It was Mrs. Grant. She wanted some money for marketing. The artist struck a heroic attitude at his easel and saw the general pull out a faded and much-worn old-fashioned pocket-book. He then unwound a yard of string and got the money out and handed it to his wife, who departed. Whether it was the long string or the veteran pocket-book that shocked the refined utterly-too-utter sensibilities of the artist will never be known, but a painful expression gathered on his mobile face as he commenced work again. The day was warm. The artist perspired. He stepped to the bell-cord and pulled it.

"What do you want?" asked the General.

"I only rang for a servant to bring me a drink of water," replied the artist.

The General never said a word, but got up and walked out. In two minutes he returned, bringing a glass of water to the thirsty artist, who was confused and did not know what to say. Grant never noticed it, but took his seat again to finish the sitting.

How Wise Rats Outwitted a Miller.

An East St. Louis miller kept corn in a bin, the sides of which sloped inwards. Nevertheless he daily saw the effects of rats. Wondering how the animals got in and out of the bin he posted himself to watch them. One of the largest rats, which had remained out of the bin, upon hearing the miller's footsteps, ran to the bin and lowered himself over the edge until he hung only by his forepaws. Then his rat friends, getting a good start by running, jumped and seized upon the hanging rat's body, raised themselves out and scampered off. When the last rat was out the old one climbed up from his suspended position and followed after—*St. Louis Globe-Democrat.*

Ladies! Ayer's Hair Vigor is a superior and economical dressing. It has become an indispensible article for the toilet.

A Singular Race.

In Sumatra there is a very singular race, called the Kubus, who are too shy to mix with the other races of the island, and dwell in the recesses of the forests. They are looked on as inferiors by the Malays, and thought to be little better than beasts. Such is their shyness that they will never willingly face a stranger. Their trade with the Malayans is consequently carried on in a strange manner. The trader announces his arrival by beating a gong, and then retires from the place of rendezvous. The Kubus approach, put their forest treasures upon the ground, beat the gong, and retreat. The trader returns and lays his commodities down in quantities sufficient, as he thinks, for the purchase of the goods on sale. Then he retires, and the Kubus reappear and consider the bargain. And so, after more withdrawals and approaches and go ng beatings, the respective parties come to an understanding, and carry off independently their bargains. The Kubus in their wild state do not bury their dead. They live on snakes, grubs, fruits, and the flesh of any deer or pigs they can slay. They are skillful spearmen, and throw stones with marvelous accuracy. They know of no state after death. In some physical respects they assimilate closely to the anthropoid apes.

During Cholera Epidemics.

The epidemics of 1830, 1845 and 1866 caused the people everywhere to adopt preventive measures which were thought to have great efficacy. Care in diet was considered most important, of course, and fruits were almost entirely discarded. Watermelons and cucumbers were looked upon as poisonous, and even ripe peaches and other harmless fruit were permitted to rot. So heavy were the losses by fruit growers and dealers in the East in 1850, that for a few years after the plague disappeared no one would raise melons and other objectional vegetables and fruits for fear that they could not be disposed of. Boiled rice, mush and milk, and bread and milk became the principal articles of diet in many families, and meats and other heavy foods were partaken of very sparingly. Camphor came into universal use as a disinfectant, and nearly everybody wore some of it on the person. Flannels were worn all summer, and plasters of various kinds were used on the chest and back.

660 Tons of Woodchucks.

To rid the State of a troublesome pest two years ago, the New Hampshire Legislature passed a law granting ten cents a tail on woodchucks, provided none were killed on Sunday. As a consequence nearly every farmer went into woodchuck raising. Since then 111,000 bounties have been paid, and 20,000 more remain to be adjusted. The Concord *Monitor* makes this curious calculation: "One hundred and sixty-five thousand clover-fed, healthy woodchucks ought to average eight pounds apiece, which would make 1,320,000 pounds, or 660 net tons, of solid woodchucks, equal to 660 cart loads, sixty six car loads of ten tons each, or two full trains of solid meat. Placed head to tail, before amputation of caudal extremity, they would make a continuous line of woodchucks forty-seven miles in length. What an opportunity for sausage manufacturers and soap houses!" The question now is, shall the law be repealed, the State treasury go into bankruptcy, or an issue of woodchuck bonds be authorized?—*Phila. Press.*

How to get a Drink in Maine.

Boston Globe.

In Maine none of the common styles of invitation prevail. It is all shrouded in mystery. You give the sign of distress to any member in good standing, pound three times on the outer gate, give two hard kicks and one soft one on the inner door, give the password, "Rutherford B. Hayes," turn to the left, through a dark passage, turn the thumbscrew of a mysterious gas fixture ninety degress to the right, holding the goblet of the encampment under gas fixture; then reverse the thumbscrew, shut your eyes, insult your digester, leave twenty-five cents near the gas fixture and hunt up the nearest cemetery, so that you will not have to be carried very far.

An Enterprising, Reliable House.

W. D. Nydegger can always be relied upon, not only to carry in stock the best of everything, but to secure the Agency for such articles as have well-known merit, and are popular with people, thereby sustaining the reputation of being always enterprising, and ever reliable. Having secured the Agency for the celebrated Dr. King's New Discovery for Consumption, will sell it on a positive guarantee. It will surely cure any and every affection of Throat, Lungs, and Chest, and to show our confidence, we invite you to call and get a Trial Bottle Free.

NEW ADVERTISEMENTS.

A Mother's Love—A Practical Illustration of Its Power.

A mother's love! What a potent thing it is! It will melt the heart of the most hardened criminal, when no other influence would be effectual. No one but a mother knows its full meaning, but every one can appreciate it if they will. It is known, though, that it means sleepless nights, care, inconvenience, and, if necessary, want, hardship and death. But the subject has been too eloquently treated by the sweetest poets and the ablest writers to furnish an essay for these columns. Too many practical illustrations occur in every day life for it to be dwelt upon, so that it is unnecessary to speak of the subject further in order to make the reader understand the full meaning of what is to follow.

Mrs. Henry Schualen, of Ashland, Ky., writes that her daughter has been cured of deafness which resulted from chronic catarrh. She tells how she had lost all hope of her daughter (her ideal) being cured, and how overjoyed she is at the result. After trying many remedies, she says PERUNA brought a cure, and that the daughter's hearing is restored. She concludes, by speaking in the most flattering terms of PERUNA, and then describes in the most lovely manner the happiness it has brought her, and reviews the distress she experienced while her daughter was afflicted.

Dr. A. R. Ong, Martins Ferry, O., writes: "I have a large trade on your PERUNA. Think it is a grand remedy."

Mr. Robert C. Hannah, Tolesborough, Lewis county, Ky., writes: "I write to inform you of the great benefit I received by the use of your medicines, PERUNA and MANALIN. I had been low spirited and very sick for about six months with a bad cough, and my friends thought I had consumption; tried a number of patent medicines, and most of the doctors in the vicinity (and we have some as good as you can find in the country), but they did me no good whatever. Our merchant, Mr. Gillespie, insisted upon me trying your remedies. I did so, but must say, I had little faith in them at first; before I had consumed my first bottle, I noticed a change for the better, and to-day I am entirely well, and as sound a man as there is in the vicinity. I credit my cure to your valuable remedies, PERUNA and MANALIN, and recommend them to all of my friends."

LAND! Claims a specialty. Warrants and ADDITIONAL HOMESTEAD CERTIFICATES and all kinds of LAND SCRIP bought and sold. SUSPENDED ENTRIES, LAND, PATENT and PENSION cases attended to. Correspondence solicited. A. A. Thomas, Attorney at Law, Room 25 St. Cloud Bld'g, Washington, D. C.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

NEW ADVERTISEMENTR.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably expels all blood poisons from the system, enriches and renews the blood, and restores its vitalizing power. It is the best known remedy for Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin, as also for all disorders caused by a thin and impoverished, or corrupted, condition of the blood, such as Rheumatism, Neuralgia, Rheumatic Gout, General Debility, and Scrofulous Catarrh.

Inflammatory Rheumatism Cured.

"AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years.
W. H. MOORE."

Durham, Ia., March 2, 1882.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, when use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

DR. JOHN BULL'S

FOR RENT.

The building formerly occupied by Mr. Thomas White will probably be for rent May 1st. There are six available rooms up stairs; a room on the first floor, that has been used for a barber shop. Would make a desirable stand for a grocery, flour and feed store, with room enough for a family above. Would also make a convenient and desirable place for Post Office, having an unobstructed entrance on Liberty street.

For further information apply at this office or to

A. A. PERRY, Agent,
205 Park Avenue, Baltimore, Md.

A LARGE AND WELL SELECTED STOCK OF CLOTHING

—FOR—

MEN, BOYS AND CHILDREN,

To be sold at ROCK BOTTOM!

Full line Garden Seeds and Onion Sets. All orders by mail promptly filled.

☞I have a fine Stallion that will be on the stand in and near Oakland.

CARPENTER AND BUILDER,

EAST END OAK STREET, OAKLAND.

Furniture repaired. Will also take orders for new furniture. Rustic work on hand and manufactured to order. Give him a call

Facts About General Grant.

Throughout the war he never received a wound.

His favorite book, as a boy, was Charles O'Malley.

His mother died over a year ago. His father has been dead several years.

One of his requests was that he should be allowed to sit up and not die in bed.

He leaves two sisters—Mrs. Cramer and Mrs. Corbin—who live in Jersey City.

His last public speech was at Ocean Grove a year ago, before the Christian Commission.

He always disliked doctors and resigned their attentions as much as possible to the last.

Several owners of 366 medals were them proudly Friday week in Philadelphia on the occasion of General Grant's death.

He leaves three sons and one daughter—Fred Buck, Jesse and Nellie, all married—and eight grandchildren.

He never drank to excess, but was fond of an occasional drink of good liquor, and brandy was his favorite beverage.

His mother was an enthusiastic Methodist, and believed in personal holiness and the nearness of the second coming.

His most intimate friend was George W. Childs, of Philadelphia, whose house he made his home whenever in Philadelphia.

Among the portraits in George W. Childs' office is one of General Grant and the Emperor of China, taken seated together and arm-in-arm.

As far back as February last he wrote to Mr. Childs that whenever he took a drink of water it felt "as if hot lead was going down his throat."

Until given over to the government all the souvenirs of his European trip were at the office of George W. Childs, to whose custody he confided them.

Like so many other great soldiers he was a fatalist and belived "what is to be will be." If he had adhered to any religious form he would have been a Presbyterian.

The husband of Nellie Grant Sartoris, his daughter, is an Englishman an only son and nephew of Fanny Kemble, the actress, who became Mrs. Pierre Butler, of Philadelphia.

When a boy if he ever went beyond a place he never retraced his footsteps, but took a roundabout tour to reach his destination some other way. He often said he attributed his success to a resolution taken in youth to "never turn back" in any undertaking.

He smoked his last cigar on the 20th of November, 1884. In a letter to a friend mentioning the circumstance he said he had smoked many thousands of cigars, and they had been his greatest comfort through the last years of the war on the battle-field.

It is an open secret that about a year ago General Grant was approached by several distinguished Democrats and the possibility of his acceptance of the Democratic nomination for President discussed. He said he had a presentiment, and always believed thot he would not die on the battle-field.

It is a curious coincidence that the fathers-in-law of General Grant's sons all suffered financial reverses like himself. Fred Grant married a daughter of Mr. Homer, of Chicago, once a millionaire. Buck Grant married a daughter of Senator Chaffee, of Colorado, who lost heavily. Jesse Grant married a daughter of Mr. Chapman, a former California Croesus.

One of the prettiest conceits in Mr. Harris's (Uncle Remus) new book is put into the mouth of an old negro driver. He had run away from his master, and could not be caught; but an old lady bought him, because he had saved the life of her son, and he surrendered himself and became a faithful servant. When his old mistress came to die her wandering mind dwelt upon the negro who had served her so faithfully. She fancied she was making a journey. "The carriage goes smoothly along here," she said. Then, after a little pause, she asked, "Is David driving?" and the weeping negro cried out from the corner of the room: "'Taint po' Dave, mistr'ss! De good Lord done tuck holt ob de lines."—*Anonymous.*

Don't fill the system with quinine, when fever and ague, and malarial fevers, can be much more effectively treated by ayer's Ague Cure. Warranted to cure.

A View of Prohibition.

Wheeling Intelligencer.

A common error with men and women who favor constitutional prohibition of the liquor traffic is dwelt on by Rev. Dr. Hatfield, writing in the *Advance*. There are those who seem to believe that, this side of prohibition in the constitution of every State, there is nothing to be accomplished for the cause of sobriety and peace of society. To this class Dr. Hatfield addresses himself, putting with great emphasis this conclusion.

"It is important that we make a wise use of the laws we have for the suppression of intemperance until we can replace them by better ones.

"Just at this point, as it seems to me, some of our friends act with singular unwisdom. In their zeal to secure the abstract and ideal, they lose sight of the practical. They will have prohibition or nothing. Local option laws, and laws forbidding the sale of liquors to minors, and on the Sabbath, do not interest them. They render little or no assistance to those who are enforcing our present laws to save the children and youth from becoming drunkards. Some of them go so far as to demand the repeal of all license laws and the removal of tax on the manufacture of whisky. If these wild schemes could be carried into operation it requires no prophetic vision to anticipate some of the results. Whisky would be so cheap that a toper could drink himself into a state of more than beastly drunkenness for two or three cents. Grog shops would be ten times as numerous as they are now. Towns and counties would lose the protection now secured them by local option. The land would be deluged by drunkenness and debauchery to an extent of which we can hardly form a conception. Decent men would be driven to combine for a system of license and regulation, and we should probably hear little more of prohibition for a generation to come. He that is wise will consider these things."

This puts so tersely the practical side of the case that to attempt to add to it is to "gild refined gold." But this much may be said, that there is not a community to which Dr. Hatfield's remarks do not apply.

Let us see how it is at home. We have a local option law in West Virginia. No county that does not want it need have license. The majority do not want it and do not have it. But there are counties in which liquor is sold without license and there is slight effort if any to enforce the law. In the city of Wheeling liquor is sold every day in the week by persons who have no license. Liquor is sold on Sunday, to minors, to habitual drunkards—all in violation of excellent laws familiar to everybody.

The men and women who are demanding constitutional prohibition are not using their time, their money or their influence to bring about the inforcement of these liquor laws. Why ignore the practical work of today and bend their energies towards an ideal of the future? Do they think it hopeless to try to enforce the laws that we have? If so, what induces them to believe that absolute prohibition will annihilate the liquor traffic? Who is to enforce prohibition? We may be sure that prohibition will not enforce itself—the lesson of all prohibitory efforts is against such a hope.

The enforcement of existing laws ought to be much easier than the passage and enforcement of new and more radical provisions, but this idea does not seem heroic enough for advanced prohibitionists, and so they go on in their own way and, as judged by results, wasting effort.

Chipping in for Religion.

An Episcopal minister who arrived in this city a few days ago from Nevada, where he has been doing missionary work for several years, tells some curious stories of people and things in that country. He spent a portion of his time in Virginia City, and had to look to the people for his support. Once a week he went among the business men for contributions. He took in the saloons and gambling shops, as well as the banks and stores. Contributions were generally on a liberal scale, as the people, though not particularly religious, thought well of the cause, and vowed, one and all, that they would not let the preacher suffer. On almost every round he received a number of "poker chips," worth from $1 to $5. These he would take to the bank, where they were readily cashed.

Among the saloon-keepers was a perfect Hercules in stature and strength. He was a man of violent temper, and savage disposition, and had killed his man. He was, therefore, generally feared. This man was practically boss of the town. He sent the preacher word that he wanted to see him at his saloon. The preacher went, and was informed that he could get from $5 to $10 a week by calling at the saloon for it, and that it would be taken as an insult if he refused. The proposition was promptly accepted, and therefore, he had no better friend or more liberal contributor than the burly saloon keeper.

On one occasion, while in the saloon to receive his weekly stipend, another minister entered and presented his claims for assistance. The saloon man refused to give him anything, saying: "What are you doing in town, anyhow? I suppose you want to start an opposition church or something, and get up a row among us Christians. I'll tell you why I won't give any money. You see this man here? He's a preacher, too. I've just given him $10. We know something about him. He has a Bishop behind him. If he don't walk the chalk, I'll just write to the Brishop and have the preacher bounced. I have enough influence to do it. You have no Bishop and can do as you please."

The informant says it was his custom while in Virginia City to hold religious services in the saloons and gambling dens. He would go in Sunday morning and say: "Well, boys, it's about time to close up. I want to hold meeting here. Have you any objections?" They never objected, and, as a general thing, conducted themselves with the utmost propriety during divine service. If one of them ventured to break over the line of decorum the others would compel him to behave himself or put him out. On funeral occasions, which were frequent, the undertaker, who always managed the job, would require the preacher to ride on the hearse, he being considered the "next in importance to the corpse."—*Pittsburg Dispatch.*

A Soldier's Tribute.

Gen. Frank Cheatham, who commanded a division in the Confederate army in the Southwest during the late war, and who was one of the hardest fighters in that army, presided at a large Grant memorial meeting held in Nashville, Tennessee, Monday evening. In calling the meeting to order Gen. Cheatham said among other things: "Grant's history has gone over the world. We have learned to reverence him and his soldiers to worship him. I was on the other side, and I will venture that there is not a Confederate soldier that will not, for the terms he gave to Gen. Lee, say that they love him. I have read history, but have never heard of such terms as he granted to Lee. 'Stack your arms and take your horses and go home. You will need them to make your crops.' And we did need them. I brought three home myself. I am here to-night to do reverence to that great soldier, who I believe and always have believed, was a great man."

Famous Hot Spells.

In 1303 and 1304, according to a French periodical, the Rhine, Loire and Seine ran dry. In 1615 the heat throughout Europe became excessive. Scotland suffered particularly in 1625. Men and beasts died in scores. The heat in several departments during the summer of 1705 was equal to that in a glass furnace. Meat could be cooked by merely exposing it to the sun. Not a soul dared venture out between noon and 4 p. m. In 1718 many shops had to close; the theaters never opened their doors for several months. Not a drop of water fell during six months. In 1773 the thermometer rose to 118 degrees. In 1779 the heat at Bologna was so great that a great number of people were stifled. There was not sufficient air for the breath, and people had to take refuge under ground. In July, 1792, the heat became intolerable. Vegetables were burned up and fruit dried upon the trees. The furniture and wood work in dwelling houses cracked and split up; meat went bad in an hour.

A Wonderful Discovery.

Consumptives and all, who suffer from any affection of the throat and lungs, can find certain cure in Dr. King's New Discovery for Consumption. Thousands of permanent cures verify the truth of this statement. No medicine can show such a record of wonderful cures. Thousands of once hopeless sufferers now gratefully proclaim they owe their lives to this New Discovery. It will cost you nothing to give it a trial. Free trial bottles at Nydegger's Drug Store. Large size, 50c. and $1.

OAKLAND, GARRETT CO., MD.

HER WAY TO SAY "NO."

My sweetheart sat knitting. "My darling," said I,
"I have had a most beautiful dream."
She feigned not to hear me and made no reply;
Said simply: "I'm turning the seam."
I reached for the knitting—a mesh of soft white,
That she held in her fingers so small;
But she said: "Don't disturb me, I'm busy to-night—
I'm knitting a sock for a doll."

"Don't tease me so, darling," I pettishly cried;
"You're just dying to hear, I'll be bound—"
But she pushed back her curls, as she softly replied:
"Just wait till I've knitted around."
I waited awhile, and then closer I drew,
And breaking of silence the seal,
I said: "Now you're ready, let me tell it to you."
She answered: "I'm setting the heel."

I smiled and I frowned, and looked up at the clock,
Regretting that soon I must go;
Then looked at my teaser—she held up the sock,
Saying: "Would you put red in the toe?"
"You shall hear me, darling, you dearest of girls;"
She placed both her hands on her brow,
And laughingly said, as she threw back the curls:
"Just wait—I am narrowing now."

"I dreamed of a cottage close down by the sea,
'Neath the brightest and bluest of skies."
She answered: "Sit further away from me, please,
My needles will get in your eyes."
"I dreamed we were there in that home on the shore,
And that love, darling, love made us rich"—
"I told you to sit further off once before;
You're the cause of my dropping a stitch."

At last it was finished, then madly I said:
"Am I, dearest, lover or friend?"
She took the small scissors and severed the thread,
Saying "Wait till I've fastened the end."
"Will you marry, me, darling?" I said in low tone—
There was nothing to do but to go;
For I learned at the last what I first might have known—
It was always her way to say "No."

—*T. O. Chisholm, in Louisville Courier-Journal.*

THE HOUSE-FLY.

A Chapter on the History of This "Adjunct of Culture."

How the Fly Moves, Lives and Obtains Its Nourishment—The Development of Its Wings—What Becomes of the Tormentors in Winter—General Points.

Some one has observed how little we really know about our intimate friends; even those living under the same roof. The same remark will in a degree apply to that ever-present household companion, the house-fly. Wherever civilization penetrates, there go the honey-bee and the house-fly, twin adjuncts of the higher culture. And yet how little is known of the life-history of the fly; where its eggs are placed, where its young live, upon what they live, how they become flies, and how long they remain with us.

If we examine one of them, it will be seen that the fly has six legs, composed of a number of segments or joints freely movable upon each other; the toe or tarsal joints are five in number. To the last joint are attached two hooked claws, and if anyone will examine the fly's foot with a microscope, he will detect between the claws a little cushion which is deeply cleft into two parts or flaps. The under sides of the flaps have very numerous peculiar hairs which are bulbous at the end, and are called "tenent-hairs." These hairs are hollow, and secrete a sticky fluid. Each tenent hair is bent near the end, beyond which bend, says Tuffen West, "is an elastic membranous expansion, capable of close contact with a highly polished surface, from which a very minute quantity of a clear, transparent fluid is emitted when the fly is actively moving."

Mr. West also adds, that when a fly is not making use of its cushions, as on a surface sufficiently rough to afford it foot-hold with its claws alone, these only are made use of.

As early as 1667 Hooke noticed the importance of the grasp gained by the claws, when drawing against the strong, forward-pointing hairs situated on the base of each tarsal joint, whenever any projections or a yielding surface are afforded by the object on which the fly is walking. Hooke also believed in the existence of a "smoky substance on glass."

This, says West, has been considered a mistake, "and yet it is certain that glass very frequently undergoes a slow decomposition on its surface in a moist atmosphere, from the excess of alkali in its composition. Such a change is speedily produced in glass exposed to the action of the weather, as in our window-panes, and conveys the appearance as if a 'smoky substance' were condensed upon it.

It has been proved by most careful observations, which may be readily verified by any one desirous of getting at the truth, that this tarnish does very materially assist a fly when in a weak state in maintaining its hold, and in freely moving upon the glass. To keep our windows clear for the admission of light, it requires to be constantly removed.

Opticians call a similar deposition of moisture the "sweating of glass."

West further describes the way in which the actual movements of the fly's foot are made. The cushions are set down on a smooth surface, perpendicular or horizontal, and the numberless tenent hairs applied to such surface; "a slight push forward of these, succeeded by a gentle draw backwards, at each application, removes the air between their soft, elastic expansions and their plane of motion, and thus a firm hold is gained. Access of air is prevented by the minute quantity of moisture which exudes from the expanded tips of the tenent appendages; and thus a vacuum is formed, on the same principle as in the 'atmospheric hat-peg,' the 'plate-holder' of the photographer, or the 'artificial gums' of the dentist. When the fly wishes to move a leg from its place of attachment, the claws are brought down and pressed against the surface; from their position they raise the hinder part of the pulvillus (cushion), where the tenent hairs are least developed, first, and so on forwards. If the claws were attached to the fifth joint, as it has been supposed, they could not act equally well in the way I have mentioned; and I think a fly when once stuck fast, if it had no claws, might remain so."

It should be noticed, as any one may do, that the fly, like all insects, moves the legs of each pair alternately in walking. After all, the pressure of the atmosphere is the main agent by which a fly is able to adhere to perfectly smooth surfaces.

Flies are distinguished from most other insects by having but a single pair of wings; what corresponds to the second or hinder pair in other insects being a pair of knob-like "balancers." The flight of the house fly is most rapid in warm, sultry weather. We all know how busy and pertinacious their movements are in dog-day weather.

It has been found that a common fly when held captive moves its wings three hundred and thirty times a minute, whereas a honey-bee, whose powers of continued flight are much greater, moves its wings one hundred and ninety times in the same period. The wings describe a figure 8 in the air.

The buzz of the fly has been carefully studied by Landois. During flight the fly's buzz or hum is in a relatively low tone; when it is held so that the wings can not move the buzz is higher in pitch, and it is higher still when the fly is held so that all motion of the external parts is prevented. The last mentioned is the true voice of the insect; it is produced by the breathing holes of the thorax. The buzz of the fly thus expresses the emotions of the creature; the low hum being one of contentment, the shrill, excited buzz one of alarm and disturbance.

When a fly alights upon our hand or face on a hot day it is for the purpose of lapping the perspiration from the skin. How this is done is a curious study. When the fly, to quote from our "Guide to the Study of Insects," settles upon a lump of sugar, or other sweet object, it unbends and extends its tongue, and the broad knob-like end divides into two flat, muscular leaves, which thus present a sucker-like surface, with which the fly laps up liquid sweets. These two leaves are supported upon a framework of chitinous rods, which act as a set of springs to open and shut the muscular leaves. The inside of this broad fleshy expansion is rough like a rasp, and, as Newport states, is easily employed by the insect in scraping or tearing delicate surfaces. It is by means of this curious structure that the busy house-fly occasions much mischief to the covers of our books, by scraping off the albuminous polish, and leaving traces of its depredations in the soiled and spotted appearance which it occasions on them.

The structure of the fly's tongue, and of the whole apparatus for taking its food, has engaged the attention in late years of some of our best anatomists of insects. Its structure is so complicated and difficult to understand, and labored anatomical descriptions are so dry, that we will not here describe it, but content ourselves with referring the reader for an excellent description of the fly's proboscis to Professor Macloskie's article in the *American Naturalist* for March, 1880. Suffice it to say that the fly has not, as have beetles and grasshoppers, free jaws and accessory jaws for biting and tearing the food, but all the mouth-parts of other insects are represented by the fly's proboscis, the larger part of which is formed by the under lip; the enlarged and variously modified fleshy extremity of which forms a sucking organ. What little food is taken by the fly is fluid; sweet fluids are its favorite diet.

But whence come the swarm of midsummer flies, and how do they keep increasing through August? What becomes of them in the winter? How long do they live, and what of the manner of life of their young? Are the small flies the children of the larger ones?

So little was known about the early history of the house-fly that we once endeavored, and with fair success, to study its transformations. During August the house-fly is particularly abundant, and especially so in and about stables. On placing a fly in a bottle she laid between six p. m., August 12, and eight o'clock the next morning, one hundred and twenty eggs. They were deposited irregularly in stacks, lying loose in two piles at the bottom of the bottle. The next day several maggots, as the larvæ are called, were observed crawling about in the bottom of the bottle. Afterwards by placing a mass of offal in the sun, the flies came and laid their little white slender eggs, which hatched out, so that thousands of writhing maggots abounded in the mass.

It was found that the young maggots hatched in twenty-four hours after the eggs were laid. At first they are but little larger than the eggs. After remaining in the first stage for one day the maggot moults, being a little larger than before. After another day it sheds its skin a second time and enters upon the third stage of its larval life, which lasts three or four days. It breathes by means of two spiracles or air-holes at the end of the body, which communicate with the air-tubes in the body. There is also a spiracle near the head. When about to transform into the pupa or chrysalis state, the body contracts into a barrel-shaped case, and turns brown and hard. This case is called the puparium, and within it the maggot becomes a pupa or chrysalis.

The house-fly, having as a maggot lived a squalid existence, after a pupal sleep of from five to seven days, pushes off one end of its pupal case, and on emerging from the case, immediately runs about, though its wings are still small, soft and baggy, much as in the pupa. Soon, however, the skin becomes dry and hard; the fluid in the wings dries, and in a few moments the fly takes flight.

If in its winged state the fly is one of the most disagreeable features of dog-days, and people wonder why flies were ever made at all, it should be remembered that flies have an infancy as maggots, and the loathsome life they then lead as scavengers cleanses and purifies the August air, and aids in lowering the death rate of our cities and towns.

While most house-flies die on approach of winter, multitudes being attacked by a white fungus, their swollen dead bodies remaining on the wall or windows in October, a few live through the winter. While writing this article on the first warm day in spring, a few flies have for the first time made their appearance in our study. These will lay their eggs about stables in the late spring, and thus give rise to a swarm of maggots and August flies.—*A. S. Packard, Jr., in Youth's Companion.*

FRAUDS IN CIGARS.

Fraudulent Manufacturers Who Imitate Popular and Expensive Brands.

"Now, there's a cigar," said a tobacco merchant whose firm handled more than a million dollars' worth of cigars a year, "that has made a great reputation within the past year, and which is eagerly smoked by all good judges of cigars, and yet there is so much cheating done in this particular brand that fully two-thirds of the smokers are swindled. I am not surprised, either, that they do not find it out, as the cheating is very adroitly done. The price of the cigar to dealers is twenty-two and a half cents, and yet you can buy the cigar, or what they pretend is the cigar, all over town for twenty-five cents. We will not retail them for less than twenty-eight cents, because that gives a little enough profit."

"Are all that are sold for twenty-five cents bogus?"

"They are not the true imported brand, as a rule. Of course there are occasional big hotels and restaurants that are content to handle them at a margin of two and a half cents. The fraud is effected in this way: Clerks or boys in the hotels or restaurants where the genuine brand is sold keep the boxes when they become empty and supply them at a fair cost—say fifty cents apiece—to the small dealers. A domestic cigar is manufactured of the exact shape and color of the imported brand, and the box is filled with these domestic cigars. The box is genuine, and the cigars very much like the real thing. The dealer, by this little game, clears about thirteen cents on a cigar—a pretty tidy profit, and well worth the ruse even if it is a State Prison offense."

"How can one detect the spurious one?"

"Only an expert can tell the difference in the make of the cigar at a glance, but if you look carefully at the date on the box it might give you a clew. For instance, I saw some cigars that were not over a week old the other day that were in a box labeled October 12. The manufacturers on the other side are endeavoring to throw difficulties in the way of these fraudulent dealers by putting a peculiar glaze on their boxes. But the cigar thieves soon get a hold of the boxes, so what are they going to do about it?"—*N. Y. Sun.*

THE THREE GREAT LANGUAGES.

Comparative Importance of the English Over the French and German Tongues.

The language in which Shakespeare and Milton wrote was the language of but five or six millions of people in their day, and as late as one hundred years ago English was spoken by not more than fifteen or sixteen million people, says the Paris *American Register.* At the same period French was the mother tongue of at least thirty million people, and German, in one or other of its forms, was the language of from thirty to forty million people. This state of affairs is now completely reversed. Between forty and fifty years ago the English language equaled the German in the number of those who spoke it, and now the latter is left far behind in the race. German is spoken by 10,000,000 persons in the Austria-Hungarian empire 46,000,000 in the German empire, 40,000 in Belgium, 2,000,000 in Switzerland, and the native tongue of some 2,000,000 in the United States and Canada. This gives a total of about sixty million persons who may speak German.

With French the case is much the same, but the gain during the past century has been smaller than that of German. French is now spoken by the 38,000,000 people of France, by 2,250,000 in Belgium, 200,000 in Alsace-Lorraine, 600,000 in Switzerland, 1,500,000 in Canada and the United States, 600,000 in Hayti, and by 1,500,000 in Algiers, India, the West Indies, and Africa; in all about forty-five million.

English is now spoken by all but some 500,000 of the 37,000,000 persons in the British Islands, by 53,000,000 out of the 56,000,000 inhabitants of the United States, by 4,000,000 persons in Canada, 3,000,000 in Australasia, 1,700,000 persons in the West Indies, and perhaps by 1,000,000 in India and the other British colonies. This brings up the total to 100,000,000, which can not be very far from the truth.—*Chicago News.*

A Disinterested Party.

"Hello, there!" called out a bartender in a West Brighton beer pavilion while the thirsty souls from an incoming boat surged in front of him. "Hello, there! you didn't pay."

But the two men he addressed did not seem to hear him, and they lounged outside.

"Say, Fritz," called out the bartender to a waiter. "Say, Fritz, hail them fellers for the price. They've gone out without settling."

The tall German laid down his tray, wiped his mouth with his apron and started ferociously after the receding couple. Soon he came back with a festoon of dark blue under the battlements of his left eye. There was a rent in his duster and a lump under his jaw the size of a codfish ball.

"Did you collect?" called out the bartender.

"Naw," said the waiter.

"Wouldn't they give up?"

"Naw."

"What did you do?"

"Tole dem to seddle up or I'd wollop dem."

"That was right. What did they say to that?"

"Nodings. Von pucked me by der chaw, der odder fetched me on der eye. Dey nogged me oud right avay, I bed you."

"The deuce they did. Did you smash 'em back?"

"Smash 'em back? Naw; vat for should I take up your kivarrels?"

THE WHITE MAN'S FETISH.

An Interesting Experience in the Career of Mr. H. M. Stanley.

Mr. Stanley tells a characteristic story of the way in which he gained the respect and fear of an important tribe who positively refused his expedition a passage. As the chief, after angry refusals, was about to leave, the following prearranged comedy was played for his benefit:

"While standing near the tent door, for a moment irresolute, he caught sight of the large Chinese gong suspended to a cross-bar supported by two forked poles.

"'What is this?' he asked, pointing to the gong.

"'It is fetish,' I answered, sententiously.

"His young son, Enjeli, who was much more acute than his father, whispered to him his belief that it was a kind of bell, upon which Ngalyema cried out:

"'Bula Matari, strike this; let me hear it.'

"'O, Ngalyema, I dare not; it is the war fetish!'

"'No, no,' said he, impatiently. 'Beat it, Bula Matari, that I may hear the sound.'

"'I dare not, Ngalyema. It is the signal for war; it is the fetish that calls up armed men; it would be too bad.'

"'No, no, no! I tell you to strike. Strike it, Bula Matari;' and he stamped on the ground with childish impatience.

"'Well, then'—taking the beater in my hand—'remember, I told you it was a bad fetish—a fetish for war;' and as I lifted the beater high with uplifted hand, I asked again: 'Shall I strike now?'

"'Strike—strike it, I tell you!'

"With all my force I struck the gong; the loud bell-like tone sounding in the silence caused by the hushed, concentrated attention of all upon the scene, was startling in the extreme, but as the rapid strokes were applied vigorously, the continued sounds seem to them like thunder. They had not recovered from the first shock of astonishment when the forms of men were seen bounding over the gunwale of the 'En Avant' right over their heads, and war-whooping in their ears. From my tent, and from the gorge behind them, a stream of frantic infuriates emerged as though from the earth. The store-tent was violently agitated, and finally collapsed, and a yelling crowd of demoniac madmen sprang out one after another, every one apparently madder than his neighbor. The listless, sleepy-eyed stragglers burst out into a perfect frenzy of action. From under the mats in the huts there streamed into view such a frantic mob of armed men, that to the panic-struck natives the sky and the earth seemed to be contributing to the continually increasing number of death-dealing warriors. Every native present, would-be friend and would-be foe, lost his senses completely. The seated warriors forgot their guns and fled before this strange deluge and awful scene. The ammunition bearers threw their gourds away—some were broken, and the powder and slugs were scattered over the ground; and as Ngalyema was standing paralyzed with fear, and with his faculties benumbed, I seized him by the arm, and said softly to him:

"'Be not afraid, Ngalyema. Remember Bula Matari is your brother. Stand behind me; I will protect you.'

"The Zanzibaris were now a yelling crowd in front of me, calling out tauntingly and menacingly:

"'Ha, ha, Ngalyema! You came to fight Bula Matari, Ngalyema! Where are your warriors, Ngalyema?'

"There could not be a better representation of relentless, bloodthirsty fury than that which was shown by these amateur black actors in the suddenly improvised scene. Their assumed frenzy was the next thing to reality. Had I not been in the secret I also should have been duped; while the valor with which I defended my poor brother, who with his two hands grasped me round the waist, danced from side to side to avoid furious strokes from the wild-eyed men, while young Enjeli clung behind his father and followed his movements, reminded me of the long-forgotten play of 'hen and chickens.'

"'Save me, Bula Matari; do not let them hurt me! I did not mean anything,' cried Ngalyema.

"'Hold hard, Ngalyema!' I cried. 'Keep fast hold of me; I will defend you, never fear. Come one, come all! Ha, ha!' etc.

"But the camp was almost emptied of our visitors, much of the ammunition was left behind, the guns were strewn over the ground, and the play was well acted.

"'Enough, boys; fall into line;' and 'Silence' was cried out by Susi and his brother captains; and the obedient, well-trained fellows fell into line at 'Shoulder arms' with all the precision of military veterans. Then, as Ngalyema had allowed his hands to fall down by his side in mute surprise at this other transformation scene, I took hold of his two hands, and said, with an assuring smile:

"'Well, Ngalyema, what do you now think of the white man's fetish?'

"'Ah, I was not afraid, was I? See, all my people are run away! Ay me, such braves! Only Enjeli and Ganchu left with me! But tell me, Bula Matari, where did all these people come from?'

"'Ah, that is the bad fetish I told you of! Do you want to see any more? Come, I will strike the gong again, and the next scene may perhaps be more wonderful still.'

"'What!' he shrieked, while he laid his hand upon my arm. 'No, no; don't touch it. Ay, verily, that must be a bad fetish,' shaking his head at the round, innocent face of the gong."—*From Mr. Stanley's New Book.*

—It makes one feel folish enough to have a horse snap at him on the public throughfare. Of course he isn't afraid, but he jumps, nevertheless, with a scared look overspreading his features; then he looks silly, and laughs an insipid little little laugh, as he reflects that everybody is looking at him; and it doesn't help the matter when somebody observes, as somebody inevitably does, that the horse was deceived by his greenness, and took him for grass. The only reason why he doesn't commit a capital crime then and there is because he doesn't know whether to kill the horse, or the man who made the verdant suggestion.—*Boston Transcript.*

ENDED IN SILENCE.

The Customer Was Wearied by the Smooth-Bored, Bevel-Edged, Cheerful Liar.

The barbers were all busy during the hottest of the hot days last week in an up-town barber shop when a visitor entered. His cheek bones were high, his mustache was of the color of wet straw, and his hair was plastered down on his forehead in a style that stamped him from afar. He was on dress parade and filled with pride. From his highly polished boots to his brilliant new tie he was resplendent and new. He swaggered into the shop with the air of a conqueror, and the foreman rested the lather brush in his victim's ear while he leaned over confidentially and whispered:

"That's Charley; you've heard me speak of him, hain't you?"

"Well," said the large man in the chair, "if there is anything under heaven or on earth that you haven't spoken of——"

"Yes," said the foreman, hurriedly, "but this here boy is the dandy masher of the universe and is known all over New York. Why——"

"You needn't shave off my mustache."

"Ah, there, Charley," catching the visitor's eye and smiling with a pleased expression, "how are all the dear girls?"

"Well, they're as expensive as usual," answered the visitor, with an affectation of carelessness. "Gimme a light for my see-gar, please."

Four of the barbers left their chairs at once to get a match, and four of the customers sat upright in their chairs and looked around with lathered and expressive faces at the very popular German with the blue necktie. The expression of the face of the large man, whose ear had been lathered, was not kindly.

"Charley," said the boss, "what's become of that millionaire's daughter in Brooklyn that was running after you?"

"What, C. B. the millionaire's daughter on Clinton avenue?"

"No," said the boss, with a very confidential wink, "I was referring to M. N. F., the sugar refiner's daughter."

"O, I chucked that over long ago," said Charley, strutting up and down with a face that was adorned by a look of ineffable complacency and an unusually aggressive barber cigar, while the large man rose up perilously under the razor, and stared hard at him.

"How's the little actress, Charley?" ventured the foreman insinuatingly.

"Which, the one at the Bijou?" asked Charley, turning away from the mirror, where he had been gazing with undisguised delight at his putty-like mug.

"O, no, I mean the one at the Casino."

"O, I got a letter from her last night; she's a sticker from way back."

Once more the large man sat up, and when he lay down again his voice rose plaintively:

"Charley, you make me very weary!"

The barbers looked around in surprise, and the visitor ceased curling his mustache and turned around.

"In fact, Charley," continued the man, "you are about the worst specimen of a smooth-bored, bevel-edged and cheerful liar that I ever heard."

Then the large man lay back in his chair, and the shave was finished in absolute silence.—*N. Y. Sun.*

GIBRALTAR'S STRENGTH.

The Siege and Capture of the Famous Military Fortification.

French and Spanish troops, 40,000 in number, for four long years, from June, 1779, till February, 1783, beleaguered the fortress of Gibraltar, then held by General Eliot, with a garrison of 7,000 men. The enemy erected batteries right across the sandy isthmus, while in the bay they held forty-seven ships of the line and ten "battering ships," besides countless lesser craft. One night the rock narrowly escaped being taken by surprise. A goatherd having undertaken to guide the Spaniards by a path unknown to the English, 500 troops followed him one dark night and crept silently to a hollow called the Silletta, or little chair, and thence to the signal station, where they slew the guard. There they awaited reinforcements from below; these, however, were delayed, and the garrison meanwhile were aroused, and sallying forth drove back the invaders. The Silletta was immediately filled up and the path utterly destroyed and made inaccessible, and the siege wore on through weary months. At last a furious general attack was met by an incessant fire of red-hot balls on the enemy's fleet (five thousand were thrown in one day), till at length the battering-ships took fire, as, owing to the thickness of their timbers, the red-hot balls sank deep into the wood and could not be dislodged. The scene that ensued in the darkness of that terrible night must have been awful indeed; and so fearful were the groans and shrieks of the wounded and dying that brave Englishmen forbore to let their foes perish in the flames, and ventured to their rescue, the marine brigade being foremost in this work of mercy, which added fresh laurels to their victory. It was said that in this engagement the Spaniards lost three thousand men, while the garrison had only sixteen killed, and the damage done to the fortress was repaired in a few hours. A few days later a formidable English fleet came to the relief of the town, the siege was raised, and Britain once more left in undisputed possession of the stronghold, which in the days of Queen Anne, she had acquired as a sort of luckpenny, while fighting on behalf of the Archduke Charles, in whose name it had been seized by Sir George Rooke, July 24, 1704, who surprised it when garrisoned by only eighty men. Of course, our holding Gibraltar is an arrangement about as pleasant for Spain as it would be to England to see a French garrison in full possession of Dover castle and fortifying impregnable galleries in Shakespeare's cliff, beneath the protection of which all manner of smuggler might find safety, whereas any rash revenue cutter venturing within range would be forthwith fired at and probably sunk. No wonder that Spain would fain reclaim this heaven-built bulwark of her shores.—*Belgravia.*

THE HISTORICAL MILL.

In Which Most Everything Is Ground and the Gospel Is Preached.

On the old County road leading from Taunton to New Bedford, about three miles from Taunton green, at the head of a large pond, stands a building whose history is so peculiar and whose uses are so many that it can properly be classed among the wonders of the old colony. It was erected about fifty years ago by Josiah King for a fork works. A few years afterwards it was sold to William Pierce, who now owns it. In appearance it is no more peculiar than the ordinary run of country saw-mills. Its age rests lightly upon it, and, barring accidents, it is likely to remain a landmark for at least fifty years to come. Its history, told by one who lives near it, is as follows:

"On the lower floor of the building are three rooms. In one is a grist-mill, in another machinery for sawing and splitting wood and cider-making, and the third is used for a church and for holding various kinds of entertainments. Grain is brought here from miles around and ground into meal for 'fodder' and cake-making. On any day during the late fall you will see half a dozen old farmers gathered about discussing things in general, and waiting for their little grist to be ground. Meal made from corn of their own raising is thought far superior to any that can be bought at the store.

"I asked an old man one day why he did not use bolted meal. 'I've used meal of my own and father's raisin' for over sixty year' an' it's good enough f' me. I don't b'live in s' many new-fangled notions just gut ip t' git money out uv us poor farmers.' Of course he must have his clumsy joke on the end: 'I c'n bolt my own meal fast enuf when 'ts made into cakes.'

"In the early fall the old mill is kept running night and day making cider. Hundreds of cart-loads of apples are ground up and the juice squeezed out. An upright barrel with one head out stands always full of the fermented juice and a cup near by invites every one to help himself. One day a small boy wandered in. He could not reach over the top of the barrel to the cider, so he made an inclined plane of a board and crawled up on it. He reached down to dip a cupful of the coveted liquid. The board tipped up and the young man went in head first. Luckily some one heard the splash and rushed into the room just in time to save the youth from a cidery grave. This boy has now grown up to be an active temperance worker. Cider-drinking parties are often held here and the person who drinks the most is voted the champion. I once saw a young man drink ten glasses in rapid succession. When this part of the mill is not in use for cider-making wood is sawed and split here, and the same old farmers who bring their own corn to have it ground to save money will bring a load of wood and have it reduced to the proper size for stove-burning. Years ago this part of the mill was used for sawing box-boards and shingles, and more recently as a furniture factory.

"In all the years the old mill has been running there has been but one accident. One day the mill was sawing shingles, when a young man with a scarf about his neck came in. He got too near the shafting, and it caught him by the scarf and began to throw him around and around. Before the mill could be stopped his boots and stockings were torn from his feet in shreds, and four of his ribs and an arm were broken.

"The room used as a church is such as the old Puritans worshiped in. Except in midsummer and midwinter meetings are held here regularly Sunday evenings and on week day evenings fairs, festivals and 'sewing circles' often make merry in this room. Not infrequently in winter a dance draws the young people to the old mill.

"I distinctly remember one evening prayer and praise meeting that I attended here. The minister was an old man and very near-sighted. In the course of the evening he began to cough, and not being able to control it he asked for some one to fetch him a glass of water. It was early in the fall, in cider-making time, and in the second room beyond stood the full barrel and a glass near it. A young scapegrace quickly responded to the request of the minister, but instead of bringing water he filled the glass with cider, and with a sober face took it up to the preacher. The audience discovered the trick and reached for handkerchiefs. The unsuspecting old gentleman raised the glass to his lips, and, without stopping to taste or smell, swallowed the whole of it. Such a look of horror as came over his face when he realized the trick I will not attempt to describe. The audience smiled and tittered, but the minister immediately regained his composure and said not a word.

"One of the most pathetic scenes I ever witnessed was the funeral of a little child in the church-room of the old mill. The parents were poor, hard-working people, and the dead baby was the only one God had given them. It was a beautiful little girl, as fair as though its parents had been of royal blood instead of being too poor to provide a coffin for the little thing. Kind neighbors had bought a little white casket and made a little white robe of some cheap cloth and trimmed it with blue ribbons. They put flowers about the room in the old mill in rude vases and cups, and gathered reverently about the mourning parents, while the minister said a few kind words and prayed to God that the father and mother be given strength to bear their grief."

Surely, like the mills of the gods, this mill grinds all.—*Taunton (Mass.) Cor. Boston Globe.*

—The Los Angeles *Herald* describes a specimen of the vampire family recently caught there: "This huge specimen measured twenty inches from tip to tip of his wings, and was pretty well armed with teeth and claws. His head was as large as the heads of four or five ordinary bat heads combined, and well hooded with two ears fully as large as a half-dollar. His majesty was as vicious and warlike as a scorpion or tarantula when confined, and his bite would probably be as dangerous.

FOR OUR YOUNG FOLKS.

JOHNNY RUNS AWAY.

The sky was clear, the stars were bright,
The grass was wet with dew,
When Johnny rose, put on his clothes,
And vowed what he would do.

"I'll leave my pa, I'll leave my ma;
I'll go from here to stay;
My parents both have been unkind,
And so I'll run away.

"I'll take my clothes, I'll take my all,
A slave I will not be;
I'll go out West, and do my best—
I'll strike for liberty!"

And Johnny started bravely out,
And said he'd ne'er return;
He said he'd go where he could live
And let his genius burn.

He traveled all that summer night,
And bravely through the day;
And then he said: "I wish that I
Had never run away.

"I'm tired and weak—I'm sick," said he,
With sadness in his tone;
"It isn't best to go out West—
At least to go *alone*.

"And now I'm in a pretty fix,
And don't know what to do;"
And then he sighed and sobbed and cried:
"Boo-hoo, boo-hoo, boo-hoo!"

The boy, when found, was taken home,
And was content to stay;
Said he: "I'm cured, and rest assured,
No more I'll run away!"

—*H. Elliott McBride, in Golden Days.*

TOMMY HARMON'S LASSO.

How the Joke of the Farm Was Held in Making an Important Capture.

For a long time Tommy Harmon's lasso was the joke of the farm. He had read somewhere of the wonderful doings of Western cowboys with the lasso, and from a description given in that account he had made himself a very fair specimen.

The fact that there was no earthly use for such a thing as a lasso on the New York farm where he lived made no difference in Tommy's enthusiasm, and with great impartiality he went about lassoing—or lassoing at—everything. Gate post, dog, cat or calf was welcome alike to Tommy, and he minded neither failure nor laughter.

By and by the day of Tommy's triumph came. It came quite unexpectedly, and without any help from him, except in the way of what Matt, the hired man, called a silly suggestion.

It happened in this way: A fox had been stealing Mrs. Harmon's chickens, until that good lady lost patience and insisted that a trap should be set for the thief.

Tommy, accordingly, baited a steel-trap with a nice young chicken, and set it between the barn and the wood lot, where Master Fox was supposed to hide during the day. Then Tommy went away, intending to visit the trap the next morning.

About an hour later, however, he saw a half-dozen crows angrily fluttering over the spot where he had set the trap, and it occurred to him at once that the fox had already been caught, and was being attacked by the crows.

He caught up a stick and ran hastily toward the trap, more sorry at each step that he did not have his lasso with him. As he drew near the spot he could hear the angry caw, caw of the crows, and could see them furiously swoop and rise again, all of which made him think that the fox was fighting hard for his life.

But just imagine his surprise, when he had gotten through the corn-field and could see the trap, at discovering that instead of a fox an eagle was caught. He could now understand what the crows were so angry about. Crows hate hawks and eagles, and take every opportunity to injure them. They seemed to know that this eagle could not defend himself very well, and they went at him on every side, making the feathers fly at every attack.

The eagle could easily have carried away the steel-trap if it had not been fastened by a chain to a stake. As it was, the captured bird struggled madly at the end of the chain in his efforts to beat off the crows.

Tommy at once became greatly excited, and with visions of stuffed eagles floating through his mind, ran at the great bird, intending to kill it with a blow of his stick, and then carry it home.

This would have been an excellent plan if the eagle had only stood still and stretched out its neck for Tommy to hit. But it did not, and before Tommy knew it he was on the ground, with torn clothes and bleeding face. It was very well for him that he had not fallen within reach of the angry eagle, or Tommy might not have lived to laugh over the triumph of his lasso.

Fortunately the eagle could not reach him, and Tommy was able to scramble to his feet and run toward the house a great deal more quickly than he had run to the trap.

Near the wagon-house he met Matt, and breathlessly explained matters to him. Tommy's appearance showed that he was not telling a big story, and Matt, only stopping to ask where the trap was, started off at a run.

Tommy darted into the wagon-house, snatched his beloved lasso from its peg, and followed after Matt as quickly as his tired legs could take him. Exactly what he intended to do with the lasso he did not know. He took it because it was a sort of second nature to do so.

When he reached the field he found that Matt was as badly off as he had been. The eagle had contrived to pull up the stake, and was struggling with claws and beak to tear out Matt's eyes, while Matt was trying hard to get away, beating at the bird with his hands to keep it from his face. In Tommy's excited mind there was but one thing to do.

"Lasso it, Matt! lasso it!" he cried, thrusting his lasso into Matt's hands.

Anything to beat the savage bird with. Matt whirled the lasso in his hands, and struck blindly at the eagle, which fell back for a moment.

"Lasso it! lasso it!" shrieked Tommy, dancing up and down.

The rope was coiled in readiness to throw, and without intending it, Matt cast it at the eagle. By great good luck the noose fell over one of the bird's outstretched wings, and Tommy fairly yelled with delight as he sprang forward and drew the lasso tight.

They still had some trouble in subduing the mighty bird, but they did succeed finally in capturing it alive. They sold it for fifteen dollars; and now, when anybody seems inclined to laugh at Tommy's lasso, he shows them Matt's new hat and his new suit of clothes, and explains how they got the money to buy them with.—*John R. Coryell, in Harper's Young People.*

A SHAGGY "NEWSBOY."

True Story of a Faithful and Watchful Paper Carrier.

The railroad ran along one side of a beautiful valley in the central part of the great State of New York.

I stood at the rear end of the train, looking out of the door, when the engineer gave two short, sharp blasts of the steam whistle. The conductor, who had been reading a newspaper in a seat near me, arose, and, touching my shoulder, asked if I wanted to see a "real country newsboy." I, of course, answered "Yes." So we stepped out on the platform of the car.

The conductor had folded up his paper in a tight roll, which he held in his right hand, while he stood on the lower step of the car, holding on by his left.

I saw him begin to wave the paper just as we swung around a curve in the track, and a neat farm-house came into view away off across some open fields.

Suddenly the conductor flung the paper off toward the fence by the side of the railroad, and I saw a black, shaggy form leap quite over the fence from the meadow beyond it, and alight just where the newspaper, after bouncing along in the grass, had fallen beside a tall mullein stalk in an angle of the fence.

It was a big, black dog. He stood beside the paper, wagging his tail and watching us, as the train moved swiftly away from him. Then he snatched the paper from the ground in his teeth, and, leaping over the fence again, away he went across the fields toward the farm-house.

When we last saw him, he was a mere black speck, moving over the meadows, and then the cars rushed through a deep cleft in the hillside, and the whole scene passed from our view.

"What will he do with the paper?" I asked of the tall young conductor at my side.

"Carry it to the folks at the house," he answered.

"Is that your home?" I inquired.

"Yes," he responded; "my father lives there, and I send him an afternoon paper by Carlo every day in the way you have seen."

"Then they always send the dog when it is time for your train to pass?"

"No," said he, "they never send him. He comes when it is time for the train, and comes over here to meet it of his own accord, rain or shine, summer or winter."

"But does Carlo not go to the wrong train sometimes?" I asked, with considerable curiosity.

"Never, sir! He pays no attention to any train but this."

"How can a dog tell what time it is, so as to know when to meet the train?" I asked again.

"That is more than I can tell," answered the conductor; "but he is always there, and the engineer whistles to call my attention, for fear I should not get out on the platform till we had passed Carlo."

"So Carlo keeps watch of the time better than the conductor himself," I remarked, "for the dog does not need to be reminded."

The conductor laughed, and I wondered, as he walked away, who of my young friends, of whom I have a great many, would be as faithful and watchful all the year round as Carlo, who never missed the train, although he could not "tell time by the clock."—*Allen S. Bigelow, in Golden Days.*

THE SNARL FAMILY.

Where It Takes Up Its Abode, and the Difficulty of Turning Its Members Out.

Daisy is a little girl three years old. She has blue eyes that open wide with wonder when she is surprised and twinkle with fun and mischief a great deal of the time—a pretty little rosy mouth and an abundance of long golden hair.

Now this hair has long been a great trial to Daisy, for it has to be combed and brushed every day, and when she plays "housekeeping" under the table with maple sugar for "tea," or creeps under the lounge to play "bear," the hair gets badly tangled, and fairly ties itself up in knots, so that when it is combed there are a great many little shrieks and jumps from Daisy.

But one day when Auntie was brushing Daisy's hair she discovered what made all the trouble. And what do you suppose it was? Why, a family by the name of Snarl had moved into Daisy's hair, and they didn't like to be turned out. There was Father and Mother Snarl, and Johnny and Susan; besides a lot of little Snarls. And as Auntie chased each one to its hiding place she lectured them and remonstrated with them on their naughtiness in troubling Daisy so.

"There, Johnny Snarl, I see you hiding behind Daisy's ear. Aren't you ashamed to plague a little girl so? Now don't think you can escape; you will have to come out."

"Ah! that was Susan that pulled so. She is a stubborn girl, is Susan Snarl, and determined not to come out."

"And here is Mother Snarl, and ever so many of the little ones with her. Such a provoking family! Even baby Snarl pulls as hard as he can."

And Daisy gets so interested in the doings of the Snarl family that she forgets all about the hurt and laughs aloud at the discomfiture of Johnny or the hard chase Auntie has after Susan. Sometimes the Snarls have company. A great many aunts and uncles and cousins have come to visit them. This generally happens after Daisy has had a molasses candy frolic, or some unusual romp. But then the fun is greater than ever with so many to turn out of doors. And one day Daisy said:

"Mamma, does the Snarl family ever go into other little girl's hair?" And mamma said she didn't know, but perhaps there may be some little girls with long curls whose mamma may find that just such a mysterious family has been making them trouble as bothered little Daisy so long before Aunty found the hiding place of the Snarl family.—*Cincinnati Enquirer.*

—King Humbert was seventeen years old before a kingdom of Italy existed.

MISCELLANEOUS.

—A dog supposed to be rabid gnawed a plum tree in Georgia recently, and the owner, being somewhat timid about eating or selling the fruit, had it shaken to the ground.

—Seven hundred thousand quilts are sent from a Connecticut quilt manufactory each year to warm the Southern and Western States, Mexico, Canada, the West Indies, and even the different cities of the South American States.—*Hartford Post.*

—It has been decided in Ohio that the husband is the legal owner of his wife's clothes. So absolutely is the power invested in the husband that one man, who wished to deed his wife's clothes to her, could not legally make the transfer.—*Cleveland Leader.*

—In the largest library in the world, in Paris, there is a Chinese chart of the heavens made about 600 years before Christ. In this chart 1,460 stars are found to be correctly inserted, as corroborated by the scientists of the present day.

—Recently a Government transport, with a full crew, many wounded soldiers and valuable horses, was kept waiting in Suez Harbor three full days for a mule which somebody or other had presented to Queen Victoria, and without which the ship had orders not to sail.

—Two new type-writers have recently been brought out in England. Each is about eight inches square, and weighs not to exceed six pounds. They can be carried in a sachel, and are afforded at so low a price as to be within the reach of almost any person.—*Chicago Times.*

—Boys, as a rule, are a nuisance, but there is always something about our own that makes them a little superior to others. They are of a finer quality of material, and the noise that they make is not the harsh, and nerve-destroying kind that other boys make.—*Burdette.*

—Mr. Sanford Pullen, of Oakland, Me., eighty-eight years of age, has resided on the farm in that town which is now his home for eighty-four years, yet he has lived in two States, three counties and three towns. That is, the names of the State, county and town of his home have been changed that number of times.—*Boston Globe.*

—The only countries upon the globe to which cholera has not been carried are the islands of the South Pacific, Australia, the Cape of Good Hope, the islands of the North Atlantic, and the western coast of South America. Those countries are all separated from India by a wide expanse of ocean, and have no commercial intercourse with that country.—*N. Y. Herald.*

—The following admonitory notice was recently published by a French editor in his paper: "The wine merchant who last week sold me a bottle of lemonade flavored with vitriol for a bottle of champagne is requested to send me within twenty-four hours a bottle of genuine champagne, failing which his name and address will be made public." The result was that he forthwith received almost unlimited contributions of first-class wine.

—Some persons are apt to look upon Mexico as a half-civilized nation. Journalism in that section varies from the sensational work put into some American papers. A murder is briefly announced, with only the leading facts and names, and with no artistic elaboration of details. The taste of the Mexican reader does not incline toward crimes. Still less does he delight in the miseries of unfortunate families. The family circle is the last place the reporter invades. The rattle of the family skeleton is rarely heard, and when it is, truth is rarely lost sight of in an unseemly scramble to be the first to exhibit it.—*Philadelphia Press.*

—"How many people," inquired a Buffalo philosopher, "begin reading their daily newspaper at the beginning?" The question excited considerable discussion. The result of a comparison of ideas and experiences on the subject was that quite as many people opened their dailies and began at the middle of the last page as there were readers who started at the beginning of a page. Said a participant in the discussion: "If you observe a dozen men who take up newspapers you will hardly find two who begin to read at the same place. Go into a restaurant, a hotel office or a club room and make a few notes on the methods of newspaper perusal."—*Buffalo Courier.*

POISON IN CANNED GOODS.

Chloride of Zinc, Freely Used by Canners, as Deadly as Arsenic.

So many cases of poisoning have taken place by reason of the use of canned goods that we, seeking for a definite cause, find it arises from chloride of zinc. This is a poison almost as deadly as arsenic, and has a place in the closing of cans once occupied by arsenic. Its adoption grew out of the ease with which it can be used, skilled labor not being required for its application, and besides, though not cheaper in itself, it could be applied to a cheaper quality of tin plate, of which the cans were then made. It was not until it was used for this purpose that cases of poisoning from the use of canned fruits and vegetables were known, although its effects as a poison in foreign countries, particularly in Germany, England and France, were a subject of medical and chemical investigation long ago. A child was fatally poisoned by it in London, and was unsuccessfully treated by the faculty of the medical school of London hospital, and the general symptoms of its malady were similar to those attending all the cases of poisoning by reason of the use of canned goods. The canner uses the dangerous material freely, applying it with a large brush, working so rapidly as to cap ten cans a minute, and by the very reason of the haste and carelessness of the method employed admitting a greater or less amount of the poison into every can. The consumption of these canned goods, amounting to ten cans for every person in the United States every year, gives an appreciable idea of the vastness of the attack made upon the human stomach in this country. Canners must stop using this deadly poison, which attacks the vital organs with resistless vigor, and laws that fail to consider this important feature of the question fail in an important particular.—*Brooklyn Eagle.*

THE CHURCH DEBT.

Bill Nye Expresses His Satisfaction With the Life of an Eccentric Millionaire.

I have been thinking the matter over seriously, and I have decided that if I had my life to live over again I would like to be an eccentric millionaire.

I have eccentricity enough, but I can not successfully push it without more means.

I have a great many plans which I would like to carry out in case I could unite the two necessary elements for the production of the successful eccentric millionaire.

Among other things I would be willing to bind myself, and give proper security to any one who would put in money to offset my eccentricity, that I would ultimately die. We all know how seldom the eccentric millionaire now dies. I would be willing to inaugurate a reform in that direction.

I think now that I would endow a home for men whose wives are no longer able to support them. In many cases the wife who was at first able to support her husband comfortably finally shoulders a church debt, and in trying to lift that she overworks and impairs her health so that she becomes an invalid, while her husband is left to pine away in solitude or dependent upon the cold charities of the world.

My heart goes out toward those men even now, and in case I should fill the grave of the eccentric millionaire, I am sure I would do the square thing by them.

The method by which our wives in America are knocking the church debt silly by working up their husband's groceries into "angel food," and selling them below actual cost, is deserving of the attention of our national financiers.

The church debt itself is deserving of notice in this country. It certainly thrives better under a republican form of government than any other feature of our boasted civilization. Western towns spring up everywhere, and the first anxiety is to name the place, and second to incur a church debt and establish a roller rink.

After that a general activity in trade is assured. Of course, the general hostility of church and rink will prevent ennui and listlessness, and the church debt will encourage a business boom. Naturally, the church debt can not be paid without what is generally known through the West as the "festival and hooraw." This festival is an open market, where the ladies trade the groceries of their husbands to other ladies' husbands, and everybody has a "perfectly lovely time." The church clears two dollars and thirty cents, and thirteen ladies are sick all the next day.

This makes a boom for the physicians and, later on, for the undertaker and general tombist. So it will be seen that the western town is right in establishing a church debt as soon as the survey is made and the town properly named. After the first church debt has been properly started, others will rapidly follow, so that no anxiety need be felt if the church will come forward the first year and buy more than it can pay for.

The church debt is a comparatively modern appliance, and yet it has been productive of many peculiar features. For instance, we call to mind the clergyman who makes a specialty of going from place to place as a successful debt demolisher. He is a part of the general system, just as much as the ice-cream freezer or the button-hole bouquet.

Then there is the row, or social knock-down-and-drag-out, which goes along with the church debt. All these things add to the general interest, and to acquire interest in one way or another is the mission of the c. d.

I once knew a most exemplary woman who became greatly interested in the wiping out of a church debt, and who did finally succeed in wiping out the debt, but in its last expiring death struggle it gave her a wipe from which she never recovered. She had succeeded in begging the milk, and the cream, and the eggs, and the sandwiches, and the use of the dishes, and the sugar, and the loan of an oyster, and the use of a freezer, and about fifty button-hole bouquets to be sold to men who were not in the habit of wearing bouquets, but she could not borrow a circular artist to revolve the crank of the freezer, so she agitated it herself. Her husband had to go away prior to the festivities, but ordered her not to crank the freezer. He had very little influence with her, however, and so to-day he is a widower. The church debt was revived in the following year, and now there isn't a more thriving church debt anywhere in the country. Only last week the church traded off seventy-five dollar's worth of groceries in the form of asbetos cake and celluloid angel food, in such a way that if the original cost of the groceries and the work were not considered, the clear profit was thirteen dollars, after the hall-rent was paid. And why should the first cost of the groceries be reckoned, when we stop to think that they were involuntarily furnished by the husband and father?

I must add, also, that in the above estimate doctor's bills and funeral expenses are not reckoned.—*N. Y. Mercury.*

What She Got.

Mrs. Blue had sent her cook out to do the marketing, and when she returned she went down to see what she had got, and if she had done her work properly.

"Well, Mary," she inquired, "did you get the vegetables?"

"Yesum."

"And the fish?"

"Yesum."

"And the melon?"

"Yesum."

"And the groceries?"

"Yesum,"

"There wasn't anything else for you to get, was there?"

"Yesum."

"I guess you must be mistaken; that's all I told you to get, wasn't it?"

"Yesum."

"Well, I hope to goodness you haven't been buying things you had no business to buy. What else did you get?" and the lady's voice had an angry quaver in it."

"I got back, mum, that's all."

The lady looked at the load of stuff the girl had brought with her, and, wondered if sarcasm were intended, but she only smiled sweetly.—*Merchant Traveler.*

MODERN VANDALISM.

Reverence for Beauty a Superficial Quantity with the Multitude.

In profession, we of to-day are all Crusaders, burning to defend the places made sacred by the picturesqueness or associations of the past. In deed, we are almost all Goths and Vandals, ruining them without mercy. While the men who are to come will judge us by our actions, we judge ourselves by our words. Because the speech of a few is fair, we fancy that all must be right with the many. Because more is being said and written about art than ever has been before, we think that the feeling for it must be greater in like proportion. In a word, we mistake our sowing of good seed for the reaping of a fruitful harvest. Once in awhile, however, we are reminded that all is not so well as it seems. In the United States, within the last ten years, art schools have been established by hundreds, but when it came to finding out what they accomplished by an art competition instituted by Harper and Brothers, the result was shown to be just nothing. In England, benevolent men, strong in their own faith, think to refine the lower classes by the influence of art and by making their surroundings beautiful. But even as they put up their mosaics in Whitechapel famous collections of paintings are allowed to be dispersed, and plans are prepared to destroy one of the most picturesque corners in London.

The fact is that the reverence for beauty, genuine enough with men like Mr. Ruskin, is superficial with the multitude, whose real worship is one of comfort. Whenever there is a struggle between the things of the past and those of the present, it is easy to predict which will survive; for in this case fitness is always measured by comfort. Perhaps, after all, when the buildings and cities in which people live are concerned, it is unreasonable to wish it to be otherwise. It may be, as Hawthorne says somewhere in Marble Faun, in speaking of the gloom and chill and inconvenience of the stone palaces in Italian cities, that a dwelling-place should never be built to last longer than forty or fifty years. It is probably more important that a house should be healthy and clean and adapted to the physical well-being of men who are to spend their days in it than that it should give mental pleasure to those who merely look at it from without. Workingmen living in the ugly suburbs of London, or in the red brick monotony of Christian and Catharine streets in Philadelphia, which no man would go out of his way to look at, are doubtless better off than their fellows in Italian towns, though the latter may be settled in two or three large, damp rooms on the ground floor of old palaces which travelers come from afar to see. The few—a losing remnant in this case—overlook the wants of the people. Considering the subject dispassionately, we must admit that many of the changes which are fatal to mediæval beauty and quaintness are not wholly unnecessary or capricious. No one, while the memory of last summer's plague is still fresh, can deny, for example, that it is better to sacrifice the picturesqueness of some of the narrow, dirty streets of Naples than the health and lives of thousands of Neapolitans. The majority of business men in London do not question the wisdom of the removal of Temple Bar, which has made their going to and coming from the city so much easier. It must be added, however, that those whose occupations do not lead them cityward wonder what great good has been done by destroying an old landmark, declared to be an obstruction in the street, and then blocking up the way with a new, meaningless monument.—*E. R. Pennell, in Atlantic Monthly.*

CHARITY.

Discrimination Imperative in Giving to the Poor.

In giving to the poor, discrimination should be exercised. Our duty is not discharged when we have given them something, simply because we have given. All interested in the work of charity know that it is not nearly so advisable to give money to the needy as it is to lay the money out judiciously for them. It is not, however, of money-giving that I would write, but of garment giving. Many people are accustomed to give half-worn or outgrown clothes to the poor, without stopping to consider whether they are suitable for the person to whom they are given. How often have we seen poor people, who can scarcely keep starvation from the door, arrayed in silk and embroidery. The moral effect of this is very bad. Here is a case in point. A washerwoman, with a drunken husband and five children, for whom she must provide, received numbers of garments from families by whom she is employed. Many of these clothes were beautiful, fit for children of wealthy families. They were given to the washerwoman because the children of the donors had outgrown them. The washerwoman, proud of her pretty children in their fine attire—poor woman! the mother-pride is pardonable, for mother-love is God's gift to all, rich and poor alike—spent what she should have used for food for things to suit the rich apparel, so that her children might outshine those of her neighbors. Remonstrance was unavailing. Years passed by, and the children, grown old enough to help their mother in her hard and weary life, became millstones to the poor woman. They would do nothing and had no thought save for finery. To-day they are a pest to all with whom they come in contact. The foolish mother, worn out by labor, has only one comfort in life, and that is a daughter who was so marred by small-pox that the mother always dressed her in the commonest clothes, "because she is so awful homely," and seldom took her out for the Sunday afternoon walk. When the child did go it was only to look after the younger children. This daughter now takes charge of the poor home, saves the mother many an insult and injury from the wretched father, and works indefatigably to keep the family under shelter.—*Louisville Courier Journal.*

ABOUT ALMANACS.

The Largest Almanac in the World From Which All the Lesser Ones are Prepared.

Every family in the United States uses an almanac, but few people are cognizant of the immense amount of work required in their preparation. The phases of the moon, the positions which the sun and stars will hold at given times for every day throughout the year, the calculation of eclipses, and the hundred and one other facts told by astronomy and mathematics appear as regularly as the years go round. The simplest almanacs used for druggists' advertisements are full of such information, and when one goes further and picks up one of the big volumes called nautical almanacs, published for the use of astronomers and navigators, the array of figures is really appalling, and their long lines of digits, thrown into order which would delight a Gradgrind, make the brains of the general reader swim as he endeavors to understand them. These big nautical almanacs are the fathers of all the others. The calculations of the smaller almanacs are taken from them, and they feed, as it were, the whole family of little almanacs the world over. The greatest nations of the world now have their own nautical almanacs, and these are made by their respective governments. The nautical almanac of France has been published longer than any other, its editions having been issued for several hundred years. The British almanac comes next, dating back to a little before the Revolution, and the German and Spanish were begun since then. The American Nautical Almanac was first issued in 1855, and it is now said to be the best almanac published anywhere in the world. It contains more valuable information and calculation than any of the other government almanacs, and it holds the highest place among astronomers and navigators. The almanac is made at Washington, and a special department of the navy under Prof. Newcomb is devoted to its getting up. It is a book of solid figures, over an inch thick, about eight inches wide and twelve inches long. It contains more than five hundred pages, and each page is black with a multitude of carefully arranged figures, each of which represent hours of calculation and sheets of scientific and algebraic study.

The work is published three or more years in advance of its date. The almanac for 1888 is now out, and that for 1889 is being prepared. Twelve scientists, each noted as an astronomer and a mathematician, located in different parts of the country, are almost constantly working upon it. They make their calculations and send them to Washington, and they are here proved before going into the almanac. The title of the book is "The American Ephemeris and Nautical Almanac," and if you would abbreviate this title in talking of it to one of the makers of it he would be highly disgusted. One of them told me yesterday what it contained, but his words of scientific terms fell upon my ear like the jargon of a Choctaw, and he might as well have expressed himself in Greek. Some of the more scientific of your readers, however, may understand him. I will repeat his answer to my request to know what this book of five hundred pages of solid figures contained. He said its calculations are divided into three parts. Part 1 is adapted to the meridian of Greenwich. It contains the positions of the sun, moon and primary planets for every mean moon throughout the year. It contains the distances of the moon from the sun and certain fixed planets. This is used by navigators at sea for determining the longitude, etc., etc.. Part 2 is adapted to the meridian of Washington, and is intended for the use of astronomers, as well as navigators. It contains data for finding the apparent positions of the principal fixed stars for every tenth upper transit at Washington; also the sun's apparent right ascension and declination, hourly motion, and equation of time for every mean and apparent noon at Washington, and likewise the same circumstances for the moon. It also contains the mean time of transit, right ascension, and declination, horizontal parallax and semi-diameter of each primary planet at the time of transit at Washington. Part 3 is devoted to "phenomena," and here, as I am not a scientific dictionary on legs, I will not attempt to repeat what the astronomer said it contained. It was much worse than the above, and when I looked again at the millions of figures as he repeated the scientific jargon I became more and more impressed with the immense work of getting up a nautical almanac and an "American Ephemeris."

These nautical almanacs, however, do not deal with the weather. That is left entirely to the weather bureau, which is distinct from them. Almanacs were made for years before any government took them up. The old Romans had a sort of almanac, but the first printed almanac was that of George von Burback, who issued his predictions at Vienna in 1460. In the sixteenth and seventeenth centuries almanacs were used as political documents, and they were full of astrology, astronomy and superstition in addition to their politics. The first American almanac was that of William Bradford, who published one in 1687. Ben Franklin's "Poor Richard's Almanac" was first published in 1732, and the American Almanac, which continued its publication up to 1861, was first published in 1628. There are now about one hundred almanacs published in the United States, of which, perhaps, the best is Spofford's American Almanac, published by the Librarian of Congress.—*Cor. Cleveland Leader.*

—A fifteen-year-old daughter of W. G. Cavender, six miles southeast of Dalton, gave an exhibition of her suddenly developed magnetic power Thursday afternoon. She exhibits all the wonderful powers of the other magnetic girls, and the electrical force is so perceptible as not to be mistaken. In the chair trick, for instance, she simply rubs the palm of one hand on the back splints. She also stands immovable upon one foot and defies the pushing of the strongest man. She claims that the simple touch of one's fingers upon her shoulders destroys her will power, as she designates it.—*Dalton (Ga.) Argus.*

Turn the Rascals Out.

A year ago the cry of turn the rascals out was being yelled from one end of the land to the other. This emphatic and forcible language was used to fire the Democratic heart, and was an appeal to the *honest few* in the Republican party to go over to the Democrats and help elect a Democratic President. All this, of course, upon the assumption that the administration of the government by the Republican party had been corrupt and Republican officials, as a rule, dishonest. There was another assumption, also, and that was that a Democratic administration would be pure and Democratic officials, as a rule, honest. This sort of political clap-trap caught enough simple minded fools, *alias* mugwumps, to elect a Democratic President, and about the first business of the new administration was to go in search of the large army of rascals who existed in the Democratic imagination. The search, though long and tedious, failed, and failed utterly, to bring to light the rascals of which the public had been told so much. Not only so, but the aristocratic noses of all the Democratic smelling committees failed to scent out any of the rottenness and corruption which had grown up under Republican rule. This, to the Democratic mind, was a singular state of affairs. No rascals. No corruption. Evidently there was something wrong. But the Democratic mind was equal to the occasion, and so the offensive partisanship dodge was invented and for a while it was worked for all it was worth. But somehow it was discovered that the offensive partisanship circular was a two-edged sword, and when the administration awakes to this fact the President quietly shut up shop and went fishing. But the good work of turning the rascals out is still going on and this is the way the work is done. In the city of Cincinnati, in the State of Ohio, at the Presidential election in the year of our Lord 1884, great frauds were perpetrated upon the ballot. This, of course, was nothing new in Democratic politics. Of course Morris Thomas and Eugene Higgins did not go from Baltimore to Ohio to help the people to have a fair election. They were there, at any rate, and frauds were committed, and both of these Maryland worthies have been appointed to important offices by Mr. Cleveland. At this same election there was a certain Michael Mullen, of Cincinnati, a police lieutenant, who, on election day, arrested and confined in the station house over one hundred colored people and prevented them from voting. They were all released, no charges having been preferred against them. Mullen was tried in the United States Court, convicted and imprisoned for violation of the Federal election laws. Now, the strange part of the case is, that before the sentence has more than half expired President Cleveland comes to the front and Mullen is pardoned, on his good reputation, and because, perhaps, he misapprehended his duties "and various other reasons." It seems, therefore, that if the administration cannot find Republican rascals to punish *it can find* Democratic rascals to reward, and it seems, too, that Democratic rascals are being liberally rewarded. The assumption that the Republican party had been very corrupt turned out to be without foundation in fact, and, unless we are mistaken, the other assumption that the Democratic party is pure and its officials, as a rule, honest will prove equally groundless. Let the administration go on turning such convicted rascals as Mullen out; let it continue to reward such men as Higgins and Thomas for their dirty work, and the time will soon come when the people will turn the rascals out, sure enough.

Over 10,000 Christians have been massacred in the provinces of Biendinh and Phyyen, China.

By the breaking of a fan in the West End Coal Company's mine at Monoqua, near Wilkesbarre, Pa., Tuesday, eleven men were suffocated by gas.

A Striking Tribute.

The feature of Gen. Grant's death and burial that will live as long as his fame is the complete Union of Sympathy over his taking off. Jew and Gentile, Protestant and Catholic, North and South have stood together in sorrow by his tomb. The *Catholic Review*, which has more than one kindly mention of the "Old Commander," has this to say in its leading editorial article:

It is natural and fitting that the whole people should lament the death of Grant. Appomattox will be forever one of the landmarks of universal history, illustrating how a people could do or die, not for the petty ambition of a soldier or a statesman, but for a cause that was just and touched all humanity. There has been much profiless talk about the site for a monument to the memory of Grant. Appomattox is monument enough. That is the crown of his victories and of his fame. It marks also the new birth of this people. It taught a lesson to the world, illustrated the other day by the memorial services in Westminster Abbey. It taught the world that true republicanism, which is the conduct of public affairs for and by the public, was a fact, and that a free Confederacy of free States could stand the fearful trial of even a fratricidal war. From that day out the United States, after retiring their citizen armies and holding only a handful of regular soldiers, took rank among the great powers of the world. The foremost foreign foe against the cause and the Union for which Grant and our armies fought was England, whose Queen and people gave a memorial service at Westminster in honor of the dead soldier. England to-day seeks the friendship and good will of the people whom she wished to destroy. We have grown a little in twenty years. We should have been out of existence as a Confederacy of free States had not citizen Grant and his citizen armies crushed the rebellion. It is of the very essence of freedom to abolish slavery.

So we leave Grant at Appomattox, and join in the general sorrow at his death. He bore his sufferings most patiently and awaited death with true Christian resignation. As a soldier he was everything that was admirable. As President he came at a very trying time and under circumstances that may excuse many mistakes. Mistakes also attended his civic career. His best work was his work as a soldier and his fame will rest on that. His modesty, the modesty of a man who held the fate of a country in his hands, was remarkable. Grant never "made a splurge." He was not without faults. What man is faultless? No generous man cares to count faults over a grave. In one respect, and a most important one, he stands as an example to his countrymen. Grant was chaste.

Mr. Blaine on Gen. Grant.

AUGUSTA, ME., August 8.—Hon. James G. Blaine delivered an oration here to-day on Gen. Grant. He said: "If the armies of the Union had ultimately failed the vast and beneficent designs of Lincoln would have been known in history as a statesman and philanthropist who in the cause of humanity cherished great aims which he could not realize, and conceived great ends which he could not attain; as an unsuccessful ruler whose policies distracted and dissevered his country; while Gen. Grant would have taken his place with that long and always increasing array of great men who were found wanting in the supreme hour of trial.

"But a higher power controlled the results, in his gracious mercy, had not raised those men for works which should come to naught. In the expression of Lincoln, 'No human counsel devised nor did mortal hand work out those great things.' In their accomplishment those human agents were sustained by more than human power, and through them great salvation was wrought for the land.

"Gen. Grant's military supremacy was honestly earned, without factious praise and without extraneous help. He had no influence to urge his promotion except such as was attracted by his own achievements. He had no potential friends except those whom his victories won to his support. He rose more rapidly than any military leader in history, from the command of a single regiment to the supreme direction of a million of men, divided into many great armies and operating over an area as large as the empires of Germany and Austria combined."

John Jarrett is a practical man, who takes a practical view of a practical question. He condenses a startling array of figures and puts a powerful argument into this brief form:

The iron and steel manufactures imported from abroad during the last four years amount to $224,000,000. This is at foreign valuation in our markets. These goods were sold for perhaps $315,000,000. Hence, according to prices in that time, the imported iron and steel represents a loss in wages of fully $222,000,000 to our workingmen. This is called over-production. The imported goods should be made in this country.

If, instead of over-production, we heard more of under-protection it would be better for the country. A tariff high enough to keep at home this immense drain on our resources would furnish work and wages for an army of men. Is it possible that there are intelligent people who do not see this?—*Wheeling Intelligencer.*

General Grant's Probable Escape.

Grant's old body servant is employed in the departments here, says a letter from Washington to the Cleveland *Leader*. His name is William Barnes, and he was with Grant from 1862 until the second year of his Presidential term. William is a good-looking colored man, who, though he must be more than forty-five years old, does not look over twenty-five. He is very proud of his service with Grant, and delights to talk of the reminiscences of the time. He says Grant was the kindest of masters, always the same in temper, and never getting excited or angry, whatever the provocation. It was William Barnes who probably saved Grant from being assassinated on the night that Lincoln was killed. Grant arrived in Washington that day and it was Mrs. Grant's intention to go with the General to the theatre that night. She had ordered that their baggage be taken to the hotel, but William misunderstood her order and had it transferred to the Baltimore and Ohio depot. This was not discovered until too late to go to the theatre, and then Mrs. Grant decided that they would go on to New Jersey and let the theatre go. Had William not made the mistake Grant would have been one of that party in Lincoln's box that night. As it was he had hardly gotten out of the city before the news arrived that President Lincoln was shot and he had to return.

NEW YORK, August 10.—In an interview yesterday, Col. Grant said: "I think that father's book will appear before long. We do not yet know exactly what or how much manuscript there is. The last pages my father wrote have not been looked over, and there is a large amount of matter not in form for publication. On my return to Mt. McGregor, I shall devote the next four weeks to looking over the manuscripts. I shall make copies of all his papers and preserve the originals. I am not yet sure whether there will be enough matter for two volumes or not, but what there is will be published with as little revising as possible. The story will be brought down to my father's death, and when this has been done whatever there is will be printed."

In regard to his mother's health he said: "My mother is physically very strong, and I have no doubt that in time she will regain her usual health. She has been confined unremittingly to my father's sick room. If she had not been very strong she would have broken down long ago. I think that with a change of surroundings she will recover rapidly. As to the future plans of the family I cannot speak very definitely. We shall all go back to Mt. McGregor and remain there until fall, when the family must separate. Mrs. Grant will doubtless occupy the house on Sixty-sixth street."

The Blue and the Gray.

From the New York Sun, August 10.

Gen. Joe Johnson went out walking with Gen. Sherman and Gen. Phil Sheridan yesterday morning, and after dining with them at the Fifth Avenue Hotel, left town on the 3:40 train from Jersey City. The two Northern generals saw him off. Gen. Buckner left the hotel for home early in the morning. Gen. Fitzhugh Lee will remain a day or two at the St. James Hotel. His genial smile lighted up the hotel corridor at different times yesterday, and lots of the guests bowed to him simply to show that they thought him a trump. Gen. Gordon will remain in town a day or two also, unless something occurs to call him away.

The Ellicott City *Times* says "the next Legislature of Maryland will be one of the most important that has ever assembled in this State, especially in the matter of the number of responsible offices it will have to fill. It will have to elect a Governor, United States Senator, State Treasurer and two Police Commissioners for Baltimore city, besides providing for the election upon the question of a new Constitution and passing a law for the valuation and assessment of all property for taxation."

A special election was held in Charles county, Md., on Tuesday of last week, on the question of the sale or prohibition of liquor, and the prohibitionists were defeated by a majority of about 900. Every district in the county was carried against them. This is the third time Charles county has voted on this question, the vote against prohibition at last Tuesday's election having been larger than at either of the two previously held.

Harry Garfield, it is said, takes a professorship at St. Paul's school at Concord, N. H., where he prepared for college. His brother, who was the youngest member of the recent graduating class at Williams, will study law in New York city.

Borne to the Tomb.

NEW YORK, August 8.—At 8 o'clock nature was putting forth signals of an intensely warm day. The crowds grew denser and denser around the plaza. Muffled drums and dirgeful trumpets marched in at one side and took positions at the east end. At 8:50 Gen. Hancock and staff trooped slowly into the plaza from Broadway, and presented front to the city hall then moving to the end of the plaza in Broadway, where they rested on the plaza.

At this time 100 members of the Liederkranz society filed up to the steps of the city hall and sang with impressive effect "Chorus of the Spirits from Over the Water," Schubert, and "Chorus of the Pilgrims," Tannahauser. The honor guard of regulars filed into the open space at 9 o'clock—Co. A, 5th artillery, under Col. W. B. Beck, and Co. E, 12th infantry, under Major Brown. Then came the original guard of honor that was on duty at Mt. McGregor, and which alone should lift the remains to-day. Filing into the corridors of the city hall, these took their places beside the remains, and were under command of J. H. Johnson, senior vice commander of Grant Post, G. A. R., of Brooklyn. Inside the corridors Commander Johnson was waiting.

"Columns in position right and left," was his command. The veteran guard of honor was erect. "Lift the remains," was the next command in clear, but low tones. The twelve men stooped to the silver rails with gloved hands. "March," was the word. The body moved. Out upon the portico were borne the remains, Commander Johnson immediately at the head. Down the steps with measured tread, across the open to the steps of the black and waiting car. The silver mountings glistened as the burial case and its burden was carried up and placed upon the dias upon the mounted catafalque. The veterans retired down the steps. The body was alone for all to view. The honor guard next to the hearse, on either side, took the same relative positions they had maintained to the remains while being borne to the hearse.

The clergy and physicians had paid respect to the remains by alighting from their carriages and accompanying them from the steps to the hearse. They entered carriages on either side of the plaza, near Broadway, as follows: Rev. Dr. Newman, Bishop Harris, Bishop Potter, Rev. Dr. Chambers, Rev. Dr. Field, Rev. Dr. Bridgeman, Rev. Dr. Wett, Rev. Father Deshon, Rev. Robert Colyer, Rabbi Brown and Drs. Douglas, Shrady and Sands.

A signal was given, and the line of coaches with clergy moved off the plaza to Broadway. The band stood waiting at the head of the funeral cortege, Col. Beck advanced to the head of the line of black horses before the coach. "Move on," were his words of command, with uplifted swork. The leaders slipped forward, led by colored men, and in an instant the black line of horses had straightened their traces and the wheels beneath the remains were moving. The hour was 9:47. The band played a dirge. The tramp of the regulars and honor guard beat upon the pavement, thousands beneath the trees and crowding the sides of the squares looked silently on as the black funeral car rolled over the curb into Broadway.

At 10:10 precisely the Grant family came out of the ladies' entrance in the Fifth avenue hotel and took their carriages. Col. Fred. Grant and his wife rode with Gen. Grant's daughter Nellie, Mrs. Sartoris, U. S. Grant, Jr., and his wife and Senor Romero occupied the next carriage together. Mr. and Mrs. Jesse Grant the third, the Cramer family the fourth carriage. As the carriages received their occupants they rolled away towards the Avenue and remained there closely wedged in and waiting for their turn in the line. They had been waiting eagerly more than a quarter of an hour before President Cleveland came out and took his seat in his carriage drawn by six handsome grays, with Secretary Bayard. A four-horse carriage that followed received Vice-President Hendricks, and his private secretary, Hughes East. Ahead of them had gone a number of carriages following the Grant family in the following order: Mrs. Rawlins Holman, daughter of Gen. Grant's friend and first Secretary of War, the general's old staff in four carriages; his ex-cabinet officers in four carriages: detachments from Wheeling and U. S. Grant Posts G. A. R., in four carriages; Mr. J. W. Drexel and members of the Aztec club, survivors of the Mexican war.

As soon as the catafalque had passed the carriage containing Col. Fred. Grant, his wife and sister, fell in, and there was a tremendous scramble for the carriages of the mourners, whom the long wait had persuaded to leave their seats to catch a glimpse of the procession from the street corner where Capt. Williams' men had cleared and kept open a space for the aides with no little difficulty. The coaches fell quickly in line without confusion.

The order of the procession was briefly as follows: The regular army and naval brigade, first and second divisions National Guards, state of New York, first division New Jersey National Guards, catafalque, official guests and members of family in carriages, veteran division, commanded by Gen. Sickles, comprising various veteran organizations, army societies and the Grand Army of the Republic, civic division, in four subdivisions, comprising a large number of committee, associations and political clubs.

At 12.30 the head of the procession turned into Riverside Park. Lines were formed on the east side of Riverside drive and, as the catafalque passed, arms were presented by regiments and the band played a dirge. The ceremonies at the tomb were very simple and brief. A detail of the Grand Army of the Republic repeated the ritual of that order, occupying 10 minutes. This was followed by the burial services of the Methodist Episcopal church conducted by Rev. Dr. Newman. The casket was then placed in the vault. The bugle call or taps, meaning in camp that the lights are out, was then sounded, and a salute of 21 guns closed the ceremonies.

The pall-bearers were: Gen. Sherman, U. S. A.; Lieut. Gen. Sheridan, U. S. A.; Admiral Porter, U. S. N.; Rear Admiral Worden, U. S. N.; Gen. J. E. Johnston, Virginia; Gen. S. B. Buckner, Kentucky; Geo. S. Boutwell, Massachusetts; A. J. Drexel, Pennsylvania; Geo. W. Childs, Pennsylvania; John A. Logan, Illinois; George Jones, New York, and Oliver Hoyt, New York.

DON'T TALK HARD TIMES.—There is a good deal in talk. Let a man talk dull times, and it is infectious; everybody in the store gets the blues, and in turn talk dull times, and from hustling around to stir up and take care of what business there is, they all get to sitting down and moping over the dull times. If a customer does happen to drop into one of these "dull times" stores, he actually gets frightened out of buying one-half as much as he actually expects to, because everybody looks so blue. He catches the spirit of the store, and resolves to hang on to all his money with a death grip. This bugbear of dull times ought to be sat down on. It is doing more to kill business than anything else. Tell a well man he is sick, keep it up, and you can eventually hound him to death. Business is not all that we could desire, still we know of a good many firms who shut down on crying "dull times" long ago and are making money to-day.

A box was shipped from Black River Falls, Wis., to Chicago on Saturday night the 25th ulto. The messenger became suspicious of the contents, and on the arrival of the train at Elroy, Wis., Sunday, the box was opened, and inside was found a man armed with a 38-caliber revolver, a billy, a razor, a bottle of chloroform and a bunch of cord. He refused to give his name. The box was shipped to Sidney L. Barland, Chicago. Two more persons supposed to be confederates were arrested. It is supposed that they had planned to rob the mail and express car.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, August 10, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¾@5¾c. that generally rated firstquality 4¾@5¾cts; medium or good fair quality 3¾@4¾ cts; ordinary thin steers, oxen and cows 2¾@3¾ cts; extreme range of prices 2¾@5¾ cts; most of the sales were from 3¾@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 1,958 head, against 1,649 last week and 1,910 head the corresponding week of last year, and the sales were 1,120 head, against 1,016 last week, and 858 head the corresponding week of last year.

Trade at the opening to-day, and for a short time afterwards, was fairly active. Wholesale prices were ¼c., higher than they were last week, and for a short time retail sales were made in full sympathy, but before the close the advance was partially lost. The improvement was chiefly observable in the better grades. There were some better tops than there were last week, but there were quite a full representation of thin cattle, good butcher cattle not being abundant. Prices 2¾@5¾, with most sales from 3½ to 5¾c.

THE SWINE MARKET.

The number of the offerings is generally reported as light, but they number about 1,000 head more than they did last week. The quality of the offerings is not quite as good as were those of last week. Trade is fair and prices ¼c., off as compared with last week's figures. Rough sows and stags are quoted at 6@6¼c.; grassers, 6½@5¾c., and the better grades 6¾@7c,, and extras 7¼c., net; same time last year hogs sold at 7@8½c., as to quality.

THE SHEEP MARKET.

There is quite a full run this week of sheep and lambs, but mostly of common stock, which are very slow of sale at our lowest quotations. Good sheep are not in fair demand at the prices quoted. There is no outside demand, trade being entirely limited to supplying the demands of our home butchers. We quote common to fair sheep at 2@3¼c., and fair to good 3½@4c., with extras 4¼c. Lambs 3@6c., few selling at either extreme. Same time last year sheep sold at 3@4¼c., gross, and lambs 4@6.

PUBLIC SALE

— OF —

MILITARY LOTS

IN GARRETT COUNTY.

On TUESDAY, August 25, 1885,

at 10 o'clock, A. M., in front of the Glades Hotel, in Oakland, we will, on behalf of P. M. Lusson and wife, the owners, offer at Public Sale to the highest bidder the following

MILITARY LOTS to-wit:

Nos. 2724, 2721, 2726, 2727, 2660, 2664, 2668, 2691, 2692, 2693, 2694, 2697, 2494, 2463, 2460, 2429, 2431, 2472, 2473, 2582, 2499, 2493, 2441, 2442, 2490, 2493, 2593, 2584, 2585.

These Lots are a part of the tract of land called

"INTERNAL IMPROVEMENTS,"

and lie in the neighborhood of Accident. The tract, "INTERNAL IMPROVEMENTS" was patented to General Walker K. and John B. Armistead, April 28th, 1834. On June 30th, 1847, the widow and heirs at law of General Walker Armistead filed their bill in Equity for a sale of said land, No 861 Equity, Allegany county. A decree was passed by which W. M. Price was appointed trustee to make said sale. Said Price, trustee, sold and conveyed said lots to P. M. Lusson, and said sale was ratified and confirmed by the Court.

Any person desiring to examine the title of Lusson and wife to said lots can do so by calling on the undersigned who will furnish any information in their possession with reference to the title.

TERNS, EASY.

PEDDICORD & THAYER,
Attorneys.

JOHN R. KERFOOT,
8 15 2t Agent for owners.

Mortgagee's Sale

—OF VALUABLE—

REAL ESTATE

In Garrett County, Maryland.

By virtue of a power of sale contained in a mortgage from Alpha Hinebaugh and Fannie B. Hinebaugh, his wife, and John Hinebaugh and Mary A. Hinebaugh, his wife, to Matthew Cullen, dated June 8th, 1882, and recorded among the Land Records of Garrett county, in Liber W. H. T. No. 6, folios 468, &c., and assigned to Henry A. Rasche by said Matthew Cullen, the undersigned, assignee of said mortgagee, will offer at public sale, in front of the Court House, in the town of Oakland, Garrett county, Maryland,

On Monday, SEPTEMBER 14TH, 1885,

at 3 o'clock P. M., all the following Real Estate, viz:

First, All that tract of land situate, lying and being in said Garrett county, known as

"SWALLOW FALLS,"

containing about eight hundred acres.

Second. All those pieces or parcels of land situate, lying and being in Garrett county aforesaid, known and designated as

Military Lots Numbers 1256, 1258, 1260, 1261, 1262, 1263, 1264, 1265, 1266 and 1269,

containing fifty acres of land each, and included in a tract of land called

"The Falls of Muddy Creek."

All of which said lands are more particularly described in the said mortgage, reference to which is here by made.

Said lands are situated on and near the Youghiogheny river, about seven miles north of the town of Oakland, are well timber, and improved by several DWELLING HOUSES and out-buildings, and the same property on which the said Alpha Hinebaugh recently operated a saw mill.

TERMS:—Cash on day of sale.

HENRY A. RASCHE,
8 15 4t Assignee of Mortgagee.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. References given when required.

ANDREW J. HARNE.

Oakland, May 19th, 1885.—1 y.

LOCAL NEWS.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday ntghts of each month.

The Y. M. C. A. of Oakland meets in the Pritchard Building Friday night of each week

ANNOUNCEMENTS.

[Advertisements under this heading will be inserted at the following rates: For Members of the Legislature, Clerk of the Circuit Court and Sheriff, $4.00; Surveyor and County Commissioners, $3.00, and for Register of Wills, $2.00. Advertisements to run till the meeting of the Nominating Convention. The space allowed will be six lines or less, and 50 cents per line will be charged for each line in excess of that number. No name will be announced until the fee is paid.]

FOR SHERIFF.

At the solicitation of many friends I hereby announce myself as a candidate for Sheriff of Garrett county, subject to the action of the Republican County Convention.

JOHN H. RILEY.

July 7, 1885.

—Mr. Eli McMillen and wife, of Accident, were in town this week.

—Mr. D. E. Offutt shipped from Oakland this week over 10,000 pounds of wool.

—Rattlesnakes are said to be more numerous in parts of this county this summer than usual.

—Judge Hamill took charge of the Oakland postoffice Wednesday morning.

—The J. O. Michael property on Second street, Oakland, was purchased at Trustee's sale Tuesday, by Mr. J. R. Bishop, for $3,200.

—Mr. F. C. White left at our office two clusters of potato onions, one of which contains 9 and the other 13 perfectly formed onions from one set.

—Mrs. Stahl, widow of the late John Stahl, desires to dispose of her house and lot in Oakland. Persons desiring a cheap property should make a note of this. 7 18 tf

—The Maryland Senators were at the Oakland Hotel Sunday evening, for a short time, returning to Deer Park, where they remained over night. Monday they went up the W. Va. C. & P. R. R. as far as Davis City.

—The Democratic primary was held at the Court House Saturday afternoon. The attendance was small. Messrs. G. W. Merrill, W. A. Daily, B. Reynolds, R. S. Jamison and John F. Browning were elected delegates. The county convention is in session as we are printing this issue.

—Monday morning in the Emmanual Protestant Episcopal Church, Col. R. D. Johnson, of Cumberland, was married to Mrs. Maria N. Johnson, of St. Louis. Mr. and Mrs. Johnson left the same afternoon for Bedford Springs, where they will remain some weeks, after which they will take up their residence in Cumberland.

Church Services--Sunday.

Garrett Memorial (Pres.) Church—Preaching at 11 A. M. Rev. John S. Foulk.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Fair and Festival.

The ladies of the Presbyterian church will hold a fair and festival in the Brooks building, commencing Wednesday evening, August 19th, and will continue three or four days. Lunch will be served during the day. Proceeds to be used in building a parsonage. We respectfully solicit the patronage of the public.

For Sale.

Will be sold on favorable terms—30-horse power steam saw mill complete, with cut-off saw.

D. E. OFFUTT, Admst.,
Oakland, Md.

Death from a Snake Bite.

Sunday evening last Beeson, aged about 14 years, the eldest son of Mr. Jonas Glotfelty, residing on Deep Creek, about 9 miles from Oakland, was bitten by a rattlesnake, under the following circumstances: He had been out caring for some cattle, and whilst on his way home stopped to gather and eat some blackberries, when he was struck on the inside of the right wrist. He did not see or hear the snake, but felt that he had been bitten by a rattlesnake, and ran home, thereby heating his blood and aiding the spread of the poison throughout the system. Dr. Glotfelty, of Accident, was called, who, upon an examination of the arm, said that the boy must die. The arm swelled to such an extent as to burst, and the boy died about 3 o'clock Monday afternoon, after suffering untold agony.

Resolutions Passed.

The following resolutions were passed by Oakland Lodge, No. 114, I. O. G. T., at a meeting held Aug. 11th, 1885:

Resolved, That this lodge has heard with deep regret that the Local Option law is being openly, willfully, and persistently violated in the town of Oakland.

Resolved, That whilst the number actually engaged in violating the law are few, we regret to say a large number of our citizens sympathize with the violators, and give them their moral support.

Resolved, That we heartly endorse the course pursued by those among us who are endeavoring to enforce the law, and bring the law-breakers to justice, and we pledge those thus engaged our hearty co-operation and support in all legitimate efforts to enforce the Local Option law.

By order

COMMITTEE.

Obituary.

Eli H. Sell was born in Preston county, W. Va., April 7th, 1854. He was brought up in the M. P. Church. At the age of 21 he emigrated to Lenawee county, Mich., where he contracted the fever and ague, which settled in his loins and resulted in disease of the kidneys, which disease proved to be beyond the control of the best physicians of Michigan. They advised him to return to the mountains of the east, which he did in the spring of 1884, settling near Deep Creek, in Garrett county, Md. Until about three weeks previous to his death he had been improving in health, when, from over-work and exposure, his old disease returned in an aggravated form, and after two weeks of extreme suffering he passed away in perfect peace, Aug. 1st, 1885, aged 31 years, 3 months and 24 days. While in Michigan he was converted and joined the church of United Brethren in Christ, in which he remained a consistent member until his Heavenly Father said: "It is enough, come up higher." He brought with him a letter of good recommendation from his pastor and the writer received him into the church at Deep Creek, where he labored earnestly and faithfully for the master. His last words were "I bid you all farewell, I am going home to rest." Truly "How blest the righteous when he dies. The end of that man is peace." He was married to Miss Mary L. Shaffer Dec, 29th, 1875, who with four small children, are left behind on the shores of time to mourn the loss of a kind husband and father. May the widows' best Friend and the Father of the fatherless ever comfort and keep them.

ALBERT DAY,
Pastor.

A Crowning Triumph.

W. W. Cole's Colossal Shows are coming, and will exhibit at Oakland on Friday, August 21. That Mr. Cole has the greatest show now on the road is frankly admitted by both press and public. The surpassing excellence of his entertainments, which exceed in extent and variety of interesting and novel features anything heretofore presented in the circus line, is thoroughly attested. The exhibitions given under a mammoth canvass, are unique in character and abounding in startling feats, comprising over sixty distinct acts, performed in succession in the rings and upon the elevated stage. The old time circus features, such as riding, tumbling, leaping, etc., are retained, to which are added such novel and astonishing attractions as aerial bicycling, performing Arabs, Turks, Moors, Egyptians, Mexicans and Spaniards; M'lle Aimee, the Human Fly, who walks head downward upon a polished plane of wood, sixty feet above the ground; grand roller skating carnival, a clown elephant and a performing white hippopotamus from the historic Nile; an equine wonder in the shape of the horse Blondin, that has reached the zenith of brute intelligence by learning to walk a tight-rope stretched twenty feet above the ground. A decidedly interesting feature in the natural history department is the bovine curiosity—a living, healthy cow, with two distinct and perfectly formed heads, each with its complement of horns, eyes, ears and mouth. This feature alone is a study for naturalists.

Many cages of wild animals, and numerous trained animals, occupy the menagerie tent. A better or more pleasing show could not be got together, and the popular verdict places W. W. Cole at the head of the procession as the greatest showman of the country.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Accident.

Rain.

The town lively.

We are having rather cool weather.

There are forty scholars enrolled so far.

Farmers are about finishing up their harvest.

Politics is getting warm among the Democratic brethren.

Many strangers visiting our place aside from the Normal students.

The political mecca seems to lie in the direction of Grantsville.

Mr. H. Richter and wife, of Chicago, are spending the summer here.

The fight over the postoffice here promises to be hot, instead of warm.

Eli McMillen, Esq., is at present visiting friends at Mountain Lake Park.

Dr. B. T. Keller and Hon. R. T. Browning passed through lately on a visit to Grantsville.

Messrs. Miller & Co. have gone 80 feet deep at Conrad Fratz, with plenty hard rock all the way down.

Rev. Pugh, who has been quite ill has recovered. Rev. Shoup who lately injured his back, is around again.

A few summer boarders have found their way here. The business from present aspects does not appear too promising.

Miss Piggate, of Baltimore, lately stopping with Dr. Glotfelty, has taken with her some very fine studies of Garrett county.

Gorman is not a boss, oh! no! Who said he was? All the same there seems to be an uncommon anxiety to get down on his side of the fence.

Miss Butler, of Washington, has introduced a new singing book by Dr. Robinson, and is giving free instruction to the Sabbath School scholars.

Cyrus Stark, while working at a lath mill had his hand badly lacerated, necessitating the removal, by Dr. Glotfelty, of the two front fingers of the right hand.

Mechior Weller is making very extensive repairs to his grist mill. Mr. John Bowman has undertaken part of the job, and Mr. Wilhelm, of Addison, Pa., will put in new machinery, &c.

We can safely say that so far there has been very little interest manifested by Republicans as regards the fall election. There has been no conferences, no canvassing and no attempt to make slates.

The amount of political gossip afloat, just at present, would fill an interesting volume. There is a probability of a serious accident yet to some slates said to have been very carefully made.

The Normal scholars have organized a literary society under auspicious circumstances. Edward Boyer, lately from Mount Union, Ohio, is President; Thaddeus Hinebaugh, Secretary. Further notice will be given.

We are much pleased with the Normal school scholars, as well as teachers. The gentlemen and ladies comprising the school are a creditable representation of the teachers of Garrett county. So many handsome ladies have never before been seen on the streets of Accident. Of course we wish we were young again.

For the benefit of western friends will say that the season in Garrett has been, all things considered, a good one. Crops are generally good. Oats and corn promise well; buckwheat will be only moderate, it is thought. Fruit of all kinds has been abundant—peaches and cherries excepted. Apples will be plenty generally. We have had no destructive storms, but rather extreme hot and cool weather. Taxes are somewhat lower owing to an increase in the taxable basis. Whether the increase is fictitious and to be returned as insolvent with increased taxes in the future, as has been already intimated, we will not pretend to say. We hope, however, for the best, and trust that whoever may succeed our present board of county commissioners will endeavor to lift some of the burdens of high taxes. There seems to be a general complaint of scarcity of money, which is an indication of hard times in business quarters generally.

E. H. G.

Mountain Lake Park.

The Assembly opened promptly at 10:30 on last Thursday, the 6th inst. Quite a number of the lecturers were present and took part in the ten minute talks. The entire morning was taken up in this way, which made it a very pleasant occasion. In the afternoon the Normal Institute by Dr. Frysinger, the Greek Department by Rev. C. E. Young, and the C. L. S. C. by Rev. J. T. Judd were organized, and each class entered at once upon their respective duties. At night Prof. A. A. Line gave us an exhibition of stereoptican views of Mountain Lake Park and vicinity, which was very interesting even to those who live here. On Friday morning Mr. J. B. Phipps gave us another of his grand chalk talks, which was more like an earnest sermon than a lecture to parents concerning the standing of their boys on the royal road of life. In the evening Dr. Miller gave us a grand lecture on "Martin Luther," and on Saturday morning he gave us another on "Pluck," which was not only calculated to strengthen this qualification, but to beget it within those who are the most destitute of it. In the evening a grand concert and entertainment was given. The receipts were $112, which a little more than paid for the splendid bell in the tower. Dr. Miller preached for us Sabbath morning. Sabbath School was held at two o'clock, young peoples meeting at four, and preaching again at night by Dr. Baugher. At 10:30 Monday, Dr. Baugher gave us one of the most interesting lectures on sketches of travel to and in Europe, that I have ever listened to. As he had stated, he read to us the story book in the morning, then in the evening he turned through it again showing us the pictures, which were both very instructive and beautiful.

Dr. Frysinger stated the other day that everything we had up here was first-class. The rain, the sunshine and all the gatherings would come under this head. As the one to give the entertainment this morning was sick and in bed and no one could be found to take that one's place, the Dr. said that he supposed that there was nothing to announce but a first-class disappointment, unless he would take the Assembly for a text and preach for us an Assembly sermon. This he did most effectually.

Mr. J. M. Jarboe of Oakland, and Mr. C. Mayers of Terra Alta, are among our summer residents.

J. A. E.

[Unavoidably crowded out last week.]

Friendsville Cullings.

The Rev. F. G. W. Ford was on a trip to Barbour county, W. Va., last week.

Mrs. Ford who was visiting there accompanied him home,

Mr. Andrew Collins, who has been stopping at Oakland for some time, was circulating among his many friends here last week.

Mr. Wm. Ryland, of this place, made a flying trip to Confluence, Pa. one day last week.

Mr. Will Rush and others, from Uniontown, Pa., are here on a fishing expedition.

We had the pleasure of greeting the smiling face of Mr. Herman Sayage, of Sang Run, Sunday. Perhaps he has a Friend down here that he wished to see.

Mr. George D. Frantz is building a nice dwelling house that will be completed in a short time.

Mr. Kessler, of Selbysport, is repairing the Kent Mill property at this place. Will soon have the repairs completed, and then expects to move his family here.

The Rev. D. A. Friend, of Albrightsville, W. Va., visited his parents, Mr. and Mrs. Joshua Friend, of this place, last week.

Professor John A. Steele, of this place, was visitings friends at Johnstown, Sunday.

Mr. Joshua Friend spent a few days at Oakland last week.

BETSIE.

Advertise

If you want a farm put a small advertisement in THE REPUBLICAN; you will get more information in that way, in spending $3 or $5, than you would by spending $50 in traveling. If you want to sell your land, advertise in THE REPUBLICAN; it goes to all parts of our county, as well as to adjoining counties in Maryland, West Virginia and Pennsylvania, and is seen by those who are looking for new homes. If you have anything to sell or buy, any wants, advertise in the paper having much the largest circulation of any paper in the county. It gives value received, and can not fail to reach the most desirable parties, and bring excellent results.

English Press on Grant's Funeral.

LONDON, August 10.—The London papers all contain articles this morning on the funeral of the late General Grant, and are unanimous in concluding that it was a wonderful and impressive cortege. The *Times* prints a three-column account of the funeral procession, and contains a leading editorial highly eulogistic of the dead General, and recalling many of his personal traits.

In addition to its account of the Grant funeral, the *Times* this morning, in its editorial expresses unbounded admiration for the conduct of the American people concerning the burial of Gen. Grant, and pronounces the funeral a "spontaneous outburst of National admiration and gratitude, which, although it can do nothing for the actual object, is not therefore the less to be commended." In conclusion the *Times* says: "No other nation and no former period could have afforded the materials for such a procession as that of Saturday, or even the physical conditions which enabled its members to come together."

OAKLAND, GARRETT CO., MD.

IRREVOCABLE.

The waves leaped up on the long white beach,
  Leaped up and ran back again;
Their sound was almost fashioned in speech—
  Sweet longings and sighs of pain.
There were tiny shells strewn on the sand,
  And Margot, our neighbor's daughter,
Went gathering them in her small white hand,
  While I gazed over the water.

A boat came darting around the pier,
  My own true lover bringing,
And his shout of welcome I could hear
  Clearer than Margot's singing.
While "O, come!" he cried, "and sail with me;
  With spray my mast is wet;
We'll fly o'er twenty miles of sea
  Before the sun is set!"

But I—I thought of the garden wall
  That held the winds aloof,
And the sheltered mossy seat, and all
  The roses that climbed the roof.
"Nay! come ashore!" I called; "I fear
  The billows and the gale."
But still he answered: "Nay, come here,
  Sweet love, with me to sail!"

I frowned at last, and I shook my head;
  His cheek took a redder glow;
"O, fie! for shame," mocking Margot said;
  "If he will take me, I'll go!"
Lightly she ran o'er the sandy beach
  Where lingered the grating keel,
And his outstretched hand helped her to reach
  My place, by tiller and wheel.

Dark and stern was my lover's face,
  Yet he called once more to me;
But merry Margot sat there in my place,
  And I turned back from the sea.
I heard the rattling of sail and rope,
  I heard a light farewell,
But I bent to watch a primrose ope
  And gathered a faint pink shell.

They had gone their twenty miles and more
  Or ever the day was done;
They were heading toward the tide-washed shore
  Before the set of sun.
But a cruel cloud rose wild and black,
  And a storm-blast swept the sea;
No sail could live in its savage track,
  No boat could return to me.

They were wrapped in the billows' mad embrace;
  They were drowned in sight of land;
They found together a burial place
  On the cold, dark beds of sand.
O, break, my heart; since here to abide
  Is but to cry o'er and o'er,
Would it were I lay drowned at his side!
  Would Margot walked here on the shore!

IN BUTTERFLY TIME.

After Forty Years of Faithful Waiting.

"Seems to me the butterflies is dretful thick this season, Becca."

"Yes, they do seem to be consider'ble thick, mother."

"I never see 'em so thick. Thar's hull swarms on 'em: lots of them common yallar ones, an' leetle rusty red ones; an' thar's some of them big spotted ones, ain't thar? Near's I kin see through my specs, thar's one now a-settin' on that head of clover."

"Yes, there is one, mother."

"Thar's lots of grasshoppers, too. The grasshoppers air a-risin' up around my feet, an' the butterflies air flyin' up in my face out of the flowers. Lor, hev we got to the bars a'ready? I hadn't no idee on't. Be keerful about lettin' on 'em down, Becca."

The younger of the two old women let down the bars which separated the blooming field which they had been traversing from the road, and they passed through.

"S'pose you'd better put 'em up agin, Becca, though thar ain't any need on't, as I see. Thar ain't nothin' in the field to git out but the butterflies an' the grasshoppers, an' they'll git out if they want to, whether or no. Let me take holt."

"There ain't any need of it, mother."

"Yes, I will, too, Becca Wheat. I'm jest as strong in my arms as ever I was. You 'ain't no call to think I ain't."

"I don't think so, mother; I know you're real strong."

"I allers was pretty strong to lift—stronger'n you."

The bars up, the two women kept on down the road. It was bordered by stone walls and flowering bushes. Ahead, just as far as they could see, was one white house. They were going there to a women's prayer-meeting.

The older of the two kept a little ahead of the younger, trotting weakly through the short, dusty grass. Her small old head in a black straw bonnet bobbed in time to every step; her sharp, yellow little face peeped out of the bonnet, alert and half aggressive. She wore a short black shawl tightly drawn over her narrow, wiry back, and held her hands folded primly in front over the two ends.

The other woman, her daughter, pacing dreamily behind, was taller and slenderer. Her face was pale and full, but slightly wrinkled, with a sweet, wide mouth. The pleasant expression about it was so decided that it was almost a smile. Her dress was slightly younger, a hat instead of a bonnet, and no shawl over her black calico afternoon dress.

As they drew nearer to the house the old woman peered anxiously ahead through her spectacles.

"See any one thar, Becca?"

"I should think two women jest went in. I couldn't tell who they was."

"You'd orter wear your spectacles, Becca, your eyesight ain't so good as mine was at your age. She's got her front room open for the meetin'. I kin see the curtains flappin'."

Quite a strong soft wind was blowing. As they went up the front walk between the phlox bushes with their purplish-pink heads, the green curtains with a flowery border swung out of the windows of Mrs. Thomas' best room, the one on the right of the front door.

The door stood open, and a mildly curious face or two showed through the windows.

"Thar's old Mis' Wheat an' Becca," said some one in a whisper to Mrs. Thomas, and she came to the door.

There was a solemn composure on her large, comfortable face. "Good-afternoon, Mis' Wheat," said she; "good-afternoon, Becca. Walk in."

They walked in with staid demeanor, and took their seats. The chairs were set close to the walls around the room. There were nine or ten women there with good, grave faces. One old woman sat close to the mantle-shelf, and Mrs. Wheat took a vacant chair beside her.

"How d'ye do, Mis' Dill?" whispered she, reaching out her little skinny hand.

The other shook it stiffly. She was as small as Mrs. Wheat, but her little face was round, and her chin had a square decision in its cut, instead of a sharp one. She had a clean, nicely folded white handkerchief in her lap, and she wiped her spectacles carefully with it and looked through them at Mrs. Wheat before replying.

"I'm enjoyin' pretty good health jest now, thankee, Mis' Wheat," whispered she.

Mrs. Wheat's eyes snapped. "You do seem to be lookin' pretty middlin' for one of your age," said she.

Mrs. Dill gave a stony look at her.

The meeting began then. The good women read in the Bible and prayed, one after another, the others silent on their knees beside her. Their husbands and sons in the hay fields, the children in the district school, the too light-minded though innocent village girls, the minister wrestling with his dull sermon faithfully in his shabby study, the whole world, were remembered in their homely petitions. The south wind sang in at the windows; a pine-tree around the corner of the house soughed; the locusts cried shrilly over in the blossoming fields; and their timid prayers went up.

Old Mrs. Wheat, in her corner, on her knees, listened with an outward show of reverence, but she was inwardly torn with jealousy. She was the last one called upon to take part; even old Mrs. Dill was preferred before her. But she had her revenge; when she did get her chance to speak, long and weary was the time she kept the devout sisters on their aching knees.

She had been storing up a good deal to say while the others were praying, and now she said it. For church and town and commonwealth, for missions at home and abroad, her shrill cry went up. Lastly she prayed, with emphatic quavers, for old Mrs. Dill. "O Lord," pleaded she, "remember, we pray Thee, this aged handmaiden at my side. May she long enjoy what blessin's are left to her in her age an' decrepitood. Sanctify her trials unto her, an' enable her to look away from the feebleness an' want of strength which is now her lot on this airth, to that better country where the wicked cease from troubling an' the weary air at rest."

When the prayer was ended, Mrs. Dill rose softly from her knees and sat down. Her face was absoluteiy immovable as she met Mrs. Wheat's glance when the meeting broke up.

The two old ladies were left in the best room alone for a little while. Mrs. Thomas, who was Mrs. Dill's daughter, wanted to see Becca about something, so she called her out into the sitting-room.

"You an' Mis' Wheat can visit a little while, while Becca an' I are out here," said she.

Mrs. Dill looked at her daughter when she said this, as if inclined to decline the proposal. Then an expression of stubborn fortitude came over her face, and she settled herself solidly in her chair.

The two looked primly at each other when they were left alone.

"How is Mis' Thomas?" said Mrs. Wheat; "an' how is Adoniram?"

"They air both well, thank ye."

"I s'pose Adoniram is to work?"

"Hayin'."

"I thought I ketched a glimpse of him in the field over thar when I come in. Adoniram grows old, don't he?"

"I don't know."

"I sot lookin' at him in meetin' last Sabbath, an' thinkin' how dretfully he was altered. I hope he'll be spared to you as long as you live, Mis' Dill. It's consider'ble better on your account that he hain't never got married, ain't it?"

Mrs. Dill reddened and stiffened her chin a little. "Thar's a good many folks don't git married, Mis' Wheat; men, an' women, too, sometimes."

"Becca could 'a got married dozens of times if she'd wanted to, Mis' Dill."

"I s'pose so."

"See here, Mis' Dill, s'pose we come to the p'int. You're allers kinder flingin' at me, an' I know well enough what it means. You've allers blamed me 'cause you thought I come betwixt my Becca an' your Adoniram, an' I didn't as I knows on."

"O, no; course you didn't."

"I s'pose you don't believe it, Mis' Dill?"

"No; I 'ain't forgot how Adoniram come home from your house, jest about this time o' year, a matter o' forty year ago."

"I don't know what you mean."

Mrs. Dill sat up straight in her chair, and talked with slow emphasis. Her eyes never winked.

"Jest about this time in the afternoon an' this time o' year, 'bout forty year ago, Adoniram come home from your house. They'd got the hay in the day before, so he had a leetle restin' spell, an' he went right over thar. I knowed where he'd gone well enough, though he made up an arrant after a rake to Deacon White. I knowed he'd stop to Becca's before he got home. She'd been off visitin', an' he hadn't seen her for a week. She'd jest got home that mornin'. Well, Adoniram went, an' he come home. I was a-goin' through the front entry when he come in through the settin'-room. He was jest as pale as death. I asked him what the matter was an' he wouldn't say nothin'. The door stood open in here, an' he come in an' dropped into a cheer by the table, an' put his head down on it. I coaxed an' coaxed, an' finally I got it out of him. He'd been over to Becca's, an' you'd treated him so he couldn't ever go again. He said you didn't like him, an' that was the end on't. Becca couldn't go agin her mother's wishes, an' he wasn't ever goin' to ask her to. Adoniram had jest joined the church that spring, an' he'd jest as soon cut his hand off as to lead Becca to disobey her parents. He's allers had a strong feelin' that marriages made that way wa'n't blessed. I've heerd him say so a good many times. So——"

"I'd like to know what I did to mistreat Adoniram, Mis' Dill."

"He never told me the hull perticklars. Thar was somethin' 'bout a butterfly."

"Lor, I remember. 'Twa'n't nothin'—nothin' at all. Young folks air so silly! I remember jest as well as of 'twas yisterday. Adoniram an' Becca was out in the yard in front of the house. Becca had it all laid out in flower beds jest as it is now, an' thar was swarms of butterflies round 'em. They was out thar in the yard, an' I was in the settin'-room winder. They was kinder foolin', an' all of a sudden Adoniram he begun chasin' a butterfly. It was one of them great blue-spotted ones. He caught it mighty spry, an' was a-givin' it to Becca, when I said somethin' out o' the winder. I don't know jest what 'twas. I thought 'twas dretful silly for him to waste his time ketchin' butterflies, an' Becca had some sewin' I wanted her to do. I s'pose 'twas somethin' 'bout that."

"You didn't think Adoniram was good enough for Becca; that was the hull on't."

"That wa'n't it, Mis' Dill. I don't see how you come to think sech a thing."

"You'd jest set your heart on havin' her git that rich Arms feller; you know you had. But she didn't; she didn't git anybody."

Mrs. Dill's thin voice quavered and shook, and her little bony form trembled all over, but the spirit within her manifested itself bravely through shakes and quavers.

"You air misjudgin' of me, Mis' Dill, an' you ain't showin' a Christian spirit. You'll be sorry for it when you come to think it over. You'll see 'twas all jest the way I said 'twas, an' I didn't mean nothin'. Let alone anything else, it's awful cruel to ketch butterflies, you know that, Mis' Dill."

"You've done a crueler thing than ketchin' butterflies, Martha Wheat."

"Well, Mis' Dill, I guess we'd better not talk 'bout this any longer. 'Tain't jest becomin' after the meetin' we've jest had to git to disputin'. Thar's Becca."

Going home along the green-bordered road and across the flowery field, Rebecca Wheat noticed that something seemed to have disturbed her mother. The nervous old woman fretted and fidgeted. In the middle of the field she stopped short, and almost danced up and down with feeble, childish wrath.

"Why, what is the matter, mother?"

"Them pesky butterflies!" ejaculated her mother, waving her trembling hands. "I'd like to poison their honey for 'em."

"Let me go on ahead, mother; then they won't bother you so much. I kin kinder brush them away."

"Well, you may, if you're a mind ter. Say, Becca—speakin' of butterflies brings it to mind. You never thought I was ter blame 'bout separatin' you an' Adoniram Dill, did you?"

The old daughter looked pleasantly into her old mother's face. "I didn't blame anybody, mother. I didn't think you used to like Adoniram very well; but it's all over now."

"You didn't take it to heart much, did you, Becca?"

"Not enough to hurt me any, I guess. Do you mind the butterflies so much with me ahead?"

"No, I guess I don't. I've kinder been thinkin' on't over lately, an' ef I was kinder sharp 'bout that butterfly business, an' hindered you an' Adoniram's makin' a match on't, I ain't above sayin' I might hev been a leetle more keerful. Adoniram's turned out pretty well. Mis' Higgins told me yisterday that he'd jest bought that ten-acre lot of Deacon White's. I guess he must hev been layin' up money. Well, Becca, I dessay you air better off than you would be ef you'd been married. It's pretty resky."

Rebecca, plodding before her mother, looked ahead at the familiar landscape, with that expression of strong, pleasant patience which the years seemed to have brought out in relief on her face, like the chasing on silver. It made her more attractive than she had been in her youth, for she had never been pretty.

She and her mother reached the comfortable house, with three great elms in front of it, where they lived, two hours before sunset.

About an hour later Adoniram Dill went home too from his labor across the fields. He was a tall, muscular old man, with a strong-featured beardless face. He was so straight and agile that he looked like a young man the width of a field away. When he came nearer, one saw his iron gray hair, the deep seams, and the old brown tint of his face with a start of surprise.

Supper was not quite ready, so after he had washed his face and hands at the kitchen sink, he went into the sitting-room and sat down in a calico-covered rocking-chair with a newspaper. His mother looked in presently, and saw him there.

She stood in the entry door and beckoned him solemnly. "Come into the parlor a minute," she whispered; "I've got somethin' I want to tell you, an' the children will be racin' in here."

Adoniram rose and followed her in obediently.

She shut the parlor door and looked round at him. "Adoniram, what do you think? Mis' Wheat was over to the meetin' this afternoon, and she an' me had a little talk arter the others was gone, an' she brought up that old affair of you an' Becca again."

"There ain't any use bringin' it up, mother."

"She says she didn't mean to say when she talked to you so about *that* butterfly business. She jest thought you hadn't orter be wastin' your time doin' sech cruel things as ketchin' butterflies, an' she wanted Becca to come in an' do some sewin'. That's what she said. I let her know I didn't believe a word on't. I told her right to her face that she thought you wa'n't good enough for Becca, an' she wanted her to hev that rich Arms feller."

"Seems to me I'd have let it all gone, mother."

"I wa'n't goin' to let it all go, Adoniram. I'm slow-spoken, an' I don't often speak, but once in awhile I've got to. She's the most aggerratin' I don't know what you would hev done with her ef you had married Becca. You'd 'a had to hev her arter Mr. Wheat died. She 'ain't never liked me. She tried to be dretful nice to me to-day, 'cause she'd got an ax to grind; but she'd got so much spite in her she couldn't help it showin' out a leetle. Why, she'd kerried it into the prayer-meetin', she did, Adoniram. She *prayed* for me, 'cause I was so old an' broke down, an' she's three year older'n me. I think it's awful to show out that way in a prayer-meetin'."

"P'raps she didn't mean anything."

"Yes, she did. I knew jest what she meant by the hull on't, Adoniram Dill. She's got kinder sick livin' thar alone with Becca, without any man to split up kindlin'-wood an' bring in water, an' she's tryin' to git you back again. She jest the same as said she hedn't no objections to it. I guess she thinks you've been doin' pretty well, too. She thinks it would be a mighty nice thing now to hev you step in thar with your money an' wait on 'em. I see through her."

"P'raps it ain't so, mother."

"Yes, 'tis. Adoniram Dill, you don't mean to say you'd hev any idee of marryin' Becca Wheat, arter you've been treated as you hev?"

"You ain't heard me say any such thing, mother."

"I thought you looked kinder queer. You wouldn't, would you, Adoniram?"

"Not if it didn't seem for—the best. I don't—know."

All of a sudden Adoniram Dill sat down beside the little parlor table and leaned his head on it as he had forty years ago.

"What's the matter?" his mother asked, with a scared start, looking at him with awed eyes. It was almost like a coming back of the dead, this rising of her son's youth from its snowy and grassy grave in her sight. "O, Adoniram, you poor boy, you ain't felt jest the same way about her all these years? It's awful. I hadn't any idee on't."

"Never mind, mother. Jane's callin' us to supper; you go right along, an' I'll come in a minute."

"Thar ain't any need of your havin' any more frettin' about it, anyhow, Adoniram. Her mother's willin', an' I ain't a doubt but Becca is. I've seen her look kinder down-hearted sometimes; for all she's so good an' uncomplainin', I guess she's been worried as well as some other folks. You jest tuck up arter supper an' go right over an' ask her. Thar ain't no reason at all why you shouldn't. You ain't nuther of you so very old, not more'n sixty. An' I don't know as Mis' Wheat 'll be so very bad to git along with. I dessay she's meant all right."

Adoniram said nothing. He rose with an effort, and went out to supper with his mother, who kept gazing at him with loving, questioning eyes.

"Ain't you goin'?" she whispered when they were in the sitting-room again.

"I guess not to-night, mother."

"Well, mebbe 'tis jest as well to wait till to-morrer. I don't want Mis' Wheat to think you was in too much of a rush."

After his mother had gone to bed, and the summer night was complete with all its stars out-of-doors, he sat down on the front door-step alone and thought. He felt like a wanderer returned to some beautiful, dear country, the true home of his heart, which he had never thought to see again. To-night the golden gates of youth swung open with sweet music for Adoniram Dill, with his gray locks and his hard, seamed face, and he entered in, never knowing he was any different.

The steadiness with which he had kept to his ideas of duty for the last forty years gave his happiness, now that the long strain was over, an almost unearthly, holy character. It was truly the reward of virtue. The faithful old man who had taken what he considered to be the right course for himself and the woman he loved, without question or appeal to that mandate of obedience which he read so literally, was capable at sixty of being as freely happy as a child.

The sordid motives which had possibly actuated Becca's mother to withdraw her opposition at last did not fret him at all. He was far above it. That hard, shrill voice which had rung out of that sitting-room window for him for the last forty years was still. The voice had truly said cruel things, more cruel than its owner would own to now. The poor, honest young man had gone away that day with the full and settled understanding that his sweetheart's mother was bitterly opposed to him, and that must be the end of it all. He never dreamed of such a thing as urging her to marry him without her mother's consent.

So he had never been in that front yard, full of roses and pinks and butterflies, since.

He and Rebecca had met in the village society like kindly acquaintances for all these years.

Adoniram, looking across the little country church Sunday after Sunday as the years went on, might have seen the woman growing old who should have grown old by his side, with bitter regret, and Rebecca, with patient sadness, have marked his entrance among all the congregation; but no one had known.

The day after the meeting Adoniram had to drive over to the store on business. On his way back he passed a house where an aged sister of Mrs. Wheat's lived, and saw, with a start, the latter's thin face at a window. "I wonder if Becca's home?" said he. Then he drove on quicker, with a gathering resolution.

About four o'clock he was going across lots through the field toward the Wheats'. He had his Sunday coat on. When about half-way across he saw a woman's figure approaching. Soon he saw it was Rebecca. He stood in the narrow foot-path, between the tall clover and daisies and herd's-grass which came up to his knees, and waited.

She greeted him, when she reached him, in her usual good, placid way. "How do you do, Mr. Dill?"

"I was coming to see you, Becca."

She looked at him, and the calm lines in her face changed a little. "I'll go back. I was going after mother, that was all; but she won't be in any hurry.

"No, there ain't any need of your goin' back. I can say what I wanted to jest as well here, an' then you can keep right on after your mother. Becca, supposin' 'twas forty year ago, an' you an' me was here, an' your mother was willin', what would you say ef I asked you to marry me?"

Great tears stood in her eyes. "O, Adoniram, it wouldn't be fair."

"Don't you think your mother would be willin'?"

"I don't think she's so set agin it as she was, but 'twouldn't be fair. I'm sixty year old, Adoniram."

"So'm I, Becca."

She shook her head. "No, Adoniram, it ain't any use. It might have been different once. Now, after all this time, when I'm old an' broken down, an' the fault of all the trouble on my side of the house, I ain't goin' to be so mean as to let you marry me. It ain't fair."

Adoniram gave one step forward and caught his old sweetheart in his arms. "I've been waitin' for you forty year, Becca, an' there ain't nothin' more comin' betwixt us. Don't you say anythiog more about it's not bein' fair."

"You know mother 'll hev to live with us."

"I'll try an' make her jest as happy as I can."

The clover and the grasses rustled in the wind, and the butterflies came flying around the old man and his old sweetheart standing there. It would have made no difference to them if they had been waiting in their little chrysalis coffins a hundred years so, they were butterflies now. There were yellow ones and little rusty red ones, and now and then a gorgeous large one with blue spots on his black wings. Seeing one of these male Adoniram remember something swiftly.

"Want me to ketch a butterfly for you, Becca?"

"I've got one now you caught forty year ago."—*Mary E. Wilkins, in Harper's Bazar.*

SUMMER LIFE IN CITIES.

Some of the Mistakes Committed by Most People—Lessons to be Learned From Inhabitants of Tropical Regions—Timely Suggestions.

There is need of education in the manner of living comfortably during the hot months of the year. With all our much-vaunted improvements in building, the house that is cool is still the exception. The architects, more anxious to display their taste in designing "elevations" than their ingenuity in making plans, seldom take into account the varying demands of our climate, and the stuffy house, through which it is impossible for the liveliest breeze to travel, is still the rule. If they build huge apartment houses, or family hotels, always do they set the stair-well in the center. If the upper story is a mansard, and consequently better fitted by its shape than the old-fashioned garret in the gable-roof for living, it is made uninhabitable by the failure of the builder to provide a liberal space with opportunity for circulation of air between ceiling and roof. Wide streets with buildings of moderate height are far less comfortable than the narrow lanes between high stone buildings which one finds through all the cities of the tropics. But so long as we build of wood the wide street is safest. Then it gives a chance for trees, and is certainly best in winter when one wants all the sun he can get. Heat, however, is poured upon man in cities intensified by reflection from the buildings and the sidewalks, and increased in length of infliction by the storing of the heat in bricks or stone to be given off after the sun has sunk. No man thinks of doing anything with the front of his house for the comfort of passers-by. Else we might borrow an idea from the Mexican, who runs a huge awning over the roadway to his neighbor's house opposite. With our English traditions still clinging, we—that is, the men—insist on dressing in clothes of the same material, though lighter weight, as we use for winter wear. This, however, is wiser than the wearing of starched thin clothes, as was the fashion twenty and thirty years ago. Our hats may be of straw, but they are low-crowned. Our shoes may be low cut, but they are of stout leather. Our suits must not be less than trousers, vest and coat, and the man who receives a caller with either vest or coat removed runs a terrible risk with Mrs. Grundy. Most important of all is the question of food. There are certain heat-producing viands, such as fat meats, that one can not too studiously avoid during the summer. Here again we may take a hint from the tropics. But there are also certain heating articles, such as condiments, that, moderately used, are wholesome as counter-irritants, so to speak, and to the tropics one may go for hints on this score. Ice-cold drinks and chilled food are to be avoided as though they were poison. There is, in consequence of the great loss to the system of fluids by perspiration, a craving for drinks. But the mouthful of ice water, held in the mouth, will relieve the thirst more surely than will gallons of the same beverage swallowed. The system, too, may be surely and safely cooled (when not heated to too high a point) by pouring ice water on the wrists. All these hints and cautions have been spoken numberless times, but there can be no harm in repeating them. And let no one, though he pretend to be a man of science, forget that no rule of life—how to dress or what to eat and drink—can be laid down for all to follow. In iron mills, where the mercury is never below ninety degrees, and where the heat comes from gigantic furnaces in great blasts that almost scorch the skin, men work dressed in thick flannel. But that is not the wear for all those whose duties are performed in the open air, or who, in consequence of our persistence in absurdities of building, live and work where the air, heated by the sun during the days when his courses are the longest, encompasses and wilts its victims.—*Boston Transcript.*

—An American publisher is producing an excellent substitute for glue for the use of bookbinders. It is called gum gluten, and is free from smell, very adhesive and strong. By its use it is claimed that a saving of seventy-five per cent. can be effected in a bookbindery in a twelvemonth, one hundred weight of gluten going as far as six of glue.

AN ITALIAN LOCUST HUNT.

How Capri Peasants Destroy the Summer Pest by the Wholesale.

I was quietly at work in my study at Capri one day in a very hot August, laboring to breathe as well as the great heat would let me, when a wild-looking youth rushed in to me from Anacapri, crying out that the locusts had come. The disease of the vine had already caused great loss, and now there were the locusts eating up the harvest. A great part of Anacapri was as bare, the youth told me, as if a fire had swept across it. The invaders had already got over the brow of the mountain and were in the woods below. Would I go out and see them. Certainly I would.

As we approached their advanced guard under cover of a low wood, we could hear the incessant click, click, of the enemy, and every now and then we were fallen upon by their scouts, which dashed against our faces and clung to our clothes. As we proceeded we found them frolicking in legions, like imps let loose for mischief. The atmosphere being rather thicker than I liked, I did not go that morning to see how things looked at the worst. I went back to pay a visit to the Syndic and ascertain what could be done to mend them.

Trouble of this kind comes upon Capri every three or four years; but there has been no swarm so great as this one since the great plague of locusts which had occurred some twenty years before the time of which I am writing. "That, indeed," said my informant, was awful. They climbed our walls, got into our houses and churches, crawled over the altars, ate up the entire harvest, and who can say what might have happened if it had not been for St. Antonio? Some missionary priests were then among us, and they ordained a solemn procession of women; they were all to walk with their hair loose about their shoulders, with the priest in front carrying the image of the saint. Before the procession was over a strong east wind came and blew all the locusts into the sea, just over the Blue Grotto. Ah, signor, St. Antonio is powerful!"

Report having been formally made to the Syndic, His Excellency, in true official style, ordered a bag of the devastating animals to be collected and sent off to the Subintendent, who resided at Castellamare, in order that he might ascertain whether they were really locusts. Until that point was officially decided the Syndic could disburse none of the public money to arrest the plague, which, in the meantime, was of course spreading over the woods and fields with the rapidity of a prairie fire. The grain was being bitten off under the ear as cleanly as though cut by a knife, the fig trees being stripped and barked. The messenger did not arrive at Castellamare till after business hours, when the Deputy was enjoying his evening leisure and would be disturbed by no one.

On the next day, however, the Syndic of Anacapri, having obtained the requisite authority, attached a proclamation to the walls of the house, offering a reward for the capture of locusts at the rate of a penny for a pound. All the idle population of the district instantly became as busy as bees, and went out locust-hunting in parties of five or six, provided with sacks and sheets. A sheet held by a man at each corner being lifted up like a wall across the path of the invaders, one or two people with brooms beat the bushes and swept the earth, causing the disturbed locusts to fly on until the sheet was black with them. It was then quickly doubled up, the insects scraped from it into a sack, and preparations instantly made for capturing another batch in the same way. A locust hunter told me that he was earning at this work sixteen pence a day, or six pence beyond his usual daily wages. I was told also by the parish priest of Anacapri that in a few days the whole body of hunters in that small district captured upward of twenty hundred weight, but that he remembered one season in which there were as many taken in a single morning.

The reward for captured locusts was not paid until they were dead and buried. Dead and unburied they would soon putrefy under a hot sun and breed a pestilence. There is a point in the island called Monte Solario, about eighteen hundred feet above the level of the sea. Thither the locusts are all taken after they have been soaked in boiling water, and after having been in that way killed by the sackful, they are buried in a deep pit dug for the purpose.—*Household Words.*

The Rising Generation.

A bright little miss living on Eagle Street was given a warm cookie by a neighbor. Though contrary to her custom, the mother allowed the child to eat it. Shortly the little girl exclaimed, "Mamma, let me go and get another cookie; I know Mrs. —— will give me one." "No, dear, it will make you sick." "Will I die and go to heaven?" "Yes." "Well, Mrs. —— [her Sunday-school teacher] says heaven is a beautiful place." "You don't want to go to heaven and leave papa and mamma do you?" "Well, mamma, you get a cookie, too, and come with me to heaven."

While a little girl on Howard Avenue was being rebuked by her mother, she said, "Hush, mamma; if you scold so much you will make me nervous, and I shall die like ——." "Do you remember her?" said the mother. "O, yes," replied the little one, "and her mamma scolded and scolded her so much, she got so nervous she went sick and died. —*Utica Herald.*

—Tobogganning at Saratoga has become a summer as well as a winter amusement, showing American enterprise in a manner that must make original Canadian tobogganers blush with chagrin. The sledges are mounted on rollers and go rumbling down the sidewalks, where the streets are steep, to the great consternation of horses and pedestrians.—*Troy Times.*

With 40 tude in 8
Until wi 3 son 1 is led
2 choose a proper mate.
—*C. H. Dodge, in Detroit Free Press.*

A REMARKABLE WOMAN.

How She Founded the Scandinavian Temperance Sailors' Home in London.

One of the best known among English philanthropic institutions is the Scandinavian Temperance Sailors' Home in London, and one of the most interesteesting biographies of the century would be that of its famous foundress, Agnes Hedenstrom.

Left an orphan when quite a young child, she was brought up in the house of wealthy relatives in Upsala. Here she was petted and indulged to the last degree.

"Let the child have her own way!" said her friends. "She has no parents, poor thing!"

All her pranks were overlooked, and she grew up animated largely by the desire to enjoy herself and have her own way. Still a sense of dissatisfaction would make itself felt in her life. She was not quite happy, though she could have given no reason for her despondency. One day, however, she listened to an eminent Swedish preacher, and then for the first time became conscious of the religious element lacking in her own life, and of the fact that she only needed to fill her idle hours with thought and labor for others. She began preaching to her countrymen in the North, where no woman had been allowed to speak in public, first addressing small meetings and then vast assemblages.

For fome years she continued this work, becoming at last persuaded that it was her duty to go as a missionary to India. But while in London, awaiting an opportunity to engage in work abroad, she was impressed with the great need of laborers among the poor in East London. She began preaching to them in the streets, and it was there that the sound of her own language broke on her ear, half-smothered or inarticulate. There homeless, drunken Scandinavian sailors were ensnared by the hundreds, in horrible pitfalls of evil. For two years she worked among the sailors, preaching and persuading.

She still shudders at the recollection of her first address to some of her countrymen, at a place called the Strangers' Rest. Twenty drunken sailors had been collected in this room, and, alone and trembling, their countrywoman addressed them, while they shrieked and blasphemed. One after another, they became quiet, until the whole company was finally subdued. Next evening they came, bringing some comrades with them, and it was not long before a Scandinavian lecture-room was permanently established.

It was some years before Miss Hedenstrom could raise sufficient funds for a larger establishment, but in 1880 the Home was founded. Of this Miss Hedenstrom is sole manager. She corresponds with the members of her company, when they are abroad on voyages, receives and invests their money, and aids many a Captain in picking out his crew. Beyond all this, she superintends the "boys" who are temporarily on shore. For their benefit bedrooms are kept in order, meals are served in a large dining-room, and plenty of space is provided for them to pass their leisure hours amid books and newspapers. In short, the Home is an immense boarding-house, though of course it can not be entirely self-supporting, some of its patrons being quite destitute.

Miss Hedenstrom says of her charges: "I have never yet had a sailor among the five thousand that have been in this home who has returned from it to his former haunts; and, thank God! there are at present a good many decently-dressed men among the Scandinavian sailors in London, whereas, when I began my work, there was not a single one of all that came under my notice who did not look ragged or slipshod.

"I can do little to raise funds; but never yet have I asked anything in vain from my Heavenly Father."

It requires strong character for a work like this. But this woman seems to possess it, and to owe to it the fitness for her calling.—*Youth's Companion.*

Alcohol in the Kitchen.

"Of 622 moderate and immoderate drinkers with whom I have conversed, 337 tell me that they acquired the desire for wine and other alcoholic poisons by their use in articles of diet and in the family and social circle, dealt out to them by their wives and sisters and female friends. Of this number, 161 cases were from the use of liquors in articles of diet. Of the whole number referred to, 328 fill a drunkard's grave, 17 died of *mania a potu*, and five by suicide." These are the words of a physician who has made the subject a matter of careful study. If only women *could* be enlightened on this one point, and cease to be tempters.—*W. C. T. U. National Bulletin.*

The Board of Health to-day issued a request to the people, calling their attention to various ways of avoiding sickness. The following is a sample of the advice it gives: "Be careful to avoid the use of alcoholic drinks; do not suppose that their use will prevent the occurrence of disease. On the other hand, those who indulge in the habit of drinking are always fair subjects for disease, and when attacked the intemperate are particularly in a condition to offer feeble resistance."—*Philadelphia Ledger.*

THE key to a good situation is not whisky.—*Picayune.*

FARM AND FIRESIDE.

—Pop Overs: Four eggs, four cups of flour, four cups of milk, small piece of butter, pinch of salt. Bake in gem pans, and serve with sauce.—*The Household.*

—Fifteen tons of grasshoppers, comprising, it is estimated, 60,000,000 separate insects, were captured at the Natoma Vineyard, near Folsom, Cal., by drowning in the irrigating ditches.

—In many sections stone set on end make the best posts for supporting wire fence. Where hedge plants are set to complete the fence, the posts need not be over forty inches long, ten of which is in the ground, and the top carrying the main barbed wire as a security against breachy cattle.

—Next to clover, perhaps millet is the best forage crop. It requires rich land and a warm season. It is hardly any use to sow millet till the middle of June, and the time of growth is till the middle of September. It should be cut in the most succulent condition to be the most valuable.—*Boston Budget.*

—The slophole at the back door is productive of doctor's bills. Some people take the trouble to pour slops every day on different ground where they become lost to the doctor's profit through speedy drying up, but where the family will gather a gain from their wide and sure, if not always speedy, manurial effect.—*Exchange.*

—Baked Pineapple: Cut some slices of bread very thin, place them in a buttered baking dish and cover each slice of bread with a slice of pineapple. Put a bit of butter the size of a large bean on the center of each; place in a slow oven and bake. When done, dish, turn the syrup over and serve warm. If liked, the slices of pineapple may be soaked in kirchwasser for twenty-four hours before baking.—*N. Y. Mail.*

—"String beans," as they are more frequently called, are relished by almost every person either cooked or as pickled beans. A succession of sowings should be made until August. Sow about two inches deep in drills two feet apart, and not too thickly in the row. The golden wax is one of the best varieties, and has the further merit of being one of the best shell beans for winter use.—*Cleveland Leader.*

—A correspondent writes that all kinds of fruit can be perfectly preserved in crocks or other open vessels just as well as in cans, simply by packing cotton batting over it so as to close all the apertures. The fruit is cooked the same as for canning, the crocks, jars or other vessels filled, and the common unglazed batting put over and securely tied on. Professor Tyndall demonstrated several years ago that all putrefaction was caused by bacteria in the air, and that these could not penetrate cotton batting.—*Chicago Herald.*

—Stirring wet soil has such a bad effect that an entire season's cultivation will fail to make it friable and mellow. Especially is this the case with heavy land, where hard lumps point clearly to the mistake made in early spring. Nothing is ever gained by planting seed in wet soil, for the surface will certainly bake hard and cause failure of germination. Should abundant moisture remain after heavy rains, it is not a fit place for the garden, for the varieties of plant life that will flourish under such conditions are few indeed. On the other hand, the moment soil is sufficiently dry to work loosely, the better for early crops.—*N. Y. Tribune.*

PARIS GREEN.

The Importance of Great and Constant Carefulness in Using This Deadly Poison.

Paris green is so deadly a poison that some persons think it should never be used to kill insects on growing crops. Some go as far as to refuse eating potatoes altogether, since it is so commonly employed. A few prominent journals favor its prohibition by law. It can not be questioned that serious injury, and sometimes fatal results, have occurred from employing it. Those who apply it are often careless, and allow the wind to blow the dust into their nostrils, or they breathe the minute portions which rise in the air in mixing it. In one case a poor fence between a pasture and a potato patch allowed a herd of cows to break in, and several died from eating the poison. Animals have been poisoned from the vessels containing the arsenic, carelessly used for feeding. A field of potatoes on the windward side of a vegetable garden caused some of a family to become poisoned by eating the vegetables which had received some of the Paris green from the wind.

Such accidents, although few and far between, show the importance of great caution. The same care is required in the use of powerful appliances or machinery of any kind. Steam engines sometimes destroy life, but men continue to make and use them. Fatal accidents occur on railroads, but we are hardly willing to abolish them. Barbed-wire fences injure cattle and horses, but they have proved too useful and efficient for farmers to give them up. There is no necessity for accidents from Paris green with proper care. Millions of persons eat the tubers of potatoes unharmed, for the poison, being insoluble, can not enter them, and there is enough iron, the antidote, in all soils to neutralize any portion which may reach the earth. The chief danger is that when people become familiar with anything they grow careless in its use. It is important, therefore, to continue the constant caution which is commonly used at first, but too often relaxed afterward.—*Country Gentleman.*

—The flour and other mills using steam power in Dakota are employing hay for fuel on account of the difficulty in procuring coal. The hay gives a good, steady heat, and raises steam very quickly. It is said to be more economical than coal, and the money paid for the hay is distributed among the farmers of the neighborhood.—*Chicago Journal.*

—James Russell Lowell, speaking of the new Premier of England, says: "The Marquis of Salisbury is a very able leader, and will undoubtedly make a successful Ministry."—*Boston Journal.*

MANURE IN SUMMER.

Its Use in Garden Culture—How and When It Should Be Applied.

Since the introduction of commercial fertilizers that are in a condition to be immediately available for plant food, the manuring of plants during the summer season has become much more prevalent than when only barn manure was to be had.

We now have many kinds of fertilizers that can be applied after the plants are well up, and still be a great benefit to the crop; but when coarse manure is applied it takes too long for it to change into plant food to be in season to do any good to the growing crop, unless it be applied before the crop is planted; but sometimes a liberal dressing of coarse manure applied after the first hoeing will be a benefit by protecting the plants from dry weather. The manure acts as a mulch, keeping the soil moist, thus enabling the plants to utilize what fertilizers are already in the soil.

Whenever a soil is deficient in nitrogen and it is deemed necessary to apply it in a concentrated form, there is but little doubt it is best to apply it during the growing season, because if applied at any other season a considerable portion will be lost by evaporation.

Among the crops the most benefited by summer manuring may be mentioned running vines, like squashes and cucumbers. Any of the fertilizers rich in nitrogen may be applied even at the second time of hoeing, and be of great benefit to these crops. Corn, and even potatoes are often greatly benefited by the application of a small quantity of wood ashes the first time hoeing; but in the application of strong wood ashes care must be taken not to apply them soon after a rain, or when the plants are wet with dew, but apply only when the leaves are dry, or the ashes will stick to the leaves of the plants and the water will cause the potash on the plants to burn the leaves; in fact, care must be taken in the application of any concentrated fertilizers never to apply them when the plants are wet, for as a rule such fertilizers are very fine, and although it may not be intended to have any of it touch the plants, it will be very likely to blow on them enough to injure the foliage.

It is the practice of some when they apply fertilizers in the growing season to place it close around the stalks of the plants, but this is not as well as it is to spread it evenly over the ground, as the roots of most plants extend from one hill to the roots of the next, by the second or third time hoeing; there is no danger but they will find whatever has been applied in the form of a fertilizer quite as well, or even better, than if placed directly around the hill. In applying fertilizers in the summer it is better to apply them just before cultivating the crop; it will then be more thoroughly mixed with the soil.

When it is thought necessary to apply barn manure in the summer it should be well prepared before it is used, or but little advantage will be derived from it much before autumn; but if well composted so as to decompose it and make it fine, much of it will be available for plant food in a very short time after applied. If the farmer could know just when rain was coming, and apply his fertilizers a few hours before, it would be much better than if not applied until after the rain was over, in fact the advantage to be derived from fertilizers depends almost entirely on the rain fall; during a dry season but a very small portion of fertilizers become available for plant food. To have fertilizers do the most good there should be frequent showers with plenty of sunshine, for all rain and no sunshine is quite as fatal to the preparation of plant food as dry weather.

The application of fertilizers during the growing season in common field culture is, as a rule, too expensive to be generally adopted, but in garden culture when it often becomes important to force a crop, and to do so it frequently pays to apply some quick acting fertilizer after the crop is partially grown; but he who is to practice this should be well posted in regard to the condition of his soil and the wants of his crops, and he should be able to select such fertilizer as has the particular element that is most needed for the rapid growth and maturity of his plants, and this element to be of immediate use must be soluble in water. For example, if the crop be dandelions or lettuce, nitrogen should be applied in preference to phosphoric acid, and the nitrogen should not be locked up in leather chips, but it should be in a form that would be immediately available.

It is the practice of some farmers to manure mowing lands immediately after the first crop of grass is cut, but to do this to advantage the manure, if made on the farm, should be composted long enough so as to be thoroughly decomposed, therefore very fine and free from lumps, so that when applied it will at once settle down to the roots of the grass where it will be out of the way of the mower, and where it will be kept moist. Fresh manure should never be applied to grass lands in the summer season, but commercial fertilizers may be applied to good advantage on moist land or on high land if it can be applied just before a good shower. Whatever be the quality of the manure, rain is needed to form plant food. This is one of the serious drawbacks to the application of any fertilizer in the summer season, especially on grass land; we are so liable to have seasons of dry weather after the first crop of grass is cut that it is very uncertain whether the application will be of any advantage to the second crop. As a rule it is better to delay the application of fertilizers to grass land until the second crop is cut, then with the aid of the fall rains it will give the grass a good start, and strengthen the roots so they will be ready for an early and vigorous start the following spring.

Summer manuring should, as a rule, be confined to hoed crops, and trees and shrubs, and when applied it should be spread all over the ground and mixed with the soil by thorough cultivation, thus bringing it in direct contact with the moist soil, which starts that chemical action necessary to change it to that condition to enable it to enter the growing plants.—*Massachusetts Ploughman.*

A Daily Defalcation.

The Hon. John Kelly, the head and front of Tammany Hall, a man of strict integrity, an indefatigable worker, early at his office, late to leave, so burdened with business that regular meals were seldom known by him, with mind in constant tension and energies steadily trained, finally broke down!

The wonder is that he did not sooner give way. An honest man in all things else, he acted unfairly with his physical resources. He was ever drawing upon this bank without ever depositing a collateral. The account overdrawn, the bank suspends and both are now in the hands of medical receivers.

It is not work that kills men. It is irregularity of habits and mental worry. No man in good health frets at his work. By and by when the bank of vigor suspends, these men will wonder how it all happened, and they will keep wondering till their dying day unless, perchance, some candid physician or interested friend will point out to them how by irregularity, by excessive mental effort, by constant worry and fret, by plunging in deeper than they had a right to go, they have produced that loss of nervous energy which almost invariably expresses itself in a deranged condition of the kidneys and liver, for it is a well-known fact that the poison which the kidneys and liver should remove from the blood, if left therein, soon knocks the life out of the strongest and most vigorous man or woman. Daily building up of these vital organs by so wonderful and highly reputed a specific as Warner's safe cure, is the only guarantee that our business men can have that their strength will be equal to the labors daily put upon them.

Mr. Kelly has nervous dyspepsia, we learn, indicating, as we have said, a breakdown of nerve force. His case should be a warning to others who, pursuing a like course, will certainly reach a like result.—*The Sunday Herald.*

Fascination of Mining.

An old '49er says of gold hunting: "It's the fascination of it. Lor', man, when you've struck it pretty rich and can see yer gold right in front of yer; when you're piling it up every half hour o' the day, with a nugget now and again as big as a bullet to cheer you, and then when the evenin' comes and you count it up and find a hundred odd dollars just picked outo' the earth that day—well, there ain't nothin' like it. Then when you don't strike it rich you always think you're going to next day, an' it's just as excitin hearin' other men tell in the evenin' what they pulled out as it is countin' over your own. Why, I've been three or four months at a time without making a dollar, and without a cent in my pocket; but geewhittaker! the excitement of it don't give a man twice to think how hard up he is."—*Exchange.*

DOES the man who puts the powder in the fire-cracker fillibuster?—*Chicago Sun.*

"Throw Physic to the Dogs"

when it is the old-fashioned blue mass, blue pill sort, and insist on using Dr. Pierce's "Pleasant Purgative Pellets," a modern medical luxury, being small, sugar-coated granules, containing the active principles of certain roots and herbs, and which will be found to contain as much cathartic power as any of the old-fashioned, larger pills, without the latter's violent, drastic effects. The pellets operate thoroughly but harmlessly, establishing a permanently healthy action of the stomach and bowels, and as an anti-bilious remedy are unequaled.

THE barber's trade is the best trade, for it's always at the head.

Young Men, Read This.

THE VOLTAIC BELT CO., of Marshall, Mich., offer to send their celebrated ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES on trial for 30 days, to men (young or old) afflicted with nervous debility, loss of vitality and all kindred troubles. Also for rheumatism, neuralgia, paralysis, and many other diseases. Complete restoration to health, vigor, and manhood guaranteed. No risk incurred, as 30 days' trial is allowed. Write them at once for illustrated pamphlet, free.

Indigestion Cured.

I suffered for more than five years with indigestion, scarcely able to retain the simplest food on my stomach. I declined in flesh, and suffered all the usual depression attendant upon this terrible disease. At last, failing to find relief in anything else, I commenced the use of Swift's Specific. The medicine toned up the stomach, strengthened the digestive organs, and soon all that burning ceased, and I could retain food without difficulty. Now my health is good, and can eat anything in the shape of food, and digest it without difficulty. Take the prescribed dose after eating. JAMES MANN, No. 14 Ivy St.

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

WHEN WRITING TO ADVERTISERS, please say you saw the Advertisement in this paper.

Fair Play.

"Git up!"

It was in 1864 down in front of Grant's army, and I was a mile or so outside of the Union pickets, having been on a scout. In making my way back I had been followed pretty closely by half a dozen Confederates, and had eluded them by hiding in a thicket. After an hour's rest I was creeping along on hands and knees towards the nearest field fence when the above command reached my ears and a "reb" stepped in view from behind a large tree.

"Yank, in course?" he queried, as he looked me over, holding his carbine ready for a shot.

I nodded in the affirmative.

"How are you heeled?"

I had a navy revolver in my belt, and showed it to him.

He threw down his carbine, drew a navy from his own belt, and, coming quite close, he said:

"Yank, one of us has got to die! A week ago some of you 'uns set the cabin afire and turned my poor old mother out into the fields to take sick and die. I swore on her grave that I would kill the fust Yank I could draw bead on, and you're my meat!"

"Are you going to shoot down a prisoner in cold blood?"

"That ain't Silas Curtis—not much! It's ten paces—one—two—three—fire! You shall have fair play."

"You mean we shall fight a duel?"

"Sorter one. I expect you'll shoot at me and miss, and I'll shoot at you and put a ball into your head. I'm no bush-whacker to shoot a man down without a show, but I'm dead certain to kill you all the same."

We backed away from each other. The woods were fairly open, and when we had 30 feet between us there was no obstruction to deflect a bullet or annoy the eye.

"All ready, yank?"

"Yes."

"I'll be fair. You may do the counting. Good-by to you, for I'm a dead shot."

"One—two—three—fire!"

The two pistols made one report, but as the noise filled my ears I went down. I was bewildered, half unconscious, but realized that I was hurt.

"Shoo, now, but I just raked his scalp!" I heard the man say as he bent over me. "Say, Yank, we must have another shot. You cut powerful close to my ear, and mebbe I dodged a bit. Come, fair play, ye know."

I tried to rise up, but fell back, and at that moment two bush-whackers pushed out of the woods and came running up. I heard loud talking, oaths, threats, and a bullet from a pistol tore through the cloth on my shoulder. Then I must have fainted, for the next thing I remember was of being carried on the man's back through the woods. When he felt me moving he laid me down and asked:

"Say, Yank, how far is it to your lines?"

"About a mile from where we fought."

"Straight north?"

"Yes."

"Because those bushwackers was bent on killing you, and to see you fair play, I had to plant 'em both. Reckon I hain't no more business in the Confederacy after this. Reckon Uncle Sam won't be any wuss on me nor Jeff Davis. Yank, kin ye hang to my neck?"

"Yes."

"All right. Keep this 'ere handkerchief sorter waving as a signal to the pickets, and I'll carry ye safe as an ambulance."

And clinging to the back of the man who had thirsted for my blood, I was soon inside the lines, and Sam was explaining to the pickets:

"No, I hain't no deserter. I've been sorter driven in here because Sile Curtis will see fair play if it takes a leg."—*Detroit Free Press.*

Stories About Cats.

A cat of Searsport, Me,, made friends with a pet rat, but killed all the wild rats it could find.

A cat of South Brooks, Me., watches a cradle, and when the child cries caresses it until it falls asleep.

A gentleman of Newport, R. I., let a mouse out of a trap for his cat, but a big rooster stadding near jumped on it first, took it in his bill by the neck, and shook it until it was dead.

A cat of Hyde Park, Mass., took charge of a brood of six chickens. She licked their feathers until they grew the wrong way. The chicks followed her as they would have followed a hen.

A Lewiston cat made friends with a pig, became his constant companion and slept with him at night. When the pig was slaughtered she watched by his corpse, and refused to eat any of his flesh.

A Maine cat accidentally stepped on the keys of a piano board one day, and was surprised at the sound. Since then she goes to the piano regularly and paws the keys, waiting with ears erect and eyes sparkling for the sounds.

A City of the Unknown Dead.

Since 1868 something over 41,000 of the city's poor, friendless and unknown dead have been buried in the city cemetery, which adjoins that in which are buried the remains of the soldiers. On Mondays and Thursdays of each week the burials take place. When a person dies in hospital, workhouse, penitentiary or other public institution, unless the body is claimed by friends or charitably disposed persons and given Christian burial, it is placed in a cheap fifty-cent pine coffin, removed to the morgue for a day or so and thence transferred on one of the city's steamers to Hart's island and buried by a gang of workhouse employes who are detailed to bury the dead. When a person dies in a public institution his or her nearest friend or relative is informed, and if the latter are able the city will take measures to compel them to bury the body. But the duty is often shirked. It is nothing new to hear of a husband who is able refusing to bury a wife, or of a wife refusing to bury a husband—or a father or mother refusing to give a son or daughter a proper burial, or of the latter doing as much for their parents. But there are those who, even if as poor as the mythical church mouse, will even beg for the means to secure a coffin and a burial plot elsewhere for some deceased loved one. Some of the poorest of the poor have been known to deny themselves the very necessaries of life, to go thinly clad and hungry, rather than one of their kith and kin should be placed in a pauper grave. And yet there are in the Potter's Field hundreds of the dead whose kindred are known to be well-to-do. There sleep in some of the pits side by side the poorest outcast and the once petted child of fortune.—*N. Y. Tribune.*

The City of Mexico Doomed.

The City of Mexico is slowly but surely sinking into Lake Texcoco, and if means are not taken to prevent such a calamity it will be under water in about fifty years. Humboldt's measurements taken early in this century gave the lake a depth of sixteen feet ten inches, and it is nowhere more than six feet eight inches, while careful observations in the last twenty years show that the bottom of the lake has risen uniformly one and one-half inches a year, and is now but nine feet below the level of the principal streets of the city. This seriously impedes drainage, the fall of the sewers being too slight to produce a proper flow of refuse matter even in dry weather, while in the rainy season, when the streets are sometimes flooded from the lake, it is completely checked. The ground on which the city stands is therefore saturated to within two or three feet of the surface with decaying matter, poisonous gases rise, and thousands die yearly from malarial and malignant fevers. Ten years ago, when the population was about 200,000, the annual death rate was 3 per cent, or 8,000 persons, and this percentage has doubtless increased with the growth of the place, little attention being paid to sanitary improvements. The city suffered from five great inundations from 1553 to 1630, and in 1789 a drain 12 miles long, 10 to 30 feet deep, and 200 to 300 feet wide, which had occupied 100 years in construction, was completed. The efficacy of this does not seem to have lasted, and it is now urged that large sums be expended in draining Lake Texcoco dry and carrying off the surplus moisture of the valley of Mexico to save the ancient city of the Aztecs from destruction.—*Springfield Republican.*

Bill Arp on Storms.

A storm in the country is worth something to see. We can look out and afar off and see it coming, and we can see the lightning flash and zigzag and corruscate, and have no fear—it is grand but not fearful—not alarming. The trees are all around us and have never been struck. They are our lightning rods, our insulators. Lightning will strike one lonely tree, but it rarely strikes in a grove or forest. It has struck twice in our cotton field and killed the cotton, but these trees all around us scatter it and keep it from concentrating. Neighbor Freeman says that lightning has a liking for a wagon with one steer, for he passed one on the road day before yesterday while there was a storm on hand, and the lightning struck the little one steer wagon and tore it all to pieces, and the steer just went on with nothing but one shaft hitched to him. There was no driver, for the steer had just been turned loose to go home by himself. Cobe says he never did understand this thunder and lightning business, nohow, "for," says he, "some folks say it's the lightnin' that strikes, and some say it's the thunder, but he has noticed one thing, and that is when anything is struck, they both come right smack together, and it looks like it takes 'em both to do the work."—*Atlanta Constitution.*

No scrofulous infection can resist the purifying power of Ayer's Sarsaparilla. Sold by all druggists.

NEW ADVERTISEMENTS.

Miss Nellie Kent,

Wellington, Lorain county, O., writes: "Dr. S. B. HARTMAN & Co., Columbus, O., Gentlemen: I have been a great sufferer from chronic catarrh, bronchitis and neuralgia of the face. I have been taking your PERUNA for one month. The neuralgia and catarrh is almost well, and the cough is much better. I like your PERUNA very much."

C. E. Dupler, aged thirty-four years, of Equality, Illinois, had been affected with a chronic catarrh which he first discovered six years ago. In succession he lost his smell, taste and hearing. The disease was so malignant that it not only attacked the softer parts, but destroyed the bony partition of the nose and seriously affected the external parts. He could only hear a watch ticking by holding it close to his ear. He suffered intense pain in the nose, from which green, dry clots of offensive odor fell. In this condition he presented himself to Dr. Hartman several months ago. He can now hear a watch eight inches from his right and six inches from his left ear. His taste and smell are again returning, and the external part of the nose is quite well. Few more grateful patients ever left a physician's office than Mr. Dupler. He said, "Why in the world was PERUNA not prescribed for me long ago?"

Cramps of the Stomach.

We have the privilege of reporting the following case. Those similarly affected can get the name and address of Dr. Hartman. The lady does not want her name in the papers. For a year, or years, (the writer does no remember the length of time,) this lady had cramps, the most fearful, of the stomach, every day and night, "which would be followed by that terrible weakness, which was something wonderful." The suffering and distress of this lady was indescribable and almost unendurable. After all the physicians and medicine had failed, and all hope had almost fled, Dr. Hartman was consulted, and from the first day of taking his PERUNA, the cramps and all bad feeling left her, and now for over a month has been entirely free from every symptom. A more thankful patient no doctor ever had.

Mr. Biggs, druggist, Charlestown, Kanawha Co., W. Va., writes: "PERUNA sells well here and gives good satisfaction. Customers speak well of it."

Dr. J. Anderson, Coshocton, Ohio, writes: "Your PERUNA sells well and gives good satisfaction. I consider it a splendid medicine."

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTR.

A HOME DRUGGIST TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best-known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of **Rheumatism**, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."
River St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREW, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with **Salt Rheum** in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists; $1, six bottles for $5.

DR. JOHN BULL'S

Smith's Tonic Syrup

FOR THE CURE OF

FEVER and AGUE

Or CHILLS and FEVER,

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for impurities of the blood and Scrofulous affections.

Ex-President Arthur's Arrest.

Now that the majesty that doth hedge an executive is being dissipated in Mr. Arthur's case by his retirement, says the San Francisco *Call*, his ex-cabinet is beginning to let out a good many little incidents of the reign of one who will deservedly go down in history under the sobriquet of "the jolly President." For illustration, one of his constitutional advisers, in a recent letter to an old crony in this city, says:

"Did I ever tell you of the fun we had during the visit of the Presidential party to Florida summer before last? You must know that, besides being a confirmed practical joker, Chet is quite an adept at certain slight-of-hand tricks, a proficiency in which he has kept up from boyhood. He flatters himself he can remove a handkerchief or watch from a pocket with as much adroitness as a professional 'nipper.' He has perpetrated many a queer joke in this way, the exalted position of the perpetrator naturally protecting him from suspicion. While at Jacksonville the 'White House gang' determined to attend a monster darkey camp-meeting about ten miles back in the country, and to avoid the eternal 'reception nuisance, we went incog. When we left the train, and were awaiting for conveyance at a small tavern, Chet noticed a fat planter dozing in the bar-room, and displaying a preposterous bunch of seals on his fob-chain. Arthur watched his chance, snaked out the man's watch, and hid it in the saddle bags of another traveller, that was hanging on the wall. Now, Bill Chandler had been waiting a chance to get back on Arthur for several days, so he in turn collared the planter's property, and slipped it into the breast pocket of Chet's big duster. Then he quietly led each member of the party aside and let them into the conspiracy, to their great delight. When the vehicles returned from the camping ground, Arthur was immediately collared by the planter who savagely demanded his property.

"'What do you mean, fellow?' said the President, trying not to laugh, and winking at his staff—all of whom, however, remained suspiciously indifferent.

"'Oh, you can't come any funny business with me. One of these gentlemen saw you steal my watch and put it in your pocket. Here, constable, I want this man searched.'

"'Very well, then, search me,' said our first citizen, almost exploding with laughter.

"'I thought so,' said the constable and to Chet's petrification, he fished out the watch from the first pocket he dived into. 'I just slam you into the calaboose, my fine fellow.'

"'You will, eh?' said the President with a chuckle. 'Here, Mr. Frelinghuysen, just tell this man who I am.'

"'Did you speak to me, my good man?' said the secretary of state, innocently.

"'Yes, yes. Hurry up and explain this thing,' said Arthur, as the constable began taking out a pair of handcuffs.

"'Explain what? I don't know you, sir,' and the state department walked off.

"'Great Scott,' stammered Arthur. 'Say—you there—Chandler! What does all this mean? Tell these people who I am—quick!'

"'If you are addressing me,' said the secretary of the navy, putting on his glasses and taking a benevolent survey of the prisoner, 'my name is not Chandler, and I never saw you before.'

"'Great heavens! this is outrageous!' screamed Arthur, fighting desperately with the constable. 'I tell you I am the president.'

"'The most impudent rascal I ever saw,' said Folger.

"'Hard looking face,' chipped in Bob Lincoln.

"'Don't be rough with the old man,' said Teller kindly. 'Perhaps he's gone in the——. What are you president of, my good fellow?'

"'I'm President of the United States, as you'll pretty soon find out!' gasped the prisoner furiously.

"'Tut, tut, tut!' murmured Chandler, pityingly. 'Clean gone, clean gone! Intelligent-looking man, too. Escaped from some asylum, likely.'

"And to his unmistakable horror, Arthur was loaded into a wagon and carted off to the county bastile, where he was kept almost an hour, until, in solemn caucus, the cabinet voted for his release. To Chet's credit, however, be it said, that although he was extradited in a white rage and vowing to smash the entire household slate, he cooled down before we reached Jacksonville, and concluded to 'set 'em up' for the crowd in true White House style. But the joke business had a rest after that."

Light Breaking in England.

Earl Granville opposed the creation of the commission to inquire into the causes of the business depression in the United Kingdom upon the ground that it might lead the people to believe that the government could afford relief by legislation. This was, in effect, the expression of his lordship's fear that the results of the proposed inquiry might afford strong arguments against the further adherence of England to the theories of Cobden. There can be little doubt that, if the proposed inquiry is conducted intelligently and thoroughly, there will be aroused a strong demand from the English masses for material relief. True, the government cannot create prosperity, but it can by legislation take advantage of existing conditions and put it in the power of the people to improve their condition.

The free-trade policy was a great thing for England in past years. It made Manchester, Sheffield and the other great industrial towns what they are. The wealth of the cotton lords, iron and shipmasters and other rich manufacturers enriched the country, and with cheaper bread the masses gained a great boon. But England's commercial sun is waning. Confronted with rivals committed to protection, she is steadily losing control of markets in which she was formly supreme. At present she not only is compelled to push the free-trade propaganda as best she may abroad, but she is forced to combat the growth of protection sentiment at home. Her colonies have adopted the protective system, and when reproached with their selfishness pleaded their common sense. A generosity on their part would have suffered them to continue as simply agricultural people would have been vastly appreciated by the followers of Cobden in the mother country, but the example of the United States has demonstrated to these new countries the wisdom of the protective system, while the nations of the Continennt are for the most part also committed to that system. Had her colonies perceived sooner the value of protection, the free-trade policy would have fewer adherents in the mother country to-day. As it is, that policy is being questioned, and the distrust of it is growing. That it will speedily be abandoned is not maintained, but its material modification, which would be the presage of its ultimate disuse, is, in the view of many close observers, not far distant.

It is stated that the personnel of the proposed commission to inquire into the trade situation is not such as to warrant materially satisfactory results, but it may suit the interests of the free-traders to discredit the commission in advance. At any rate, the fact that the commission is thought necessary is an evidence of suspicion of the Cobden theory and a purpose to test its wisdom. While England's supremacy was little disputed the Manchester school found ready believers of its teachings, but in the face of keen and increasing rivalry in the world's markets the skeptics are multiplying as the fallacies of free-trade come to be suspected and demonstrated.—*Balto. Herald.*

The words of sympany and of sorrow which come from the South in this day of the nation's affliction are unusually gratifying. The remembrance of the victor's magnanimity at Appomattox endures, and there is added to this a generous and patriotic pride in the achievements and the fame of the foremost soldier and citizen of the re-united nation. There is no cause to question the sincerity of these expressions. They bear the strongest evidence of earnestness, and are proofs of a sentiment of common nationality which ought not to be regarded with any feeling but satisfaction and thankfulness. It is really a wonderful spectacle, this unanimity of tribute to the character and service of the conquering general in a great civil war but twenty years past. In view of this phenomenon it is difficult to entertain any pessimistic opinion of the condition or prospects of the nation so far as they are dependent on union in the bonds of patriotism.—*Boston Advertiser.*

Cleanse the blood with Ayer's Sarsaparilla, and realize how far down in the scale of health you have been living.

Animals as Barometers.

I do not know of any surer way of predicting the changes in the weather says a correspondent of the *Cincinnati Enquirer*, than by observing the habits of the snail. They do not drink, but imbibe moisture during rain and exude it afterward. This animal is never seen abroad except before a rain, when you will see it climbing the bark of trees and getting on the leaves. The tree snail, as it is called, two days before rain will climb up the stems of plants, and if the rain is going to be a hard and long one, then they get on the sheltered side of a leaf, but if a short rain, on the outside. Then there are other species that before a rain are yellow; after it, blue. Others indicate rain by holes and protuberances, which before a rain rise as large tubercles. These will begin to show themselves ten days before a rain. At the end of each tubercle is a pore which opens when the rain comes, to absorb and draw in the moisture. In other snails deep indentations, beginning at the head between the horns and ending with the jointure of the tail, appear a few days before a storm.

Every farmer knows when swallows fly low that rain is coming; sailors, when the sea gulls fly toward the land, when the stormy petrel appears, or Mother Carey's chickens, as they are called, predict foul weather.

Take the ants: have you never noticed the activity they display before a storm—hurry, scurry, rushing hither and yon, as if they were letter carriers making six trips a day, or expressmen behind time? Dogs grow sleepy and dull, and like to lie before a fire as rain approaches; chickens pick up pebbles, fowls roll in dust, flies sting and bite more viciously, frogs croak more clamorously, gnats assemble under trees, and horses display restleness.

When you see a swan flying against the wind, spiders crowding on a wall, toads coming out of their holes in unusual numbers of an evening, worms, slugs, and snails appearing, robin redbreasts pecking at our windows, pigeons coming to the dovecote earlier than usual, peacocks squalling at night, mice squeaking, or geese washing, you can put them down as rain signs. Nearly all the animals have some way of telling the weather in advance. It may be that the altered condition of the atmosphere with regard to electricity, which generally accompanies changes of the weather, makes them feel disagreeable or pleasant. The fact that a cat liks herself before a storm is urged by some naturalists as proof of the special influences of electricity. Man is not so sensitive. Yet many feel listless before a storm, to say nothing of aggravated headaches, toothaches, rheumatic pains, and last, but not least, corns.

The Lottery Craze in Cuba.

Havana Cor. Inter Ocean.

Here there is scarcely a stratum of society to be found that is not directly interested in the sale or the purchase of Havana lottery tickets. Men women and children wander the streets day and night singing out the numbers which they have for sale. As the day for a drawing approaches everybody is on the qui vivi, the ticket venders being frantic to effect sales, and the rest of the population to purchase tickets in the hope of obtaining some lucky number. You will even see occasionally a paralytic or a man crippled through some accident, sitting by the wayside and crying his numbers.

At nearly every street corner and at frequent intervala between streets you will encounter stands where these tickets are sold by agents on a larger scale. Everybody patronizes these stands or the street venders, from the negro slave who hopes to draw enough money to purchase his freedom, to the rich young Cuban swell; from the thieving ragmuffin on the street to the nun or padre of the Holy Catholic church.

A Walking Skeleton.

Mr. E. Springer, of Mechanicsburg, Pa., writes: "I was afflicted with lung fever and abscess on lungs, and reduced to *a walking skeleton.* Got a free trial bottle of Dr. King's New Discovery for Consumption, which did me so much good that I bought a dollar bottle. After using three bottles, found myself once more a man, completely restored to health, with a hearty appetite, and a gain in flesh of 48 lbs." Call at Nydegger's Drug Store and get a free trial bottle of this certain cure for all Lung Diseases. Large bottles 50c and $1.00.

The Republican.

OAKLAND, GARRETT CO., MD.

THE OLD ORCHARD.

In memory's halls some pictures dwell,
With dear associations blest;
Whatever be our treasures there
This stands apart from all the rest.
With some it is a face, a flower,
A glorious day, a sunset hour,
A something that's beyond compare;
But unto me the one most fair
Is of a grey old orchard sweet,
With bloom leaves scattered at my feet,
With robins flitting through the trees,
And music from the humming bees.

It was my childhood's playing ground,
And of it brightest memories come,
My brothers and my sisters dear
Played in it round our happy home;
When all our little tasks were done
The orchard echoed with our fun;
And robin gay, now gone to rest,
Tuned up his throat, with ruffled crest,
But wondering hushed, in mute surprise
While listening to the merry cries
Of children in their gladsome mirth,
The happiest sound in all the earth.

You can not die to me, old trees,
What though your usefulness be o'er,
You're living in my memory yet
As bright as in the days of yore,
When your spring blossoms, pink and fair,
Made fragrant all the balmy air:
Or when your summer's leafy shade
A cool retreat for children made;
Or autumn's sunripe fruit so sweet
Was gathered from around our feet,
And by our father stored away
To cheer us on some wintry day.

O, days have soon dropped into years,
The years into a life-time grow,
And heads that then were dark or fair
Will soon be sprinkled o'er with snow;
But years may come or years may go,
Bring wealth or want, joy or woe;
Fame, with her mocking laugh, may come
And settle round my humble home,
But only death from me can take
The picture which those old trees make.
—*Indianapolis Journal.*

AUNT MADELINE.

Preserving a Sweet Disposition Through Life's Adversities.

"Gad! she's the only really beautiful old woman I ever saw."

The speaker was one of a group of men who stood on the steps of a church one Sunday morning a few years ago in a fair city of which we all know.

The group had apparently been discussing the woman whose appearance called forth the exclamation. I followed the direction of their looks and found ample warrant for the emphatic utterance which I had overheard.

The association of old age with uncommon womanly beauty in one person is rare enough to excuse the curiosity that impelled me to learn this woman's history. I will not, therefore, offer any apology for what the reader, and possibly the lady herself, may regard as an impertinence. It is a fact that I did learn the story of her life, stranger though I am in the city that is her home. It is not a thrilling tale. There is in it not one essentially dramatic incident. Yet it moves me to deeper emotion and stirs within me a loftier admiration than the story of many a life that genius has snatched out of the common for immortality.

* * * * *

Aunt Madeline (for so she is called by those who love her) would smile in mild reproof if any one were to say to her, "You are beautiful"—so many years have come and gone since she gave much thought for herself. Hers is a two-fold beauty, being made up of those singular graces of person which attracted the notice of the group at church on that Sunday morning and the higher graces of a life that is consecrated to others without flourish or pretense of self-abnegation.

I shall first try to tell how she appeared from my own point of view. The narrative proper shall be in the words of the pastor, to whom I am bound for it, as nearly as I can set them down.

The figure is tall and the carriage graceful. She walks like one accustomed to free exercise. Her attire is undeniably elegant. The least practical observer of such things may see at a glance that it came from the hands of a fashionable maker. I determine therefore, that she is not too poor to gratify her natural woman's taste for daintiness of dress. Her face quite baffles my powers of description. It is the face of sixty years. That I have learned; but when looking into it one does not think of its years. I can not say that it conforms to any established standard of beauty, having neither a "pretty" chin nor the "soulful eyes" of which we hear so much in verbal portraits of beautiful women. Nevertheless I am ready to stake my judgment on the general proposition that it is one of the loveliest faces that was ever seen out of dreams. The nose, I must say, is of perfect mold; the hair is a pure white mass arranged in a Grecian coil at the back, parted in the middle and falling in fleecy waves over the temples, half covering the ears and forming a truly artistic frame for the never-to-be-forgotten face.

She speaks to a young girl at her side, and her smile discloses a mouth full of natural teeth, whose whiteness time has not touched and whose perfect symmetry is unbroken.

Her skin is clear and fresh—an eloquent tribute to right living and a sign of freedom from those vanities of women on which the fortunes of nostrum makers are built.

One can not doubt that she is an old woman, but her years are years of peace, of purity, of sweet piety, of wholesome restrainis. I do not marvel that her face is glorified.

* * * * *

"Aunt Madeline was one of two sisters," said my friend, the pastor, in beginning the recital which I am to reproduce. "Her father was a politician, and an honest man. He loved truth for its own sake, and though he filled many offices he died poor, leaving his motherless daughter nothing in the way of fortune except the modest home in which they were born and reared. Madeline was twenty and Ethel, her sister, fifteen, when they were called to face the world. A livelihood must be made for both, and it was clear enough that only one of them could undertake the dubious task. The child Ethel assuredly was not equipped for it. Medeline alone must roll the heavy stone up the hill.

"With what resolute courage and simple faith in herself she set to work, we who have always known her best understood. She made no feeble appeals for help. A few of us gave her counsel from time to time, when she asked it, but that was all. She ceased to ask even so much long years ago, and I, at least, have many times been proud to be counseled by *her;* for a wiser woman I never knew.

"After her father's funeral expenses were settled there may have been fifty dollars in the house. Madeline saw that immediate action was imperative. What should she—what could she—do to earn an income? It was not hard to answer the question. In her happier and leisure girlhood she had moderately developed a faculty for writing children's stories, some of which had found their way into print. She resolved to make a serious test of her powers in that direction, and in the course of a few weeks, urged on by necessity, she produced a small volume of tales. A publisher was found who undertook to put the volume forth and pay Madeline a fair royalty. The venture was moderately prosperous. Others followed, and after ten years of struggle the hard-worked author found herself in possession of an income that was more than sufficient for her own and Ethel's needs. It was about this time that Ethel married. Madeline was now thirty and unmarried. She still remains unmarried, and on that fact hinges the noble devotion and the single-heartedness of this woman whose life has been a beautiful and constant exemplification of faith in the dear God whom she serves with such unostentatious zeal.

"In the early days of her struggle she loved and promised herself in marriagh to Joe Bertram. He loved Madeline, too, in his way, and, I do not doubt, meant to make her happy. Joe was in professional life—had made a promising start, and we all thought he was destined to take a commanding place. But goodfellowship was his ruin. When I look back upon it the swiftness of his descent appalls me. The convivial habit which at first manifested itself in occasional nights of gayety, soon became unmanageable. His business suffered from neglect. The blear look and blasphemous speech of the drunkard sneaked into the place of gallant and high-minded Joe Bertram—and he must once have been all that to have awakened love in a heart of gold like Madeline's. To look at her placid face now you would hardly believe there was a time when she would have accepted the martyrdom of fire for Joe Bertram's sake—for her love's sake; but I tell you that that love was long the imperious and dominating passion of her life.

"I do not suppose that this part of her story is out of the common experience of women; but Madeline's was a love that stopped at nothing short of crime. Not Joe's degradation quenched it; not her loss of respect for him weakened it; not death itself was powerful enough to lay it in the dust. Through degradation, through pity for his fall, through the black shadow of a shameful death, it mounted, a steadfast flame; and it has shone undimmed upon her pathway during all her solitary years.

"She loved Joe then. She loves him now. She will never cease to love him.

"But how bravely she has lived! While her grief over poor Joe's death was sorest, Ethel died. The husband who had been tenderly attached to her strangely disappeared, and two other children had been left helpless but for Madeline—Aunt Madeline, as everybody had called her since that time. She had given them more than a mother's solicitude and care, and all a mother's love. She worked for them, reared them, educated them. Now both are married, and their children are daily taught to ask God's blessing on the dear saint who waits, but not in idleness, for the Voice of Mercy to proclaim the end of earthly love and duty. Her home is musical with the romp and laughter of happy children; the house cat purs in sleek content; and the scent of flowers pervades the rooms where peace broods and Madeline's gracious presence reigns."

* * * * *

In the soft summer afternoon she sits and dreams. The little old-fashioned locket, in which Joe Bertram's picture has lain for thirty years, hangs on her bosom.

Little Daisy comes leaping into the room.

"Aunt Madeline, you *ain't* an old maid, *is* you?"

"Yes, dear (the chin droops lower and rests upon Joe's locket); yes, dear babe, an—old—maid."—*Detroit Free Press.*

No Harm Done.

Colonel Nat Hammond was on the train, not long ago, when a lank, inquiring looking stranger moved across the aisle and took a seat by him. He gazed at Colonel Hammond attentively for a full minute, and then said:

"Howdy do?"

"I am well, sir," replied Colonel Hammond.

A pause for about two minutes; then: "What might your name be?"

"My name is Hammond, sir."

A still longer pause, and then; "I hope there ain't no harm done?"

"There is not, sir!"

An embarrassing silence, during which the stranger contemplated Colonel Hammond closely; then, "You see, I've got an uncle lives up in Tennessee, that I ain't never seen, and I thought I might come up on him some time by jist asking folks their names!"—*Atlanta Constitution.*

California Orchards.

Ten years ago, according to the San Francisco *Bulletin*, if any one had predicted that hill land in California, well up the mountain sides and covered with chapparal, would be covered with vineyards and orchards, most people would have put no faith in such anticipations. But to-day one sees the vineyards and orchards creeping up the mountain sides from 1,000 to 2,500 feet high, and some at even greater altitudes. Dwelling houses are perched upon elevations where a few years ago no one would have taken the land as a gift under an agreement to cultivate it. These new vineyards and orchards are the last to be overtaken by any of the pests found at lower elevations.

AUGUST COASTING.

A Novel Summer Amusement—How the Sport is Conducted.

It was on the afternoon of the very warmest day in August that the children came running to me crying:

"There are some boys and girls from the village out on the hill, and some from the hotel on the mountain, and they all have brought their sleds."

It seemed such a puzzle to me that I rose and went out to see what was going on.

When I reached the spacious balcony I was almost convinced that the whole valley had been bewitched.

There were gathered at least twenty children and half a dozen sleds. The boys were dragging the sleds up the steep slope of the hill-side that rose from the road in front of the house, while the girls followed after as well as they could.

It was not by any means an easy feat to climb this slope.

Though at a casual glance it seemed as soft and velvety as a well-kept lawn, it was to the unwary a delusion and a snare. The midsummer sun shines down upon the Adirondack mountains with as much ardor as on the city streets. Though the nights are cool, frequently even cold, there are no dews, and usually but little rain. So the short thick grass that grows abundantly upon the sides of the lesser mountains, or, more properly speaking, the foothills, becomes somewhat parched and smooth, and as slippery as ice. The children, then, had before them quite an amount of hard walking, but those children were like mountain-goats, hardy, willing, and able to climb anything.

I watched them with interest. At last the top was reached. Then the sleds were turned upside down, and the runners were rubbed vigorously with *candles;* this completed, the sleds were put in proper position again, three children seated themselves upon each, and a gentle push started them down the slope.

How swiftly they came! The slope was steep but smooth; not a rock, stump or stone on its surface; there was no danger, and the sleds stopped on the sandy road.

For two long hours this colony of children coasted—till the grass was worn almost to the roots, and the supply of tallow (which is indispensable for this midsummer coasting) was exhausted.

After all the little ones were weary, we older people joined in the fun. I own to having made the descent but once—that was quite enough for me.

I never before had heard of this novel amusement; but, startling as it seemed at first, the novelty soon wore away, and I became quite accustomed to the sight and sounds of coasting in midsummer.—*Mrs. Frank M. Gregory, in St. Nicholas.*

CELESTIAL MOTION.

The Essential and Everlasting Condition of the Universe.

The view of the cloudless and moonless firmament on a dark clear night, when the whole vast black arch seems tremulous with the scintillations of 3,000 stars, is always overwhelming to one who gazes steadily at the sublime picture and yields himself up to the train of reflection which it suggests. But the night scene grows doubly interesting when it is known to be all in motion—not only a movement of the whole expanse, but an individual motion of each separate point of light. Suppose the universe were stationary, how would it appear? Let us see. The motionless earth would forever have one side turned toward the blazing, motionless sun and the other in perpetual night. There would be no rising and setting of the sun and no rising and setting of the stars. The silent, mighty procession of the skies would be ended and the heavens would be dead. The condition would be unendurable to human beings, if there were any human beings to see it. But there would be none. Life would be equally impossible on that side of the earth where there was perpetual day without a night and on that side where there was perpetual night without a day.

Motion, then, is the essential and everlasting condition of the universe and everything in it. There is no rest. And this motion is inconceivably complex. Our earth itself has four motions that we know of—one on its axis every day; one round the sun every year; one swaying motion on its axis, which causes the celestial pole to describe a great circle in the heavens every 25,000 years, and one by which the solar system is carried through space in the direction of the constellation Hercules. And there are, probably, other movements which we know nothing about. —*Exchange.*

The Solitude of Sleep.

Seek some spot where no foot of man has trod. There the wild bird gives you shrill, sweet greeting and the cheery insect vibrates in its hidden nook with a murmur of companship. Forsake humanity as far as may be and the echo of the great pulsating machinery, of which, even against your will, you are a part, will never leave you. You may be lonely—lonely in the heart of a crowd. You may in the circle round the fireside, in the busy streets, in great assemblies or friendly gatherings, feel yourself utterly alone. That is a different thing; it is loneliness, not solitude. Life has no solitude save the strange, sweet solitude of sleep. For it is only in the sleep world, so Sphinx like in its reserve, so grave like in its absolute silence, so death like in its complete separation, that we go away off by ourselves, leaving even our nearest companion, this dearly cherished body of ours, and wandering, who knows where? — *Charleston (S. C.) News.*

—A writer in *Harper's Bazar* says that in France the house cook becomes indignant if any of the dishes are procured at a restaurant. Our cook is very different; she becomes indignant if we want her to do anything at all—*Boston Post.*

—The French have more suspension bridges than any other nation on the globe.

SCHOOL AND CHURCH.

—Though the Hawaiian people have been partially converted to the Protestant religion, they still are superstitious, and call upon their gods and goddesses to help them in any great trouble.

—Bowdoin's new President is only six years out of college, and three years from graduation at the theological seminary. But if youth is an objection to a man for such a responsible position, it is one that he is constantly correcting.—*Boston Post.*

—It is stated that the women of the Indian Presbytery of Dakota have contributed more for the missionary fund than all the other Presbyteries in the Territory together. This is a good showing for the religious zeal of the tawny sister.—*Chicago Times.*

—P. T. Barnum has erected a fine fire-proof building for Tutt's College at Bridgeport, Conn., which will be known as "The Barnum Museum of National History." He has also promised the college the skin and skeleton of Jumbo when he dies.—*Hartford Courant.*

—According to President Seelye, Smith College, at Northampton, Mass., ten years ago began with fourteen students and now has 340 on its rolls; and during that time but one death (a drowning accident) has occurred among the students and graduates.

—There is not much indication that the students of our colleges differ from those of past days in their predilections for professional careers, if this year's graduating class of one of the great institutions may be taken as an example. Thirty-one of its members have determined to be lawyers, fifteen doctors, ten preachers, and fourteen business men. —*Chicago Current.*

—At the commencement exercises of the grammar department of the public schools of Wheeling, W. Va., three of the twenty-seven graduates were colored pupils who had completed the course of study in the schools devoted to their race. This is believed to be the first time that white and colored pupils have been graduated at the same place south of Mason and Dixon's line.—*N. Y. Post.*

—Archbishop Riordan will restore all the privileges to the Jesuits on the Pacific coast which were taken away by his predecessor, Archbishop Alemany. These include the right of absolution and sacrament, the privilege to bury the dead having been granted by the Pope in the face of Alemany's order. The new Archbishop has also decided to close up the Roman Catholic school for training of priests at Mission San Jose in Santa Clara County, Cal., and transfer the thological students to the college at Baltimore.—*San Francisco Chronicle.*

PUNGENT PARAGRAPHS.

—There are eighty-two glue factories in this country, and the price of gumdrops is kept within the means of the poorest citizen.

—Nothing is vainer in Nature than the slim man who has suddenly grown fat, unless it be the elderly matron who has just been mistaken for her daughter.—*Boston Post.*

—Summer joy:

A slender waist, just lightly clasped,
As up the scented lane they stroll;
A small, white hand, just lightly grasped,
Two heads beneath one parasol!
—*Boston Courier.*

—An Iowa girl has an album in which she keeps pictures of all the young men who have flirted with her without coming to the point. She calls it her rogues' gallery.—*Chicago Tribune.*

—The face value of all the money in the world is said to be $550,000,000,000. We can't help wondering sometimes just how many people the other $549,999,999,998.23 is divided among.—*Louisville Journal.*

—A book on etiquette advises: "Never interrupt any conversation, but wait patiently until your turn comes to speak." The book-agent who handles this book has the bulge on the world. She can come into your office unannounced, take a seat uninvited, and talk you to death under the rules.—*N. O. Picayune.*

—The Great Dismal Swamp contains 14,000 acres, all resting on a bottom of quicksand. Now, if the youngest soldier in the late war and the oldest living Mason and the surviving soldier of the Revolutionary war would like to hold a reunion right in the very middle of that 14,000 acres is the natural spot for their encampment.—*Burdette.*

—The *Oregonian* says that the unfamiliar sight of a man dressed in buckskin was seen on the streets of Portland recently. He was an old trapper from Montana, who had become disgusted with that territory on account of the railroad there, and is now on his way to Alaska, where he can trap beaver in peace.

—An exchange says that to get the full flavor of butter, the bread upon which it is spread should be inserted in the mouth buttered side down. The fact that the buttered side up is the general custom is an indication of a general and perhaps hereditary disinclination to get the full flavor of the butter. We have known the flavor of butter to be so full as to fairly stagger.—*Springfield Union.*

—An old South Carolina lady who always had a good word to say of the absent, found herself last week in a predicament. She was at a sewing society, where a rather lively young girl was discussed, of whom every one spoke harshly. Mrs. Brown sat a while in thought, but soon brightening up and shaking back her snowy curls that hung on either side of her sweet old face, she said "Ladies, have you ever noticed how well Miss Giddy walks and how beautifully she turns out her toes?"—*Harper's Bazar.*

Kindergarten French.

Congratulatory Friend—"Just arrived from the Continent, eh? You are looking remarkably well. How long were you in Paris?"

Returned Tourist — "About six weeks."

"How did you manage? You can't talk French."

"O, gestures went a great way. Sometimes I sketched what I wanted."

"Made a drawing of it, eh? And you were always understood?"

"Well, not always. Once I made a drawing of a mushroom. Now, what do you think the waiter brought me? The idiot brought me an umbrella."—*Philadelphia Call.*

TEMPERANCE READING.

A SCIENTIFIC VIEW.

The Action of Alcohol Upon the Brain and Nervous System—The Four Stages of Alcoholic Disease—The Horrors of Delirium Tremens.

In one of a series of articles by Prof. A. B. Palmer, M. D., LL. D., in *The Wide Awake*, the writer says:

The strong resemblance between the narcosis of alcohol and that of chloroform or ether is apparent; but that of alcohol is much more likely to become habitual. The essential character of the condition is so similar that the same terms may be applied to each. If chloroform is a narcotic, so is alcohol; if one is a depressing, lethal agent, so is the other. If chloroform is a poison, so is alcohol. The greatest difference in their immediate action is, that the chloroform is more speedy in its effects and sooner over; and its secondary consequences are less severe.

But in studying the effects of alcohol on the brain and nervous system we must go beyond the speedy action of a single or a few doses, and consider the more important, because the more permanent, effects of its continued use. These effects are varied by the quantity used, the length of time it is continued, and by the temperament and power of endurance of the drinker.

In its habitual use, *four* stages of alcoholic change are recognized, corresponding in many respects with the four acute stages that have been described.

There is a mild *first* stage where only small quantities are used, as where an occasional glass of light wine or beer is taken with the meals, and where such limits are not exceeded. In this the condition of the brain and nerves is but little changed from the physiological or natural state.

There is a *second* stage where a change from the normal state is more perceptible—where the force and regularity of brain and nerve action is impaired, but not in any extreme degree; but where the tone of the intellectual, and particularly of the moral, character is lowered, but yet where the subject of it is not regarded as a drunkard.

There is a *third* stage where there is unquestionable intemperance or inebriety—where the subject is called a "hard drinker" or "drunkard" according to the degree of indulgence; and there is still a more advanced or *fourth* stage, where the victim is a complete sot, given up to continued and extreme indulgence, whenever the means are within his reach, where there is the greatest debasement, physical, mental and moral, where there is advanced alcoholism or alcoholic disease, where the wretched victim is tottering on the verge of destruction, unfit for any useful occupation or respectable association, a disgrace to himself and friends, and a nuisance to all about him. These stages shade off into each other with no abrupt line of demarkation, but are different degrees of the one general process of abnormal change.

All are ready to admit the very great, the almost inexpressible, evils to the brain and nerves of individuals, to the happiness of families, to the interests of communities and the country, of the third and fourth stages of habitual alcoholic indulgence. The changes of the brain usually discoverable in its structure, but which more certainly exist in its functions—in its actions and tendencies—are most profound; and are all in the direction of physical, mental and moral degradation.

The structure of the brain is changed in various ways from its normal state. It is sometimes hardened from the increase of its connective tissue, and sometimes softened from a form of fatty change; and in both cases the proper brain cells—the seat of cerebral action—of physical and mental power—are more or less diminished in number, altered in structure, and impaired in activity. The vessels are often found degenerated, and are liable to great distention and rupture, constituting congestion and apoplexy. The membranes of the brain are often found inflamed and thickened, their transparency and pliability impaired—and, in short, the whole organ is degenerated, enfeebled and perverted.

Under the immediate effect of the liquor the drunkard is regardless of his duties and obligations to himself, his family and to society. He is inefficient, improvident, unthrifty, unreliable; often violent, dangerous and criminal. When deprived of his accustomed dram, he is morose, despondent and often unendurably wretched, with a craving for the liquor, which in the perverted state of his brain is irresistible. His depression and despair sometimes lead to suicide, preceded, it may be, by the murder of his family, with the motive of relieving himself and them from their living death. Mingled with this despair are often fits of fury which the drink excites, and his causeless and unreasoning vengeance may be inflicted indiscriminately on himself, his family, his friends, or strangers, as well as on imagined or real foes. In many cases nothing is too absurd or too depraved for him to do, and no suffering is too severe for him to endure.

The drink which for a time relieved his agony, at length fails to do so unless carried to the extent of stupefaction and unconsciousness. This quantity is therefore taken, and this increasing indulgence, if it does not induce sooner some fatal form of disease, brings him to the fourth and extreme stage of habitual drunkenness, which, though it sometimes is endured for a considerable period, usually soon results in death.

Besides rendering other diseases and accidents much more severe and fatal, this excessive drinking produces several particular diseases of the brain and nervous system.

The one best known to persons not of the medical profession, because of the striking character of the symptoms, is delirium tremens. In this terrible disease the brain becomes so affected by the alcoholic poison that all its functions, physical and mental, are performed in the most irregular and fearfully perverted manner. There is usually a premonitory stage in which the patient is restless, wakeful and apprehensive of some violence, misfortune or calamity. When attempting to sleep he is awakened with frightful dreams which are so vivid as to appear to be realities for a time after awaking. These and other symptoms may cause the patient to stop his drink, but too late to prevent its effects. In other cases, quite as numerous, the premonitory symptoms are less regarded, and the full development of the disease comes on in the midst of gross indulgence in drink; but the phenomena in either case are similar. The face now becomes paler, the surface is covered with a profuse sweat, there is trembling in every muscle, the patient looks wildly about him, seeing in his delusions frightful objects in every quarter; and though his pulse is weak and fluttering and his whole appearance indicates great debility, he still moves about restlessly, and often actively, and he frequently exerts himself violently to escape from imaginary enemies. His whole mental functions are perverted even more than his bodily ones. The most characteristic mental condition is *fear*, which is always present. His ever-present hallucinations, or morbid imaginings of sight, sound and feeling are of a frightful character. He thinks he is pursued by "a man with a hot poker," that "snakes are in his boots," that disgusting bugs are crawling over him, that great bats are flapping their skinny wings in his face, that vampires are sucking his blood, or that demons are about to seize him; and he cries out and struggles in mortal agony. He may make a fatal leap from a high window, or, escaping from his room, may run half-naked through the streets. No condition of horrors or mental suffering can exceed this state. The ancient ideas of Gorgons and Furies must have been derived from experiencing or witnessing this disease, which occasionally occurred among the wine-bibbers of the time.

In this disease, left to itself, sleep and rest are banished, and death by exhaustion is likely to occur in from a few days to a week. Many cases, however, under proper management, recover from a first, and some from a second or third, attack. It would seem from such a warning that the first attack would be the last—that the cause would be avoided. But the desire to return to drinking is so great, the force of habit so strong, the self-control through brain impairment so feeble, that indulgence again occurs, and subsequent attacks generally follow. With each recurrence of the disease the chances of recovery diminish, until death closes the earthly scene. Subsequent attacks of this particular disease may not occur, death following from other forms of alcoholism, or from complications of other diseases; but when the brain is so far impaired as to produce delirium tremens permanent reform is almost hopeless, and the victim is almost sure to die a drunkard.

Death to our natural instincts is a fearful thing, come in what form it may; fearful when amid friends and family and loving care; made less appalling by affection earned by years of self-control, of duty done, of virtue, kindness and love. It is a terror even when life passes away with these surroundings in resignation and hope, and ceases as gently as music from a slumbering harpstring. What then must be this dread event to him, who drives from his death-chamber, or perhaps his gloomy cell, by his raving violence or his profane mutterings, his family and kin, who may have but the tattered remnants of abused affection, while he puffs out his last foul breath, a token of the corruption within, and nothing remains but an inheritance of painful memories, and possibly of propensities which may lead his offspring to repeat his career.

Can it be possible that an article, which so often produces the effects upon the brain and nervous system which have been sketched in mere outline, is, as a beverage, even necessary, useful or safe; or indeed entirely innocent, habitually used in any quantity, however moderate?

"A Little Child Shall Lead Them."

An esteemed clergyman writes thus: "Very recently a boy in my parish, only six years of age, was sent by his mother to fetch his father home from a public-house. He found his parent drinking with some other men; one of them invited the little fellow to take some beer. Firmly and at once the boy replied: 'No, I can't take that; I'm in the Band of Hope.' The men looked at one another, but no one was found to repeat the temptation. The man then said: 'Well, if you won't take the beer, here's a penny for you to buy some candy.' The boy took the penny and said: 'I thank you, but I had rather not buy candy; I shall put it into the savings bank.' The men looked at one another, and for some moments were entirely silent. At length one of them rose and gave utterance to his feelings in these words: 'Well, I think the sooner we sign the pledge and put our savings in the bank the better.' The men immediately left the house. Such was the effect of the two speeches of a box six years old. How many old people have made much longer but less effective speeches! 'A little child shall lead them!' "—*Golden Censer.*

May a Christian Sell Liquor?

The dram-seller offers liquor to every man (not already intoxicated) who applies for it. Among those who apply are many to whom the liquor is poison, and worse than poison. To some of them it will bring bodily death; others it will madden to the commission of fearful crime; others find in it that which ruins family peace; and to a great number it brings the curse implied in the words: "Neither thieves, nor covetous, nor drunkards, shall inherit the Kingdom of God." Can it be right to offer liquor promiscuously to men, whom it *may* lead (and a vast number of whom it *will* lead) to hell?

May the wholesale merchant furnish whisky to the retailer to be used for this purpose? Alcohol is sold and bought for manufacturing purposes; that, of course, is right. But can it be right to furnish it to the dram-seller for a use that leads to the ruin of soul and body? Nations will not allow a neutral to furnish munitions of war to the enemy. Is not the dram-shop drinking of whisky a weapon of the Evil One? May a child of God furnish it?—*Christian Observer.*

FOR OUR YOUNG FOLKS.

THE BOY STAMP-COLLECTOR.

Three months ago he did not know
His lesson in geography;
Though he could spell and read quite well,
And cipher, too, he could not tell
The least thing in topography.

But what a change! How passing strange!
The stamp-collecting passion
Has roused his zeal, for woe or weal,
And lists of names he now can reel
Off, in amazing fashion.

I hear him speak of Mozambique,
Heligoland, Bavaria,
Cashmere, Japan, Tibet, Soudan,
Sumatra, Spain, Waldeck, Kokan,
Khaloon, Siam, Bulgaria—

Schleswig-Holstein (oh! boy of mine,
Genius without a teacher!),
Wales, Panama, Scinde, Bolivar,
Jelalabad and Kandahar,
Cabul, Deccan, Helvetia.

And now he longs for more Hong-Kongs,
A Rampour, a Mauritius,
Greece, Borneo, Fernando Po—
And how much else no one can know;
But be, kind fates, propitious!
—*Mary L. B. Branch, in St. Nicholas.*

FIFTY CENTS.

The Many Things They Were to Purchase, and the Disposition Finally Made of Them.

Frank came flying in while the family were at supper. "Aunt Catherine," he began, when the dining-room door was half open—

"Take off your cap, Frank," broke in his sister Ada, who was her impetuous brother's mentor in points of etiquette.

"Oh, dear!" cried Frank, jerking the cap off. "Aunt Catherine"—

"You must wash your hands before you sit down to the table," said his mother.

"Mother," sa'd Frank, pitifully, "I never shall get a chance to tell you."

The others laughed. "'Twon't take but a minute, Frank," said Ada, consolingly.

At last, his cap off and his hands washed, and seated at the table, he went on with his story.

"Aunt Catherine," said he, "has promised to give me fifty cents. Ain't it splendid! I've been splitting up a little kindling wood for her, and she's going to pay me just as much as she would a man."

"Hasn't she paid you yet?" asked Ada.

"No, she didn't have the change; but she's going to just as soon as she gets it. I think I shall buy a ball with the money, a real tip-top hard one. I've been wanting one ever since I can remember."

Fifty cents was a large sum to the two Willis children. Their father was not poor; he was able to give them the comforts of life, but there was very little to spare for extras. Frank and Ada had very little spending money of their own. The most they had was given them by their Aunt Catherine, who had no children and was well-to-do.

So Frank's prospective fifty cents loomed up to his fancy like a little mountain of silver.

His Aunt Catherine lived two miles away, so while he went to school through the week he could not very well go to see her. He generally paid his visits to her on Saturday, as he did on the occasion of the kindling wood and the promise of the fifty cents.

All the week following he was in a state of excitement and impatience. He teased his mother to let him go up to see his aunt after school, but she said he must wait till Saturday.

So all he had to console himself with was anticipation, and he made the most of that. The famous dairymaid with her basket of eggs was nothing to Frank with his fifty cents before the week was out. Monday night he came home from school with a change in his plans.

"I've been thinking it over, mother," said he, "and instead of getting a ball with that fifty cents Aunt Catherine promised me, I guess I shall buy a knife. I can get a splendid one for fifty cents; Eddie Perkins has just got a beauty."

Frank talked knife all the evening, till the rest of the family were rather tired of it. Next day, however, they had a respite, if a change of subject could be considered one. Frank rushed in at noon all alive with a new scheme — "Say, mother," cried he, "I've changed my mind, I ain't going to buy a knife with that fifty cents. I'm going to buy a bicycle."

"Why Frank Lee Willis," cried Ada. "You can't buy a bicycle for fifty cents; the idea!"

"Of course I can't; don't you suppose I know that. This fifty cents is just going toward it, that's all. I'm going to save up money for one, and I'm going to put this into my tin bank for a beginning."

"You'll never do it," cried Ada, incredulously.

"I'm a-going to *try*," said Frank, with a determined air.

In the course of a day, Ada came to her mother in dismay. "Mother," said she, "what *do* you think Frank's going to buy with that fifty cents now—a little yellow puppy! He is; one of the boys has one to sell, Frank says, and he'll let him have it for fifty cents. It will worry my cat, and I don't like a little yelping dog, any way. Isn't it *too* bad?"

"I wouldn't fret if I were you, dear," said Mrs. Willis, "I don't think it's very probable that Frank will buy it."

So it proved; for the next day Frank contemplated purchasing six white mice; and the next, he was undecided between Robinson Crusoe, a top and a drum. When he finally had set out for his Aunt Catherine's on Saturday evening, Ada produced a paper which she opened to her mother. "See here," she said, her little round face twinkling all over with fun, "I've set down all the things Frank was going to get with that fifty cents; and which *do* you suppose he will? Look at the long list. This morning he told me he didn't know but he might buy a rat-trap; and last night he said, after all, he didn't know but he might as well buy fifty cents, worth of marbles, and have a real good stock. I set them all down, so as to remember, for I don't believe Frank will buy one of them. He'll get something else he's never thought of."

Frank came home rather earlier than usual from Aunt Catherine's, and he walked into the house rather soberly for him, too. His father had just come home, and his mother was putting tea on the table.

"Did you get the fifty cents?" asked Ada, curiously.

"Yes."

"Where is it? Let's see it."

"I—haven't got it."

"Why, you haven't spent it, so soon?"

"Yes, I have. Supper 'most ready, mother?"

"Yes," said his mother. "What did you buy with it, Frank?"

Frank colored up to his closely cropped hair. "I wish you wouldn't ask me. I—didn't spend it for anything bad."

"Why, tell me at once what you spent it for," said his mother. "What are you acting so for, Frank?"

At that the little boy put his hands up to his red face and began to cry.

"Why, Frank Lee Willis, what is the matter?" asked Ada.

"Frank," said his father, "tell us at once what you have bought with the money."

"Oh," said Frank, sobbing, "you'll—laugh at me. You've been making so much fun—about my buying so many things with that fifty cents."

"No, we won't, dear," said his mother, pityingly; "go on."

So Frank, catching his breath at intervals, told how he had finally disposed of his wonderful fifty cents. "I got the money," said he, "and I was coming home early. I'd 'bout made up my mind to buy a pocket-book; and I thought, if I got it to-night, I could carry my contribution in it to-morrow. I'd got as far as High street, and I was going down the hill real fast, when I heard somebody holler: 'Halloo, Frank!'

"When I looked there was Benny Wheelock in his window. He broke his leg awhile ago, you know, and he's just got so he can sit up. He looked awful white and thin, though he seemed real tickled to see me. I stopped, and talked with him a minute, and I says to him: 'Ain't it pretty tiresome for you keeping in so?' Then he tries to laugh, and it made him look thinner. 'No,' says he, 'not so very. Folks come to see me some. Mrs. Stowe came to see me last Sunday,' says he, '*and* she brought me an orange. My, wan't it prime!'

"Benny's mother'd been moving round the room, and now she came up and pats his head. 'Yes, that tasted good, didn't it, Benny,' said she. 'I wish mother was rich enough to feed you on 'em all the time.' You know Mrs. Wheelock is dreadfully poor, and does washing for folks.

"Well," Frank went on, "I—don't you laugh at me—I walked right down to the store, and—I bought a whole dozen of the *beautifullest* oranges for him. I put 'em right in his window, you know, and I told him he needn't mind taking 'em, because the money was given to me, and I didn't know what to do with it. My, you ought to have seen him!"

There was a moment's silence. "Why Frank Lee Willis!" said Ada. Then: "I think you were just splendid to do it, and I guess we won't laugh!"

Mrs. Willis said nothing, but she stooped down and kissed the little boy's flushed face. And his father gave him a big pat on the shoulder. "For all our making fun of you, I guess you've proved you can spend money about as wisely as any of us," said he.

Ada kept on staring at Frank with big loving eyes. Presently, she went and whispered something in her mother's ear. "Mother," whispered she, "can't Frank have a piece of the best plum-cake for supper to-night? I don't want any myself; just a little piece for him, you know. I made lots of fun of him."

Mrs. Willis laughed, "I don't care," said she.

Then Ada went down cellar, and joyfully cut a very thick slice of the best plum-cake for Frank. —*Mary E. Pilkins, in Congregationalist.*

MOURNING.

The Goods That Are Considered the Thing to Denote Grief.

For mourning wear there is a new material, the crepe imperial, that bears a close resemblance to crape, although it is made of wool. It is not only less expensive than the crape japonica and the silk and wool crape Jappo, but it is durable enough to last as long as it is necessary to use it. The popular canvas cloths, nearly transparent in their delicate lightness, and the fine nun's veiling fabrics are cooler than silk, and perfectly adapted for the summer months. There is a new cotton material named Armure Royal of the finest black dye and guaranteed to be fast jet black. It is thirty-two inches wide. Extremely heavy mourning is no longer imperative, especially for widows, who have been made ill by the heavy swingings of crape in veils and trimmings. Dresses are trimmed only, if preferred, with crape, nor are the veils worn over the face since physicians have denounced them as being impregnated with poisonous dyes. Dainty white crepe lisse ruchings in the neck are permitted with a black one outside as a relief from the unbecomingness of the black next to the skin without relief. In addition to this there are fluffy soft collarets made of white crepe lisse with knots and ends of black gros grain ribbon, graceful jabots and fichus attached to a black lusterless dog-collar softly flowing to the waist; for elderly ladies black China crepe caps are more becoming than the closely-fitting mull, and yield a lovely contrast to the soft white hair. Cool caps for elderly ladies are made of black etamine in squares or half squares, pinned on with dull jet pins; but if white caps are insisted upon they must be of mull, very fine, with close borders. The handsome crepe stone jet buttons are a delusion and not to be trusted for use, but will remain on securely for trimming purposes. The flat black button that resembles bone or ivory without luster is trustworthy. Henrietta cloth must be of the finest, and if it can not be afforded, a fine nun's veiling is an excellent substitute, and for summer wear there are pongees, China crepes, soft China silks and flannels, both white and black.—*Philadelphia Times.*

—A contractor offered to build the Bartholdi pedestal for $199,000. The committee however, went on in its own way, and the result is that the pedestal will cost about $400,000.—*N. Y. Tribune.*

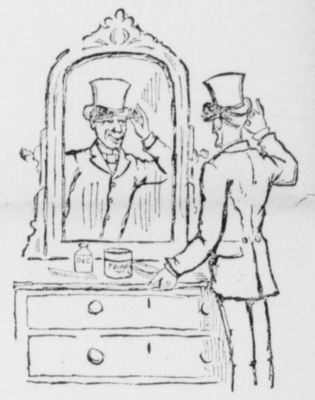
PRETTY, BUT DEAD.

A Highly Moral Lecture on the Foolishness of the Sterner Sex.

The Phenomenal Silliness of Mankind in General, and the Stupidity of Dyeing Their Hair in Particular—Aboriginal Experiences.

I notice with sincere regret that another New York gentleman has lost his life as a result of over-indulgence in the hair-dye habit. This habit is now sapping the life blood of many and sowing the seeds of death throughout our entire land.

The hair itself is not improved by dyeing as an Indian is. The Indian, prior to dying, is disagreeable and annoying, but afterward he at once becomes docile and harmless. The hair when dyed becomes rough, and if colored a dead black is the gloomiest



sight I know of. You take a heavy moustache, and after coloring it a crushed tomcat black, hang it over a new set of white commercial teeth that were made for another party and you have a picture which will make a horse leave his stall with pleasure.

Nothing looks more beautiful than beautiful hair growing where it was planted by an All Wise Hand; but nothing can be more pitiful than the picture of an old widower rising up out of his grave on the morning of resurrection day with a lot of London dyed second-hand hair and a set of dollar-store teeth in his hand.

I have made some experiments in the hair line, and I find that I can let my grocery account run just as long without hair as I could with hair. So that, for the purposes of trade, hair is not essential.

Let us go still farther and see how it is about matrimonial matters. It is claimed by gray-haired widowers especially, and bachelors who were born a long time ago, that gray hair or seldom hair is injurious to matrimonial opportunities. This depends, of course, upon who the victim is to be. If she be a young and skittish thing from the kindergarten, who regards hair as a mark of success in life, perhaps you are right in trying to improve on nature; but if she be the kind to stand up and fight for you instead of with you, a large assortment of damaged hair will not catch her.

I know that a man with five cents' worth of hair may marry far above his station in life, for I have tried it myself. So the dangerous and foolish habit of wearing the hair that has been rifled from a foreign morgue is not excusable on the ground that we can not be properly loved if we are bald.

This ought to be equally true of the hair that is gray. People who have nice gray hair should remember those who part their hair with a Turkish towel. If I had gray hair instead of a site for it, as I now have, I would spend my time largely combing it instead of blacking it. Those who black their hair as a rule do not comb it as much as they should for fear of wearing off the blacking. Is it not singular that a man should prefer paralysis and black hair to health and handsome white hair? Isn't it odd that a man who is old enough to know better should choose to be a premature angel with dead black hair and a dab of hair dye on his nose when he really don't have to?

The other day I saw an old party who had two long brindle trifles of hair pulled in front of his ears and colored. On top he had no hair and behind he had neglected to color it, so that when he looked in the mirror and had his hat on he could fool himself. He certainly did not fool anybody else.

I could not help thinking how he would look when Gabriel sounds his horn and the old gentleman begins to scrabble around for his hair dye and his hat so that he will look pretty before the judgment-bar.

We should so live that 5,000 years from now future generations will not stop to ask: "Don't he wear his own hair or that of a total stranger?" We should lead such lives that people will be sorry when we are gone and regret it for two or three days at least. It is better to die bald-headed and beloved than to live forever wearing coal black hair and surrounded by millions of people who assure us that we need not postpone our death on their acount. Still there are men who do not care for all this. Neither do they care for health. They would rather die a pretty paralytic than to live white-haired and on the square.

We talk much of the folly and vanity of woman, but, when a man really becomes ambitious to be a star fool, he shames all the female fools of his time into an early grave.—*Bill Nye, in Travelers' Magazine.*

SELF-PRESERVATION.

Said this duffer: "My dear, let us see
What that curious ball there can be;
Why, it's hornets, I swear,

Of yourself, love, take care,
This umbrella will answer for me."

REV. SAM JONES.

How the Noted Southern Revivalist Looks—A Newspaper-Man's Talk With Him.

Rev. Samuel Jones, the famous revivalist, arrived in the city yesterday morning. Mr. Jones greeted our scribe with a hearty hand-shake, rolling a quid of tobacco in his mouth at the same time. In reply to a question as to the class of people numbered among his conversions, Mr. Jones answered that the number included lawyers, doctors, editors and newspaper reporters. "Some people have an erroneous idea," continued Mr. Jones, "that the newspaper

THE NOTED EVANGELIST.

men are beyond redemption, but my work in the South proves the falsity of such a notion, as I succeeded in the course of my labors there in reclaiming a large number of press representatives."

"Do your converts, as a rule, freeze to the faith after once embracing it?" asked the reporter.

"They do; but occasionally a few fall back into their old haunts—this being due to improper nursing."

"What kind of nursing do converts require?"

"Spiritual nursing. When a convert once grasps the truth he must be put through a thorough course of religious training, in order to prove to him the wisdom of his move. In nine cases out of ten the convert sticks, provided, as I said before, he receives encouragement and religious instruction for some time after his change of life."

"To what do you attribute your unprecedented success in revival work?"

"In the first place, the present year is an unusually good one for this kind of work. The faith has risen like a mighty cyclone, and left marks of its good work on all sides. In the second place, the people are becoming more alive to their religious wants, and lose no opportunities in attending religious instruction."

"Don't you think, Mr. Jones," queried the scribe, "that your auditors are in a semi-frenzied condition when they acknowledge their conversion in the revival-meetings?"

"Certainly not. They listen to the Word of God preached by His emissary, and in obedience to the workings of their conscience rise in the possession of newly-infused faith and acknowledge their conversion; that being the case in all instances of camp-meeting conversions."—*St. Louis Republican.*

"But you haven't named the ingredients."

"O, the ingredients are of no consequence. Almost anything will do."—*Philadelphia Call.*

AMERICANIZED CHINESE.

How the Celestials on the Pacific Coast are Adopting American Habits and Institutions.

The Tapes have been raising a *tapage*. It was through the application of the Tapes to the Supreme Court that the Chinese public school was opened in San Francisco. The Tapes are Americanized Chinese, and how Americanized the following story will show: John Tape is an expressman, drives one wagon and owns another, wears his hair cut short and goes to Sunday-school. In taking goods to the mission he met Mary, a servant, who wore her hair in a butterfly chignon, painted flowers and did embroidery. John and Mary courted and were married. John built a neat little house out in the western addition, where in due time appeared two little Tapes—Mamie and John. It was an American family in custom, costume and speech, and the mission folk used to take visitors out to the Tapes, and exhibit them as examples of how very Caucasian the Mongolian might be made. A little while ago, however, John came to the mission in a very unpleasant frame of mind. Something was the matter with Mary. He could not for the life of him tell what it was, but Mary was not herself. She was neglectful and listless, but would give no explanation of her behavior. Would some of the ladies go up and find out what was the matter? Nothing would please the ladies better, and the very next morning they paid a visit to the Tape residence. There was plenty of evidence in Mrs. Tape's manner that John's complaint was well grounded.

"What's the matter, Mary?" asked one of the visitors; "has John been doing anything?"

"No; John's all right," said Mary.

"Have the children been misbehaving?"

"No; the children are all right."

"Well, what is the matter, then?"

"Another man," said Mary, plainly.

Without any more pressing Mary confessed that she had fallen in love with the Chinese interpreter of the Sacramento Courts, and that she did not care any longer for her husband. Attempts to impress her with the heinousness of this domestic offence were fruitless, and the ladies left much cast down. When John came home that evening Mary told him the terrible news with as little circumlocution, and added that she intended to pack up and leave the next day. Arguments and entreaties were fruitless, and, sure enough, next day Mary placed her children with a mutual friend and left. Something—John said it was God, but it was probably Oriental cunning—told John to be at the Market Street depot that afternoon. Soon after his arrival a Union Street car brought Mary and a bundle on the scene. John hid behind a pillar and saw his wife joined by the Sacramento interpreter. With a howl he rushed out, and, seizing the interpreter's pigtail with one hand swung him round and with the other hand planted such a terrible blow between his rival's eyes that he fell like a log. Mary looked at the fallen interpreter, then at John's terrific right hand, took his arm and quietly walked home with him.—*San Francisco Call.*

SEASONABLE SUGGESTIONS.

A Chapter on Prudence in Conduct and Temperance in Diet.

The extreme heat of the season, with the increased number of deaths, suggests great prudence in conduct and temperance in diet. A large proportion of the fatal results traceable to thermal causes might easily be prevented by a little care. Of course the few who can afford to gratify their desires by fleeing to some cool and quiet retreat, and there have the good judgment to be temperate in their habits, are the furthest removed from all seasonable dangers, but to the many this is impossible. The less fortunate ones can comply with well established hygienic principles.

Cleanliness is of the first importance and it applies not only to the person but also to the premises. The body should be sponged once a day, and twice is better, with water not cold; clothing next to the person should be frequently changed; the bedroom and linen should be thoroughly ventilated and aired after use. The common practice of shutting up the sleeping room all day in order to keep it dark should be avoided; the clothing should be aired throughout the day, and the couch not made up for use until evening. Keep no fresh meat or decayed vegetation anywhere about the premises. Whitewash the cellar and be careful to avoid keeping remnants of food about to decay and mould.

Equal in importance to cleanliness is the supply of pure air. Let every room in the house from cellar to garret be abundantly ventilated during some portion of each day. Flies and hot air are preferable to a dark, stuffy apartment, which is thus converted into a disease breeding nest. Hot air naturally rises, and, if the upper rooms are kept closed throughout the day, they will be found charged with the foul air that has been generated in the living rooms. Take the utmost care of the sewers.

Temperance should be observed, both in eating and drinking. Where the appetite or the vocation demand, it is better to eat more frequently, rather than overload the stomach at long intervals. Unripe fruit and vegetables are poisonous, and are especially injurious in hot weather. Meats and vegetables should be thoroughly cooked before eating, and all should be fresh when cooked. Intemperance in the usually regarded harmless summer drinks and compounds is followed by as serious results as over-indulgence in alcoholic beverages. Eat and drink seasonable, ripe, well cooked food and light fluids in small quantities and at more frequent intervals.

Do not attempt any over-exertion of excitement of body or mind. Start in time to meet every engagement without hurrying. Whether in the harvest field at the work-bench, in the counting room or study, or enjoying the leisure and comforts that wealth afford, be careful to observe these precautions. There are none so poor or unfortunate that they may not have them, and none so rich that they can safely neglect them. These hints are useful at every season, but they are essential now and will be during the succeeding six weeks.—*Philadelphia Press.*

MISCELLANEOUS.

—Ice cream and iced drinks have made the American stomach what it is—a cavity which produces cramps, headaches and several sorts of fever, to say nothing of bad temper.—*Detroit Free Press.*

—Beef is now slaughtered in Omaha for the eastern markets. The first car load from that point reached Boston a few days ago, making its 2,000 miles' journey in six days in excellent condition.—*Boston Journal.*

—The last remaining toll-house on the old Philadelphia turnpike was torn down last week, and for the first time in fifty years the great thoroughfare between Philadelphia and Pittsburgh was open its entire length without charge to the public.—*Philadelphia Times.*

—The Hawaiian *Gazette* tells how a native of Hilo came to his death while endeavoring to kill a fish he had just caught. He placed it in his mouth to bite it, according to custom, when it slipped down his throat, and, as it was too big to be swallowed and the expanded fins forbade its removal, the fisherman was choked to death.

—There are many novel ways of making a dime, but the last just inaugurated by the Mexican boys of Yuma caps the climax. It is the selling of smoke in old tin cans from the burning of a weed called "hediondia." They go from house to house and offer to furnish enough smoke to drive the mosquitoes away for the small sum of ten cents.—*San Francisco Alta.*

—Profane words having been occasionally spoken within the hallowed precincts of the court house at Palatka, Fla., the county officers agreed to inflict a tax of ten cents on each repetition. A fund for the poor is rapidly growing, and there seems to be some prospect of a lawsuit to decide what shall be done with the proceeds. A man from the country paid forty cents for the pleasure of a five minutes' conversation.

—The eight tons of cherries shipped from California to Chicago recently sold at an average of fifteen cents per pound. The cost of placing them in Chicago is put at nine or ten cents a pound. This leaves the grower a profit of five or six cents per pound, or $100 a ton. The San Francisco *Bulletin* remarks: "While this profit is not a large one when the cost of cultivation and the value of the land is taken into account, it is still a better profit than it ever derived from wheat farming."—*Chicago Inter Ocean.*

—The Hindoos say that chess was the invention of an astronomer who flourished several thousand years ago, and who was possessed of supernatural knowledge and acuteness. The Greeks claim that it was the invention of Palamedes to beguile the tedium of the siege of Troy. The Arab legend is that it was devised for the instruction of a young despot by his tutor, a learned Brahmin, to teach the youth how a king was dependent upon his subject for safety.

—Names of lakes and rivers as they appear in the writing of the early French explorers: Lake Ontario was called Frontenac. Lake Erie, Erike, Erige or Erie, from the nation of Eries; also Lake of Conti. Lake Huron was Karegnondi and Lake of Orleans. Lake Michigan was called Lake of Puans, Lake of the Illinois, Lake Mischigonong and Lake of the Dauphin. Lake Superior was Lake of Conde. Illinois River was the Seignelay. The Ohio was called Ouabouskigon, Oyo, Ouye and Belle Reviere. The Mississippi was the River Colbert, River St. Louis, Meschasipi and Meschasabe. Missouri River was called Pekitanoni, Reviere des Osages and Massourites.—*Louisville Courier Journal.*

—A bachelor German immigrant who went west three years ago, and who had succeeded in getting a farm under a good state of cultivation, recently sent to Castle Garden, New York, to have a wife selected for him. His request was published in the papers, and he now prays that the marriageable maidens be informed that he is no longer in the market. He has been deluged with letters from all sorts of feminine creatures—slim, fat, tall, short, blonde, brunette, fair, freckled and with black, brown, red and gray hair, and coming from every part of the country. He says that he would require the bank account of a Gould and a regiment of stenographers to reply to the letters he has received, which ask him about the size and value of his property, the climate, soil, products, population, schools, churches, and age and description of the minister. He is married now.—*N. Y. Tribune.*

A Chinese Restaurant.

You have never dined, reader, at a Chinese restaurant. You enter and perch upon a stool near a large square table. The next moment the attendant has put down in front of you a tea-pot filled with fresh, boiling tea, a teacup one-third the size used by Americans, two ebony chop sticks, a porcelain spoon, a tiny liqueur-bowl, and a saucer filled with a chocolate fluid called se-yu. This is a hybrid between salt and dilute Worcestershire sauce. The first course is cold roast chicken, served with pickled perfumed turnip. The flesh is tender, snow white and free from sauce. It is cut into small pieces, but these are arranged so as to preserve the outline of the fowl. You seize a piece with your chop-sticks, dip in the sauce, and then eat it in solemn silence. The next course is fresh fish, steamed, boiled, or fried whole and covered with a dark and very aromatic sauce. With it is served a bowl heaped to overflowing with rice. It is cooked as only the Chinese can—each grain soft and tender and distinct from its fellows. Next appears a bowl of chicken soup, on whose surface floats a few thin slices of some green vegetables. Then follow roast duck with pickled carrot, chow-chop-sue (a ragout of chicken liver, lean pork, bamboo-tip, celery, bean-shoots and onions), dried fish, steamed chopped pork, macaroni and chicken, and dainty dumplings filled with spiced hashed meats. With the foods are served tiny pitchers of liqueurs. One is a brown rice arrack, the second a date brandy, and the third an orange gin. All the dishes are well cooked and served, and are a novelty to the most blase gourmet. The made dishes especially are new and strange.—*Won Chin Foo, in Chicago News.*

SATURDAY, AUG. 22, 1885.

The Hagertown *Daily News* (whose editor, by the way, is a Democrat) has the following deservedly complimentary notice of Hon. L. E. McComas in connection with the Santos case:

If it is true that Julio Santos has been released (and we have received no contradiction of his reported release) there are two Washington county men to whom, more than to anyone else, credit is due for untiring industry and unfailing effort in that behalf, viz: Hon. Louis E. McComas and Mr. Henry Onderdonk. The latter being his old preceptor naturally felt a warm interest in the fate of his former scholar Julio, and most nobly has he championed his cause.

Mr. McComas had no such intimate personal connection with Santos, his interest being exclusively confined to that which a faithful representative should have in the welfare and safety of a constituent or fellow-citizen. It is probable that Mr. McComas' efforts were the most potent factor in producing the action on the part of our government of Ecuador. He was unremitting in his efforts to place the matter in its true light before the State Department, and in presenting it in such a manner that its merits as a question of international law, of national honor and personal liberty might be clearly understood. This was done with all the ability, persistency, earnestness and knowledge of the subject which are cardinal traits in the advocacy of any cause undertaken by Mr. McComas. At one time it seemed as if all effort would be unavailing—that is, verbal effort—but thanks, mainly to Mr. McComas, a different termination has been reached, and the prospects are that Julio Santos will soon have an opportunity to express his appreciation in person to Mr. Onderdonk and to Mr. McComas.

The Business Outlook.

The business prospect continues to improve. The silver question seems to be the sole retarding influence, but in spite of the uncertainty which it begets the signs of improvement are constantly multiplying. The iron trade is looking up and dry goods are in growing demand, with a firmer tone. The money market is more active, and railroad earnings show an improved tendency. Out of 188 woolen manufacturers 117 take a hopeful view of the outlook.

The general drift of trade reports is encouraging. There has been an absolute increase of nearly $8,000,000 in fifteen days of the present month in loans by the New York banks, and it is fair to surmise that a corresponding advance of credit is being made in other cities. Still, it is not thought prudent to count upon the certain maintenance of the improvement. Its continuance will depend largely upon the realization of the crop estimates. The certainty of an abundant supply of our leading staples will furnish a good basis for commercial confidence, which is requsite for sustained activity in trade. Reports from the country at large show firm prices as a rule, better prospects, more confidence, and expectation of a good fall trade. The outlook appears to be brightest in the South, the cotton crop of that section promising remarkably well. Baltimore is likely to fare as well in the expected improvement as any of her sister cities, and, if her merchants and manufacturers watch their opportunities as they should, she may come out ahead of many of her rivals.—*Baltimore Herald.*

Some of the Republican newspapers are saying savage things because, fot example, a Cincinnati rough, convicted of interfering with a free ballot, has been pardoned by the President; because a horse-thief and ex-convict has been made an agent for the Postoffice Department; because a man in jail for robbing the Government has been made a postmaster, receiving his commission while in durance vile—and more of the same sort.

We understand that all of these appointments are in the line of the President's determination to recognize all elements of the party in hope of fusing the factions into a solid mass. Is there any fault to be found with this policy?—*Wheeling Intelligencer.*

—Hon. Wm. Motter is very ill at his home in Hagerstown.

[From the Cumberland Independent.]

CUMBERLAND, MD., Aug. 11, 1885.

The following paragraph appeared in the "Oakland Letter" to the *Cumberland Times* of the 10th instant:

"The Baltimore and Ohio has probably got its fill of Miss Jennie Smith and local option, and it will probably go to the wall next time. It was a bad speculation for them in bringing her here on a salary. They catch the fare on local trains and have it come back on them by local option, which means big money out of the coffers of their hotels."

Now, Mr. Editor, for downright meanness and willful or ignorant misrepresentation of facts, the above item caps the climax; there are no less than four false statements in it, in addition to doing gross injustice to a noble, earnest Christian lady, and one whom all respectable people of whatever sex or creed love and respect for her many virtues as well as her earnest effort to make men and women better, and aid them to lead better lives.

The Baltimore and Ohio railroad company never got Miss Jennie Smith to go to Garrett county. She was sent a few years ago on the railroad lines of the country as the representative of the W. C. T. U., and in that capacity came on this road and has been working among its employes in the interest of temperance. She located at Mountain Lake Park for many reasons, but principally, I suppose, because she wanted to, and it was her right to locate where she pleased; and the work which Miss Jennie has done among the railroad men along this line and others will live long after the writer of the above squib has been forgotten.

We never heard that the B. & O. had taken any hand in local option affairs in Garrett county. We have heard for many years that the company would not employ any man that used intoxicating liquors, thus saying to the world "we cannot trust our property and the lives of those coming over our lines in the hands of drunken employes." This is the kind of local option that the company enforces, and it is the business kind.

The B. & O. company never paid Miss Jennie Smith a salary or compensation of any kind for any work she has done. They did not buy the lot for her cottage at the Park, or build the cottage free. She paid them the full price for the building in cash and holds their receipt therefore; they having erected the same for her.

This is the first time that we ever heard that the company expected to "fill its coffers" with whisky money, and we do hope that whenever that company shall get so far away from its chartered purpose that it must become a keeper of saloons in order to fill its coffers, that it will speedily become bankrupt and close up. * *

W.

Beer Against Whisky.

For some years a decided inclination has been apparent all over the country to give up the use of whisky and other strong alcohols, using as a substitute beer and other compounds. This is evidently founded on the idea that beer is not harmful, and contains a large amount of nutriment; also that bitters may have some medical quality which will neutralize the alcohol which it conceals, &c. These theories are without confirmation in the observation of physicians.

The use of beer is found to produce a species of degeneration of all the organs; profound and deceptive fatty deposits, diminished circulation, conditions of congestion and perversion of functional activities, local inflammation of both the liver and kidneys, are constantly present. Intellectually, a stupor amounting almost to paralysis arrest the reason, changing all the higher faculties into a mere animalism, sensual, selfish, sluggish, varied only with paroxysms of anger that are senseless and brutal. In appearance the beer drinker may be the picture of health, but in reality he is most incapable in resisting disease. A slight injury, a severe cold, or a shock to the body or mind, will commonly provoke acute disease ending fatally.

Compared with inebriates who use different kinds of alcohol, he is more incurable and more generally diseased. The constant use of beer every day gives the system no recuperation but steadily lowers the vital forces. It is our observation that beer drinking in this country produces the very lowest kind of inebriety closely allied to criminal insanity. The most dangerous class of ruffians in our large cities are beer drinkers.

Recourse to beer as a substitute for other forms of alcohol merely increases the danger and fatility.—*Scientific American.*

State of Trade.

NEW YORK, Aug. 15.—*Bradstreet's* in its commercial summary to-day says:

Special telegrams to *Bradstreet's* from leading business centres report a continuance of the improvement recently noted in the movement of staple dry goods, of wool and boots and shoes. This is specially noted at the East at all the large cities. At most Western centers this is reflected in reports of a somewhat heavier movement of merchandise and a more hopeful feeling among merchants.

Chicago states that North western farmers are in a fairly satisfactory position to make full purchases, but the expected call for funds to move the crops has not been felt there. The situation is rather better at the South, where the bright cotton crop prospects are encouraging interior merchants to purchase in excess of earlier expectations. At the East, bleached cottons and flannels are strongest. Flannels are selling at an advance of 5 per cent. Wool maintains its late firmness. Purchases are fairly liberal, and while many buyers are very conservative in taking supplies, it remains true that sales are heavier than at the like period last year. Prices, however, while firm, are unchanged.

In grocery staples the deliveries of coffee and sugar are behind those of last year. Dairy products are still depressed, with a falling off in the exports of cheese. Wheat is dull and weak and lower. Heavy stocks and the light export demand are the chief depressing influences. Indian corn is moderately firm, with light stocks and small receipts. The statement from the West that no official reports on the grain crops in Minnesota have been made by the Washington Bureau of late owing, as stated, to the lack of funds, opens to inquiry the value of the August report on ths extent of the damage done to wheat in that region in July. Our own advices, including those received by wire yesterday, report a greater amount of damage than had been previously reported.

There is no improvement in actual business in iron or steel. The few new inquiries thus far have resulted in no new business in pig iron. The late orders from rail mills were from Southwestern and Southern roads, but the decision of rail manufacturers to curtail production next year points to the extent of the depression in that line. There were 160 failures in the United States the past week as compared with 192 the preceding week.

PITTSBURG, August 17.—The outlook in the iron trade has not been more favorable for a number of years than it is at present. Signs of improvement are coming to the surface every day, and manufacturers are beginning to concede that the black mantle of depression is being gradually lifted from the staple industries of Pittsburg. Orders are increasing rapidly and many mills are running on double time. One thing noticeable as a result of the suspension of operations is the diminished stock of spikes on hand.

Will 1886 Be a Year of Doom?

From the London Globe.

Somebody has unearthed an old prophecy for the year 1886 of a decidedly uncomfortable nature. It appears that in the church of Oberemmel, near the City of Treveri, in Germany, there is a stone tablet some two centuries old, on which is cut the prophetic verse—in prose it may be rendered: "When Mark shall bring us Easter, and Anthony shall sing praises at Pentecost, and John shall swing the censer at the feast of Corpus Domini, then shall the whole earth resound with weepings and wailings." Now it so happens that next year Easter falls on St. Mark's day, Pentecost on that of St. Anthony of Padua, and the Corpus Domini comes on St. John the Baptist's day, June 24. Here, then, are the first conditions of the prophecy fulfilled, so that now-believers in prophecies and anxious-minded people generally have only to sit down and think of everything disagreeable that can possibly happen to this poor old planet and the dwellers thereon between January and December, 1886. And really if the cyclones and earthquakes, and epidemics, and "wars and rumors of wars" of the years 1882 3-4 5 are to be eclipsed, the prospect is not an agreeable one.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, August 17, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5½@5¾ c. that generally rated firstquality 4¾@5¼ cts; medium or good fair quality 3¾@4¼ cts; ordinary thin steers, oxen and cows 2¾@3¾ cts; extreme range of prices 3¾@5¾ cts; most of the sales were from 3¾@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,146 head, against 1,958 last week and 3,249 head the corresponding week of last year, and the sales were 1,297 head, against 1,129 last week, and 1,888 head the corresponding week of last year.

Trade has been slow on the hill today. The offerings showed some improvement, as compared with those of last week, tops being more numerous than they were then. On these, as to quality, full prices were obtained, but other grades showed a decline on last week's figures of ¼@½c. Prices ranged from 2¾ to 5¾c., while some few choice cattle sold, on private terms, at a fair fraction higher figures, but most sales ranged from 3¾@5¾c., more selling at and near the latter figure than last week.

THE SWINE MARKET.

The receipts are rather lighter, but appear to be equal to a very moderate demand, at a shade lower range of quotations than they were recorded last Monday. The quality is scarcely as good as last Monday's offerings. Prices range from 6@7¼c. for common hogs—rough sows and stags and grassers—and at 6¾@7 for the better grades, with most sales ranging around 6¾; same time last year hogs sold at 7@8¼.

THE SHEEP MARKET.

The receipts are ample for a very moderate demand, though the numbers offered are 120 head less than they were last Monday, and the quality is not as good as it was then. There is no outside demand, and the market has in consequence, ruled dull. Prices range at 2@4c., as to quality, few selling at either extreme. Lambs sell at 3@5c., gross. Same time last year sheep sold at 3@4½c., and lambs same as to-day.

NEW ADVERTISEMENTS.

EXAMINATION OF TEACHERS.

OFFICE OF THE
BOARD OF COUNTY SCHOOL COMMISSIONERS,
OAKLAND, MD., Aug. 18th, 1885.

Public Examinations of public school teachers for Garrett county, will be held as follows:

At Accident, Sept. 1st and 2nd,
At Oakland, Sept. 8th and 9th,

at 9 A. M. Candidates will provide themselves with pens and paper.

By order
C. B. LUDWIG,
7 22 2 Examiner.

NOTICE!

To the Qualified Voters of the Respective Election Districts of Garrett County.

Notice is hereby given that the undersigned Officers of Registration of Voters in and for the respective election districts of Garrett county, will sit in their respective election districts in said county, on the Tuesday, Wednesday, Thursday, Friday and Saturday, after the first Monday in September, that is to say on the 8th, 9th, 10th, 11th and 12th days of September, in the year 1885, and also for two successive days commencing with and including the first Monday in October, that is to say on the 5th and 6th days of October, in the year 1885, at the respective places and on the respective days hereinafter named, for the purpose of ascertaining and registering in the proper registries of voters and poll-books persons qualified to vote in their respective election districts, and of revising and completing their respective registries of voters and poll-books of their respective election districts.

The undersigned Officers of Registration will commence their said respective sessions on the respective days, and at the respective places herein named at the hour of 8 o'clock A. M., and continuing the same until the hour of 7 o'clock P. M. of each of said days, as follows, to wit:

Election District No. 1—Swanton.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Swanton.

Election District No. 2.—Selbysport.

Tuesday, Wednesday, Thursday and Saturday, the 8th, 9th, 10th and 12th days of September, at William Ryland's store, and Friday, the 11th day of September, at Rush's school house, and Monday and Tuesday, the 5th and 6th days of October, at William Ryland's store.

Election District No. 3—Grantsville.

Tuesday and Wednesday, September 8th and 9th, at the residence of the Officer of Registration, and Thursday, Friday and Saturday, September 10th, 11th and 12th at Grantsville, and Monday and Tuesday, October 5th and 6th at Grantsville.

Election District No. 4—Bloomington

Tuesday and Wednesday, the 8th and 9th days of September, at Geo. T. Michael's house and Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, at Accident, and on Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, at Sylvester H. Ryland's house.

Election District No. 6—Sang Run.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at the house of Nathan Browning, in said district.

Election District No. 7—Oakland.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Oakland.

Election District No. 8—Ryans Glade

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, at Fort Pendleton, and Monday and Tuesday, the 5th and 6th days of October, at Mrs. Thomas Grimes, in said district.

Election District No. 9—Frostburg.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October at Johnson's.

Election District No. 10.—Deer Park.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at Altamont, and Monday and Tuesday, the 5th and 6th days of October at Deer Park.

Election District No. 11.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at the house of John H. Gregg, and Monday and Tuesday, the 5th and 6th days of October at the house of Jacob Strickland.

All naturalized citizens applying for Registration will be required to produce their certificates of naturalization to the officers of Registration.

H. O. HAMILL,
Officer of Registration 1st District.
R. E. FRIEND,
Officer of Registration 2nd District.
ISAIAH FULLER,
Officer of Registration 3rd District.
GEO. T. MICHAEL,
Officer of Registration 4th District.
SYLVESTER H. RYLAND
Officer of Registration 5th District.
N. C. BROWNING,
Officer of Registration 6th District.
ANDREW J. HARNE,
Officer of Registration 7th District.
WM. F. DEAKINS,
Officer of Registration 8th District.
GEORGE L. LAYMAN,
Officer of Registration 9th District.
PERRY M. STEMPLE,
Officer of Registration 10th District.
JOHN C. CHANEY,
Officer of Registration 11th District.

Mortgagee's Sale

—OF VALUABLE—

REAL ESTATE

In Garrett County, Maryland.

—:o:—

By virtue of a power of sale contained in a mortgage from Alpha Hinebaugh and Fannie B. Hinebaugh, his wife, and John Hinebaugh and Mary A. Hinebaugh, his wife, to Matthew Cullen, dated June 8th, 1882, and recorded among the Land Records of Garrett county, in Liber W. H. T. No. 6, folios 168, &c., and assigned to Henry A. Rasche by said Matthew Cullen, the undersigned, assignee of said mortgagee, will offer at public sale, in front of the Court House, in the town of Oakland, Garrett county, Maryland,

On Monday,
SEPTEMBER 14TH, 1885,

at 3 o'clock P. M., all the following Real Estate, viz:

First. All that tract of land situate, lying and being in said Garrett county, known as

"SWALLOW FALLS,"

containing about eight hundred acres.

Second. All those pieces or parcels of land situate, lying and being in Garrett county aforesaid, known and designated as

Military Lots Numbers 1256, 1258, 1260, 1261, 1262, 1263, 1264, 1265, 1266 and 1269,

containing fifty acres of land each, and included in a tract of land called

"The Falls of Muddy Creek."

All of which said lands are more particularly described in the said mortgage, reference to which is hereby made.

Said lands are situated on and near the Youghiogheny river, about seven miles north of the town of Oakland, are well timbered, and improved by several DWELLING HOUSES and out-buildings, and the same property on which the said Alpha Hinebaugh recently opperated a saw mill.

PUBLIC SALE

—OF—

MILITARY LOTS

IN GARRETT COUNTY.

On TUESDAY, August 25, 1885,

at 10 o'clock, A. M., in front of the Glades Hotel, in Oakland, we will, on behalf of P. M. Lusson and wife, the owners, offer at Public Sale to the highest bidder the following

MILITARY LOTS to wit:

Nos. 2724, 2721, 2726, 2727, 2660, 2664, 2668, 2691, 2692, 2693, 2694, 2097, 2494, 2463, 2460, 2429, 2431, 2472, 2473, 2582, 2490, 2493, 2441, 2442, 2490, 2493, 2593, 2584, 2585.

These Lots are a part of the tract of land called

"INTERNAL IMPROVEMENTS,"

and lie in the neighborhood of Accident. The tract, "INTERNAL IMPROVEMENTS" was patented to General Walker K. and John B. Armistead, April 20th, 1854. On June 30th, 1867, the widow and heirs at law of General Walker Armistead filed their bill in Equity for a sale of said land, No. 881 Equity, Allegany county. A decree was passed by which W. M. Price was appointed trustee to make said sale. Said Price, trustee, sold and conveyed said lots to P. M. Lusson, and said sale was ratified and confirmed by the Court.

Any person desiring to examine the title of Lusson and wife to said lots can do so by calling on the undersigned who will furnish any information in their possession with reference to the title.

TERMS, EASY.

ALTA LODGE, No. 574, K. of H., meets in same Hall 2d and 4th Thursday nights of each month.

SHEALTIEL LODGE, No. 122, I. O. O. F., meets in Legge's Hall every Monday night.

PATMOS COUNCIL, No. 386, A. L. of H., meets in same Hall 2d and 4th Friday nights of each month.

The Y. M. C. A. of Oakland meets in the Pritchard Building Friday night of each week

ANNOUNCEMENTS.

[Advertisements under this heading will be inserted at the following rates: For Members of the Legislature, Clerk of the Circuit Court and Sheriff, $4 00; Surveyor and County Commissioners, $3.00, and for Register of Wills, $2.00. Advertisements to run till the meeting of the Nominating Convention. The space allowed will be six lines or less, and 50 cents per line will be charged for each line in excess of that number. No name will be announced until the fee is paid.]

FOR SHERIFF.

At the solicitation of many friends I hereby announce myself as a candidate for Sheriff of Garrett county, subject to the action of the Republican County Convention.

JOHN H. RILEY.

July 7, 1885.

—Parties desiring to buy cider mills, will find it to their interest to call on J. M. Davis & Son.

—Tuesday last was the 50th anniversary of the wedding of Samuel Luman and wife, of Cumberland.

—Rev. Finkbiner, pastor of the English Lutheran church, Cumberland, is at the Glades Hotel.

—Mr. Peter Nathan has been appointed Justice of the Peace for district No. 3, *vice* Mr. Henry Winterberg, resigned.

—The Orchilla Guano has given the best satisfaction of any fertilizer in use. J. M. Davis & Son have just received a car load for fall crops.

—Mr. N. C. Browning has been appointed postmaster at Sang Run, and Mr. Henry Zinkan at Accident, both in this county.

—Mr. Armour Craig and wife, of Uniontown, Pa., spent a couple of days at Oakland and Mountain Lake Park last week.

—Miss Ridie Jamesson, of Alexandria, Va., who had been visiting relatives and friends here, was called home last week by a telegram announcing the sudden death of a niece.

—Mr. R. W. McWilliams, who has been in California and British Columbia for about a year returned to Oakland Tuesday for a short visit among his many old friends.

—Mrs. Stahl, widow of the late John Stahl, desires to dispose of her house and lot in Oakland. Persons desiring a cheap property should make a note of this. 7 18 tf

—The sixth session of the Oakland District Conference, (M. E. Church,) will be held at Oakland, Garrett county, Maryland, commencing Tuesday, Sept., 1st, 1885, at 7 o'clock P. M.

—A number of officers of the Baltimore custom house have been removed to lessen expenses. Among them is A. A. Perry, of Oakland, who was an inspector. The saving by the removals will, it is said, amount to $17,000 annually.

—Reports from Elk Garden say that George Blackburn, a boy about fifteen years of age, was bitten by a rattlesnake, last week, and died before he could reach home. He was engaged in binding oats for a neighbor, about three miles from his home, and while in the act of binding a sheaf was bitten on the nose by the snake.

—We last week gave an account of the death of Daniel Beeson, son of Jonas and Rebecca Glotfelty, aged 12 years 2 months and 10 days, which resulted from the bite of a rattlesnake. Since our last issue we received a communication from his Sunday School Superintendent in which he says:

"He was an obedient child to his parents, a kind and loving brother, a much loved companion to his playmates, and one of the best scholars in the Deep Creek Sunday School. His seat was seldom vacant, his lessons were perfect, his attention and behavior good, and when instructions were given in regard to honoring and obeying parents, loving, serving and obeying Jesus he always responded in the affirmative. Although he suffered excruciating pains while under the influence of poison, yet his death was calm and peaceful. He passed away with a smile on his face. So we can say, 'Not lost but gone before.' While we mourn the loss of so promising a youth we bow in humble submission to Him who doeth all things well, knowing that our loss is his gain. The friends have the sympathy of the entire community."

For Sale.

Will be sold on favorable terms—30-horse power steam saw mill complete, with cut-off saw.

Apply to

D. E. OFFUTT, Admst.,
Oakland, Md.

—Miss Georgiana Savage, of near Deer Park, has just returned from an extended visit to Uniontown. During her absence she taught a three months' term of school at Fairview, on the National Pike.

Church Services--Sunday.

Garrett Memorial (Pres.) Church—Preaching at 8 P. M. by Rev. John S. Foulk.

Lutheran Church—Preaching at 10½ A. M. and 8 P. M. by Rev. C. W. Sechrist.

Preaching at Deer Park, by Rev. C. W. Sechrist, at 2½ P. M.

St. Peter's, Catholic—Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

M. E. Church—Preaching at 10½ A. M., and reception of probationers into full membership. Also baptismal service for infants. Preaching at 7½ P. M.

For Sale!

An exceptionally good saddle mare. Is quiet, young, (6 years old.) Has smooth action and is beautifully gaited. Has been driven a few times single and once double. Is not thoroughly broken to harness, and will not guarantee her to drive kindly. Will sell her (for want of use) to the highest bidder, Tuesday, September 8th, at 11 o'clock. A. M., in front of the *Democrat* office. In the meantime mare can be seen at my stable.

DR. E. K. GOLDSBOROUGH.

Oakland, August 19th.—3t.

Accidentally Shot.

Lieut. P. A. Chisholm was accidentally shot by Lieut. R. S. Jamison Wednesday morning, while hunting in the glade one mile south of Oakland. Jamison shot at a pheasant, not knowing that Chisholm was near, while he was only about thirty yards distant, and received about 100 No. 7 shot in his body, arms and face, one of the shot taking effect in the eye, which may cause the loss of the sight. He was conveyed to Oakland on a hand car, and from the railroad to his residence in a carriage, where he was attended by Dr. Cheston, of Philadelphia, and Dr. Bartlett, of Oakland. Beyond the danger of loss of sight in one eye, no serious consequences are anticipated.

Base Ball.

A very long and interesting game of base ball was played at Mountain Lake Park between the Park and Keyser clubs. Two of the Park players being away their places were filled by Messrs. Will Denny, of Terra Alta, and J. Ed. Kildow, of Oakland—Denny as first baseman and change pitcher, and Kildow as short stop and change catcher. Mountain Lake won the toss and sent Keyser first to the bat, making four unearned runs before they were retired. The Park boys were blanked in their half of the first inning. The second inning both sides were blanked. In the third, Keyser's catcher was disabled and Mr. D. E. Bolden, of Oakland, filled the vacancy as third baseman. Numerous and costly errors were made on both sides as the number of runs on each side will show. Denny and "Bob" Burley did the best playing on the Park side, and Shaw and Davis for the Keyser boys. Mr. James Litzinger, of Oakland umpired the game in a fair and impartial manner, both clubs expressing themselves well pleased with his decisions. Robert Townshend and ——— Virtz acted as scorers. Appended is the score by innings:

	1	2	3	4	5	6	7	8	9—Tl.
Keyser	4	0	1	5	3	0	5	0	0—18
Mt. Lake Park	0	0	3	1	3	1	4	4	0—16

Democratic County Convention.

The Garrett county Democratic convention, to select delegates to the State Convention, met in the court house Thursday of last week.

The convention was called to order by R. T. Browning, Esq. Mr. Wm. Hinebaugh was made Chairman and Mr. Ed. A. Browning Secretary.

On the first ballot the following gentlemen were selected as delegates: R. T. Browning, W. A. Brydon and R. S. Jamison.

Dr. E. H. Bartlett and Messrs. G. S. Hamill and J. C. Getty were placed in nomination for Alternates. Upon motion of Mr. G. W. Merrill, the nominations were closed and they were declared the unanimous choice of the convention.

Districts 1, 9 and 11 were not represented.

The proceedings were harmonious—on the surface.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

The Chisholm Family.

MR. EDITOR:—In a late ramble through the wilds and bold sceneries in Garrett county, Md., and Tucker and Grant counties, W. Va., I was enabled to make good a deferred promise to visit an old friend, James Chisholm, now in his 85th year, living on his ample farm in Grant county, bodily feeble with the weight of years, but clear and vivid in intellect and memory.

A series of articles have recently appeared in the columns of your paper on the subject of old and prominent families of Garrett county, and really I know of none more worthy of such attention than the Chisholm family, which is an interesting one in many ways. They are an ancient clan of Inverness county, Scotland. James, the youngest of the family, was the last to emigrate to this country in 1828, and his first American employment was upon the work of the B. & O. R. R. Co. at Sykesville. He there saw the first labor riot in this country. The mob moved down the line to Ellicotts Mills, destroying everything in its way, and was finally quieted by a single Priest in his robes. James soon thereafter went to the Glades, now Garrett county, and joined the rest of the family which, by this time, had all settled down where he became a grazer and herder, and in later years a miller. Sometime since he sold out his Garrett county possessions, and moved to his present quiet home in Grant county. He is a great lover of fine cattle and sheep, and has some splendid specimens on his blue grass plats. His great age has retired him from active service on his farm, which is now performed by his son Archy. Mr. C. was married to Mary McQueen in his native country, who died about four years ago, verging four score. Their children are eight in number: James, William, Alexander, John and Daniel, Mary, wife of Louis Nydegger, Isabelle and Jennie. The two last are unmarried and seem to esteem it a religious privilege to administer to the increasing wants of their aged parent. Their next enjoyment is the cultivation of flowers, which environ the comfortable home in numberless beds of all imaginable devices and tastes. These profuse and tender flowers are the resort and food for the many humming-birds which are constantly darting from one attraction to another.

Mr. Chisholm is a steady reader, but of solid matter, fit for ripe and reflective minds. In religion, a Presbyterian of the strictest sort, adhering closely to the old home church and customs. The old Westminster catechism needs no revision or amendment for him. It seems really hard for one so deeply pious and good as he, to be entirely deprived of church advantages. He is many miles away from such. He is still familiar with his native dialect. His Bible and Psalm books in Gaelic are always near at hand.

The immediate ancestor of the Chisholm family was William, who came to this country in 1822, and died near the Red House in 1837, aged 89 years, and his wife, Mary McQueen, in 1843, an octogenarian. He had seven children: Alexander, William, Jr., Daniel, Archibald, James, Jane and Nancy. Alexander was married, left a progeny and died in 1837, aged 54 years. William, Jr., died in 1866 at 81 years. Archibald deceased at his home near Oakland in 1879, at the ripe age of 83 years, and Daniel, who was somewhat of a hermit, was mysteriously murdered at his lonely home in 1858 a few miles west of Oakland. He had attained nearly seventy years. "Murder will out," but the adage in this case fails signally after a test of twenty-seven years. Not a single clue—scarcely a suspicion as to the perpetrator of this foul murder. In the Mollie McQuire parlance the crime was a "clean job." Jane Chisholm died in 1862, aged 71, and Nancy in 1872 at four score and five years. It will be thus seen James is now the only survivor of this remarkable and worthy family, and he and Alexander the only two out of the seven who ever married, or left children. Both have a considerable progeny. The first of the family to emigrate to this country was William, Jr., during the war of 1812, who at once received the patronage and friendship of Gen. John Swan, in the way of stewardship over his extensive landed estate in Allegany county, but now in Garrett. The Chisholm family not only possessed the friendship and confidence of Gen. Swan himself throughout life, but also of his descendants to the present time, and these unpretending people merit that confidence from such a worthy source if fidelity, truth, honor and honesty count for anything.

It will be noticed without suggestion that there are at least two things remarkable among the Chisholms: Longevity and celibacy. Only two of the seven brothers and sisters ever married. Their rules and habits of life were as exact as pure morals could prescribe. No wrongs or transgressions, or needless frictions, hence life ran on evenly till it was spent.

REMINISCENCE.

August 13th, 1885.

Accident.

August 15th, 1885.

EDITOR REPUBLICAN:—The Normal School is still increasing in numbers and promises to be one of the largest ever held in the county. Forty-nine scholars are so far enrolled and more coming. We have spoken to quite a number of the pupils and all express themselves as highly pleased with the teachers, Prof. Z. K. and Miss Brown. A great many of those attending go home on Friday evening, the central location of the place making it convenient to be at home over Sabbath for quite a number. The citizens of Accident claim it is one of the best locations in the county for a Normal. Though it is impossible to please all, it seems. The success of the present school justifies the favorable predictions made by our citizens. We have heard that there has been some rather ungenerous reflections made both as to people and place, but we think them ill-timed and unmerited. The school house might be larger and better, and the town might be more lively. There should be a railroad and a telegraph office, but there isn't, and the better way is to make the best of it. Speaking of the school generally it is not only one of the largest ever held in the county, but it is also in personnel of the best. There is a great deal of genuine work done and there seems to be a general desire to improve every moment. The students are certainly all well behaved and we should judge that the examination will show good work done.

The Literary society was well attended on Thursday evening, there being a large audience on hand aside from the teachers. The discussions were quite animated and the recitations, declamations and organ music all well rendered. The critic, Prof. Brown, certainly very pleasantly performed his delicate task and inculcated some most useful lessons. Prof. Brown is a graduate of the University of West Virginia, and is exceedingly zealous in working to push forward the school, and in making some very necessary criticisms, performed his duty in a manner that caused no offense and still proved effective. The query box was quite interesting in many respects, but very grave objection were found to some of the question which were very frivilous and and others entirely too personal to be pleasant. We think the honorable secretary would do well to use some discrimination and quietly suppress the more offensive ones. The paper of the society is edited by Miss Ida Shoup, which is called the "Boomerang," and reflects much credit on its editress and contributors. By proper effort it can be made very effective. The music on the organ by Miss Kale contributes very greatly toward the interest of the society. An effort will be made to continue the society after the adjournment of the Normal.

OCCASIONAL.

Mountain Lake Park.

On Tuesday evening of last week Dr. Baugher gave us his grand illustrated lectures "On Some High Places" which gave us a most pleasant and profitable tour through many delighful places on she eastern continent.

As Dr. Masden is now in Europe, Dr. Hamlin, of Carlisle, Pa., took his place, and gave us an earnest and eloquent lecture on Roger Williams on Wednesday morning. In the evening Dr. Warner of Parkersburgh, W. Va., gave us an earnest lecture on "The Preachers and Preaching Demanded by the Age." On Thursday morning Rev. N. L. Reynolds gave us a magnificent lecture on the "Origin of the Earth," which was illustrated by a number of globes and charts. As Dr. Frysinger says, the Assembly gets better and better, this last lecture being the most entertaining and instructive I have ever heard on the subject of or relating to Astronomy. In the evening Dr. Warner gave us a very good lecture on "Is Protestantism a Failure." Prof. Reynolds gave us another of his illustrated lectures on Friday morning on "The Origin of the Earth." Friday night one of the best concerts was given here that many of us had ever witnessed. The ladies and gentlemen who managed it deserve great credit and have received many thanks for their great success in this splendid entertainment. On Saturday morning Prof. Reynolds gave us his third and last entertaining and instructive lectures on the "Origin of Man." How I do so wish that thousands could have heard what we have been hearing these last few days. The like is seldom found, especialy at such little cost. In the evening Dr. Hamlin gave us another good lecture on "Learning to Read," and on Sabbath morning he gave us a very earnest and instructive talk, as he termed it. Early in the morning Rev. S. E. Jones conducted a very good prayer and praise meeting. By special request Miss Jennie Smith gave her experience in suffering and and in healing, but she did as she said she wished to do, made more especial mention of God's keeping power, all through the journey. Immediately after this Rev. H. P. Hamill gave us a very excellent sermon. On Monday morning the Auditorium was handsomely decorated, and the Assembly work was renewed in all its departments, with Rev. J. T. Judd as our lecturer on "Self Help." He certainly has helped himself or he would not know so very well how to help others. In the evening the amateur entertainment and camp fire was had by the members and friends of the Circle. The first part of the evening was spent in concert readings, interspersed with splendid singing. At the close of this the camp fire was lighted. The grove was lighted up beautifully, and the crowd gathered thick and fast around the fire, but they were especially anxious to surround the barrel containing the splendid sweet corn which was to be roasted in the glowing coals. Quite a number of extempore speeches were made from a chair in the crowd, which added greatly to the pleasure of the occasion. J. A. E.

Deer Park.

We are having most delightful summer weather. The Hotel is very full and summer visitors are also stopping at various boarding houses in the town.

Ex-Senator and Mrs. H. G. Havis have been at Saratoga for the past week.

Mrs. M. E. Porter, of Briarly Hall, Poolesville, Md., Miss Effie Jamison, of Piedmont, and Miss Carrie Adams, of Baltimore, are guests of Mrs. W. R. Davis.

Mrs. G. W. Harrison is at present visiting her daughter, Mrs. D. F. Graham.

Capt. Harrison, Mr. Samuel Harrison, of Wheeling, and Mr. Frank Harrison were in town on Sunday.

Mrs. E. J. Roberts, of Brooklyn, N. Y., is visiting Col. E. C. Tillson and family.

Mr. and Mrs. Harry Grant, of Grafton, spent a few days at Wing-and-Wing lately.

Miss Kate Hayden, of Washington, is in Deer Park at present.

The exercises at the last Band of Hope meeting were very interesting. Several young ladies who were visiting Deer Park at the time, kindly consented to assist the programme committee. Very fine selections and recitations were given by Misses Minnie Lott, of Baltimore, Laura Dunnington of Fairmont, W. Va., Rosa Poesche, Mary O'Driscoll, Florence Howell, of Washington, and Rose Carter, of Virginia. Singing by Mrs. J. V. and Miss E. R. Howell, of Washington, Miss Lavinia Haulenbeck, of Baltimore, and Miss Rose Carter, of Virginia. Everything was excellently rendered and made a pleasing entertainmeat. The following officers were elected for the ensuing quarter: President, Col. E. C. Tillson; Vice President, Dr. J. W. Laughlin; Secretary, Mr. J. Bruner Bantz; Treasurer, Mrs. J. C. Rodeheaver; Programme committee, Mrs. A. C. Lott, Mrs. L. H. Schoolfield and Miss Joe Hoye. The next regular meeting will be the first Saturday in September, and as there is a promise of outside assistance, it will, doubtless, be a very entertaining session.

Registered at Wing-and-Wing:

Washington—Miss J. V. Howell, Miss Florence Howell, Miss Birdie Howell, Master Fred Howell, B. F. Bringham and wife.

Baltimore—G. M. McComas.

Philadelphia—Harry Boon.

Sandusky, Ohio—Mrs. T. F. Barney, Mrs. F. T. Spencer, Miss Mary Spencer.

Mannington, W. Va.—C. J. Trippett and wife.

Terra Alta—Charles W. Mayer and wife.

***

Advertise

If you want a farm put a small advertisement in THE REPUBLICAN; you will get more information in that way, in spending $3 or $5, than you would by spending $50 in traveling. If you want to sell your land, advertise in THE REPUBLICAN; it goes to all parts of our county, as well as to adjoining counties in Maryland, West Virginia and Pennsylvania, and is seen by those who are looking for new homes. If you have anything to sell or buy, any wants, advertise in the paper having much the largest circulation of any paper in the county. It gives value received, and can not fail to reach the most desirable parties, and bring excellent results.

Attention Wheat Growers.

Lime insures a paying crop. Geo. E. Bishoff, near Johnstown, can supply you with the celebrated Bear Creek Lime.

Obituary.

ED. REPUBLICAN:—Allow me, through your widely circulated paper to announce the loss of one of our old friends, Mrs. Jane H. Browning, one of the last two daughters of the famous old hunter, Meshach Browning. She was born at Bear Creek Glades, at the foot of the Great Negro Mountain, and near the headwaters of Bear Creek. She was married at an early age to Joab Browning, of Frederick county, this State. They resided in what is now Garrett county at different places until about 1838, when they rented the Old Bear Creek Farm and removed to it. There they remained until the first day of January, 1850, when the husband died, leaving her a widow with her third son, Francis F., to superintend the farm. By care and economy they succeeded very well until about 1857, when she and her elder son, J. Z. who was then in West Virginia, purchased the old farm. She remained on it until the fall of 1858, when she sold her interest to J. Z., and having accumulated some other property she sold all and removed to Bloomington, Ill., where she again bought and lived with her daughter Martha and her youngest son J. R. She remained there for several years until she was afflicted with dropsy, and, thinking a trip to the mountains would be good for her health, she, with her son J. R. returned again to Garrett county, where he bought property, and her health greatly improved she again went to keeping house for him and made it her permanent home. She was a consistent member of the Catholic Church and ever faithful to her duties. She was a kind mother and tried to raise her children in the faith of the church. She was the mother of seven sons and four daughters. The daughters are all living. Only three of the sons were living to witness her death. She was a good neighbor, always ready to give aid or assistance to the sick or afflicted. She was much loved and respected by all who knew her. She was in the 78th year of her age when that dreadful disease, dropsy, warned her that her end was nigh. She was conscious to the last, and believed that she was going to die. She bore her pain and misery with great patience, and uttered no complaint only saying that she did not know why she was detained here so long. She died on the morning of the 5th of August, in the 79th year of her age, and was buried on the 6th, in the Catholic church yard at Johnstown, Father Mattingly, of Oakland, officiating. She was attended the last months of her life by two of her grand-daughters, Minerva Dumire, of Illinois, and Dalphene Browning, of Pennsylvania. Their kind attentions to her cannot be expressed. May God in His great mercy conduct them through this life and add His blessing to them and the departed soul, now and forever. Z.

The Weight of the Sun.

An astronomer gives us an idea of the relative weight of the sun and the earth as follows: "Let us, to start with, weigh the sun. Suppose we have a balance gigantic enough for the purpose, and the sun is resting on one of the scales. Nor put the earth in the opposite scale. You might as well weigh your head against one of the towers of the East River Bridge. Pile a hundred thousand earths into the balance, and the sun does not stir. There lies colossus immovable. But get together another hundred thousand, and then another hundred thousand, and stack them up in the pan against the sun. Three hundred thousand worlds piled up on one side of the balance and still the sun keeps them up. It would take 30,000 more, or 330,000 earths, to move the beam even against a single sun, and six sextillions is the number representing the weight of the earth in tons—a mass which is shooting through space at the rate of eighteen miles in a second."

Nothing to the Harvest Apple.

A Watermelon and a Cucumber which found themselves on the same stand at the Central market yesterday began quarreling.

"You are all colic, to say the best of you," remarked the Melon.

"And you are all seeds and rinds," retorted the Cucumber.

"Come, now, what's all this row about?" queried the stand keeper, as he finished selling a quart of strawberries.

"Why," answered the Melon, old Cholera Morbus here is jealous of me."

"No such thing! Old Rind and Seeds prides himself on being able to kill two men to my one, and you know that is all wind!"

"Hush, my children," whispered the stand keeper. "While I appreciate both of you for all you're worth neither of you is justified in doing any bragging at this season of the year. The Harvest Apple is now knocking 'em out in one round."—*Detroit Free Press.*

OAKLAND, GARRETT CO., MD.

A LESSON IN TENNIS.

They played at tennis that summer day—
Where was it? O, call it Mount Desert—
The place matters not; I will simply say:
They were playing tennis that summer day,
And she wore a short and striped skirt.

He played but ill—'twas his first essay—
And she his partner and coach was both;
Though perhaps not "up" in the points of play,
Yet she knew the game in a general way
And to give him points seemed nothing loath.

He did his best, but his best was poor;
The balls served to him on his side staid;
And thus it went on for a round or more,
Till, anxious, he ventured to ask the score.
"The score? Why, it's Thirty—Love," she said.

"And Love? What is love?" he fain would know,
Yet blushed to ask it, for he could see
What pardonless ignorance he must show;
But she calmly answered him, speaking slow:
"Why, Love is nothing, you know," said she.

. . . . . .

The sun of that summer day is set;
That season is gone, as seasons go;
But his heart was caught in that tennis net,
And they might have been playing partners yet
Had she not given her answer: "No."

He plays no tennis at all this year,
But he mopes, and moans, and sighs—heigho!—
That fate is so hard, and life is so drear;
And, worse than all else, he remembers clear;
That "Love is nothing"—*she* told him so.

—*C. F. Coburn, in Century.*

THE ELDER'S BACKSLIDE.

His Trip to Macon and What Befell Him on the Journey.

Elder Brown told his wife good-bye at the farm-house door as mechanically as though his proposed trip to Macon, ten miles away, was an every-day affair, while, as a matter of fact, many years had elapsed since, unaccompanied, he set foot in the city. He did not kiss her. Many very good men never kiss their wives. But small blame attaches to the elder for his omission on this occasion, since his wife had long ago discouraged all amorous demonstrations on the part of her liege lord, and at this particular moment was filling the parting moments with a rattling list of directions concerning thread, buttons, hooks, needles and all the many etceteras of an industrious housewife's basket. The elder was laboriously assorting these postcript commissions in his memory, well knowing that to return with any one of them neglected would cause trouble in the family circle.

Elder Brown mounted his patient steed that stood sleepily motionless in the warm sunlight, with his great pointed ears displayed to the right and left, as though their owner had grown tired of the life burden their weight inflicted upon him, and was, old soldier fashion, ready to forego the once rigid alertness of early training for the pleasures of frequent rest on arms.

"And, elder, don't you forgit them caliker scraps, or you'll be wantin' kiver soon an' no kiver will be a-comin'."

Elder Brown did not turn his head, but merely let the whip hand, which had been checked in its backward motion, fall as he answered mechanically. The beast he bestrode responded with a rapid whisking of its tail and a great show of effort, as it ambled off down the sandy road, the rider's long legs seeming now and then to touch the ground.

But as the zigzag panels of the rail fence crept behind him, and he felt the freedom of the morning beginning to act upon his well-trained blood, the mechanical manner of the old man's mind gave place to a mild exuberance. A weight seemed to be lifting from it ounce by ounce as the fence panels, the weedy corners, the persimmon sprouts and sassafras bushes, crept away behind him, so that by the time a mile lay between him and the life partner of his joys and sorrows he was in a reasonably contented frame of mind, and still improving.

It was a queer figure that crept along the road that cheery May morning. It was tall and gaunt, and had been for thirty years or more. The long head, bald on top, covered behind with iron-gray hair, and in front with a short tangled growth that curled and kinked in every direction, was surmounted by an old-fashioned stove-pipe hat, worn and stained, but eminently impressive. An old-fashioned Henry Clay cloth coat, stained and threadbare, divided itself impartially over the donkey's back and dangled on his sides. This was all that remained of the elder's wedding suit of forty years ago. Only constant care, and use of late years limited to extra occasions, had preserved it so long. The trousers had soon parted company with their friends. The substitutes were red jeans, which, while they did not well match his court costume, were better able to withstand the old man's abuse, for if, in addition to his frequent religious excursions astride his beast, there ever was a man who was fond of sitting down with his feet higher than his head, it was this self-same Elder Brown.

The morning expanded, and the old man expanded with it; for while a vigorous leader in his church, the elder at home was, it must be admitted, an uncomplaining slave. To the intense astonishment of the beast he rode, there came new viger into the whacks which fell upon his flanks; and the beast allowed astonishment to surprise him into real life and decided motion. Somewhere in the elder's expanding soul a tune had begun to ring. Possibly he took up the far faint tune that came from the straggling gang of negroes away off in the field, as they slowly chopped amid the thread-like rows of cotton plants which lined the level ground, for the melody he hummed softly and then sang strongly, in the quavering, catchy tones of a good old country churchman, was: "I'm glad salvation's free."

It was during the singing of this hymn that Elder Brown's regular motion-inspiring strokes were for the first time varied. He began to hold his hickory up at certain pauses in the melody, and beat the changes upon the sides of his astonished steed. The chorus under this arrangement was,

"I'm *glad* salvation's *free*,
I'm *glad* salvation's *free*,
I'm *glad* salvation's *free* for *all*,
I'm *glad* salvation's *free*."

Wherever there is an italic, the hickory descended. It fell about as regularly and after the fashion of the stick beating upon the bass drum during a funeral march. But the beast, although convinced that something serious was impending, did not consider a funeral march appropriate for the occasion. He protested, at first, with vigorous whiskings of his tail and a rapid shifting of his ears. Finding these demonstrations unavailing, and convinced that some urgent cause for hurry had suddenly invaded the elder's serenity, as it had his own, he began to cover the ground with frantic leaps that would have surprised his owner could he have realized what was going on. But Elder Brown's eyes were half closed, and he was singing at the top of his voice. Lost in a trance of divine exultation, for he felt the effects of the invigorating motion, bent only on making the air ring with the lines which he dimly imagined were drawing upon him the eyes of the whole female congregation, he was supremely unconscious that his beast was hurrying.

And thus the excursion proceeded, until suddenly a shote, surprised in his calm search for roots in a fence corner, darted into the road, and stood for an instant gazing upon the new-comers with that idiotic stare which only a pig can imitate. The sudden appearance of this unlooked-for apparition acted strongly upon the donkey. With one supreme effort he collected himself into a motionless mass of matter, bracing his front legs wide apart; that is to say, he stopped short. There he stood, returning the pig's idiotic stare with an interest which must have led to the presumption that never before in all his varied life had he seen such a singular little creature. End over end went the

man of prayer, finally bringing up full length in the sand, striking just as he should have shouted "free" for the fourth time in his glorious chorus.

Fully convinced that his alarm had been well-founded, the shote sped out from under the gigantic missile hurled at him by the donkey, and scampered down the road, turning first one ear and then the other to detect any sounds of pursuit. The donkey, also convinced that the object before which he had halted was supernatural, started back violently upon seeing it apparently turn to a man. But seeing that it had turned to nothing but a man, he wandered up into the deserted fence corner, and began to nibble refreshment from a scrub oak.

For a moment the elder gazed up into the sky, half-impressed with the idea that the camp-meeting platform had given way. But the truth forced its way to the front in his disordered understanding at last, and with painful dignity he staggered into an upright position, and regained his beaver. He was shocked again. Never before in all the long years it had served him had he seen it in such shape. The truth is, Elder Brown had never before tried to stand on his head in it. As calmly as possible he began to straighten it out, caring but little for the dust upon his garments. The beaver was his special crown of dignity. To lose it was to be reduced to a level with the common wool-hat herd. He did his best, pulling, pressing and pushing, but the hat did not look natural when he had finished. It seemed to have been laid off into counties, sections and town lots. Like a well-cut jewel it had a face for him, view it from whatever point he chose, a quality which so impressed him that a lump gathered in his throat, and his eyes winked vigorously.

Elder Brown was not, however, a man for tears. He was a man of action. The sudden vision which met his wandering gaze, the donkey calmly chewing scrub buds, with the green juice already oozing from the corners of his frothy mouth, acted upon him like magic. He was, after all, only human, and when he got hands upon a piece of brush, he thrashed the poor beast until it seemed as though even its already half-tanned hide would be eternally ruined. Thoroughly exhausted at last, he wearily straddled his saddle, and with his chin upon his breast resumed the early morning tenor of his way.

II.

"Good-mornin', sir."

Elder Brown leaned over the little pine picket which divided the book-keepers' department of a Macon warehouse from the room in general, and surveyed the well-dressed back of a gentleman who was busily figuring at a desk within. The apartment was carpetless, and the dust of a decade lay deep on the old books, shelves, and the familiar advertisements of guano and fertilizers which decorated the room. An old stove, rusty with the nicotine contributed by farmers during the previous season while waiting by its glowing sides for their cotton to be sold, stood straight up in a bed of sand, and festoons of cobwebs clung to the upper sashes of the murky windows. The lower sash of one window had been raised, and in the yard without, nearly an acre in extent, lay a few bales of cotton, with jagged holes in their ends, just as the sampler had left them. Elder Brown had time to notice all these familiar points, for the figure at the desk kept serenely at his task, and deigned no reply.

"Good-mornin', sir," said Elder Brown again, in his most dignified tones. "Is Mr. Thomas in?"

"Good-morning, sir," said the figure. "I'll wait on you in a minute." The minute passed, and four more joined it. Then the desk man turned.

"Well, sir, what can I do for you?"

The elder was not in the best of humor when he arrived, and his state of mind had not improved. He waited full a minute as he surveyed the man of business.

"I thought I mout be able to make some arrangements with you to git some money, but I reckon I was mistaken." The warehouse man came nearer.

"This is Mr. Brown, I believe. I did not recognize you at once. You are not in often to see us."

"No; my wife usually 'tends to the town bizness, while I run the church and farm. Got a fall from my donkey this morning," he said, noticing a quizzical, interrogating look upon the face before him, "and fell squar' on the hat." He made a pretense of smoothing it. The man of business had already lost interest.

"How much money will you want, Mr. Brown?"

"Well, about seven hundred dollars," said the elder, replacing his hat, and turning a furtive look upon the warehouse man. The other was tapping with his pencil upon the little shelf lying across the rail.

"I can get you five hundred."

"But I oughter have seven."

"Can't arrange for that amount. Wait till later in the season, and come again. Money is very tight now. How much cotton will you raise?"

"Well, I count on a hundr'd bales. An' you can't git the sev'n hundr'd dollars?"

"Like to oblige you, but can't right now; will fix it for you later on."

"Well," said the elder, slowly, "fix up the papers for five, an' I'll make it go as far as possible."

The papers were drawn. A note was made out for $502.50, for the interest was at one and a half per cent. for seven months, and a mortgage on ten mules belonging to the elder was drawn and signed. The elder then promised to send his cotton to the warehouse to be sold in the fall, and with a curt "Anything else?" and a "Thankee, that's all," the two parted.

Elder Brown now made an effort to recall the supplemental commissions shouted to him upon his departure, intending to execute them first, and then take his written list item by item. His mental resolves had just reached this point when a new thought made itself known. Passers-by were puzzled to see the old man suddenly snatch his head-piece off and peer with an intent and awe-struck air into its irregular caverns. Some of them were shocked when he suddenly and vigorously ejaculated:

"Hannah-Maria-Jemimy! goldarn an' blue blazes!"

He had suddenly remembered having placed his memoranda in that hat, and as he studied its empty depths his mind pictured the important scrap fluttering along the sandy scene of his early morning tumble. It was this that caused him to graze an oath with less margin than he had allowed himself in twenty years. What would the old lady say.

Alas! Elder Brown knew too well. What she would not say was what puzzled him. But as he stood bare-headed in the sunlight a sense of utter desolation came and dwelt with him. His eye rested upon sleeping Balaam anchored to a post in the street, and so as he recalled the treachery that lay at the base of all his affliction, gloom was added to the desolation.

To turn back and search for the lost paper would have been worse than useless. Only one course was open to him, and at it went the leader of his people. He called at the grocery; he invaded the recesses of the dry goods establishments; he ransacked the hardware stores; and wherever he went he made life a burden for the clerks, overhauling show-cases and pulling down whole shelves of stock. Occasionally an item of his memoranda would come to light, and thrusting his hand into his capacious pocket, where lay the proceeds of his check, he would pay for it upon the spot, and insist on having it rolled up. To the suggestion of the slave whom he had in charge for the time being that the articles be laid aside until he had finished, he would not listen.

"Now you look here, sonny," he said, in the dry-goods store, "I'm conducting this revival, an' I don't need no help in my line. Just you tie them stockin's up an' lemme have 'em. Then I *know* I've *got* 'em." As each purchase was promptly paid for, and change had to be secured, the clerk earned his salary for that day at least.

So it was, when near the heat of the day, the good man arrived at the drug store, the last and only unvisited division of trade, he made his appearance equipped with half a hundred packages, which nestled in his arms and bulged out about the sections of his clothing that boasted of pockets. As he deposited his deck-load upon the counter, great drops of perspiration rolled down his face and over his water-logged collar to the floor.

There was something exquisitely refreshing in the great glasses of foaming soda that a spruce young man was drawing from a marble fountain, above which half a dozen polar bears in an ambitious print were disporting themselves. There came a break in the run of customers, and the spruce young man, having swept the foam from the marble, dextrously lifted a glass from the revolving rack which had rinsed it with a fierce little stream of water, and asked mechanically, as he caught the intense look of the perspiring elder, "What schrup, sir?"

Now it had not occurred to the elder to drink soda, but the suggestion, coming as it did in his exhausted state, was overpowering. He drew near awkwardly, put on his glasses, and examined the list of syrups with great care. The young man, being for the moment at leisure, surveyed critically the gaunt figure, the faded bandana, the antique claw-hammer coat and the battered stove-pipe hat, with a gradually relaxing countenance. He even called the prescription clerk's attention by a cough and a quick jerk of the thumb. The prescription clerk smiled freely, and continued his assaults upon a piece of blue mass.

"I reckon," said the Elder, resting his hands upon his knees and bending down to the list, "you may gimme sassprilla an' a little strawberry. Sassprilla's good for the blood this time er year, an' strawberry's good any time."

The spruce young man let the syrup stream into the glass as he smiled affably. Thinking, perhaps, to draw out the old character, he ventured upon a jest himself, repeating a pun invented by the man who made the first soda fountain. With a sweep of his arm he cleared away the swarm of insects as he remarked: "People who like a fly in theirs are easily accommodated."

It was from sheer good-nature only that Elder Brown replied, with his usual broad social smile: "Well, a fly now an' then don't hurt nobody."

Now if there is anybody in the world who prides himself on knowing a thing or two, it is the spruce young man who presides over a soda fountain. This particular young gentleman did not even deem a reply necessary. He vanished an instant, and when he returned a close observer might have seen that the mixture in the glass he bore had slightly changed color and increased in quantity. But the elder saw only the whizzing stream of water dart into its center, and the rosy foam rise and tremble on the glass's rim. The next instant he was holding his breath and sipping the cooling drink.

As Elder Brown paid his small score he was at peace with the world. I firmly believe that when he had finished his trading, and the little blue-stringed packages had been stored away, could the poor donkey have made his appearance at the door, and gazed with his meek, fawn-like eyes into his master's, he would have obtained full and free forgiveness.

Elder Brown paused at the door as he was about to leave. A rosy-cheeked school-girl was just lifting a creamy mixture to her lips before the fountain. It was a pretty picture, and he turned back, resolved to indulge in one more glass of the delightful beverage before beginning his long ride homeward.

"Fix it up again, sonny," he said, renewing his broad, confiding smile, as the spruce young man poised a glass inquiringly. The living automaton went through the same motions as before, and again Elder Brown quaffed the fatal mixture.

What a singular power is habit? Up to this time Elder Brown had been entirely innocent of transgression, but with the old alcoholic fire in his veins, twenty years dropped from his shoulders, and a feeling came over him familiar to every man who has been "in his cups." As a matter of fact, the elder would have been a confirmed drunkard twenty years before had his wife been a strong-minded. She took the reins into her own hands when she found that his business and strong drink did not mix well, worked him into the church, and sustained his resolutions by making it difficult and dangerous for him to get to his toddy. She became the business head of the family, and he the spiritual. Only at rare intervals did he ever "backslide" during the twenty years of the new era, and Mrs. Brown herself used to say that the "sugar in his'n turned to gall before the backslide ended." People who knew her never doubted it.

But Elder Brown's sin during the remainder of the day contained an element of responsibility. As he moved majestically down toward where Balaam slept in the sunlight, he felt no fatigue. There was a glow upon his cheek-bones, and a faint tinge upon his prominent nose. He nodded familiarly to people as he met them, and saw not the look of amusement which succeeded astonishment upon the various faces. When he reached the neighborhood of Balaam it suddenly occurred to him that he might have forgotten some one of his numerous commissions, and he paused to think. Then a brilliant idea rose in his mind. He would forestall blame and disarm anger with kindness—he would purchase Hannah a bonnet.

What woman's heart ever failed to soften at sight of a new bonnet?

As I have stated, the elder was a man of action. He entered a store near at hand.

"Good morning," said an affable gentleman with a Hebrew countenance, approaching.

"Good-mornin', good-mornin'," said the Elder, piling his bundles on the counter. "I hope you are well?" Elder Brown extended his hand fervidly.

"Quite well, I thank you. What——"

"And the little wife?" said Elder Brown, affectionately retaining the Jew's hand.

"Quite well, sir."

"And the little ones—quite well, I hope, too?"

"Yes, sir; all well, thank you. Something I can do for you?"

The affable merchant was trying to recall his customer's name.

"Not now, not now, thankee. If you please to let my bundles stay untell I come back——"

"Can't I show you something? Hat, coat——"

"Not now. Be back bimeby."

Was it chance or fate that brought Elder Brown in front of a bar? The glasses shone bright upon the shelves as the swinging door flapped back to let out a coatless clerk, who passed him with a rush, chewing upon a farewell mouthful of brown-bread and bologna. Elder Brown beheld for an instant the familiar scene within. The screws of his resolution had been loosened. At sight of the glistening bar the whole moral structure of twenty years came tumbling down. Mechanically he entered the saloon, and laid a silver quarter upon the bar as he said:

"A little whisky an' suger." The arms of the bar-tender worked like a fakir's in a side show as he set out the glass with its little quota of "short sweetening" and a cut-glass decanter, and sent a half-tumbler of water spinning along from the upper end of the bar with a dime in change.

"Whisky is higher'n used to be," said Elder Brown; but the bar-tender was taking another order, and did not hear him. Elder Brown stirred away the sugar, and let a steady stream of red liquid flow into the glass. He swallowed the drink as unconcernedly as though his morning tod had never been suspended, and pocketed the change. "But it ain't any better than it was," he concluded, as he passed out. He did not even seem to realize that he had done anything extraordinary.

There was a millinery store up the street, and thither with uncertain step he wended his way, feeling a little more elate, and altogether sociable. A pretty, black-eyed girl, struggling to keep down her mirth, came forward and faced him behind the counter. Elder Brown lifted his faded hat with the politeness, if not the grace, of a Castilian, and made a sweeping bow. Again he was in his element. But he did not speak. A shower of odds and ends, small packages, thread, needles and buttons, released from their prison, rattled down about him.

The girl laughed. She could not help it. And the elder, leaning his hand on the counter, laughed, too, until several other girls came half-way to the front. Then they, hiding behind counters and suspended cloaks, laughed and snickered until they reconvulsed the elder's *vis-a-vis*, who had been making desperate efforts to resume her demure appearance.

"Let me help you, sir," she said, coming from behind the counter, upon seeing Elder Brown beginning to adjust his spectacles for a search. He waved her back majestically. "No, my dear, no; can't allow it. You mout sile them purty fingers. No, ma'am. No gen'l'man 'll 'low er lady to do such a thing." The elder was gently forcing the girl back to her place. "Leave it to me. I've picked up bigger things'n them. Picked myself up this mornin'. Balaam—you don't know Balaam; he's my donkey—he tumbled me over his head in the sand this mornin'." And Elder Brown had to resume an upright position until his paroxysm of laughter had passed. "You see this old hat?" extending it half full of packages; "I fell clear inter it; jes' as clean inter it as them things thar fell out'n it." He laughed again, and so did the girls. "But, my dear, I whaled half the hide off'n him for it."

"O, sir! how could you? Indeed, sir, I think you did wrong. The poor brute did not know what he was doing, I dare say, and probably he has been a faithful friend." The girl cast her mischievous eyes toward her companions, who snickered again. The old man was not conscious of the sarcasm. He only saw reproach. His face straightened, and he regarded the girl soberly.

"Mebbe you're right, my dear; mebbe I oughtn't."

"I am sure of it," said the girl. "But now don't you want to buy a bonnet or a cloak to carry home to your wife?"

"Well, you're whistlin' now, birdie; that's my intention; set 'em all out." Again the elder's face shone with delight. "An' I don't want no one-hoss bonnet neither."

"Of course not. Now here is one; pink silk, with delicate pale blue feathers. Just the thing for the season. We have nothing more elegant in stock." Elder Brown held it out, upside down, at arm's-length.

"Well, now, that's suthin' like. Will it soot a sorter red-headed 'ooman?"

A perfectly sober man would have said the girl's corsets must have undergone a terrible strain, but the elder did not notice her dumb convulsion. She answered heroically:

"Perfectly, sir. It is an exquisite match."

"I think you're whistlin' again. Nancy's head's red, red as a woodpeck's. Sorrel's only half-way to the color of her top-knot, an' it do seem like red oughter to soot red. Nancy's red, an' the hat's red; like goes with like, an' birds of a feather flock together." The old man laughed until his cheeks were wet.

The girl, beginning to feel a little uneasy, and seeing a customer entering, rapidly fixed up the bonnet, took fifteen dollars out of a twenty-dollar bill, and calmly asked the elder if he wanted anything else. He thrust his change somewhere into his clothes, and beat a retreat. It had occurred to him that he was nearly drunk.

Elder Brown's step began to lose its buoyancy. He found himself utterly unable to walk straight. There was an uncertain straddle in his gait that carried him from one side of the walk to the other, and caused people whom he met to cheerfully yield him plenty of room.

Balaam saw him coming. Poor Balaam. He had made an early start that day, and for hours he stood in the sun awaiting relief. When he opened his sleepy eyes and raised his expressive ears to a position of attention, the old familiar coat and battered hat of the elder were before him. He lifted up his honest voice and cried aloud for joy.

The effect was electrical for one instant. Elder Brown surveyed the beast with horror, but again in his understanding there rang out the trumpet words,

"Drunk, drunk, drunk, drer-unc, -erunc, -unc, -unc."

He stooped instinctively for a missile with which to smite his accuser, but brought up suddenly with a jerk and a handful of sand. Straightening himself up with a majestic dignity, he extended his right hand impressively.

"You're a goldarn liar, Balaam, and, blast your old buttons, you kin walk home by yourself, for I'm dauged if you sh'll ride me er step."

Surely Coriolanus never turned his back upon Rome with a grander dignity than sat upon the old man's form as he faced about and left the brute to survey with anxious eyes the new departure of his master.

He saw the elder zigzag along the street, and beheld him about to turn a friendly corner. Once more he lifted up his mighty voice:

"Drunk, drunk, drunk, drer- unc, drer-unc, -erunc, -unc, -unc."

Once more the elder turned with lifted hand, and shouted back

"You're a liar, Balaam, goldarn you! You're er iffamous liar." Then he passed from view.

III.

Mrs. Brown stood upon the steps anxiously awaiting the return of her liege lord. She knew he had with him a large sum of money, or should have, and she knew also that he was a man without business methods. She had long since repented of the decision which sent him to town. When the old battered hat and flour-covered coat loomed up in the gloaming and confronted her, she stared with terror. The next instant she had seized him.

"For the Lord sakes, Elder Brown, what ails you? As I live, if the man ain't drunk! Elder Brown! Elder Brown? for the life of me can't I make you hear? You crazy old hypocrite! you desavin' old sinner! you black-hearted wretch! where have you been?"

The elder made an effort to wave her off.

"Woman," he said, with grand dignity, "you forgit yussef; shu know ware I've ben 'swell's I do. Ben to town, wife, an' see yer wat I've brought—the fines' hat, ole woman, I could git. Look 't the color. Like goes 'ith like; it's red an' you're red, an' it's a dead match. What yer mean? Hey! hole on! ole woman!—you! Hannah!—you." She literally shook him into silence.

"You miserable wretch! you low-down drunken sot! what do you mean by coming home and insulting your wife?" Hannah ceased shaking him from pure exhaustion.

"Where is it, I say? where is it?"

By this time she was turning his pockets wrong side out. From one she got pills, from another change, from another packages.

"The Lord be praised, and this is better luck than I hoped! O, elder! elder! elder! what did you do it for? Why, man, where is Balaam?"

Thought of the beast choked off the threatened hysterics.

"Balaam? Balaam?" said the elder, groggily. "He's in town. The infernal ole fool 'sulted me, an' I lef' him to walk home."

His wife surveyed him. Really at that moment she did think his mind was gone; but the leer upon the old man's face enraged her beyond endurance.

"You did, did you? Well, now, I reckon you'll laugh for some cause, you will. Back you go, sir—straight back; an' don't you come home 'thout that donkey, or you'll rue it, sure as my name is Hannah Brown. Aleck!—you Aleck-k-k!"

A black boy darted round the corner, from behind which, with several others, he had beheld the brief but stirring scene.

"Put a saddle on er mule. The elder's gwine back to town. And don't you be long about it, neither."

"Yessum." Aleck's ivories gleamed in the darkness as he disappeared.

Elder Brown was soberer at that moment than he had been for hours.

"Hannah, you don't mean it?"

"Yes, sir, I do. Back you go to town as sure as my name is Hannah Brown."

The elder was silent. He had never known his wife to relent on any occasion after she had affirmed her intention, supplemented with "as sure as my name is Hannah Brown." It was her way of swearing. No affidavit would have had half the claim upon her as that simple enunciation.

So back to town went Elder Brown, not in the order of the early morn, but silently, moodily, despairingly, surrounded by mental and actual gloom.

The old man had turned a last appealing glance upon the angry woman, as he mounted, with Aleck's assistance, and sat in the light that streamed from out the kitchen window. She met the glance without a waver.

"She means it, as sure as my name is Elder Brown," he said, thickly. Then he rode on.

IV.

To say that Elder Brown suffered on this long journey back to Macon would only mildly outline his experience. His early morning's fast had begun to make itself felt. He was sore and uncomfortable. Besides, his stomach was empty, and called for two meals it had missed for the first time in years.

When, sore and weary, the elder entered the city, the electric lights shone above it like jewels in a crown. The city slept; that is, the better portion of it did. Here and there, however, the lower lights flashed out into the night. Moodily the Elder pursued his journey, and as he rode, far off in the night there rose and quivered a plaintive cry. Elder Brown smiled wearily; it was Balaam's appeal, and he recognized it. The animal he rode also recognized it, and replied, until the silence of the city was destroyed. The odd clamor and confusion drew from a saloon near by a group of noisy youngsters, who had been making a night of it. They surrounded Elder Brown as he began to transfer himself to the hungry beast to whose motion he was more accustomed, and in the "hail fellow well met" style of the day began to bandy jests upon his appearance. Now Elder Brown was not in a jesting humor. Positively he was in the worst humor possible. The result was that before many minutes passed the old man was swinging several of the crowd by their collars, and breaking tha peace of the city. A policeman approached and but for the good-humored party, upon whom the Elder's pluck had made a favorable impression, would have run the old man into the barracks. The crowd, however, drew him laughingly into the saloon and to the bar. The reaction was too much for his half-rallied senses. He yielded again. The reviving liquor passed his lips. Gloom vanished. He became one of the boys.

The company into which Elder Brown had fallen was what is known as "first-class." To such nothing is so captivating as an adventure out of the common run of accidents. The gaunt countryman, with his battered hat and claw-hammer coat, was a prize of an extraordinary nature. They drew him into a rear room, whose gilded frames and polished tables betrayed the character and purpose of the place, and plied him with wine until ten thousand lights danced about him. The fun increased. One youngster made a political speech from the top of the table; another impersonated Hamlet; and finally Elder Brown was lifted into a chair and sang a camp-meeting song. This was rendered by him with startling effect. He stood upright, with his hat jauntily knocked to one side, and his coat tails ornamented with a couple of show-bills, kindly pinned on by his admirers. In his left hand he waved the stub of a cigar, and on his back was an admirable representation of Balaam's head, executed by some artist with billiard chalk.

As the Elder sang his favorite hymn, "I'm glad salvation's free," his stentorian voice awoke the echoes. Most of the company rolled upon the floor in convulsions of laughter.

The exhibition came to a close by the chair overturning. Again Elder Brown fell into his beloved hat. He arose and shouted: "Whoa, Balaam!" Again he seized the nearest weapon, and sought satisfaction. The young gentleman with political sentiments was knocked under the table, and Hamlet only escaped injury by beating the infuriated elder into the street.

What next? Well, I hardly know. How the elder found Balaam is a mystery yet; not that Balaam was hard to find, but that the old man was in no condition to find anything. Still he did, and climbing laboriously into the saddle, he held on stupidly while the hungry beast struck out for home.

V.

Hannah Brown did not sleep that night. Sleep would not come. Hour after hour passed, and her wrath refused to be quelled. She tried every conceivable method, but time hung heavily. It was not quite peep of day, however, when she laid her well-worn family Bible aside. It had been her mother's, and amid all the anxieties and tribulations incident to the life of a woman who had free negroes and a miserable husband to manage, it had been her mainstay and comfort. She had frequently read it in anger, page after page, without knowing what was contained in the lines. But eventually the words became intelligible and took meaning. She wrested consolation from it by mere force of will.

And so on this occasion when she closed the book the fierce anger was gone.

She was not a hard woman naturally. Fate had brought her conditions which covered up the woman heart within her, but though it lay deep, it was there still. As she sat with folded hands her eyes fell upon—what?

The pink bonnet with the blue plume!

It may appear strange to those who do not understand such natures, but to me her next action was perfectly natural. She burst into a convulsive laugh; then, seizing the queer object, bent her face upon it and sobbed hysterically. When the storm was over, very tenderly she laid the gift aside, and bare-headed passed out into the night.

For a half-hour she stood at the end of the lane, and then hungry Balaam and his master hove in sight. Reaching out her hand, she checked the beast.

"William," said she, very gently, "where is the mule?"

The elder had been asleep. He woke and gazed upon her blankly.

"What mule, Hannah?"

"The mule you rode to town."

For one full minute the elder studied her face. Then it burst from his lips:

"Well, bless me! if I didn't bring Balaam and forgit the mule!"

The woman laughed till her eyes ran water.

"William," said she, "you're drunk."

"Hannah," said he, meekly, "I know it. The truth is, Hannah, I——"

"Never mind now, William," she said, gently. "You are tired and hungry. Come into the house, husband."

Leading Balaam, she disappeared down the lane; and when, a few minutes later, Hannah Brown and her husband entered through the light that streamed out of the open door, her arms were around him, and her face upturned to his.—*H. S. Edwards, in Harper's Magazine.*

THE LAUGHING JACKASS.

One of the Queerest Birds of That Queer Country, Australia.

Among the birds of Australia I know none more extraordinary than the "Laughing Jackass." He is a true kingfisher, alike in his personal appearance, his structure and his habits. One's idea, however, of a kingfisher is generally associated with a water-loving bird; but this Australian kingfisher is not a water-bird, but a land-bird, and preys not upon fish, but rather upon grubs, worms, snakes, frogs, mice, etc.; he is, in fact, a scavenger in the true sense of the word. For the last few days I have had a "Laughing Jackass" in my possession—as fine a jackass as could be found within a hundred miles of St. Paul's. In fact, I have only one fault to find with him, and that was he would never laugh. The cause of this defect in his education possibly may have been that I never gave him anything to laugh about; this, however, was not my fault, for I gave him plenty of good and wholesome food in the shape of raw meat, etc., which he took with a dignity becoming this most distinguished of strangers. Wishing, moreover, to try his destructive powers, I showed him one day a mouse; in a moment all his feathers bristled up, and he appeared to be (like an enraged tom-cat) twice his natural size. I held the mouse to his cage, and in an instant he seized the animal with his tremendous beak and gulped him down with apparently the greatest satisfaction. He then began a slight titter, which I trusted he would increase gradually to a laugh, but I suppose he thought it an occasion hardly worth laughing about, so he shut up his feathers again and composed himself to sleep. In this attitude I fancied I detected a sly expression about his eyes, as much as to say: "I know you want me to laugh; I can laugh if I like, but I will not laugh."

My bird was about the size of a large magpie, very like an English kingfisher in general shape; though his color was brown, still he was a very pretty bird—so beautiful, indeed, was he that a lady borrowed him for a day or so, to exhibit at a bazaar in the Hanover Square Rooms. Here, I understand, he was much admired by the fair visitors, though, from all I hear, he did not appreciate the compliment as much as he ought. In due time he was brought home. I gave him his breakfast and put him out in the sun, which he much enjoyed after his sojourn in a hot, crowded room. I turned my back for a moment, and on looking round again was perfectly horrified at what I saw. Alas! alas! the jackass had found a bar of the cage which had been broken at the bazaar, had tested it with his beak, and, finding that it yielded, had pulled it on one side and flown away. Delighted with his cleverness, and, possibly, also rejoicing at the discomfiture of his owner, away he flew into Regent's Park. One parting farewell only he gave me; the rascal actually stopped in his flight, and for the first and last time I heard his hearty laugh. The poor bird had at last found out something to laugh about—namely: that he had made his escape most cleverly; and, though he had been denominated a jackass, his actions and the clever manner in which he got out of the cage proved most effectually that he really was no jackass at all.—*Life of Frank Buckland.*

—It is the man who has the most property that has the greatest will power.—*Chicago Times.*

ROLLO AND HIS FATHER.

Reasons Why Fat Policemen are Usually Selected by the Authorities.

Mr. Holliday was confined to the house by a severe attack of rheumatism, as Mr. Holliday chose to call it.

It will be noticed that Mr. Holliday was not above the habit, common to most Americans, of using a long word where a short one would better serve the purpose.

As has been said, Mr. Holliday was confined to the house by a severe attack of gou—, beg pardon, of rheumatism—and Rollo, as was his custom, comforted his father and made him quite forget his bodily pain by plying him continually with conundrums.

"Father," said Rollo, "does fat run faster than lean?"

"Yes, Rollo, in hot weather, much faster; but why do you ask my son?" replied Mr. Holliday, winking at Jonas, who was engaged in bandaging the old gentleman's foot.

"Because, father," said Rollo, "I notice that they never make a man a police officer until he is very fat."

Mr. Holliday was much pleased to find that Rollo was so observing; though Jonas remarked under his breath (upon which there was a suspicion of whisky) that nobody with eyes in his head could help observing that.

"The reason why fat men are selected for policemen, Rollo," said Mr. Holliday, "is that it takes fewer of them to make a platoon, and therefore the expense to the city is much less when a certain superficial area of police officer is called for. Then, again, two officers, or three at the most, are quite sufficient to block up one of our great thoroughfares and prevent the passage of any of the dangerous class!"

"And that, Rollo," interrupted Jonas, this time above his breath, "is why the dangerous class always takes to the alleys; a policeman can't crowd himself into an alley, you know."

Mr. Holliday suggested to Jonas that he was engaged to dress the feet of his employer, and not to volunteer any alley-byes.

Mr. Holliday, it should be mentioned, indulged in paronomasia only when it was considered necessary to making himself understood by the menial olasses.

"And, father," said Rollo with animation, "the reason why so many thieves and murderers and other gentlemen of that kind escape is because they slip through the fat fingers of the fat policemen."

"No, Rollo," replied Mr. Holliday, "you are wrong there. To say that the thieves, murderers *et al.* slip through the fat fingers of the fat policemen argues that the fat policemen get their hands on the thieves, murderers *et al.* aforesaid; which would be in the nature of *reductio ad absurdium*, or, as we say in the vulgate, proving things that ain't so. No, Rollo, whoever told you that the fat policeman ever gets his hands on a thief or a murderer" (and here Mr. Holliday looked hard at Jonas) "was, I suspect, codding you—that is to say, trying to deceive you."

"But, father," exclaimed Rollo, in surprise, "if the fat policeman never gets his hands on the thief or murderer, what is he good for?"

"Give it up!" was the irrelevant suggestion of Jonas, who was apparently becoming drunker every moment.

"Of much good, Rollo," replied Mr. Holliday, not deigning to notice Jonas' remark. "In the first place it takes twice as much cloth to uniform him as it would an ordinary person; consequently manufacturers and dealers in cloth are directly benefited, and through them the people generally are made to prosper. It would be impossible to say how soon it would result, but there can be no kind of doubt that were it not for the large demand for cloth on account of the fat policemen, the mills would be obliged to shut down, sooner or later, and the dealers, of course, would be obliged to shut up. Thousands of working people would thus be thrown out of employment, and nobody can tell where the evil would end. You see, Rollo, when you look into this question of fat policemen, you must discuss it in a large way."

"Really," said Rollo, somewhat abashed, "I have looked at the fat policeman many times; but I never suspected that there was so much in him."

"Full 'most all the time!" exclaimed the miserable Jonas, who was evidently far gone.

"Then there is another thing," resumed Mr. Holliday. "He is of great help in preventing crowds. Where he is there is no room for a crowd. In helping ladies across the street, too, he is very useful. No horse would undertake to run over him. Horses never run up hill unless they are forced to it."

Mr. Holliday said there were some other things for which the fat policeman was good; but owing to the press of business and the distraction of the gou—that is, rheumatism—he had quite forgotten what they were. Therefore he directed that he be left alone for awhile, and that Jonas be taken to the pump and treated as the exigencies of his case seemed to call for.—*Boston Transcript.*

The Camel Express.

Of all varieties of Indian letter carriers, clothed or unclothed, none are so picturesque, says Miss Gordon Cummings, as the camel express messengers. The men wear a serviceable red uniform and large green turban, embroidered with gold thread. From their girdle hangs a curved sabre in a red sheath. The camels are adorned with trappings of gay cloth and tassels, ornamented with blue beads and gowrie shells and small brass bells round the neck to give notice of their swift approach. It is said that their rough and rapid trotting, sometimes at the rate of eighty miles a day, is so trying to the riders as to shorten their days. Two heavy mail bags hang to right and left on each side of the camel, and the saddle is so arranged that a passenger can take a seat behind the postman.—*Exchange.*

—Paris green is made of arsenic, carbonate of soda, blue vitriol, acetic acid, chloride of barium, and sometimes White's sugar of lead. It is a double salt, known to chemists as aceto-arsenite of copper.

FASHION NOTES.

Articles of Feminine Attire That Are Desired for the Nonce.

Hat brims are very narrow.

Huge garden hats are still worn.

Lace grows in favor as the season advances.

Round waists and wide sashes grow in favor.

Long flowing sashes are more fashionable than ever.

Tulle bonnets are worn with the dressiest thin summer frocks.

Lead-colored beads trim some very dressy black lace frocks.

Rhine stone pins for the hair are the order of the day at present.

Lace capotes with very high crowns are much worn at Saratoga.

The jersey jacket, now dazzling with beads, gains more favor than ever.

Cream color and pure white can not be tastefully combined in a costume.

To find what is fashionably worn just now, one must go to the seaside or Saratoga.

White drawn, silk muslin bonnets are the latest novelty for wearing with thin summer dresses.

The milkmaid overskirt and the housemaid frock are rivals in women's favor at the moment.

Hats are higher than ever, with towering bunches of flowers worn in front over the forehead.

Gold and pale pink are introduced effectively in embroideries on white satin for full dress purposes.

Black canvas over orange silk, striped with *tilleul* color, makes a dressy walking costume for early fall.

The Scottish token of good luck is a spray of white heather now put into the bouquets of fashionable brides.

The imagination of the modiste is the only law that governs hats and bonnets and their trimmings this season.

The prettiest and most economical summer bonnets are of white muslin and white lace, piece and border lace.

Small pins or brooches, no ear rings, few finger rings and very slender bracelets make up the catalogue of the summer jewelry of a woman of taste.

A few women, generally of mature age, wear a terrace-like projection at the back of their dresses, but as a rule big bustles are only seen in "fashion plates."

The horrid, waggling crinolette bustle is no longer worn. The best dressed women have learned to wear their draperies in a manner that makes any save a very small bustle unnecessary.

Pretty black straw Fanchons, dotted with cut jet, lined with black velvet and trimmed with two rosettes of white mauresque lace, fastened on the top with long, dead gold pins, are effectively worn with either white or black frocks.

A new waterproof apron for the use of equestriennes has been brought over from London, invoiced the "Norpa." It rolls up in a small compass, and buttons on to the front of the saddle, where it is held in place by small straps. When wanted it is easily unbuckled, and, opening out wide, covers the knees and the off side of the saddle far enough to conduct the raindrops downward instead of allowing them to soak into the leather. It is fastened over the knees by three wide hooks, one of which attaches to a button of the habit, while the other two are fastened to buttons placed for them on each side of the jacket, thus forming an effectual protection to the knees in a vain.—*N. Y. Sun.*

MANNY WOMEN.

Description of the Creature Who Affects Masculine Ways.

The trouble is that the "manny" woman always overdoes the thing. In her frenzied endeavors to appear and do and be like a man she usually succeeds in being like four or five men. And somehow or other she selects for her models the very type of men that all other men despise. She exaggerates every attribute of man that she attempts to copy. If she carries a cane she usually carries a Bowery-looking kind of stick I wouldn't want to be found dead with. If she whistles she does not aim to whistle in melodious bird notes, but she whistles like a stable-boy. If she wears a man's hat and ulster, as often she does, she wears a most offensive hat and the zebra ulster of the song-and-dance man. She doesn't chew tobacco, thank Heaven, because if she did she wouldn't look at silver-leaf fine-cut; she would chew "cowboy plug." And she wouldn't chew it; she would "chawr" it. When she walks down street with your brother she takes longer strides than her mortified escort. She talks loud, as some men, but no gentlemen, do. She doesn't try to be a gentleman; she tries to be a man. She overdoes everything, like a boy learning to swear, who drags in his blanks and dashes without regard to grammar or fitness, time, occasion, or place. And nobody likes her very much. O, she sometimes, when she is naturally a very bright woman, makes the circle about her lively and animated. Men cluster about her if she is handsome and laugh with her to her face and at her behind her back. Her name is mentioned lightly and jeeringly at clubs, my daughter, where yours is never whispered save with profound respect. All men speak of her by her Christian name. Frequently they are a little afraid of her, because the "manny woman," always striving to be a man, never relinquishes certain privileges of her sex, and has a savage way of saying sarcastic things to men and about women, which, were she a man, would bring her many a cuff on the ear. But being a woman she can say them with impunity. But you say men leave the society of quieter, more refined young ladies to go with the "manny" one? O, no, they don't. The "manny" woman has a way, peculiarly her own, of collaring a man and dragging him captive whither she will for a time. But he always escapes as soon as he can. Rarely, indeed, does he go willingly. Her loud talk, her long strides, her whistle, her sarcastic remarks, her cane and her dog, her slang and her politics, her soubret lightsomeness scare the average man, and he runs away the moment a safe line of retreat is open for him.—*Burdette.*

—So large a colony of Japanese reside in Vienna that a Buddhist temple is to be erected there. The decorations and furniture will be sent from Japan.

FARM AND FIRESIDE.

—If the hands are stained there is nothing that will remove the stain so well as lemon. Cut a lemon in halves and apply the cut surface as if it were soap.—*Exchange.*

—If, upon weaning a calf or other young animal, it is so far separated from the dam that one can not be heard by the other, from one to three days will suffice to render them quiet.—*Prairie Farmer.*

—Layer Cake: Four eggs, one cup of white sugar, butter the size of a walnut, one and a half cups of flour, one large teaspoon of baking powder, six tablespoonfuls of water; flavor to taste; bake in moderate oven.—*The Household.*

—A farmer is mentioned in the late discussion of New England farmers, reported in the *Massachusetts Ploughman*, who for two years planted seed from the seed-end and stem-end of the potato separately. Both years the seed-end gave him a crop from twelve to fourteen days earlier than from the stem-end.

—Milan cakes are nice for tea. Half a pound of sifted flour, a quarter of a pound of butter, six ounces of sugar, two tablespoonfuls of thick, sour cream and one egg. Mix a paste of these ingredients, roll it out and cut it in diamond-shaped pieces; glaze with egg and bake in a hot oven; when cold place a bit of jam or jelly in the center of each and serve.—*N. Y. Commercial Advertiser.*

—Gapes are produced by a parasite in the windpipe of the fowl. It may be removed by thrusting a feather into the windpipe, twisting it around and quickly withdrawing. It is said that confining a fowl in a box and filling the air in it with lime-dust will sometimes cause the fowl to cough or sneeze up the intruder. No preventive is known, but an occasional dose of turpentine is recommended.—*Troy Times.*

—Deft-fingered maidens may make a pretty fan to suit each toilet. Take a round or oval fan of pasteboard and cover it with tulle in folds and have a full puffing of the tulle about the edge. On the side on which the folds are fastened arrange a mass of loops of narrow satin or velvet ribbon and place three or four velvet butterflies as if hovering among the loops. The handle is wound about with the ribbon and loops and ends depend from the point of union with the fan.—*Harper's Bazar.*

—For coffee stains try putting thick glycerine on the wrong side and washing it out with lukewarm water. For raspberry stains weak ammonia and water is the best. Stains of fruit on good table linen can be removed without injury by using the following with care: Pour boiling water on chloride of lime, in proportion of one gallon to a quarter of a pound, bottle it, cork it well, and in using be careful not to stir it. Lay the stain in this for a moment, then apply white vinegar and boil the table linen.—*Philadelphia Press.*

CLOVER AS A FERTILIZER.

Red and White Clovers as Disintegrators of the Soil.

Probably no merely theoretical solution of this question that could be offered would be accepted as satisfactory or conclusive; but I have a case in view where a practical demonstration of it has been made, and to the word "fertilizer" I attach here the widest signification, meaning by it any substance or plant which will enhance the yield by any process, whether chemical, vital or mechanical.

On contiguous farms in the Muskingum Valley, Southern Ohio, there are two fields, one of twenty acres, one of ten, separated only by a fence. They both lie on the second plateau or bench, have been cleared and in cultivation the same length of time (about seventy years), and have been subjected to the same rotation of corn and wheat—the ten-acre field without interruption, the twenty-acre field with a rest of a year or two about every fourth year. The reader will please bear this fact in mind, since it shows that the larger field has had the advantage in one respect, and it should have full force attached to it in connection with the results about to be recorded.

The greatest and most important difference between the systems of cultivation pursued in these two fields is, that the small field has been kept seeded in red clover, while the large one has been allowed to seed itself to white. At any rate, this has been the case for the last twenty-five or thirty years. The little field is part of a small farm, while the large one is part of a large farm; and, though the successive owners of the small farm have been on the whole better farmers than the owners of the other, yet the latter have maintained a system of tillage which was better than the average of Ohio, and which might, perhaps, be said to have been inferior to that followed on the little farm, only in that it neglected the seeding of the ground with red clover, allowing the white to take its place.

The proprietor of this small farm has, as I say, cropped with wheat and corn alternately. Every spring when there is wheat on the field, in February or March, he sows about two quarts of seed per acre; and this small amount suffices to keep the ground occupied. White clover never makes its appearance, nor any other vegetation, in fact, except some rag weed after harvest, so thoroughly has the red clover taken possession. But in the field just over the fence, white clover is equally firmly established. It comes up after harvest so thick as to hold the ragweed in check fully as well as the red clover in the neighboring field, if not better.

Now, it will hardly be denied by the experienced farmer that red clover acts as a better mechanical divisor of the soil than white clover. It has coarser and more abundant roots and stems. It lays, as it were, a great number of minute tile-drains through the soil. In the red clover field, with an equal amount of tillage, the soil will always be finer, less lumpy than that in the white clover field. Therefore, whether it has a greater or less percentage of nitrogen (which I have not the tables by me at this moment to determine), it serves as a better inductor of that element from the rain and the atmosphere into the soil.—*Stephen Powers, in Country Gentleman.*

Helpless Upon a Friendless Sea!

Who, in taking passage in a great trans-Atlantic steamer, does not feel a thrill of exultation over her magnificent power. Against her the Storm King may hurl his elemental forces, nor pierce her armor, nor stop her onward course.

But let me describe a scene when, one morning in mid-ocean, there came an alarm from the pilot house followed by a cry: "The ship's rudder is lost!" From the confident expression, consternation came to every face. The wheelman being helpless to direct her course, the vessel was at the mercy of wind and wave.

The captain had been negligent—the hangings of the rudder were allowed to wear weak, and suddenly it had dropped deep into the sea!

Strong in intellect, in physical vigor, in energy and in ambition, man confronts, undaunted, gigantic tasks and commands applause for his magnificent achievements. But, all unexpectedly, an alarm comes—the rudder of his constitution is gone. He has been careless of its preservation; mental strain, nervous excitement, irregular habits, over-work, have destroyed the action of his kidneys and liver. This would not occur were Warner's safe cure used to maintain vigor. And even now it may restore vitality to those organs and give back to the man that which will lead him to the haven of his ambition.—*The Traveler.*

Suicides in Austria.

In Austria the dog-days appear to have the curious effect of causing more suicides than any other season of the year. To-day (July 1) several remarkable cases are reported. In one instance, a cadet, aged twenty, living in barracks in Vienna, put the muzzle of a gun to his chin, and, pulling the trigger, died instantly. Another case is that of an artillery lieutenant at Cattaro, who blew himself to pieces by firing a large cannon against himself in a rather ingenious manner. In a third case a young man and girl jumped into the Danube together. A fourth suicide was that of a sculptor who hanged himself. These by no means exhaust to-day's list. At Prague two young lovers, aged respectively sixteen and fifteen, fastened themselves together with a rope and then jumped into the Moldau. At Pesth a fashionable master tailor ended his troubles by hanging himself to a bedpost, while a waitress at Brunn shot herself with a revolver. A son of a rich Vienna merchant, aged twenty-one, and a clerk also took their lives with revolvers. The latter gives as his reason his inability to support his parents owing to the smallness of his salary, while the other was the victim of a so-called American duel.—*Vienna Cor. London Standard.*

"TIME works wonders," said a young man of twenty-seven when he returned home and found his elder sister only eighteen.—*Chicago Tribune.*

ABOVE all other earthly ills,
I hate the big, old-fashioned pills;
By slow degrees they downward wend,
And often pause, or upward tend;
With such discomfort are they traught,
Their good effects amount to naught.
Now, Dr. Pierce prepares a pill
That just exactly fills the bill—
A Pellet, rather, that is all—
A Pleasant Purgative, and *small;*
Just try them as you feel their need,
You'll find that I speak truth, indeed.

ECCENTRICITY in a rich man is lunacy in a poor one. False alarm—One that does not go off at the proper hour.—*Boston Post.*

The Morning Dress.

It is said that a lady's standing in society can easily be determined by her dress at the breakfast-table; an expensive, showy costume indicating that the wearer has not yet learned the proprieties. But no one need be afraid of being called "shoddy" if her loveliness is as apparent by daylight as at the hops. Perfect beauty is never the attendant of disease; above all, of those diseases peculiar to women, and which find a ready cure in Dr. Pierce's "Favorite Prescription." Price reduced to one dollar. By druggists.

THE Hartford *Journal* says there is poetry in vegetables. This is tough news for vegetarians.—*Buffalo Express.*

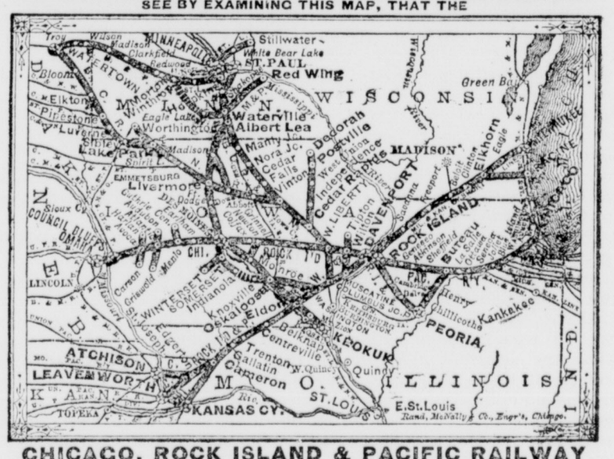
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago.

WHEN WRITING TO ADVERTISERS, please say you saw the Advertisement in this paper.

The Second Summer.

Dr. A. Jacodi in Babyhood.

The faul lies not with the *second* summer, nor with the children, but with the *heat* and the parents. The summer heat may in itself be dangerous; in conjunction with bad diet it becomes frequently fatal. It is an established fact that nearly all the mortality among children in summer is caused by disease of the digestive organs, and that all these fatal cases would be averted were these organs not to become diseased. Now the second summer is the summer in which the artificial feeding of children has begun or is about to begin. Rational artificial nourishment is the proper one for children who are old enough and whose organs have been sufficiently prepared for it. With proper feeding and intelligent care few children need suffer from stomach or bowel troubles. Sensible mothers in good dwellings, even those in poor circumstances, lose no children from this cause. Hence it is not the second summer that kills the children, but the ignorance or negligence of those who attend them. This is all the worse from the fact that the rules for the proper nutrition of children are very simple—indeed, so simple that they are not observed on account of their very simplicity.

My purpose, however, is not to discourse about medicine or about my personal views, but about popular hygiene as it is and as it should be. Now, in the matter of the feeding of the children the most preposterous things are done, because sanctioned by custom. In the first place, every possible food is administered; naturally the little creature swallows everything that is put into its mouth. "It looks so cunning!" Ask any dispensary physician what answer he receives to the stereotyped query in the case of children suffering from bowel complaint, "What does the child get to eat?" "Anything;" or "It eats at our table." I shall not dwell on particulars—colored candy, sour milk, fresh bread, sausage, coffee and tea, raw fruit, vegetables. The result: diaerhœal diseases and death. And the cause of death? Of course, the second summer.

The Pain of Being Hanged.

Dr. James Barr in Popular Science Monthly.

Dr. Taylor states that "death from hanging appears to take place very rapidly and without causing any suffering to the person." Prof. Tidy, also, speaks of the painless nature of death from hanging, while Prof. Haughton, in his paper read before the Surgical Society of Doublin, says that "the old system of taking a convict's life by suffocation is inhumanly painful, unnecessarily prolonged and revolting to those whose duty it is to be present." Those who speak of the painless nature of death by strangulation arrive at this conclusion from the fact that many cases of suicide are not completely suspended, and that if they wished they could easily relieve the constriction by assuming the erect posture, and in other cases of recovery from attempted suicide by hanging there is no recollection of any suffering. It should be remembered, however, that there is a great difference between the mental attitude of the suicide and one who is about to suffer the extreme penalty of the law. In the former case he is regardless, and perhaps also not very sensitive, of a little suffering, while in the latter every nerve is braced up to resist the inevitable result. Moreover, in those cases of recovery the loss of recollection of suffering does not prove that there was none. It might almost as well be said that, because in many cases of recovery from meningitis there was no remembrance of any suffering, therefore there was none. No doubt, the pain in hanging can under no circumstances be very acute, yet when we see a culprit heaving his chest and almost raising the whole body in his struggles for breath we must conclude that there is at least a considerable amount of mental torture.

Cheap Clocks.

The manufacture of cheap clocks and watches has come to be one of the great industries of the country. A prominent engraver of New York says that several years ago officers of a certain clock company came to him to know if he could not make an engraved paper imitation of the French porcelain face that was then used on their clocks. He spent several hundred dollars on the experiment, and finally gave it up in despair, through inability to find paper that would answer the purpose. The company refused to let him stop his experimenting, and he finally hit on a glazed and enameled paper which answered the purpose. He has made from 12,000,000 to 14,000,000 of clock faces for the company, at a cost of about 1 cent each. The old cost for porcelain was $1, which is the present cost of a clock complete. Machinery has been specially invented for turning out the paper faces.—*The Argonaut.*

A Pastor's Salary.

If a man is fit to preach he is worth wages. If he is worth wages he should receive them with all the business regularity that is demanded and enforced in business life. There is no man in the community who works harder for what he receives than the faithful minister. There is no man in whose work the community is intered—to whom regular wages, that shall not cost him a thought, are so important.

Of what proportionate use can any man be in the pulpit, whose weeks are frittered away in mean cares and petty economies. Every month, or every quarter, on a certain day, every pastor should be sure that there will be placed in his hands, as his just wages, money enough to pay all his expenses. Then, without a sense of special obligation, he can preach the truth with freedom, and parpare for his public ministrations without distraction.

Nothing more cruel to a pastor, or disastrous to his work can be done, than to force upon him a feeling of dependence upon the charities of his flock. He is the creature of a popular whim, and a preacher without influence to those who do not respect him or his office sufficiently to pay him the wages due the man who devotes his life to them. Manliness cannot live in such a man, except it be a torture—a torture endured simply because there are others who depend upon the charity doled out to him. Good, manly pastors do not want gifts, they want wages. They need them, and the people owe them; but they take to themselves the credit of benefactors, and place their pastors in an awkward and false position. If Christians do not sufficiently recognize the legitimacy of the pastor's calling to render him fully his wages, and to assist him to maintain his manly independence before the world they must not blame the world for looking upon him with a contempt that forbids and precludes influence. The world will be quite ready to take the pastor at the valuation of his friend, and the religion he preaches at the price its professors are willing to pay in a business way for its ministry.

A Telling Temperance Lecture.

Two colored barbers, one an old man and the other a young one. The young one took off his apron and started out of the door.

"Yo's gwan to get a drink, Jim?" asked the elder.

"Dat's what I's gwan to do."

"Go and git yo' drink. I yoost ter do de same ting when I wuz young. When I wuz fust married dah was a gin mill next to de shop wha' I wucked, and I spent in it fifty and sebenty cents a day outen de dollah'n a half I eahned. Wall, one mawnin I went into de butchah shop, and who shood eum in but de man wat kep' de likker shop.

"'Geb me 10 or 12 pounds po'terhouse steak,' he said.

"He got it and went out. I sneak up to de butchah and looked to see what money I had lef'.

"'What do you want?' said de butcha.

"'Gib me 10 cents wuf of libber,' wuz my reply.

"It was all I could pay fur. Now you go and git yo' drink. You can eat libber, but de man wat sells you de stuff will hab his po'terhous steak. De man behin' de bar eats po'terhouse—de man in front eats libber. I ain't touched de stuff fo' 30 yeahs, and I am eatin' po'terhouse myself."—*Foxboro Reporter.*

Curiosities of the Mails.

From the St. Jame's Gazette.

The chief of the permanent staff of the postoffice may be excused if he is rather a cynic. He gets a better view than most people of the exceeding folly which abounds in human nature. He finds for instance (according to his last report), that during the last 12 months there were 26,000 persons who posted letters without putting any address upon them. It was only to be expected that 1,600 of these remarkable beings took the precaution to "put coin and other valuables" into their unaddressed letters. The prize for fatuousness in this kind is difficult to adjudge. The gentleman who drew a check (uncrossed) for $500 and slipped it without an envelope into a letter-box has high claims. He is run hard by the laborious idiot who wrote a letter on the back of a postage-stamp and posted that document, or the less harmless persons who send live owls, snakes and other specimens of the smaller fauna by parcel post. Next to a station-master a postoffice official has the most right to regard the intellect of his species with contempt.

Ayer's Pills cure headache by removing obstructions from the system, relieving the stomach, and giving healthy action to the digestive apparatus.

The Age of Niagara Falls.

Mr, Blakewell, an eminent English geologist, gave personal attention to the problem as early as 1840, and, from everything he could learn at that time, estimated that the falls had receded about a hundred and twenty feet in the forty years preceding. He recurred to the problem again in 1846, 1851, 1856 and was each time confirmed in the belief that the apex of the horseshoe fall was receding, on an average, three feet a year. On the other hand, Sir Charles Lyell, upon his first visit, in 1841. "conceived" (upon what basis he does not tell us) that at the utmost the rate could not be more than one foot a year, which would give us thirty-five thousand years as a minimum time. But as it appears the result of the recent survey is to confirm the estimate of Mr. Blakewell, thus bringing the period down to about seven thousand years.—*Science.*

NEW ADVERTISEMENTS.

Nervousness.

The moment there is danger of impairment of the mind from excessive nervous exhaustion, or where there exists forebodings of evil, a desire for solitude, shunning and avoiding company, vertigo and nervous debility, or when insanity has already taken place, PERUNA and MANALIN should be implicitly relied on. But it is never well to wait so long before treatment is commenced. The early symptoms are loss of strength, softness of the muscles, dim or weak sight, peculiar expression of the face and eyes, coated tongue, with impaired digestion; or in others, certain powers only are lost while they are otherwise enjoying comparatively good health. In all these PERUNA and MANALIN should at once be taken.

Mrs. S. Smith, Hillsville, Lawrence County, Pa., writes: "DR. S. B. HARTMAN & Co., Columbus, O.: I have been a great sufferer for ten years. It seemed as though every organ in my body was diseased at one time or another. I had about given up all hopes, when I commenced taking PERUNA and MANALIN. I immediately began to improve, the soreness and pain disappeared, strength gradually returned, and now I am as well as ever in my life, and I owe it all to your PERUNA and MANALIN. I recommended it to my friends and it gives better satisfaction than any other medicine I ever heard of."

Miss Maria Roderick, Warren, Ohio, writes: "It is with pleasure and many thanks that I write to you to tell you of the great benefit I have derived from the use of the PERUNA. I have used several bottles of your PERUNA, and can safely say it has done me a great deal of good. I have improved ever since I commenced its use."

Mr. T. J. Webber, Plymouth, O., writes: "I am selling your PERUNA, and having a good trade on it. It gives excellent satisfaction."

Mr. Thomas Acton, Brooklyn Village, Cleveland, Ohio, says: "I received a severe wound in my foot by tramping on a spike. It inflamed and was painful and swollen. I had every reason to fear lockjaw. Your simple suggestions as to local applications and the taking of your PERUNA and MANALIN were followed to the letter, and, thanks to you, my foot is entirely well, and I am happy."

LAND! Claims a specialty. Warrants, and ADDITIONAL HOMESTEAD CERTIFICATES and all kinds of LAND SCRIP bought and sold. SUSPENDED ENTRIES, LAND, PATENT and PENSION cases attended to. Correspondence solicited. A. A. Thomas, Attorney at Law, Room 25 St. Cloud Bld'g, Washington, D. C.

An Old Soldier's

EXPERIENCE.

"Calvert, Texas,
May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

Republican Office, Oakland, Md.

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

tf 24 DAVID LITTLE.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTS.

IT LEADS ALL.

No other blood-purifying medicine is made, or has ever been prepared, which so completely meets the wants of physicians and the general public as

Ayer's Sarsaparilla.

It leads the list as a truly scientific preparation for all blood diseases. If there is a lurking taint of Scrofula about you, AYER'S SARSAPARILLA will dislodge it and expel it from your system.

SCROFULA

For constitutional or scrofulous Catarrh, AYER'S SARSAPARILLA is the true remedy. It has cured numberless cases. It will stop the nauseous catarrhal discharges, and remove the sickening odor of the breath, which are indications of scrofulous origin.

CATARRH

"Hutto, Tex., Sept. 28, 1882.

ULCEROUS SORES

"At the age of two years one of my children was terribly afflicted with ulcerous running sores on its face and neck. At the same time its eyes were swollen, much inflamed, and very sore.

SORE EYES

Physicians told us that a powerful alterative medicine must be employed. They united in recommending AYER'S SARSAPARILLA. A few doses produced a perceptible improvement, which, by an adherence to your directions, was continued to a complete and permanent cure. No evidence has since appeared of the existence of any scrofulous tendencies; and no treatment of any disorder was ever attended by more prompt or effectual results.

Yours truly, B. F. JOHNSON."

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

JEWELRY STORE,

—BY—

F. G. HYDE,

WATCHMAKER AND JEWELER,

OAKLAND, MARYLAND.

And dealer in Watches, Clocks, Silverware, Eye-Glasses, etc. All the above goods are stylish, and of a good quality; new features, new designs, reduced prices. I propose to be the leader on small profits. Any order by mail will receive prompt and careful attention. Repairing of all kinds carefully and neatly executed. I say just what I mean, and mean just what I say.

SATISFACTION ASSURED.

The celebrated Silver Klenzer, for cleaning silverware, gold, etc. The best thing in the world. It is has no equal. Put up in 4 ounce vials, at 25 cents each.

My prices the lowest of the lowest. Reiterating thanks for past favors and soliciting a continuance of your patronage in the future, I remain, very respectfully yours,

EAST END OAK STREET, OAKLAND.

Furniture repaired. Will also take orders for new furniture. Rustic work on hand and manufactured to order. Give him a call

Grant's Military Ability.

Gen. Horace Porter in Harper's.

General Grant was created for great emergencies. It was the magnitude of the task that called forth the powers by which he mastered it. In ordinary matters he was an ordinary man; in momentous affairs he became a giant.

When performing the routine duties of a frontier camp there was no act to make him conspicuous above his fellow-officers, but when he wielded corps and armies the great qualities of the commander flashed forth and his masterstrokes of genius placed him at once in the front rank of the world's great captains.

When he hauled wood from his little farm and sold it in St. Louis, with all his industry he did not drive as advantageous bargains or make as good a living as most of the farmers about him; but when he came to cope with the trained diplomatists of Europe in conducting the intricate negotiations which resulted in forcing a satisfactory settlement of the *Alabama* claims, he put forth abilities which showed from the start that the matter was in the hands of a master. When conducting the business of his store in Galena his financiering was hardly equal to that of the average country merchant, but when a message was to be sent to Congress that would puncture the fallacies of the inflationists and throttle by a veto the attempt of unwise men to cripple the finances of the nation, a State paper was produced which commanded the admiration of every believer in a sound currency. He could collect for the nation fifteen millions from Great Britain; he could not protect his own personal savings from the miscreants who lately robbed him in New York.

His methods in warfare all bore the stamp of originality and ingenuity. His success depended upon his powers of invention rather than adaptation. The fact that he has been compared at times to nearly all the great commanders of history is the best proof that he was like none of them. He saw that the art of war as practiced in Europe, with its open country, macadamized highways, and densely populated states, would not answer for America, with its dense forests, inpenetrable swamps, difficult rivers, mud roads, and sparse population. He found the necessity of devising an American system of warfare applicable to the conditions surrounding him, and while it had been part of his education to study the instructive lessons derived from the great European campaign, yet he never wasted time in trying to fit a European square peg into an American round hole.

The importance of celerity in action was always uppermost in his mind. There was a spur in the heel of every order he sent. No one could "feed a fight" more rapidly, that is, rush fresh troops promptly to the spot where they were needed. Every point gained was tenaciously held, and the enemy never recaptured an important position which had once been wrested from him.

The combinations and movements of the several great armies of the Union during the last year of the war were on a scale never before or since attempted. Over half a million of men were in the field in commands separated by more than a thousand miles, and all moving under the guiding hand of their chief: Meade manœuvering around Petersburg, Ord hanging on to Richmond, Sheridan galloping through the Valley of Virginia, Sherman cutting the Confederacy in two, Canby seizing the strongholds on the Gulf, Thomas crushing Hood in Tennessee, armies defending the Mississippi and resisting raids in Missouri. When communication was open, daily reports came in to the chief, who sat in his little hut quietly smoking his cigar, studying the maps and sending out instructions to all points of the compass. His selfreliance in the field was perhaps his most characteristic trait. He never convened formal councils of war, though he always consulted and advised with his officers, whose opinions never failed to have with him the weight to which they were entitled. He manifested no pride of opinion, but in a campaign he felt that the person who had to shoulder the responsibility ought to decide the movement. One of his objections to a council of war was that there would naturally be some officer who would oppose his plans, and in urging their objections and finding arguments with which to fortify the position they had taken, they would reach a frame of mind which, in case they were overruled, might make them lukewarm in executing the movement.

General Sherman once made a very fair criticism when he said, in his graphic way, and with his crisp style of expression: "Grant always seemed pretty certain to win when he went into a fight with anything like equal numbers. I believe one great reason why he was so much more successful than others was that while they were thinking so much about what the enemy was going to do, Grant was thinking all the time about what he was going to do himself."

My Boy Do You Smoke?

The United States Navy annually takes into its service a large number of apprentice boys, who are sent all over the world and taught to be thorough sailors. It has been the policy of the Government since the war to educate the "blue jacket," upon the principle that the more intelligent a man is, the better sailor he is likely to become. There is no lack of candidates for these positions. Hundreds of boys apply, but many are rejected because they cannot pass the physical examination. Major Houston, one of the Marine Corps who is in charge of the Washington Navy Yard barracks, is the authority for the statement that one-fifth of all the boys examined are rejected on account of heart disease.

His first question to a boy who desires to enlist is: "Do you smoke?" The invariable responce is, "No, sir," but the tell-tale discoloration of the fingers at once shows the truth. The surgeons say that cigarette smoking by boys produces heart disease, and that in 99 cases out of 100 the rejection of would-be apprentices on account of this defect comes from excessive use of the milder form of the weed. This is a remarkable statement, coming as it does, from so high an authority and based upon the results of actual examinations going on day after day and month after month. It should be a warning to parents that the deadly cigarette is sure to bring about incalculable injury to the young. A law passed restricting its use to the dudes would not, perhaps, bring popular disfavor, because it might reduce the number of these objects about our streets, but boys indulging in the cigarette ought to be treated to liberal doses of "rod in pickle" until the habit is thoroughly eradicated.—*Scientific American.*

Ancient and Modern Divorce.

"An Antiquory" in St. James's Gazette.

There is little new under the sun. In Saturday's papers appeared an account of the final ceremony of divorce in France which has just been gone through by Mme. Patti and the Marquis de Caux. The parties, we are told, seated themselves in the chairs set apart for the use of brides and bridegrooms before the mayor, only, in place of sitting side by side, their chairs were separated by a row of four others without occupants. Witnesses attended on both sides, and they went their respective ways. Now these French ceremonies of marriage and divorce have an exact parallel in the oldest modes of forming and dissolving the marriage tie among the ancient Romans. The religious ceremony called confarreatio is thus described by Gibbon: "A sacrifice of fruits was offered by the pontiffs in the presence of 10 witnesses; the contracting parties were seated on the same sheepskin; they tasted a salt cake of far, or rice, and this confarreation, which denoted the ancient food of Italy, served as an emblem of their mystic union of mind and body." Thus were couples married for more than 500 years before Christ; and even more striking is the parallel to be found in the dissolution of such a marriage. This was effected by the dffarreatio, in which the parties sat on two separate sheepskins, and tasted, presumably, of two distinct salt cakes, with the same formalities. Such parallels are always interesting, and this mode clearly points to a survival.

As an illustration of cruelty of fashion, it is said that in one locality a dealer bought from local gunners 70,000 birds in four months, and an enterprising woman from New York has contcted with a Paris millinery firm to deliver it during the summer, 40,000 or more skins of our small birds.

No family or traveler, in a malarial district, should ever be without that sure antidote—Ayer's Ague Cure. Warranted to cure all malarial disorders.

Humorous.

A country seat that always rents—the barbed wire fence.

What causes the flowers to shoot is that they all carry pistils.

To the pure all things are pure, except city milk and cheap groceries.

It was a German who pronounced cricket such a bat and wicket game.

This is the season of the year when the hook and lyin' stories fill the air.

"The richest man in Oregon began business by tanning calfskins," says an exchange. This is reversing the rule. Most men begin by being tanned.

Young housewife: "What miserable little eggs again. You really must tell them, Jane, to let the hens sit on them a little longer."

"People who raise green apples have only their labor for their pains." People who eat green apples generally have pains for their labor.

"What must I do," asked a mean and conceited man of a friend who knew him well, "to get a picture of the one I love most?" "Sit for your own portrait," was the reply.

A child who had once seen a grab-bag in church, after the contribution box had passed by one Sunday, whispered to her mother; "How much did you get? I grabbed a quarter."

"Out of every one hundred and nine female school teachers," says an exchange, seven marry every year." How many times do the remaining 102 marry? Give us all the facts.

The composer of "Put me in my little bed" announces that he got ten dollars for writing that interesting lyric, and hints that it was not enough. It was not; he ought to have got ten years.

"Is the man honest?" asked old Hyson. "Honest as thr day is long," was the reply. "Ye-es," said old Hyson; "but then he won't do at all. I want him for a night watchman."

"How old are you my little man?" asked a gentleman of a youngster of three years to whom he was being introduced. I'm not old at all," replied the little man; "I am almost new."

Coddlepate used to rave over Miss Gurlingur's hyancinthine curls. Since he has discovered that they are fastened on with hairpins he has chosen a new floral emblem and now calls them "lie-locks."

The discovery has been made that the world does not revolve with the same momentum it did a thousand years ago, but it still swings round fast enough to satisfy the man with a heavy bill coming due.

"Give stock plenty of light" is the advice of an agricultural paper. That is all right as far as it goes, but we have the word of an eminent financier that it should be well watered if the man expects to make any money out of it.

Sydney Smith's Anecdote.

Exchange.

"Have you ever observed," wrote Sydney Smith, "what a dislike servants have to anything cheap? I tried this experiment with great success the other day. Finding we consumed a great deal of soap, I sat down in my thinking-chair and took the soap question into consideration, and I found reason to suspect that we were using a very expensive article when a cheaper one would serve the purpose better. I ordered half a dozen pounds of both sorts, but took the precaution of changing the papers, on which the prices were marked, before giving them into the hands of Betty. 'Well, Betty, which soap do you find washes best?' 'Oh, please sir, the dearest, in the blue paper; it makes a lather as well again as the other.' 'Well, Betty, you shall have it, then.' And thus the unsuspecting Betty saved me some pounds a year."

A Remarkable Escape.

Mrs. Mary A. Dailey, of Tunkhannock, Pa., was afflicted for six years with Asthma and Bronchitis, during which time the best physicians could give no relief. Her life was despaired of, until in last October she procured a Bottle of Dr. King's New Discovery, when immediate relief was felt, and by continuing its use for a short time she was completely cured, gaining in flesh 50 lbs. in a few months. Free Trial Bottles of this certain cure of all Throat and Lung Diseases at Nydegger's Drug Store. **Large Bottles 50c and $1.00.**

The Republican.

MY WINNY.

How I Won a Wife Amid the Ocean's Surges.

Stranger to Canada, I think you said? First visit to Ontario? Well, you're heartily welcome to Indian Creek. Take a chair on the piazza till dinner's ready—we dine early in these new-world parts.

Fine farm? Well, yes; Indian Creek is a nice place, if I do own it. All, as far as you can see—grass land, corn fields, woods and creeks—all belong to it. Stock, too—they call it the best-stocked farm in Ontario, I believe, and I dare say they're right. All mine; and yet I came to Canada twelve years ago, without even the traditional half-crown in my trousers' pocket. You look surprised. Would you like to hear the story? There's a good half-hour to dinner-time yet, and it's a story I never tire of telling, somehow.

I began life as the son of a village carpenter in the South of England. You know that class pretty well, I dare say, and what a gulf was fixed between me and the vicar of the parish. And yet—and yet—from the time she was seven years old and I eleven, and she fell down in the dusty road outside the carpenter's shop, and cried, and I picked her up, and smoothed the little crumpled pinafore, and kissed the dust out of her golden curls, I loved but one girl in the world, and that was the vicar's daughter, Winny Branscome.

Madness, you'll say. Well, perhaps so, and yet a man is but a man, and a woman a woman; and love comes, whatever one may do. There's no class distinction recognized by childhood, and we were playmates and friends till she went to boarding-school. If Miss Winny had had a mother, no doubt things would have been very different; but we were alike in never having known a woman's care, and the old vicar was blind to everything but his theological treatises.

But when she came back from her London boarding-school, a beautiful young lady, all smiles and laces and little lovely ways—then I knew. I had tried my best to study and work, and make myself more like the men she would meet; but what can a lad in an English village do? I just had enough education to make every other lad in the place hate me; and beside the men of her world I suppose I cut rather an astonishing figure. Yet the love of her was so beyond all else in me, that mad, hopeless as I felt it, I had no power over myself; and the first time I caught her alone in the woods—she avoided me, I saw, and I had to watch for a chance—I told her the whole story, and waited for her answer. She grew scarlet—a rush of color that dyed her fair, sweet face—then deathly white.

"Dick," she said, and she was trembling from head to foot, "you know it can never, never be; you know you are wrong even to dream of such a thing. Some girls would think it an insult—I know you better; but if my father heard of this, he would say you had abused his kindness to you; he would never forgive you. Forget your madness." And she ran from me.

I let her go. I had seen the blush and the tremor, and I guessed that if I had been Mr. Loftus, the young Squire, instead of Dick Hawtry, the carpenter's son, her answer might have been different. A great resolve sprang up in my soul, and I took a solemn vow in those June woods. That very night I sold the old shop (my father was dead, and I had taken to the business), and with the money I bought an outfit, and started straight for Canada. It was pretty tough work at first, but I worked like a galley-slave—starved, and pinched and saved, and never spent a penny on myself except for the books I sat up half the night to read and study. Well, in this country the man who works and doesn't drink is sure to get on; and I had a mighty purpose in my head. By and by I bought some land dirt-cheap, and sold it for three times what I gave for it—then I began to make money fast. I should call my luck wonderful if I believed in luck, and didn't prefer to think I was helped by a Power far abler than my own. At last, ten years to the very day after I set foot on Canadian soil, I bought Indian Creek Farm, and began to build this house. All the neighbors thought my good fortune had turned my brain, for I fitted it up and furnished it for a lady, down to a little rocking-chair by my study-table, and a work-basket with a tiny gold thimble in it. And when all that was finished, I took the first ship for Liverpool.

Ten years builds a city over here. It doesn't make much change in a Devonshire village. The very gates were still half off their hinges, as I left them, only the people were a little older and a trifle more stupid, and there was a new vicar. Old Mr. Branscome had been dead six months; died very poor, they told me; there was nothing left for Miss Winny. My heart gave one great leap when I heard that. And Miss Winny? O, she had gone governessing with some people who were just off to Canada, and the ship sailed to-morrow from Liverpool.

The Liverpool express never seemed to crawl so slowly before. I got there to find every berth taken on board the Antarctic, and the captain raging at the non-appearance of two of the crew. Without a second's pause I offered for one of the vacant places. I was as strong as a horse, and active enough, and though the Captain eyed me rather askance—I had been to a West End tailor on my way through London—he was too glad to get me to ask any questions. So I sailed on the ship with my girl, little as she knew it. I saw her the first day or two, looking so pale and thin that she was like the ghost of her old self, and yet sweeter to my eyes than ever before. The children she had charge of were troublesome little creatures, who worried and badgered her till I longed to cuff them well. But there was a gentleness and a patience about her quite new to my idea of Miss Winny, and I only loved her the more for it. After the second day out the wind freshened, and I saw no more of her.

We had an awful passage. It was late in November—an early winter, and the cold was intense. It blew one continuous gale, and some of our machinery was broken—the screw damaged—and we could not keep our course. As we drew near the other side of the Atlantic, we got more and more out of our bearings, and at last the fogs told us we were somewhere off the Banks of Newfoundland, but where no one was quite sure. It seemed to me it had all happened before, or I had read it or dreamed it. At all events, it was hardly a surprise to me when, on the tenth night, just after midnight, the awful crash and shock took place—a sensation which no one who has not felt it can imagine in the least—and we knew that the Antarctic had struck.

It's a fearful thing, if you come to think of it, a great steamer filled with living souls in the full flow of life and health, and in one moment the call coming to each of them to die. Before you could have struck a match the whole ship was in a panic—cries, terror, confusion, agony—O, it was awful! I trust never to see such a scene again. I made my way through it all as if I had neither eyes nor ears, and got to the stateroom I had long ago found out was the one which belonged to my girl. I knocked at the door with a heavy hand; even at that awful moment a thrill ran through me at the thought of standing face to face with her again.

"Winny!" I cried, "come out! make haste! there is not a moment to lose!"

The door opened as I spoke, and she stood just within, ready dressed, even to her little black hat. The cabin light had been left burning, by the doctor's orders, and it fell full on me as I stood there in my sailor's jersey and cap. I wondered if she would know me. I forgot the danger we were in—forgot that death was waiting close at hand—forgot that the world held any one but just her and me.

"Dick!" she cried—"O, Dick, Dick!" and she fell forward in a dead faint on my shoulder.

All my senses came back then; and I threw her over my arm and ran for the deck. A great fur-lined cloak had been dropped by the door of the ladies' cabin. There was no light, but I stumbled over it as I ran. I snatched it up and carried it with me.

Up above, all was in the wildest chaos; the boats over-filled, and pushing off; the ship settling rapidly; people shouting, crying, swearing. One hears tales of calmness and courage often enough at such times, which make one's heart glow as one reads them; but there was not much heroism shown in the wreck of the Antarctic. The Captain behaved splendidly, and so did some of the passengers, but the majority of them and the crew were mad with terror, and lost their heads altogether.

I saw there was not a chance for the over-crowded boats in that sea, and I sprang for the rigging. I was not a second too soon: a score of others followed my example, and with my precious burden I should not have had a chance two minutes later. As it was, I scrambled to the topmast, and got a firm hold there. Winny was just coming to herself. I had wrapped her round like a baby in the fur cloak, and with my teeth I opened my knife to cut a rope which hung loose within reach. With this I lashed her to me, and fastened us both to the topmast. The ship sank gradually; she did not keel over, or I should not be telling you the story now; she settled down, just her deck above water, but the great seas washed over it every second and swept it clean. The boats had gone!

One or two of the crew, floating on loose spars, were picked up afterward—no more. The rigging was pretty full, at least in the upper part; down below, the sea was too strong. The Captain was near me. I felt glad to think he had been saved—he was not a coward like some of the others.

How long was the longest night you ever knew? Multiply that by a thousand, and you will have some idea of that night's length. The cold was awful. The spray froze on the sheets as it fell, the yards were slippery with ice. I stamped on Winny's feet to keep them from freezing. Did you notice that I limp a little? I shall walk lame as long as I live. Sometimes there was a splash in the black water below, as some poor fellow's stiffened hold relaxed, and he fell from his place in the rigging. There was not a breath of wind, nothing but the bitter, bitter fog. How long could we hold out? Where were we? How long would the ship be before she broke up? Would it be by drowning or by freezing? We asked ourselves these questions again and again, but there was no answer. Death stared us in the face; we seemed to live ages of agony in every minute—and yet, will you believe me, that all seemed little in comparison to the thought that after all the struggles and the sorrows, after all those ten long weary years, I held my girl in my arms at last!

She had pulled one corner of the cloak around my neck (I stood on a level just below her,) and her hand lay there with it—it was the hand that warmed me more than the cloak—and her cheek rested against my own. Often I thought its coldness was the coldness of death, and almost exulted in the thought that we should die together. And then I would catch the murmur of the prayers she was uttering for us both, and know that life was there still, and hope lived, too.

Well, well! Why should I dwell on such horrors, except to thank the Mercy that brought us through them all? Day dawned at last; and there was the shore near by, and soon rockets were fired, and ropes secured, and one by one the half-dead living were drawn from their awful suspension between sky and sea, and landed safe on shore. They had to take Winny and me together, just as we were, and even then they had hard work to undo the clasp of my stiffened arms about her. I knew nothing then, nor for long after; and it is wonderful that Winny was the first to recover, and that it was she who nursed me back to life and reason.

And how did I ask her to marry me? Upon my word, now you ask, I can't remember that I ever did. That seemed utterly unneccessary, somehow. Caste distinctions look small enough when you have been staring death in the face for a few hours; and words were not much needed after we had been together in the rigging that night. Somehow I was glad it was so; glad my girl had taken me in my cap and jersey, for a common sailor, and yet loved the old Dick through it all; glad she never dreamed I was owner of Indian Creek farm, and the richest man in that end of Ontario, and had wealth and a position higher than Mr. Loftus, the young Squire at home. The people she was with had all gone down on that awful night; she had no one in the world but me. We were married at Montreal—the Captain of the Antartic gave her away—and then I brought her home to Indian Creek. To see her face when she saw the rocking-chair, and the work basket and the thimble! Heaven bless her!

There she comes, with her baby on her shoulder. Come into dinner, friend, and you shall see the sweetest wife in the new country or the old; the girl I won amid the ocean's surges.—*Bright Days.*

BABY DESTROYING.

The Many Deaths of Children Caused by Ignorance and Neglect of Parents or Attendants.

It has come to be a gospel with young married folk that the second summer is the destroyer of the baby. It is fate—kismet. That the second summer costs more lives than it ought is not the fault of the summer; it is the fault of the heat and the parents. The summer heat is dangerous to all young children; it is in connection with the bad diet of the second summer that it is fatal. It is a well-established fact that nearly all the mortality of second-summer babies is from diseases of the digestive organs, and these come from irrational artificial feeding. Children come to the table, eat pickles, unmashed or fried lumps of potatoes, beets, radishes, and the like, and the trouble begins. The stereotyped answer to the question: "What does the child eat?" is: "O, it eats at the table with the rest of the family." The result is enteric diseases and death, and the cause of death is ascribed to the "second summer." The first summer the baby stays at home, has its natural food, and pulls through fairly well. But the second summer it must show off. It is trundled down town through the heat of a July or August day, is overheated, excited, and its nervous system put to the strain. Keep the yearlings at home; give them a grass plat and a sand-pile. Do not let them come to the table, give wholesome food—milk, oat meal ground very fine and stirred and cooked for twenty minutes. Put them to bed at dark; with a garment they can not kick off when the nights are cool. Bathe them in tepid water night and morning. Stay at home with them and take care of them yourself, for it is not "the second summer" which kills the children, but the ignorance or negligence of those who attend, or rather do not attend, them. Colds and calves get through their second summers quite as well as their first, and there is no reason that the human animal should not live quite as close to nature and do quite as well.—*Indianapolis Journal.*

A Texas Centipede.

The centipede is not a pretty insect. He runs too much to legs. Once I thought them of no use, but after seeing a lot of little Chiricahua Indian papooses pulling centipedes from their holes and greedily devouring them, legs, poison and all, I no longer doubted the wisdom and beneficence of their creation. In the course of my checkered career I have had several adventures with centipedes and always came out second best. A centipede can raise a blister on a man's body quicker than a red hot iron, and if you don't immediately apply a remedial poultice of pounded prickly pear and dose yourself inwardly with post whisky—which latter is warranted to kill anything but an army mule—the resultant effects may be serious. Centipedes usually attack their victim at night, when he is asleep and can't defend himself. They are armed with about 200 little lances conveniently lashed to the toe of each foot—of which they have several—and at the base of each lance is a tiny sack of venom. If a centipede crawls across your body—which he'll most likely do if you lie down anywhere within a half mile of him—you'll have no difficulty in following his trail and you'll remember his visit for weeks. No man ever died from the bite of a centipede, but I have known one to make a man wish he were dead.—*Philadelphia Times.*

—The tribal government of the Cherokees is democratic in form, with an elective chief magistrate and an upper and lower house of representatives. The judiciary is also elective, and criminals are punished after the manner of the whites.—*Chicago Times.*

There is too much adulteration in our food and amusements.—*Norristown Herald.*

—"You should have a thermometer to ascertain the proper temperature of the water," said a fond mother to the colored nurse who was giving the baby a bath. "Whaffor?" "To tell when the water is too hot or too cold." "Don't need no sich dockerment. Ef de chile turns blue de water am too cold, an' ef hit turns red den hit am too hot." And now the colored lady is open to offer.—*Texas Siftings.*

Why He Didn't Go to Dakota.

"So you've given up the idea of going to Dakota to settle down?" said a Gotham bachelor to a Brooklyn Benedick.

"Yes, forever," he replied with a sigh.

"What's the reason?"

"Sh!" he hissed, as he glanced nervously at his wife, but seeing that she was occupied he whispered:

"I am told that out there the atmosphere is so dry and clear that talking can be heard for more than a mile."—*N. Y. Journal.*

TEMPERANCE READING.

HEART-BROKEN.

The Piteous Wail of a Poor Wife and Mother Whose Husband Will Drink—The Terrible Outlook for Herself and Her Seven Children.

We received a letter this week from Iowa, which contains the following sentences:

"I have seven children living. *Their father will drink, and I am so heart-broken.* My trouble is greater than any ever described in print, but I conceal it as best I can for the sake of the children."

There is more of it, but this is sufficient.

God help the poor woman! "*I am so heart-broken. I have seven children and their father will drink.*"

Of course she is. It could not be otherwise. She came to the man who is her husband, an innocent girl, full of hope, full of anticipation, full of love, dreading nothing, trusting everything. He was to stand between her and the cold world, she was to do her woman's share and he was to do his man's share, and they were to go down through life to the valley and shadow, hand in hand, each a help and comfort to the other. She had visions of the home he was to furnish her, of the children that were to be born to them, of the labor made pleasure by the anticipations of the good that, through it, was to come to them, and finally, of the peaceful ending when the garnered treasures that well-lived, prosperous years had brought would be left as a heritage to those they had reared in honor and usefulness. That's what was in the girl's mind when she stood up in the parlor of her old home and resigned her life into the keeping of the man who had wooed and won her.

What has happened to her?

"I have seven children living, and their father will drink. I am so heart-broken."

This is what is the matter. "*Their father will drink, and I am so heart-broken.*" That sentence should be repeated over and over again. We would that we could burn it into the very heart of every man in the land: "*I have seven children living, and their father will drink. I am so heart-broken.*"

Their father got in the habit of frequenting the miserable corner grocery which the cupidity of the brewer established near him, and the regular thing happened.

He commenced in a light way, he progressed to regular drinking, and then, the appetite once fixed, he came home drunk every night. Possibly he beat the patient, uncomplaining woman, but more likely he came home so sodden he was incapable of that brutality, but simply rolled into bed, and slept the sleep of a drunken beast.

He rose in the morning, incapable of labor, and went, as soon as possible, back to the beer-shop, where he stayed all day. As a matter of course the farm was neglected, the work that was done was done by the woman and the children, and their little earnings were wrested from them to supply the never satisfied demon of drink that had possession of the father. Scant food, rags, cold and hunger followed. The children are not well enough clad to go to church or school, and they are growing up in ignorance, and are being fitted for the penitentiary or gallows.

The mother loves these children, and, seeing the inevitable before them, no wonder she writes:

"Their father will drink. I am so heart-broken."

She gets up in the morning as tired as she went to bed. She goes to bed to sleep, but she does not sleep. The drunken brute beside her prevents sleep. He has murdered sleep, not for himself, but for his suffering wife. Her pillow is wet with tears. She has in her mind, all night long, the children, ill-fed, ill-clad and growing up without proper education, without proper surroundings and without any advantages. There come before her visions of her four boys, all sneered at by the neighbors as drunkard's boys, and almost certain to go the way their wretched father has gone; of the three girls, who, ignorant and debased by the example that is always before them, will finally drift off into that current of vice from which there is no return. She knows their fate, and there is no sleep for her. She rises always more tired and more dragged out than when she sought her pillow. No wonder she writes:

"Their father will drink. I am so heart-broken."

What is there in life for her? Nothing, or rather worse than nothing. Better for her that she should die and find that peace in the grave that the brewers will never give her in life. She lives only because there is in her mind some sort of a hope that something, she knows not what, may yet save her husband. But the outlook is dreary enough, and, as she says, her troubles are greater than can be described in print. What is there for her? Rags, hunger, cold, desolation, despair, death. Nothing in life for her and worse than nothing for her children when she leaves them. Clothes! She has had none for twenty years. Food! Warmth! She has neither. She has none of the luxuries of life and falls far short of the necessities. There are no carpets on her floors, no curtains to the windows, if indeed she has glass in them; only the barest of the commonest necessities of life. She and her children do not live, they exist. There are good things in life, but they are not for her. There are pleasant surroundings, there are comforts, there are luxuries, but they are not for her. The brewer and his lieutenant, the beer-shop keeper, have a mortgage on her husband's earnings, and even on hers, and they take all the good to themselves. Their houses are well furnished, and why should they not be? Her husband, and the husbands of a score or more like her, are contributing all they have to their use and behoof.

"Their father will drink. I am so heart-broken."

She conceals her trouble from her children as best she can, for should she give up what would become of them? The sodden father, debased beyond help, caring nothing for the woman whom he swore to cherish and protect, caring nothing for the helpless children he brought into the world, chained to a habit which has complete control of him, is worse than nothing to them. The best thing she can do with him is to keep him out of their sight, and so she is glad when he leaves the wretched home, and sorry when he returns. She is compelled, for the sake of the children, to keep them away from their father, and so she has to carry her own load and his, too, his being trebled in weight by the debasing influences that have possession of him. What is there in life for her? A dreary journey day by day, bare-footed, over sharp rocks, with the certainty that at the end she shall fall and perish, leaving those she loves behind her, helpless and hopeless.

"Their father will drink. I am so heart-broken."

And all this time the brewer brews, and the seller sells. There is a profit of one dollar and fifty cents on each barrel to the brewer, and nine dollars to the retailer. What care they that the money the poor wretch pays down upon the bar is bread taken from the mouths of children and clothes from their backs? What difference does it make to them that this infernal appetite is not only dragging down the father to death and a hell afterward, but is killing a mother and making thieves of four boys and outcasts of three girls? What difference does it make to them that the community must in time bury the poor mother, and bear the expense of the criminality of the seven children? Not a whit. There is the brewer's dollar and a half, and the miserable retailer's nine dollars, and the piteous moan, "Their father will drink. I am so heartbroken," has no more effect upon them than would a paper wad against an iron-clad.

Possibly there will a time come when the public conscience will be awakened to the enormity of the crime against humanity. Possibly the time will come when the people will say to the brewer and his tool: "You shall not kill this woman, you shall not kill, body and soul, these children." Possibly, some time, this heart-broken plaint will be heard, and will rouse men and women to action. There is a day coming when some sort of action will be taken in self-protection. It is not alone the poor woman in Iowa who is uttering this piteous moan. There is the same plaint in the houses of the rich. Cold and hunger can not reach them, but disease, disgrace and death can. The liquor fiend cares not who his victims are, and its claws reach in all directions. It is as merciless and as greedy as a grave-yard—it takes everything that comes to it. Wine at five dollars a bottle kills just as certainly as beer at five cents a glass. There are mothers in velvet and satin who moan just the same as the calico-clad woman in Iowa. It is all the same.—*Toledo Blade.*

What Drink Costs Canada.

The Canadian people spend more for whisky and other intoxicating drinks than for any other class of manufactures.

Five millions more for liquor than for meat.

Six millions more for liquor than for either bread or woolen goods.

They spend more for strong drinks than for all the lumber they annually use for building houses, barns and fences, and furniture.

One-third more of the stuff that puts snakes in their boots than on the boots themselves.

Twice as much for alcohol as for cottons.

Nearly three times as much as for sugar.

While they spend $8,000,000 for clearing their heads by education, they spend three and a half times as much for muddling them.

A single year of this baneful expenditure costs as much as would buy out the farms and stock of either of the wealthy counties of Hastings and Elgin.

Thirty-two years of the annual drink bill would purchase the farms, stock and implements of the whole Province of Ontario.

Liquor costs the Dominion as much as an ordinary war, and kills more than such a war generally does.

The direct cost for the maintenance of prisoners and asylums and in the loss of labor is another item in the drink bill of the country which would swell well the total financial loss caused by the liquor traffic to an even more enormous sum.

And the financial loss, after all, is *the smallest evil of the whole business.*—*Irish World.*

A Telling Temperance Lecture.

Two colored barbers, one an old man and the other a young one. The young one took off his apron and started out of the door.

"Yo's gwan to get a drink, Jim?" asked the elder.

"Dat's what I's gwan to do."

"Go and git yo' drink. I yoost ter do de same ting when I wuz young. When I wuz fust married dah was a gin-mill next to the shop wha' I wucked and I spent fifty and sebenty cents a day outer de dollah 'a half I earned. Wall, one mawnin' I went into de butchah shop, and who shood cum in but de man wat kep' de likker shop.

"'Gib me ten or twelve pounds po'terhouse steak,' he sa'd.

"He got it and went out. I sneaked up to de butchah and looked to see what money I had lef'.

"'What do you wan'?' said the butchah.

"'Gib me ten cents' wuf of libber,' wuz my remark.

"It wuz all I could pay fur. Now yo' go and git yo' drink. You'll eat libber, but de man wat sells yo'—de stuff will hab his po'terhouse steak. De man behin' de bar eats po'terhouse—de man in front eats libber. I ain't touched the stuff in thirty yeahs, and I am eatin' po'terhouse myself."—*Foxboro Reporter.*

PEOPLE need not tell me that I am excited on these questions. I know that I am. I should be ashamed before God and man if I was not. In my ministry I meet the horrid fruits of these whisky-shops. I see that men and women are perishing in these pitfalls. The number of the victims is so great that it overwhelms me. My brain is burning, my heart is breaking. The church is asleep, and the world, too; and they are hugging each other. I am weary with holding in. I must cry. I would rather be counted singular in the judgment of men than be unfaithful in the judgment of God.—*Rev. Dr. Arnot.*

INDIAN CUSTOMS.

A Woman's Experience in the Haunts of the Noble Red Man.

A woman of this city who has several times visited the frontier as a guest of acquaintances in the regular army was speaking the other day of her experiences last summer. She was one of a party of ten, among them two or three women from the East, who were visiting at one of the frontier posts. A gallant officer conceived the idea of a trip lasting several weeks, which should include the various Indian agencies and army posts of the Northwest. The women were particularly delighted with the idea and the party set out.

In speaking of Lo, the traveler said: "If you want to know what real dirtiness is, you ought, without doubt, to see the inside of an Indian tepee. And until you have do not consider yourself capable of judging in such matters." These uncleanly habits, she thought, were innate, for the Indians abhor water as much as a dog attacked with rabies.

At the Pine Ridge Indian Agency, considered the typical one in the country, and which is presided over by Agent McGillicuddy, is a mission school conducted by Mrs. McGillicuddy, a woman of superior education and refinement. The little Indian girls live in the school-building, which is conducted as are Eastern seminaries for young women. One day two of the little girls, about ten and twelve years old, ran away from the school and returned to the wigwam of their parents, who at once brought them back. Mrs. McGillicuddy thought they ought to be punished, and discussed with the squaw the advisability of a whipping, but was told in substance it would do no good; that the most severe and effective punishment possible to inflict would be an extra bath that week, which was administered, much to the discomfiture of the children. It had its effect, however, and they were among the most obedient thereafter. She agrees with all authorities as to the constitutional laziness of the noble red man.

A number of humorous incidents that happened while on the trip were related. While at one of the agencies, one Sunday, the Indians were gathered near the officers' quarters devoutly performing certain religious duties. An officer induced a young woman from one of the Eastern cities, who was possessed of a remarkably heavy head of blonde hair, reaching to the ground, to allow it to flow loosely and let the Indians admire it. She at once became the center of attraction, to the utter neglect of the religious ceremonies. They gathered about her in swarms, and manifested their pleasure at the sight by jumping about, rubbing their hands and gesticulating wildly. They pronounced it the finest scalp they had ever seen. The young woman was badly frightened, and the rest of her stay at that place was made rather unpleasant from the fact that the Indians manifested such an admiration for her that she was afraid to venture out. One evening during their stay at the Pine Ridge Agency the party attended church in the little Episcopal chapel. When they went in all was perfectly quiet, but services had hardly begun when they were startled by a terrible excitement among the Indians. Dr. McGilliendy endeavored to quiet them, but was unable to do so. The cause of the commotion was that news had been received announcing the death of White-Thunder, a very popular Chief on one of the other reservations. The despair of the Indians seemed so intense and their grief so uncontrollable that the question was asked: "Why do they wail and moan so loudly?" It was explained that when a brave dies he who does the most and loudest mourning receives from the widow the choicest pieces of personal property left by the deceased. All of the property is thus given away by a "graduating scale" based upon the display of anguish made by grief-stricken friends.

The traveler related an incident coming under her observation which tends to dissipate the idea that the savage can not be civilized. It is the story of poor Enoch Arden in terra cotta tint, with slight variations.

There was one young buck, of industrious and frugal habits, who, unlike his more trifling brothers, had adopted many of the white man's ideas, and by steady work at teaming acquired a comfortable cabin (instead of a wigwam), which he furnished in some taste, lived quietly with his squaw, and enjoyed the confidence of the white man. He went out on one of his regular trips, but did not return at the expected time. Search was made for him, but after the lapse of a week or so he was declared lost. The other braves at once began to mourn for him. This is said to have been the best, or perhaps the worst, exhibition of howling ever heard. It was exciting for the double incentive of securing the personal effects of the dead Indian and receiving the smiles of the rich young squaw, who was possessed of unusual personal charms as well as wealth.

Not unlike her white sisters in similar positions, this bereaved widow displayed considerable tact and executive ability. By her coy manners she had induced one fine young brave to outlast the others in the contest. His grief had been so intense that she rewarded him with nearly all of the personal property left by her lamented husband, and as a happy culmination gave him her fat, greasy hand in marriage. The honeymoon had only fairly begun when "the supposed deceased," who had apparently died intestate, put in an appearance, after an unusual and extended drunk. Right here is where Enoch Arden was outgeneraled. Instead of going away and leaving the young couple to spoon, this resurrected Indian asserted his rights, retook his goods, chattels, tenements, and hereditaments, including the gentle Annie, instructed the copper-colored Philip to "git," and he "got."

The simple, child-like vanity of the Indian is well illustrated by the following: At one post, "Young-Man-Afraid-of-His-Horses" came into the little photograph gallery, or tent, to have his picture taken. When the tin-type was shown him he went into ecstacies at the reproduction of his own manly form arrayed in Government clothes and whatever else he could accumulate on his person. To understand how complete was his joy it is only necessary to say that, in unbounded glee, he wanted a picture taken of his squaw, who was placed in position before the camera. Just as everything was about ready the "Y. M. A. O. H. H." wanted to see how his better half would look. He put his head under the cloth of the camera, and, to his horror, saw she was standing on her head. He instantly jerked his head out from under the curtain, but saw her standing on her feet. Thinking he might have been mistaken, the Indian took another peep and saw she was again standing on her head. He remonstrated with her, saying she could not expect a picture to look like her if she persisted in standing on her head. The squaw denied any such acrobatic performance. Upon taking one more look Mr. Indian flew into a rage, grabbed his squaw by the shoulders, shook her violently, and dragged her out of the place, saying she was bewitched and should not have a picture until she learned to stand on her feet.—*Chicago Tribune.*

ADAPTATION IN AGRICULTURE.

Folly of Settling Facts Which Have Already Been Settled by the Experience of Others.

While every intelligent cultivator of the soil is doubtless well aware of the fact that the same kinds of plants and animals do not thrive equally well in all climates or under the same conditions, still there are comparatively few persons who pursue this subject further than what is forced upon them through dear-bought experience. It is quite true that experience is often the most direct medium through which a man can obtain the information or facts which he may be seeking, but it can scarcely be said in this age that all must travel the same road in order to secure the same amount of knowledge. Accumulated individual experience may be considered as at least a fair basis upon which to establish principles that will not mislead the inexperienced, even if they do not enable the novice to secure greater results. It is a waste of time, if nothing more, to repeat experiments just for the purpose of being able to say that you have settled certain facts or fallacies by actual individual experience. There is still room enough for experiments without going over old ground, and agricultural science has certainly reached a stage where some of the old and mooted questions may be considered as decided, and it is worse than folly to spend more time in their investigation. We have certainly determined the fact that there are climates and soils especially adapted to the growing of wheat; and while the natural limits may, by artificial means, be somewhat extended, it is a question if it will pay the agriculturist to undertake to force nature in such matters and try to raise crops that at best are uncertain, and in a majority of instances cost more than they are worth. To run counter to natural conditions is, however, one of the follies of a large number of agriculturists in all civilized countries, and perhaps nowhere are the numbers greater than in the United States, for here we have thousands of farmers and fruit growers who seem to be perfectly oblivious to all principles of adaptation as well as to ignore the experience of all who have gone over the same field before them. If a hundred or even a thousand men have utterly failed to make any special branch of agriculture a success in a locality, they will not be satisfied until they have tried it themselves. They will try to raise wheat on a soil only adapted to rye, and perhaps winter wheat upon land where it is almost certain to be thrown out by frosts in winter and killed, and do not once imagine that the results were due to their own ignorance or persistent stupidity. Now, it is well known that we have vast regions of country where both the soil and climate are especially adapted to the growing of wheat and oats, others for corn, rye, potatoes, and various farm crops; and while the farmer may by artificial means achieve partial success where natural conditions are against him, we should at least hesitate to advise others to attempt to do the same as a matter of business.

There are natural dairy regions where all things seem to combine in making conditions especially favorable for the production of milk, butter, and cheese. The pasture and meadow grasses may grow fully as luxuriantly in other localities, and still dairy husbandry can not be made a success, the reasons for the failure being due to other causes than food. Low, moist soils in warm climates may produce more succulent food than high and dry land, and yet that from the former may be deficient in nutritive properties. Low lands also produce more food when used for pasture than high grounds, but they are never as healthy for cattle, and fevers, foot-rot, and similar diseases are usually developed on moist soils. What are called malarial regions are really as unhealthy for domesticated as for human beings, and should always be avoided by stockmen if they expect permanent and continued success in their business.

Large, heavy breeds of cattle, like the Shorthorns, are not adapted to hilly regions, where they will have to climb for their food; neither are they suited to the thin pastures of the Western plains, where they must travel a long distance to obtain sufficient food and water. The breeds that are light of foot are best for such regions, and the same is true of horses, sheep, and other stock. The stock raiser should keep these things in mind when looking for a stock farm, and, further, not expect to find any one breed equally valuable for all purposes. The long-sought "general purpose breed" has not as yet appeared, and until one is developed it will be safe to select the very best of those already known that are especially adapted to certain purposes and the conditions under which they are to be reared.—*N. Y. Sun.*

—In Tenejapa, Oaxaca, Mexico, the Indian residents are more sanguinary than the Chinese in the administration of justice. They surrounded the houses of seven well-known robbers and burned them alive in their houses. When the militia arrived they only found a heap of ashes.

FARM AND FIRESIDE.

—Smoking plum trees with sulphur is recommended as a preventative of the ravages of the curculio.

—Fruit jellies may be preserved from moldiness by covering the surface one-fourth of an inch deep with pulverized sugar.—*Chicago Times.*

—For stomach cramps, ginger ale or a teaspoonful of the tincture of ginger in a half glass of water in which half a teaspoonful of soda has been dissolved.—*Boston Budget.*

—Eggs at twelve cents per dozen give the same food value as lean beef or mutton at ten cents per pound. Eggs, therefore, are economical food, and they are excellent for the farmer's family.—*Troy Times.*

—It is said that scarcity of water is one chief cause of tough beef. Animals fatted in summer on succulent food are more tender than those of the same age and character fatted in winter.

—It is well-known that when a cow aborts in a herd it becomes contagious. This is due to a disease which causes the difficulty rather than from any physical disorder. No cure is known, and the loss among the herds annually is very great—*Albany Journal.*

—If your blacksmith insists upon burning your horses' feet, says the *National Stockman*, in order to make the shoes fit, hunt another farrier at once. The horseshoer who will do such a thing is either an ignoramus or is too lazy to do his work as it should be done.

—Milk toast (for invalids): Take a couple of slices of bread and toast well—that is, crisp. Take new milk or cream, also a bit of butter (varying according to toast required), and melt in a saucepan together. Then dip in the slices of toast, let them soak for a moment or two, lift on to a deep plate and pour the remains of milk and butter on top. Serve very hot; add salt as required.—*N. Y. Herald.*

—Currant Vinegar: This fine vinegar is made by simply pressing the fruit to a mash, let it stand a night, then strain the juice off clear and fill bottles to the brim. Set them uncorked in the sun, or in a warm place, until the fermentation ceases. Any little impurities that arises skim off with a piece of blotting-paper, and cork the bottles well. White currants are excellent for delicate pale vinegar. Red ones make a vinegar equal to that made from the finest red wine.—*Philadelphia Call.*

—The putting up and marketing of butter in good shape during the summer months is an almost impossible task. The butter often comes into market really unfit for use, when, no doubt, it started from the dairy in fine condition. Farmers should put up their butter just as well as the regular dairymen, pack it solidly in vessels made especially for the purpose and in every way prepare it to go on the market in the best possible shape. If they do this there will soon be no reason to complain of selling butter in summer at ten to fifteen cents per pound.—*Prairie Farmer.*

—The Soldier's Broil: Half roast, or stew, or parboil a moderate-sized shoulder of mutton, lift it into a hot dish, score it on both sides down to the bone, season it well with fine salt and cayenne or pepper, and finish cooking it upon a gridiron over a brisk fire. Skim the fat from any gravy that may have flowed from it, and keep the dish which contains it quite hot to receive the joint again. Warm a cupful of pickled mushrooms, let a part of them be minced, and strew them over the broil; when it is ready to be served arrange the remainder round it and send it to table instantly.—*N. Y. Herald.*

SWINE.

The Proper Summer Diet for Young and Growing Pigs.

There is no better food for young pigs after weaning than good skimmed milk, with a little sweet, moderately fine wheat bran and corn meal stirred into it. There should not be a large proportion of meal in the mixture at first, nor so long as the pig is making growth, though corn meal is excellent to finish off fattening with. Many a young pig has been spoiled by overfeeding with corn or corn meal. It is impossible to get a good growth on such food alone. Clear milk would be better, but milk will pay a larger profit when given in connection with some grain. Milk alone is rather to bulky for a sole diet; it distends the stomach too much and gives the animal too much to do to get rid of the surplus water. Many young pigs are spoiled by overfeeding. When first weaned they should be given a little at a time and often. They always will put a foot in the trough, and food left before them a long time gets so dirty that it may be entirely unfit to be eaten. But one of the worst methods of feeding milk to pigs is to have it stand in a sour swill barrel, mixed in along with cucumber parings, sweet corn cobs and other kitchen wastes, till the whole mass is far advanced in the fermentation stage. Sweet milk is good, and milk that is slightly sour may be better, it may be even more easily digested, but milk that soured until it bubbles, till the sugar in it has turned into alcohol or into vinegar, is not a fit food for swine of any age, and certainly not for young pigs that have just been taken from their mother. A hog will endure considerable abuse, will live in wet and filthy pens, will eat almost every sort of filthy food, and often thrive fairly well, but a pig that is kept in comfortable quarters and fed upon wholesome food will pay a much better profit to the owner and furnish much sweeter pork for the barrel. Nearly all the diseases which hogs are subject to are caused by cold, wet pens, or by sour, inferior swill. Better throw surplus milk away than to keep it until it rots and then force it down the throats of swine. Farmers should keep swine enough to take all the wastes of the farm while in a fresh condition and then supplement it with good wheat middlings and corn meal. Our own practice has been to keep pigs enough to take the skimmed milk each day direct from the dairy room, without the use of a swill barrel to store and sour it in. A swill barrel in summer is a nuisance on any farm. We could never find a good place to keep it—where it would not draw flies or breed flies. In winter it would be less objectionable, but it is a nuisance at all times and in all places.—*N. Y. Herald.*

A Campaign Secret Given Away.

In the campaign of 1884 the two candidates for Governor in a "pivotal" Western State arranged for a series of joint discussions. Both men were popular, both of fine appearance and were so well matched in mental force and as orators that the contest between them promised to be a magnificent one. For several weeks the scales balanced evenly.

But one day the brilliant Republican candidate came up ailing. He seemed overcome and spoke laboredly. The next day he was even less effective. Later he was compelled to ask his opponent for a postponement of certain appointments, which was granted. Before the campaign ended he had abandoned the field altogether.

Meantime the Democratic candidate continued his canvass, seeming to grow stronger, cheerier and more effective with each succeeding week. He was elected. One evening in December while entertaining several gentlemen he said:

"I will tell you a campaign secret—which gave me the election. With the opening of my campaign I began caring for my liver. I knew that a disordered or torpid liver meant dullness and possible sickness. I took something every day. When my opponent began failing I knew his trouble to be his liver and felt like prescribing for him, but feared if I did so he might beat me! I grew stronger as the campaign progressed, often making two speeches a day. Even my voice, to my surprise, did not fail me once. All because Warner's safe cure kept me in A 1 trim." Ex-Governor Jacob, of Kentucky, also made a campaign tour under precisely similar circumstances and says he kept up under the exhausting strain by use of the same means.—*Rochester Union.*

Why did the porcupine? How much did the armadillo? What was it the rabbit! Why did the ant eater?—*Philadelphia Call.*

Especially to Women.

"Sweet is revenge especially to women,' said the gifted, but naughty, Lord Byron. Surely he was in bad humor when he wrote such words. But there are complaints that only women suffer, that are carrying numbers of them down to early graves. There is hope for those who suffe , no matter how sorely, or severely, in Dr. R. V. Pierce's "Favorite Prescription." Safe in its action it is a blessing, *especially to women* and to men, too, for when women suffer the household is askew.

"THERE she blows," the old whaler remarked when his wife commenced to give him a curtain lecture.—*Palmer (Mass.) Journal.*

An Offensive Breath

is most distressing, not only to the person afflicted if he have any pride, but to those with whom he comes in contact. It is a delicate matter to speak of, but it has parted not only friends but lovers. Bad breath and catarrh are inseparable. Dr. Sage's Catarrh Remedy cures the worst cases as thousands can testify.

CANCER of the TONGUE.

A Case Resembling That of General Grant.

Some ten years ago I had a scrofulous sore on my right hand, and with the old-time treatment it healed up. In March, 1882, it broke out in my throat, and concentrated in cancer, eating through my cheek, to the top of my left cheek bone and up to the left eye. I subsisted on liquids, and my tongue was so far gone I could not talk. On October first, 1884, I commenced taking Swift's Specific. In a month the eating places stopped and healing commenced, and the fearful aperture in my cheek has been closed and firmly knitted together. A new under lip is progressing, and it seems that nature is supplying a new tongue. I can talk so that my friends can readily understand me, and can also eat solid food again. I would refer to Hon. John H. Traylor, State Senator, of this district, and to Dr. T. S. Bradfield, of LaGrange, Ga. MRS. MARY L. COMER.

LaGrange, Ga., May 14, 1885.

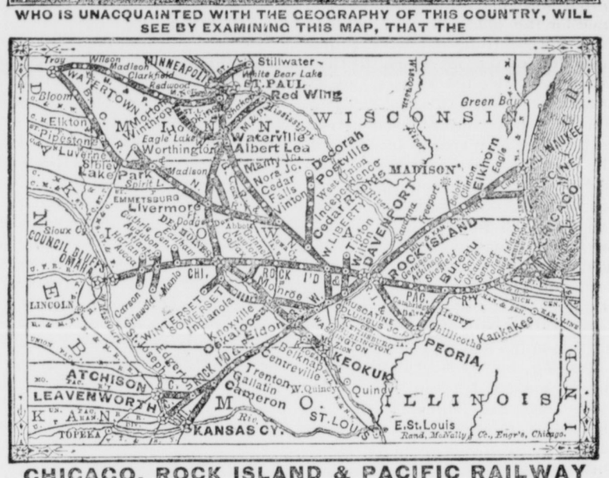
A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Brailfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten. "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

Put Good Men on Guard.

Sometime ago we called the attention of our Republican readers to the importance of nominating our best men for the offices to be filled next fall. Since writing that article ample time has passed in which to thoroughly consider the subject, and we trust not only that this has been done but that the Republican party of Garrett county is prepared to act upon the suggestions we then made. We feel that the importance of the subject demands our earnest and careful thought and our energetic action, and we trust we may be pardoned if we again urge its attention upon our readers. The Republican party owes it to itself to nominate good men. If both political parties would nominate good men the public interests would not suffer, no matter which party might succeed for the time being. Experience has demonstrated that the public interests have not been subserved by the election of Democrats heretofore, and with the experience of the past two years before them the people are not likely to repeat the experiment. This is a Republican county by a majority although not large yet decided, and we may reasonably look forward to the election of a Republican ticket. This being, as we believe, the case, we regard it all the more important that none but good men should be nominated, and then, when the people vote for such men, they will feel not only that they are voting for the men who are going to be elected, but that when they are elected they will have the ability as well as the integrity to faithfully discharge their duties. Don't nominate men simply because they say they are strong; don't nominate them because they think they can capture a few Democratic votes; don't nominate half-and-half milk-and-water Republicans. Nominate men about whose political principles there can be no doubt, true men—men who command the confidence of their party and challenge the respect of the opposition. With a ticket composed of such men we may snap our fingers at the Democracy. With a ticket composed of different material we will deserve defeat.

Early in the season the attention of the corporation authorities was repeatedly called to the necessity of opening certain streets and alleys in the town for the comfort and convenience of the people. Attention has also been called to the obligation resting upon The Burguess and Commissioners in connection with the opening of these public thoroughfares, which have been closed without a shadow of authority. To all appeals thus far, so far as we know, a deaf ear has been turned by the town authorities, who seem to regard themselves as the masters of the people. How is this matter to be understood? Is the law designed for the government of a few only, or does it apply with equal force upon all? Can two or three gentlemen of some prominence in the town keep alleys and streets closed up and defy the law, whilst men of less influence are required to obey the law? The people do not complain because some are required to obey, but rather because others are not required to respect the law.

Some of our people seem to feel that forbearance has long since ceased to be a virtue in this matter. They seem well assured, also, that it is of no use trying to induce the town authorities to enforce the plainest provisions of the law. We have often heard that for every wrong there is a remedy, and it seems to us the remedy in this case would be to lay the matter before the Grand Jury, to which the people and officials are alike accountable. At any rate there can be no harm in trying this remedy.

For months and months past, in addition to all the other cries of hard times, we have daily heard the report of a failure of crops. We now suspect that many of these reports have been industriously circulated by men who were speculating in grain with a view to profit thereby. From the Agricultural Bureau we have the cheering information that the country is to have a very large aggregate of crops this year. The cotton and corn crops, we are told, will be the largest ever grown, whilst the wheat crop, although less than usual, will be far more than we can possibly consume. With this point settled we need not be seriously disturbed, although the dispute about the quantity or yield of wheat is kept up even after the entire crop is harvested. If any fellow wants to lie in the interest of his grain investments we can't prevent him, but the people know enough about the crops now to feel very comfortable withal.

Register.

The September sitting of the Registers of this county, will commence on September 8th, and continue five days. This will be their longest continuous sitting and it ought to be taken advantage of by every Republican who either neglected or forgot to register at the previous sittings. Persons who fail to embrace the opportunity offered during the September sitting may be debarred from registering in October for want of time and thereby become virtually disfranchised. Should this misfortune occur they will have no one but themselves to blame. A citizen who possesses all the qualifications of a voter except the simple one of being registered might as well not possess any qualification whatever. The awkward position he will occupy on election day must be exceedingly mortifying. Let the closing of the books on the last day of the September sitting show a complete Republican registration on the muster roll of registers. A long pull, a strong pull and a pull altogether is all that is wanted. Every Republican vote should be cast on election day, and to be able to do it every Republican voter must be registered.

The reports from Marseilles indicate the appearance at that place of a very fatal type of the cholera, in which the patient dies without the occurrence of either diarrhœa or vomiting, but apparently stricken with a chill from which it is impossible to cause a reaction by any known medical process. The deaths in the city are increasing daily and it looks now as though the horrors of last year were to be repeated. In Spain there is no perceptible decline in the ravages of the epidemic. On the contrary the reported death list has risen to two thousand a day and it is probable that many deaths are not reported owing to the disposition on the part of the peasantry to oppose or ignore all sanitary requirements. The government is doing all that is possible to aid the sufferers, but it is uphill work to aid those who from ignorance or prejudice resent all interference in their behalf.

Colonel James C. Mullikin, chairman of the Republican State Central Committee, has issued a call notifying the members of the committee to meet in Baltimore on Thursday, August 27th, at 11:30 A. M., at the rooms of the Young Men's Republican Club, 70 Saratoga street. Arrangements will then be made for holding the State convention, which will nominate candidates for State Comptroller and clerk of the Court of Appeals.

Death of Judge Wm. Motter.

HAGERSTOWN, August 22.—Ex-Judge Wm. Motter died between 11 and 12 o'clock last night at his residence, this place, aged sixty-eight years four months and twenty-seven days. He was in failing health for some time, and his death was not unexpected. Deceased was born in 1817, at Emmittsburg, Frederick county, and graduated at the age of nineteen at Princeton College, having also attended for a short time Pennsylvania College, at Gettysburg, Pa. He studied law with William Schley and Edward A. Lynch, at Frederick, having as a fellow-student at the time the late Judge Geo. A. Pearre, with whom he afterwards practiced law for six months in Cumberland. Giving up his practice at Cumberland at the end of that period, he removed to Wheeling, W. Va., and thence, in 1845, to Hagerstown, where he has since resided. He was defeated for the State Senate in 1857, but two years later was elected state's attorney of this county, and in 1867 was chosen a member of the Constitutional Convention. In the same year, at the first election under the new Constitution, he was chosen associate judge of this, the Fourth judicial circuit of Maryland. He was succeeded in 1882 by Judge A. K. Syester, who is now on the bench. Upon his retirement from the bench he resumed the practice of the law. While on the bench, he was regarded as a safe and impartial jurist, and he enjoyed the esteem and confidence of the community in every position he held. Judge Motter was twice married. By his first wife he had one daughter, who married Dr. Bruce, of Cumberland, and by his second wife, who was the daughter of Mr. W. D. Bell, former editor of the *Herald and Torchlight*, he had six children. His funeral will take place to-morrow afternoon, with services at the St. John's Episcopal Church, where he held the position of vestryman for a number of years. He will be interred in Rose Hill Cemetery.

The Situation in Ohio.

Now that the Ohio nominations are complete on both sides, speculation as to the results of the election turn chiefly upon two elements of uncertainty—the Prohibition vote and the colored vote. It is asserted, and reiterated with great positiveness, that there is much dissatisfaction among the colored voters of Ohio with the nomination of Foraker. This statement is, however, emphatically denied, and no substancial proof has been offered in support of it. There are about twenty thousand colored voters in Ohio, and, of course, any bolt they might make of the Republican nominations would be seriously felt, but there is at present no reason to fear that any such bolt will take place. It is Democratic wish that is the father of the thought.

The Prohibition vote is rendered uncertain by reason of an element of comedy that has forced its way into the very serious canvass. It is charged upon the sworn statement of a witness who cannot be ignored that the Prohibition candidate, while suffering with dyspepsia, took bottled ale as a medicine, but took it clandestinely in the woods at a camp-meeting. This is positively denied by the Prohibition candidate, but the witness makes his statement in detail and promises to give the name of the doctor who prescribed the ale and other proofs. It is not improbable that the Prohibition vote will be seriously affected by it.

There are other elements of uncertainty. There is said to be a free trade revolt in Hurd's district, where the nomination of Hoadly is regarded as "a rebuke." There is also a split in the Democracy, led by Mallon, a defeated Democratic candidate for sheriff. He leads a "workingman's party," and has the support of the Knights of Labor.

There are other and lesser elements of uncertainty, but one of the most powerful of these is the personal popularity of the candidates. Foraker is a popular man. Hoadly is quite the reverse. The Republicans will rely on an active an stirring campaign and the Democrats on a still hunt.—*Balto. American.*

State of Trade.

NEW YOTK, August 22.—*Bradstreet's Journal* in its commercial summary says: "The encouraging features of the general trade situation heretofore reported have been reported in special telegrams received by *Bradstreet's* this week. Those specific advices from Boston state that while the feeling in trade circles is more encouraging, the gain in the volume of trade which has taken place is not large. Still it is of significance that at Philadelphia, Cincinnati, Memphis and Burlington, the leading jobbers record better sales and an improved feeling in trade circles. At Chicago there has been some depression, owing to the decline in the price of wheat, but otherwise there is no change. At St. Louis the threatened strike of the Gould road operatives belonging to the Knights of Labor depressed trade by causing the withholding of orders from the interior. At Cleveland it is wired that trade is fair for the season only. At New York only a moderate average of the reports recorded above is true. Leading dealers in staple lines at New York regard the general improvement noticed here, mainly in cotton goods and wool, as pointing to the usual excess demand customary at the opening of autumn. The necessitated outlay in the fall is heavier than in the spring. General inquiry fails to find an exceptation of a continuing revival in trade in the existing improvement.

The improvement in iron at Pittsburgh, Philadelphia, Cincinnati, St. Louis and Chicago is mainly in pipes and plates, for which orders have increased. There has, however, been considerable enthusiasm respecting the gain. The improvement in prices of steel rails, reported at $1 50@1 00 per ton, has amounted to less than $1 in reality. The intention of the Long Branch conference of steel rail workers is to put prices up to $30 per ton against nominally $27 50. The Rensselaer Iron and Steel Works, New York State, having reorganized with new capital, will build furnaces and continue work.

BOSTON, August 22.—The *Advertiser* in its weekly review of the wool market says: The market continues active, with large sales reported, while the figures would have been even greater had dealers been able to open their goods fast enough to meet the demand. There is no boom in the market, but for the past six weeks sales have been large, as an average of over 4,000,000 pounds per week, and the effect of this lively business most of course grades, noted a week ago, dealers have found no trouble to place their goods, and they are now in many instances trying to obtain a little more advance. The price of wool here is considered low as compared with the cost in the country, and it is claimed that at present figures, the goods sold cannot be replaced with any profit to the dealer.

CONNELLSVILLE, August 22.—The *Keystone Courier* says: While there is no tangible improvement to note in the coke trade, the future prospects are not quite so dark and unpromising this week as they have been during the past three months. The coke operators who have been patiently singing: "Wait till the clouds roll by," while the same clouds didn't stir an inch, now wear a look of hopefulness. Said one of the more sanguine, yesterday: "I'll bet a new hat the coke trade is better inside of two weeks." There is some foundation for the prediction. The iron trade is better, and upon this the coke trade chiefly depends, of course.

Destructive Storms.

CHARLESTON, S. C., August 25.—Charleston was struck by a cyclone this morning and one-fourth of the houses in the city are unroofed. Parts of the spires of St. Michael's and St. Matthew churches were blown down and the spire of the Atadel Square Baptist Church is demolished. The wharves and warehouses are badly demoralized. At Sullivan's Island steamers are aground, and the new Ashley river bridge now constructing is swept away. Four vessels which arrived yesterday are wrecked. The telegraph wires are down and no cars are running. The loss is estimated at $1,000,000. The work of restoration has already begun.

SAVANAH, GA., August 25.—The storm this morning did but little damage in this city or neighboring plantations. At Tybee a dwelling house was blown down but no one was injured. The bark Caroline Chalmers went ashore on the knoll inside of Tybee. A dispatch from Darien reports no damage either to the shipping or the rice crops.

DAVENPORT, IOWA, August 25.—The heaviest rain storm for years prevailed here almost continuously for forty hours, ending at noon yesterday. Over seven inches of rain has fallen, causing great damage to streets and crops. Several washouts are reported on the railroads, and trains from the west and southwest have been delayed. The loss in bridges washed away in this county will amount to several thousand dollars.

On the Mercer County railroad a train of cars went through a bridge, involving a loss of $20,000. A brakeman named Frank Fense was buried in the wreck.

In the 24 hours ending at 2 o'clock yesterday afternoon, the Mississippi river rose 15 inches.

FREDERICK, MD., August 25.—For the third time this summer a heavy storm swept over Frederick county to-day. The Catocatin river running through the Middletown valley, overflowed its banks and carried away everything that afforded obstruction. Barns, bridges and dwellings were demolished and fully $15,000 damages was sustained. Several of the bridges have been swept away within the past three months and much of the loss falls on the poor farmers, who can ill afford it. Considerable damage was done to growing corn throughout this section of the State.

PITTSBURG, August 25.—A freshet in Girty's run last night, caused by a cloud burst, near Evergreen, Pa, flooded 22 houses, washed away 13 railroad and township bridges and drowned a large lot of live stock. The damage will reach many thousands of dollars. No lives lost.

A Killing Frost in the Nothwest.

ST. PAUL, MINN., August 24.—The signal service here has advices reporting a killing frost over the greater portion of the Northwest Territory, extending southward to the northern portion of Minnesota. The temperature fell to 27 degrees at St. Vincent just before sunrise this morning. This is low enough to form good, stiff ice and kill vegetation. The lowest temperature reported this morning was 25, observed at Minedoca, Northwest Territory. The air here in St. Paul is crisp and chilly, but there is no frost. The guests are leaving the lakes in large parties today for the South.

A curious discovery was made recently when a lightning rod, which had been in place fifteen years imbedded in soft clay was removed. There was found attached to it a solid lump of iron ore weighing ninety-six pounds, supposed to have been produced by the conversion of the clay by the action of electricity.

A National Grant Monument.

From a letter in the Boston Herald.

Of course the Washington people are thinking somewhat about the Grant monument to be erected here; but they do not expect to raise the money for it, nor do they expect to determine its character. If it is to be a truly national memorial and worthy of the greatness of the name it shall commemorate it ought, it seems to me, to be a grand triumphal arch, and it ought not to cost less than $1,000,000. A grand arch would be in the completest possible contrast to the Washington obelisk, and it could be so placed as to show to wonderful advantage. One admirable site for such a work of art would be on the high ground at the head of Sixteenth St. This is nearly as fine an elevation as that on which the Are de Triomphe stands in Paris, and the surrounding avenues could be made very splendid. But the grandest site that could be named would be the hill at Arlington. Then we should have the Washington monument on one side of the river and the Grant monument on the other. Very soon the growth of the city will require the occupation of the land between Arlington Cemetery and the river bluff opposite Georgetown for dwelling sites. Ultimately the District of Columbia must be restored to its original size of 10 miles square. There is great need of a new and adequate bridge on the high level of the city to span the river between the National Observatory and Arlington House. To build this vast highway and to put the Grant triumphal arch at the Arlington end of it would be the most admirable improvement that could be suggested. It is too great and costly an enterprise for the citizens of the District to think of carrying through without the help of Congress.

Awful Responsibility.

WASHINGTON, August 25.—"The government at Washington still lives," but there is only one member of the Cabinet in the city. Most of the departments are run by the rascally Republican chiefs and employes, whom Democratic editors have been finding so much fault with of late, and the government is being carried along in the same manner as it was under a Republican administration. It will be remembered a great deal was once said about the present administration being a business affair, and during the last campaign Mr. Cleveland was credited with saying that a President of the United States had no right to absent himself from Washington, where the business of his office called him, for a longer period than two weeks at the most, but here he has been absent now going on three weeks, and there is nothing known as to when he will return. Mr. Cleveland has probably changed his mind since he entered the White House as to what a President of the United States should do. At any rate, "the government at Washington still lives," in spite of the absence of those who have sworn to administer it.

It is pretty generally conceded now that although there will be some decrease in the wheat crop—how great may be the injury is very differently estimated—the falling off will be more than made up by the increase in the crop of corn. It is a magnificent one, and will in all probability exceed last year's enormous yield by 100,000,000 bushels. There has been an increase in acreage of 6 per cent, as compared with last year, and of over 8 per cent, as compared with 1883, and the condition of the crop is excellent, the average, by a recent report, being 94 per cent. for the whole United States, as against 96 per cent. in 1884 and 88 in 1883. How great is the interest now taken in corn is shown by the figures of the acreage, the total in 1883 having been 68,302,000 acres, while this year no less than 73,864,000 acres were devoted to this crop. The South, as was noted recently, reaps this year a great deal of benefit from this crop, its share of the increase being estimated at fifty millions of bushels over the yield last year, while its increased yield of cotton is put down at from one to one and a half million bales, and its crops of tobacco, fruits and vegetables were never surpassed. The rice crop, too, is a splendid one, and the sugar more productive than last year, as prices are better and the cost of production has been less.

Advertise

If you want a farm put a small advertisement in THE REPUBLICAN; you will get more information in that way, in spending $3 or $5, than you would by spending $50 in traveling. If you want to sell your land, advertise in THE REPUBLICAN; it goes to all parts of our county, as well as to adjoining counties in Maryland, West Virginia and Pennsylvania, and is seen by those who are looking for new homes. If you have anything to sell or buy, any wants, advertise in the paper having much the largest circulation of any paper in the county. It gives value received, and can not fail to reach the most desirable parties, and bring excellent results.

A gentleman said to a minister: "When do you expect to see Deacon S. again?" "Never," said the reverend gentleman solemnly. "The Deacon is in heaven."

NEW ADVERTISEMENTS.

BUY YOUR GROCERIES —AT— HARNE & LAWTON'S GROCERY, OAKLAND, MARYLAND.

ORDER NISI.

In the matter of the Deed of Trust from Thos. Coddington to Frederick A. Thayer, Trustee.

Aug. 8, 3t. PETER GORTNER, FRED. GORTNER.

Mortgagee's Sale

—OF VALUABLE—

REAL ESTATE

In Garrett County, Maryland.

—:o:—

By virtue of a power of sale contained in a mortgage from Alpha Hinebaugh and Fannie B. Hinebaugh, his wife, and John Hinebaugh and Mary A. Hinebaugh, his wife, to Matthew Cullen, dated June 8th, 1882, and recorded among the Land Records of Garrett county, in Liber W. H. T. No. 6, folios 468, &c., and assigned to Henry A. Rasche by said Matthew Cullen, the undersigned, assignee of said mortgagee, will offer at public sale, in front of the Court House, in the town of Oakland, Garrett county, Maryland,

On Monday,

SEPTEMBER 14TH, 1885,

at 3 o'clock P. M., all the following Real Estate, viz:

First. All that tract of land situate, lying and being in said Garrett county, known as

"SWALLOW FALLS,"

containing about eight hundred acres.

Second. All those pieces or parcels of land situate, lying and being in Garrett county aforesaid, known and designated as

Military Lots Numbers 1256, 1258, 1260, 1261, 1262, 1263, 1264, 1265, 1266 and 1269,

containing fifty acres of land each, and included in a tract of land called

"The Falls of Muddy Creek."

All of which said lands are more particularly described in the said mortgage, reference to which is here y made.

Said lands are situated on and near the Youghiogheny river, about seven miles north of the town of Oakland, are well timbered, and improved by several DWELLING HOUSES and out-buildings, and the same property on which the said Alpha Hinebaugh recently opperated a saw mill.

FOR SHERIFF.

At the solicitation of many friends I hereby announce myself as a candidate for Sheriff of Garrett county, subject to the action of the Republican County Convention.

JOHN H. RILEY.

July 7, 1885.

FOR COMMISSIONER.

At the earnest solicitation of many friends I have consented to announce myself as a candidate for County Commissioner, subject to the action of the Republican County Convention.

WM. W. FRAZEE.

—Senator Getty was in town Tuesday.

—Judge Ritchie is at the Glades Hotel.

—Jacob Brown, Esq., was in Oakland this week.

—Mr. E. O. Hinkley, of Baltimore, is at Miss Edward's cottage.

—About $300 was realized at the Presbyterian fair and festival last week.

—Parties desiring to buy cider mills, will find it to their interest to call on J. M. Davis & Son.

—Peter Nathan, Esq., Grantsville's new Justice of the Peace, was in Oakland this week.

—Mr. Samuel C. Hoye has been appointed postmaster at Deer Park, *vice* Col. E. C. Tillson removed.

—Major W. O. Ison, of the Treasury Department, Washington, D. C., is in Oakland for a short vacation.

—Mr. P. A. Chisholm, who was accidently shot last week, is doing well. The probabilities are that he will not lose his eye.

—The Orchilla Guano has given the best satisfaction of any fertilizer in use. J. M. Davis & Son have just received a car load for fall crops.

—W. W. Cole's circus was greeted with a large crowd last Friday. The performances were said to be good. The street parade was among the best ever seen in Oakland.

—Mr. John E. Thrasher, a young married man, residing near Deer Park, was seriously burned Tuesday night, by the explosion of a coal oil lamp.

—Mrs. Stahl, widow of the late John Stahl, desires to dispose of her house and lot in Oakland. Persons desiring a cheap property should make a note of this. 7 18 tf

—We had a frost throughout this county Thursday morning, but the extent of the damage to the crops is not known. It is feared that the buckwheat and corn has been seriously damaged.

—Mr. P. T. Garthright, at his store at Mountain Lake Park, has now on hand a very large stock of Clothing for men, boys and children, which he will sell within the next ninety days at a small advance on cost. Also boots and shoes, stocking yarns and many other lines of goods. Call and examine goods and prices.

Aug. 22, 13t.

—The following named players of the Athletic Association of this place have been selected as the permanent team to play all match games of base ball, the selection of substitutes being left to the captain: Captain and catcher, J. Ed. Kildow; pitcher, Perry White; first base, F. P. Arnold; second base, D. E. Bolden; third base, W. P. Townshend; short stop, W. Dawson; left field, S. Spedden; centre field, R. Townshend; right field, C. Peddicord.

—The Circuit Court was in session on Saturday last, Judge Hoffman on the bench. The special session was held for the purpose of hearing a replevin case between O. W. Heiskell and John Shartzer. On Wednesday morning Mr. Shartzer distrained one of his tenants, taking as the distress, property found on the premises of the tenant. Mr. Heiskell had a mortgage upon the property of the tenant which was distrained, and under his mortgage he replevied the property and took it into his possession. Mr. Shartzer then, through his counsel, docketed a motion for a return of property, which was heard on Saturday as above stated. The question before the Court was whether the distress or the replevin would hold. The Judge rendered his decision Wednesday in favor of Shartzer, sustaining the legality of the distress and ordering a return of the property in controversy.

—A warrant was issued Saturday last by Esquire Gonder for the arrest of Joseph Helbig and John Bell, both of Oakland, charged on oath of A. Laughlin, telegraph operator at Mountain Lake Park, with assault and battery with intent to kill. The assault was made on the previous evening. They have so far eluded arrest.

—The following is not ours, but our sentiments exactly: "If you have an item of news, an item with no taint of abuse, an item that's kind well stored in your mind, let it go to the press, it's always of use. Hoard your dollars and cents; prize your home for its sacred contents, hoard your malice and hoard your spite, never talk crooked when your can talk right. But above all, when the news man is around, tell him where an item is found. Or better still jot it down and promptly send it around, the printer will be pleased to type it."

—Mr. Nathaniel Bell Harvey, of Ryan's Glade, Garrett county, has been the father of fifteen children, eleven of whom are living. Mrs. Harvey, his wife, is one of the finest Christian characters we have ever met. Her robust, cheerful piety is so attractive that it is quite a treat to sit down and converse with her. A few years ago, while she was spending a night some distance from her home her house was burned to ashes, together with all her furniture. A messenger was despatched to break the sad news to her. It was especially sad for the reason that it was a new house which herself and husband had labored hard to rear as a shelter for their old age. When the news was told her, she asked if her husband and children were safe, learning which fact she appeared cheerful and contented. On reaching the spot she found her husband almost in a state of despair. Said she, "Cheer up, Nathan, and trust the Lord. He will help us to get another home." We had the pleasure of spending a night in a comfortable house built on the site of the one destroyed. They believed the Lord helped them, and we believe so too.—*Balto. Field Record.*

—Died, at the residence of H. E. Friend, in Garrett county, Md., Aug. 3d, 1885, Mr. Edwin J. Blackburn, in the 42d year of his age. He was born in Harrison county, W. Va., Dec. 12th, 1843. At the breaking out of the Rebellion he enlisted in Co. C, 34 Regt. Md. Vols., served for three years, re-enlisted and served to the close of the war and was honorably discharged. About eight years ago, while running as engineer on the B. & O. R. R., he was knocked from his engine by a coal house, and received a spinal injury, which resulted in his death. During his affliction he was a great sufferer, and for more than four years unable to walk, but he bore his affliction with christian resignation. He was a consistent member of the M. E. Church and lived in a glorious anticipation of a blissful immortality beyond the grave, and hence death came to him as a welcome messenger, releasing him from a life of suffering and introducing him into the realms of immortal bliss. His funeral was preached in the M. E Church at Johnstown, by Rev. F. G. W. Ford, to a large congregation of friends and weeping relatives. He was a kind and loving parent and an affectionate husband. He leaves a wife and five children and a large circle of friends to mourn their loss. May they all meet in Heaven. H. E. FRIEND.

Piedmont papers please copy.

Church Services--Sunday.

Garrett Memorial (Pres.) Church—Preaching at 11 A. M. and 8 P. M. by Rev. John S. Foulk.

M. E. Church—Preaching at 7½ P. M.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Attention Wheat Growers.

Lime insures a paying crop. Geo. E. Bishoff, near Johnstown, can supply you with the celebrated Bear Creek Lime.

Harvest-Home.

The Lutheran people of the Accident pastorate will have a grand harvest-home rally in the grove adjoining Forks church, on Saturday, Sept. 5, 1885.

An enjoyable day is promised, and all who can, are cordially invited to attend.

J. B. SHOUP, Pastor.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

For Sale!

An exceptionally good saddle mare. Is quiet, young, (6 years old.) Has smooth action and is beautifully gaited. Has been driven a few times single and once double. Is not thoroughly broken to harness, and will not guarantee her to drive kindly. Will sell her (for want of use) to the highest bidder, Tuesday, September 8th, at 11 o'clock. A. M., in front of the *Democrat* office. In the meantime mare can be seen at my stable.

DR. E. K. GOLDSBOROUGH.

Oakland, August 19th.—3t.

Sad Death of a Minister.

Rev. S. S. C. Idleman, a young minister of the Methodist Episcopal church, stationed at Oldtown, met his death under distressing circumstances there Saturday evening. He lived with a Mr. Wilson and had been very ill for some time past with typhoid pneumonia, which caused delirium. Saturday evening Rev. Idleman was left alone a few moments, when he arose from his bed and jumped from the window of the second story in which he was. He fell on his head and was instantly killed. He was about 26 years old, unmarried and had supplied the Oldtown church for two years past. His remains were yesterday sent to the residence of his father, near Elk Garden, West Virginia.—*Cumb. News, Tuesday.*

Base Ball.

Last Monday the Mountain Lake base ball club went to Keyser to play the return game with the club of that place. As the train pulled into the depot the boys were greeted by cheers from the crowd to welcome them. A committee from the Keyser club escorted them to a boarding house where they donned their uniforms and were then taken to the base ball grounds, where a crowd of about one thousand had gathered to witness the contest. The game opened with Mountain Lake at the bats. The first ball thrown struck Dawson, the batter, on the head who was given his first, but prevented him from playing his usual strong game. There was some good playing done by both nines, but at times they were very careless, thus allowing the score to stand at the close of the game 15 to 11 in favor of Keyser. The spectators showed very little partiality, applauding good plays on both sides. After the game the visiting boys "took in" the town, but did not forget to be back in time for a good, substantial supper to which they did justice, Mr. Crowe, of Lonaconing, umpired the game to the satisfaction of all.

Mountain Lake Park.

There being no lectures on Tuesday morning of last week the whole of the morning was devoted to the Normal work, the evening was spent listening to readings from Shakespere and from the Bible by Mrs. Hart, of Washington, D. C.

The Schools of Art and Elocution are prospering finely. The entire day on Wednesday was devoted to review and examination of the Greek and Normal Classes, and at night reports were made of the different branches of work done during the entire Assembly. The results were very gratifying, the finances especially, bringing them out a few dollars ahead.

There were several graduates "in the school of one," Frysinger, who received their diplomas with honor, This was a very pleasant and gratifying part of the evening's exercises.

Assembly officers were elected for next year, which resulted in the re-election of all the officers just retiring: Dr. Frysinger, President; Rev. J. B. Young, Secretary; and Mr. R. W. Armstrong, Treasurer.

The time for the next Assembly was fixed for the first Tuesday in August, 1886.

The hour for closing having arrived, Dr. Frysinger requested that several would make short speeches, stating to what extent they had been benefited by the Assembly. Several, with Rev. J. T. Judd, partook heartily in these exercises. He said that although Dr. Frysinger had served so faithfully and successfully in conducting the Assembly without any financial reward, the Greek and Normal Classes were anxious to show their high appreciation of his earnest labors, by each class presenting to him a handsome little volume. The meeting closed by singing from the Epworth Hymnal, "God be with you till we meet again.

Thursday morning we were all startled with the report that Mr. Atkinson's dog had bitten and nearly killed the nine months old child of Prof. White. Two doctors were quickly summoned. On examination they found that although the largest wound was about three inches long across the front part of the head, and that it was cut through the scalp, but as it had just missed the fatal spot, it was not necessarily dangerous. To prevent a similar occurence, the dog was killed on Friday. The children had been playing with the dog in Prof. White's yard. He started to crawl through the wire fence, when one of the little girls thoughtlessly ran up to him pressing the child against him, when he immediately thurned his head and bit the child.

Bro. Thompson was to leave Friday morning for home, so on Thursday evening a few of his friend were invited to tea. Among them were Miss Jennie Smith and her mother. No sooner had they left home than some special friends of Miss Jennie's began decorating the cottage and preparing for illumination. It was all done so quietly and secretly that Miss Jennie and her mother knew nothing of it until they were summoned back and found the whole front beautifully lighted up with gas jets and Japanese lanterns, and a number of Roman candles were being fired off, and quite a company had gathered to celebrate her birthday anniversary, with their cheerful faces and loving words, and in their little deeds consisting of a little over seventy dollars as a birthday present. Bro. Thompson was asked to make the opening speech which he did very nicely. Miss Jennie making a very earnest and touching reply. Revs. Lakin, Rider, Dr. Frysinger and J. T. Judd followed with a few appropriate remarks. Then Rev. Lakin and Miss Jennie lead in prayer. The remainder of the evening was spent in a very pleasant social manner.

Mrs. Hubbard invited the public to examine the work of her Art Class. The progress was gratifying and nearly surprising. She begins another term this week. Any who may wish to take advantage of this very efficient teacher, would do well to begin at once. On Sabbath we had morning meeting at nine o'clock and preaching at half past ten, by Rev. Mr. McGrew, he and his wife having just returned from India as missionaries. Mr. E. E. Shelden conducted a young peoples' meeting at seven in the evening, and at eight Mrs. McGrew held a meeting in the interest of the W. F. Missionary Society. An auxiliary society was formed here. All the officers were elected and were instructed to arrange for an anniversary next year.

J. A. E.

ACCIDENT, MD., Aug. 21 1885.

EDITOR REPUBLICAN:—It is certainly a matter of continual wonder to me where and how false reports originate. That they can be circulated innocently is easily understood, but to manufacture a lie out of the whole cloth and then start it on its mischievous mission certainly requires a mind lost to all feelings of moral restraints whatever. Give a good lie a few hours start and the truth will never catch up much less get ahead. I am moved to these moral reflections by a little personal experience of rather an aggravated character, connected with the recent fight here for the postoffice. Since Mr. Zinkan has been appointed postmaster the report has been circulated that my petition, which was a large one and signed by many influential citizens of both parties, was separated from its head and then attached to Mr. Zinkan's petition and thus forwarded to the Department, and thus helped to secure the appointment for Mr. Zinkan. The real facts in the case are that my petition was gotten up in good faith, for my own vindication, and to keep Republicans out of a Democratic family quarrel. My petition was forwarded to Hon. L. E. McComas, and I will take pleasure in showing Mr. McComas' letter acknowledging its receipt to any one who still have doubts in the matter.

Very respectfully,

JOHN E. GNAGEY.

Accident.

Henry Zinkan postmaster.

The country now is safe.

Quite a number of young men find business of great importance calls them to Accident.

The Quarterly meeting at Friendsville was well attended.

The apple and pear crop promises to be phenomenal. The present weather is quite favorable for apple dumplings.

Very extensive improvements are promised by the new postmaster.

The plaining mill is doing an extensive business and is found a very great convenience in many respects. Mr. Camp's saw mill is also running very regularly in connection with the planer.

The Normal has reached over fifty scholars actually enrolled.

The town more than lively of evenings.

We regret to learn that Mr. Samuel Friend, the boss photographer, leaves Friendsville soon. He will locate in West Virginia. Mr. Friend aside from photography has done some excellent work in lettering.

Rev. Shoup has been requested to deliver a lecture to the Normal class.

Mr. J. Z. Browning's steam thresher is heard in the neighborhood. At the present time there are three separators at work near here.

The abundant showers have forwarded fall plowing.

Mr. Joel Beachy and wife of Grantsville lately paid us a pleasant visit. The height of our ambition is to go down the vale of declining years beloved as is Mr. Beachy. The highest of earthly praise can fully be bestowed upon Mr. Beachy, a christian, a useful citizen and a good neighbor.

There are several summer visitors lingering at Mr. Miller's.

E. H. G.

For Sale.

Will be sold on favorable terms—30-horse power steam saw mill complete, with cut-off saw.

D. E. OFFUTT, Admst., Oakland, Md.

Ayer's Sarsaparilla contains Iodide of Potassium and Iron, with the best vegetable blood purifiers.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, August 24, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¼@5¾ c. that generally rated first quality 4¾@5¼ cts; medium or good fair quality 3½@4 cts; ordinary thin steers, oxen and cows 2¼@3½ cts; extreme range of prices 2¼@5¾ cts; most of the sales were from 3@5¼.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,866 head, against 2,146 last week and 2,900 head the corresponding week of last year, and the sales were 1,957 head, against 1,297 last week, and 1,453 head the corresponding week of last year.

A very large proportion of the offerings to-day—much larger than usual—consisted of thin, light cattle, few good butchers' cattle being among them. The tops were quite as good as those of last Monday, and possibly as numerous as they were then, but there was a very long line of medium and thin cattle. Prices ranged from $2 25 to $5 65 per 100 pounds, with most sales from 3 to 5¼. Dealers generally consider the decline in tops as about 20c., and medium and common cattle 37½c. per 100 pounds.

THE SWINE MARKET.

The run of hogs is quite light this week, and their average quality is not as good as last week's offerings, there being more grassers and rough hogs in proportion among them. Trade is fairly active in all the yards with the light supply. Prices for rough hogs—sows, stags and grassers—6@6½c., and the better grades 6¾@7. Same time last year hogs sold at 6½@7¾c. for rough hogs, and 8@8¾ for the better grades, with extra 8c. net.

THE SHEEP MARKET.

There is a very heavy run this week, and numbers will be left over unsold, or be reshipped East at owners' risk. Trade is very slow, there being no outside demand whatever. The quality of the offerings does not average as good as last week's. We quote butcher Sheep at 2@3¾c., gross. Lambs sell at 2¾@5c., few selling at either extreme, most sales being from 3 to 3¾. Same time last year Sheep sold at 2½@4¼c., and Lambs at 2@5½, gross.

NEW ADVERTISEMETNS.

COMMISSIONERS' MEETING.

OFFICE OF THE GARRETT COUNTY COMMISSIONERS, OAKLAND, MD., Aug. 26th, 1885.

The County Commissioners of Garrett county will meet in their office at Oakland, on

Monday, Sept. 14th, 1885,

for the purpose of the transacting of general business.

By order

G. W. MERRILL, Clerk.

PUBLIC SALE

—OF—

MILITARY LOTS

IN GARRETT COUNTY.

On MONDAY, Sept., 14th, 1885,

at 3 o'clock, P. M., in front of the Glades Hotel, in Oakland, we will, on behalf of P. M. Lusson and wife, the owners, offer at Public Sale to the highest bidder the following

MILITARY LOTS to-wit:

Nos. 2724, 2721, 2726, 2727, 2660, 2664, 2668, 2691, 2692, 2693, 2694, 2697, 2494, 2463, 2460, 2429, 2431, 2472, 2473, 2582, 2490, 2493, 2441, 2442, 2490, 2493, 2593, 2584, 2585.

These Lots are a part of the tract of land called

"INTERNAL IMPROVEMENTS,"

and lie in the neighborhood of Accident. The tract, "INTERNAL IMPROVEMENTS" was patented to General Walker K. and John B. Armistead, April 24th, 1834. On June 30th, 1847, the widow and heirs at law of General Walker Armistead filed their bill in Equity for a sale of said land, No. 861 Equity, Allegany county. A decree was passed by which W. M. Price was appointed trustee to make said sale. Said Price, trustee, sold and conveyed said lots to P. M. Lusson, and said sale was ratified and confirmed by the Court.

Any person desiring to examine the title of Lusson and wife to said lots can do so by calling on the undersigned who will furnish any information in their possession with reference to the title.

TERMS, EASY.

PEDDICORD & THAYER, Attorneys.

JOHN R. KERFOOT, Agent for owners.

J. B. BRANT, Auctioneer.

August 26, 1885.—tf.

EXAMINATION OF TEACHERS.

OFFICE OF THE BOARD OF COUNTY SCHOOL COMMISSIONERS, OAKLAND, MD., Aug. 18th, 1885.

Public Examinations of public school teachers for Garrett county, will be held as follows:

At Accident, Sept. 1st and 2nd,

At Oakland, Sept. 8th and 9th,

at 9 A. M. Candidates will provide themselves with pens and paper.

By order

C. B. LUDWIG, Examiner.

NOTICE!

To the Qualified Voters of the Respective Election Districts of Garrett County.

Notice is hereby given that the undersigned Officers of Registration of Voters in and for the respective election districts of Garrett county, will sit in their respective election districts in said county, on the Tuesday, Wednesday, Thursday, Friday and Saturday, after the first Monday in September, that is to say on the 8th, 9th, 10th, 11th and 12th days of September, in the year 1885, and also for two successive days commencing with and including the first Monday in October, that is to say on the 5th and 6th days of Ocober, in the year 1885, at the respective places and on the respective days hereinafter named, for the purpose of ascertaining and registering in the proper registries of voters and poll-books persons qualified to vote in their respective election districts, and of revising and completing their respective registries of voters and poll-books of their respective election districts.

The undersigned Officers of Registration will commence their said respective sessions on the respective days, and at the respective places herein named at the hour of 8 o'clock A. M., and continuing the same until the hour of 7 o'clock P. M. of each of said days, as follows, to wit:

Election District No. 1—Swanton.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Swanton.

Election District No. 2.—Selbysport.

Tuesday, Wednesday, Thursday and Saturday, the 8th, 9th, 10th and 12th days of September, at William Ryland's store, and Friday, the 11th day of September, at Rush's school house, and Monday and Tuesday, the 5th and 6th days of October, at William Ryland's store.

Election District No. 3—Grantsville.

Tuesday and Wednesday, September 8th and 9th, at the residence of the Officer of Registration, and Thursday, Friday and Saturday, September 10th, 11th and 12th at Grantsville, and Monday and Tuesday, October 5th and 6th at Grantsville.

Election District No. 4—Bloomington

Tuesday and Wednesday, the 8th and 9th days of September, at Geo. T. Michael's house and Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Bloomington.

Election District No. 5—Accident.

Tuesday and Wednesday, the 8th and 9th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Accident, and on Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, at Sylvester H. Ryland's house.

Election District No. 6—Sang Run.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at the house of Nathan Browning, in said district.

Election District No. 7—Oakland.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Oakland.

Election District No. 8—Ryans Glade

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, at Fort Pendleton, and Monday and Tuesday, the 5th and 6th days of October, at Mrs. Thomas Grimes, in said district.

Election District No. 9—Frostburg.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October at Johnson's.

Election District No. 10.—Deer Park.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at Altamont, and Monday and Tuesday, the 5th and 6th days of October at Deer Park.

Election District No. 11.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at the house of Jehu H. Gregg, and Monday and Tuesday, the 5th and 6th days of October at the house of Jacob Strickland.

All naturalized citizens applying for Registration will be required to produce their certificates of naturalization to the officers of Registration.

H. O. HAMILL, Officer of Registration 1st District.
R. E. FRIEND, Officer of Registration 2nd District.
ISAIAH FULLER, Officer of Registration 3rd District.
GEO. T. MICHAEL, Officer of Registration 4th District.
SYLVESTER H. RYLAND Officer of Registration 5th District.
N. C. BROWNING, Officer of Registration 6th District.
ANDREW J. HARNE, Officer of Registration 7th District.
WM. F. DEAKINS, Officer of Registration 8th District.
GEORGE L. LAYMAN, Officer of Registration 9th District.
PERRY M. STEMPLE, Officer of Registration 10th District.
JOHN C. CHANEY, Officer of Registration 11th District.

LAND! Claims a specialty. Warrants, and ADDITIONAL HOMESTEAD CERTIFICATES and all kinds of LAND SCRIP bought and sold. SUSPENDED ENTRIES, LAND, PATENT and PENSION cases attended to. Correspondence solicited. A. A. Thomas, Attorney at Law, Room 25 St. Cloud Bld'g, Washington, D. C.

OAKLAND, GARRETT CO., MD

WHY HE SOLD THE FARM.

"Then why do I sell?" you ask me again,
Big cabin, an' clearin,' an' all?
Well, stranger, I'll tell you; though maybe you'll think
It ain't any reason at all.
There's plenty of hardships in pi'neer life;
It's a hard workin' stint, at the best;
But I'd stick to it yet if twa'n't for this:
A heart like a log in my breast.
D'ye see over there by the cotton-wood tree,
A climbin' rose close by a mound
Inside of a fence made of rough cedar boughs,
With woodbine all runnin' around?
Well—Netty, my darling old woman, lies there;
Not very old either, you see;
She wa'n't mor'n twenty the year I come West,
She'd be, comin' grass, thirty-three.
How she worked with a will at our first little hut,
In the fields and among garden stuff,
Till her forehead was burned, and her poor little hands,
Through hardships, grew rugged and rough.
She never complained: but many a time
I have come in and found her just there,
With eyelids all red and her face to the East—
You see all her own folks were there.
I'd cheer her and tell her we'd go by an' by
When the clearin' an' plowin' was through;
But then came the baby. He wa'n't very strong,
And poor Netty had plenty to do.
So after awhile she got gloomy again;
She would hide in the corn-field to cry;
We hadn't no meetin' to speak of, you know,
Not a woman to talk to was nigh.
An' she wanted to show little Joe to her folk;
She was hungry, I s'pose, for the sight
Of faces and scenes she had loved all her life,
Which 'twas natteral, stranger, and right.
But just when we'd planned to go over the plains,
The devilish Sioux came about,
So we waited, it may be, a harvest or two,
And then came the summer of drought.
That left us poor people. The next coming spring
Such a wearisome fever came round;
An' stranger—hold on till I tell you—there now—
It laid little Joe in the ground.
Netty pined to a shadder, and moped by his grave
And her eyes grew so large and so clear,
That I knowed we had got to go soon to the East
If I cared about keepin' her here.
If you'd seen her poor face when at last I could say
I would take her home visitin.' Well—
I'll never forget how she put up her hands
Into mine, and for joy cried a spell.
She didn't feel strong though, that week or the next,
An' the cough an' the fever increased.
But softly she'd whisper—she couldn't speak loud—
"We'll go—by an' by—to the East."
She never got east any further than that,
Right over there under the mound;
But I'm going to take her and Joe in the spring
To her father's old burying ground.
That, stranger's the reason I'm willin' to sell;
You can buy at a bargain, you see;
It's mighty good land for a settler to have,
But it seems like a grave-yard to me."

—*Texas Siftings.*

THE HAUNTED ENGINE.

An Engineer's Terrible Revenge Upon a False Friend.

By such parties as were in the habit of frequenting the Transverse & Devious Railway Company's offices, Julius Wright must be well remembered. This observation is supposed to apply more particularly to the toilers and delvers, who were not likely to meet the man under other conditions. Socially considered he was very much more of a swell than apperred at all justifiable by his position or his personal qualifications—always excepting that indefinable, mysterious quality known as "magnetism," which is, as novelists and telepathists inform us, quite independent of either beauty or merit. He was an insignificant little fellow, not over five feet four in his biggest-feeling moments. His face was alert and keen, but, to my eye, always fraught with the peculiar expression of a man liable at some time to go wrong. One does not follow any business for the years that I have done without learning to recognize the signs of potential guilt—that is to say, in faces of the active type. I never try to analyze a pretty face; I can not do it. I think no man living can.

Wright was a man of accomplishments. He could dance and sing, and play prettily upon several instruments, and turn off neat little verses—*vers de société*—isn't that the term? And he was a manly little chap; could swim and shoot, ride, drive spar and run with the best. So, as men liked him for his good-fellowship, and women for his love-making and liberality, Wright was a popular man.

But I knew a thing or two about him. I was not surprised—not much—when, after a few days of uncertainty and suppressed rumors, it came out that Julius Wright had absconded with a sum of the railway company's funds reaching well up toward the hundreds of thousands—more than it appeared should have been accessible to him. The general inference and the natural, was that he had betaken himself out of the country to the refuge of a government not on terms of extradition with the United States. Great, then, was the astonishment of the community when it transpired later that the escaped defaulter had been living for many weeks in easy reach of his pursuers, and actually in the employ of the company he had robbed. It was no wonder, said his late companions, with retroactive admiration, somewhat misplaced, that the officers of the law had failed to find, in the stoker of a freight train over the southwestern division, the spruce and fastidious individual who had been almost a social autocrat in the headquarters city of his company.

The newspapers got the story, of course, and gave it the usual send-off, with extra-heavy head-lines, and all the alliteration the dictionary would supply. I remember one of their phrases about "Engine No. 23 pulling into Walling with importance in every clank of the metal," and "the pluck and power displayed by the engineer, who had to report a notable occurrence on his run." Briefly stated, it appeared that No. 23 had come into Walling minus her fireman. The engineer's story was that some twenty miles back, as they crawled up a hard grade, the fireman had jumped from the train, discovering his identity to the engineer, together with a satirical message to the directors of the road.

"'Tell 'em,' says he to me—'from Julius Wright—that's me—their office was better than a school of polytechnics. Say, Stacy, *can't* I fire?' And with that he jumped, just as we started to run down the grade. I brought her in alone. I knew I could do it, and we was too short of hands to call one of the boys from the twists—the brakes; so I just come on and fired for myself. Tired? I should smile! and so shaky and starty I couldn't sleep—couldn't even set down and eat. You bet! The boys'll tell how ali broke up I was. But I daresn't stop short off. No, sir! I just rustled round and cleaned the engine, and put her to bed myself. Well, I've heard men say they could run an engine *sixty* mile and fire for themselves, but I'm blamed if I could! Twenty's enough for me," he said, with what struck me as rather defiant emphasis and a keen, underbrowed look—for I got the story from his own lips, when I was sent out to Walling to work on the case.

I am not, as a rule, an imaginative man. "A patient, persistent plodder"—that is the characterization I once heard as made of me by our chief, who is given to alliteration in his rhetorical flourishes. Thus lacking imagination, it seemed to me little was to be gained by following Wright to Walling, whence he had gone with no form of taking leave. But to Walling the chief chose to dispatch me, after two of our best men had come back from a fruitless stay there.

"Certain uncommon avenues of receptiveness are abnormally alive to impression in you," he said; "I'd like you to go to Walling."

And to Walling I went, after some preliminary training under the fireman of a local train on one of the company's branch lines.

But the night before I started I got a note that surprised me. It intimated that my services were required by Miss Mirabel Duane, and requested me to wait upon her at the earliest opportunity. Miss Duane had but just returned from a trip abroad. I could not conceive what she could want of me. Moreover, in view of my impending departure, it appeared not much worth while to obey her summons. And yet—and yet—her father was President of the T. & D. Railroad Company; Julies Wright had been a guest of the house, and I might obtain incidental data.

Miss Duane was a handsome girl, of the dark, heroic type. I had seen her coming off the steamer, and I was genuinely shocked at the change in her in a fortnight. She was haggard and thin, as if she had been ill for months. She wasted no time in making her wishes known. She wished to employ me to trace up Julius Wright. Most women would have assumed some trumped-up reason, more or less unplausible, to account for her interest in this man, who was virtually hardly more than her father's clerk. Miss Duane very properly assumed that her motive was no affair of mine. Her one concern was to spare no expense in finding Julius Wright.

"I am so very sure you will find a clue at Walling," she said; "I can not put that conviction from my mind. And when you find him give him this from me."

"I was obliged to tell her of my prior undertaking, and to intimate that I feared that the mission was opposed to hers. She tore open the note she had given me.

"Read."

"X Y Z thousand dollars (the sum with which Wright had absconded) "were this day paid in your name to the T. & D. Railway Company. Your immediate return will cause the charge against you to be withdrawn."

"Here are the railroad company's receipts," she said, and displayed them, duly attested. "Now, you must see, the one thing is to find Mr. Wright. Every added day of his absence makes it harder to reinstate him——"

She paused, gasped, shuddered, and put out one hand toward me with a look of fright and pain. As I caught her cold slim fingers in answer to that appeal, she fell back swooning in her chair. Deathly as she looked, I could not bring myself to call for help. It seemed to me it would be an infamous thing to expose her to the indifferent curiosity and comment of domestics and chance guests. With my free hand I tossed the flowers from a vase close by, and dashed the water in her ghastly face.

"O, God!" she moaned, "the fire! the merciless fire!"

Her left hand was clasping some ornament at her throat, dragging down the supporting chain until, it threatened to strangle her. I bent to unclasp that clinging hand. It yielded its grasp stiffly, and the pendant locket swung into my own hand. The gold burned my flesh as if it were a coal. And with that contact an unaccountable thrill swept over me—a sensation like that we have when we seem to re-live in a dream some part of a former existence. Out of this vague mistiness of thought and feeling, I seemed to resolve the face of Julius Wright, distorted, full of horror and agony unspeakable. I started. Miss Duane was languidly opening her eyes.

"I fainted again, I suppose? No; pray call no one," she said, weakly, but with decision. "I am so grateful that you brought no one here—but you may give me, if you will, a cup of wine from the cabinet in the corner."

She sipped the restorative slowly, and graciously smiled at my clumsy speeches of sympathy.

"Then you will make additional efforts to give me relief, will you not? For this arises from pure anxiety and grief. I never swooned in my life until a fortnight ago. It seems contemptible to trade upon one's weakness, does it not? But—well—you men will let yourselves be moved by the sight of physical suffering, where the extreme of mental anguish would make no impression."

"Madam," I said, "what does that locket contain?"

She started with a haughty, questioning glance, that became lost in wonder.

"It holds—a miniature."

"Perhaps a lock of hair? Yes, I thought as much. Now, let me advise you. Take it from your neck, with care to touch only the chain, put it away in a safe, or drawer—where you will—out of reach of contact with you, and I guarantee you immunity from these swoons."

"What do you—what can you mean? What do you know?"

"I know no more than yourself—only that there is a subtle essence of relation between the material and the spiritual that our finite, faulty knowledge has not grasped. You wear the portrait and the hair of a person for whom you have a strong congenial affinity, and on physical contact with it your over-susceptible organization receives the force of his suffering—stay! it may not be bodily suffering—it may be grief, or apprehension—or remorse."

Her proud head drooped.

"I believe you are right," she said; "my folly has been so great that I have fancied I found actual consolation in touching the lock of hair I had arranged to meet my hand. And now I fancy that I can remember how every attack of this nature has been coincident wi' a such a lapse of weakness. At all events, I will experiment on your advice. My very life is sapped by these swoons, from which I bring no definite recollection, but a sense of indescribable horror, and peril to Julius Wright."

All the restlessness and the intensity of Miss Duane's own spirit seemed to possess me when I went to Walling. And all futility and non-fruition of effort seemed to confront and mock me. It was easy enough to set any Walling tongue a-wagging about "the swell that fired for Stacy, and skipped between two days," but to the published facts no one could add a word. Wright had been a clever actor, and had given no clue. His record here was like the outward life of any man in his apparent station. Stacy was willing enough to repeat his story, but it was the same unvarying account he had already given so often. His conclusion of it now began to be colored, as I have intimated by a touch of resentment. He was evidently not a little vain of his unassisted management of his great machine in that memorable night-run, and jealous at hearing that others had surpassed the feat. Indeed, he had become so arrogant and unreasonable as to have offended most of "the boys at the yard." Walling being a division terminus, the little town was a general stopping place, whence the men were variously assigned to the trains dispatched night and day.

"All Stacy wants now is a Jew-store diamond-pin to make a way-up conduc., but he'll have to sport a double chin before he can get to be a director. He'll be a runnin' the whole thunderin' line pretty soon," said a railroad man, one of a group lounging on the boarding-house piazza.

"Well, he can start in right now," said another, "and I'll copper on any train he starts. I'd sooner drive the devil's dump-cart than to fire on '23' again to-night. That engine's got the phthisic, and she's go'n t' bust and blow the whole crew over into Utah."

"Give us a rest," spoke up a boss from the machine shops; "'23' 's the best on the division. They's not a rivet sick about her."

"O, they ain't, ain't they? Well, what I want to know's what makes them sulphur fumes just settle down in the cab so thick you could make a sieve out of 'em with a shot-gun. I swear, I thought I'd choke last week."

"That's so," said a quiet little fellow, who was busily plucking out his mustache, hair by hair. "I fired on '23' week 'fore last, and I could hardly breathe; and worse 'n that, somehow I got scared, and—and—well, I don't know what was the matter, but I went to sleep—or fainted, or something—and when I come to, there I was a lying full o' cold sweat, and Stacy shovelin' double coal right over my head."

"Them's me!" cried the malcontent.

"Scared! Why, my heart clim up and clawed at my tongue, and it felt as big and hard as a driving-wheel, and *I* keeled over. Gents, '23' 's freight, but she's got a passenger aboard. His name's Mr. Spook, and his profession's warnin'. He's served notice on me that '23' 's got a notion o' layin' down on her back, and makin' poached duck out o' me. I'll promenade over, and sort o' tell Mr. Train-Dispatcher I'm caught out."

"Suppose he'd put me on in your place?" I said.

The men gathered about me with notes of admiration, both decisive and sincere. It was an off hour, and the bunch escorted me over to the office and presented me to the train-dispatcher. There was much mock ceremony, conducted with a gravity that would not discredit Parliament, and much humor of a quaint, original cast. The train-master looked annoyed when he saw my credentials. Hitherto he had deemed me what I appeared—a supernumerary "hand," awaiting assignment.

"Well, I don't like this,'" he said, having bidden me into his private office. "Couldn't you make your opportunity some other way? It's taking such chances for the train. O, you can fire? O, that's all right, then. Just so Stacy has help—I couldn't risk him alone."

"Drink?" I said, casually.

"Not a drop. No, I guess it is the strain of the other night. He's getting all broke up."

At nine o'clock "23" stood coughing for her start; a great ten-wheeler, shining, mighty. The yard lights shone on the close brown cars of the through freight behind her, stretching back, a long line, like some articulated, sentient creature. A group of the boys stood near, and speeded us with good-natured chaff.

"Look out you don't lose your mate again, Stacy," cried one; "this is another new man, and it's just a month to-night since the other said 'Good-bye, sweetheart!'"

When I looked at Stacy after this, his face was as white as the aerated fluid in the tube of the water-gauge. We had scarcely left the lights of Walling behind, when I felt a singular sense of oppression. Our smoke seemed to settle down upon us, laden with sulphurous gas, as when confined in a tunnel. Our train was a "time fright" that ran but once a week, and at this period the line was clear for our passage over the whole division. Carrying the water supply in a tank-car, we had no need to stop on the whole run. We clattered past small way-stations, fast asleep already, dark, save for the signalman's lonely light. We clanked through defiles tremblingly, as if the dark mountains on either side were crouching monsters, gathering for the spring. We hurled ourselves upon the shadowy shapes of spectral bridges, with the indrawn breath of uncertainty with which man ever approaches the insubstantial and mysterious.

"Fire up!" cried the engineer; "he is not burnt!"

Since our first start he had been leaning on his rest, save when he mechanically tended the machine. But now he turned, with a swift whirl, caught the chain door-swing of the fire-box, swung it open with the stoker's accustomed swaying pull, peered into the fiery gap with searching gaze, and slammed the iron door as if upon a foe.

"Fire up! Why don't you put in coal?"

It wanted half the usual time, but I was constrained to obey. I had not yet wiped the blackened sweat from my brow, when he whirled about again and opened the furnace door.

"Plainer and plainer!" he cried; "put in more coal!"

He turned to the window again as I brought the scoop. That coal never was burned. I threw it over the side, impelled by prudential motives less than by a curious appearance that arrested me when I opened the fire-box door. And so, through the rest of the run, while the smoke gathered thicker, denser and more fœtid, again and again, and a score of times again, we repeated that same formula—he commanding, I alternating actual obedience with simulated compliance.

The way-stations were thickening toward Belen, when the engineer approached me, after one of his wistful, reluctant visits to the fire.

"You are a good lot," he said; "you have got sand. The others all fainted dead away—they couldn't stand it. Yes, you're good pluck. Come!" he said, ingratiatingly, "*you* look and see if he is there."

I opened the iron door. "Yes, he is there."

He caught the loaded scoop and thrust it into my hand. "Throw it on him!" he cried, "and burn him up. Perhaps you can do it."

I shoveled in the coal, then turned and took him by the arm.

"Why did you burn him up?" I said.

He cowered behind me toward the tender, turning his face from the furnace, yet glancing back at it askant, as he had done all along, drawn toward it by reluctant fascination.

"Now I will tell you," he said. "I knew all along that he was Julius Wright. We lived behind his rooms, up yonder in the city—my wife and I—my Josie. Why—yes—he got me this berth! Do you suppose I'd have given him away to the company—not for ninety millions!—when he came out here and told me he was sweet on Miss Duane, and had robbed the company to get a start for her? No, sir! He carried that pile of notes with him day and night—you know how much of it I could have got by giving him up. He fired for me two months, ate with me, slept in my bed. The boys wondered to see me so thick with Sam Barnes, my fireman. Fire up! Is he——? O, it's no use!" He took up his recital: "He got a letter that night at Belen. There was a picture in it. See."

He took from his breast a letter and a photograph. Blood was on them both. The face in the picture was the face of a woman I had seen often enough in a luxurious little cottage on our northern bay—a merry, blonde face, with perfect teeth peeping through the parted lips—the type of woman who could smile into a man's eyes while she dishonored him.

"I happened to come behind him while he read. I saw the picture, and knew it. I knew the writing. She signed: 'Your loving Josie!' I stole away without his having heard me; and the first mile out of Belen I struck him down, and took my false wife's picture from him, and I burned him! But mark you I killed him first—he was dead when I thrust him into the fire-box. But I've been burning—through him—in the flames of hell, and burning alive! Fire up, and see—is he there? O, yes! I knew it. You see, on this run it is all reversed. He begins to grow into shape back near Walling, where his bones fell into ashes as I stirred them into the coals. The melted lumps of his jewelry are in my trunk at Walling—I *could* clean my engine that night, and I found them. Well, he grows and grows in the fire, until he stands like life on the spot where I killed him. You'll see soon—yonder ahead, where a pile of rock is over a Mexican grave."

And in truth, when the headlight flashed on an upheaped cairn of stones, topped by a rough brown cross, once more John Stacy cried in my ear "Fire up!" and from the open fire-box door appeared to issue something in human form, pallid and bleeding—the shape of Julius Wright. Farther and farther the dead man pressed the living, to the very edge of the tender's slippery step. Then I succeeded in stopping the train. The cab was empty, and a few rods farther back John Stacy lay beside the rails, stone dead.—*Y. H. Addis, in San Francisco Argonaut.*

NO CHUMPS NEED APPLY.

Uncle Sam Only Wants Good Men for His Regular Army.

"Is this where they enlist?" inquired a sallow-faced young man, stepping into the United States army recruiting station on West Congress Street.

"Yes. How old are you?"

"Twenty-five."

"Open your mouth." The examining officer took a firm grip on the young man's chin and forehead and looked long and earnestly into the opening presented to him. "No, I can't take you," he said, finally.

The sallow young man turned on his heel and went out without a word.

"Three back teeth on one side gone," the officer explained to a bystander. "If he'd lost only one he might have passed."

Another candidate for military honors came in a few minutes later. His teeth were found to be satisfactory and he was introduced to the next stage of the ordeal.

The candidate was sent to the opposite end of the room and invited to look at some cards, the spots on which at a distance of twenty feet appeared to the eye to be exactly the same size as a bull's-eye at one hundred yards. The next test was for color-blindness, after which the victim was required to strip himself stark naked. In this condition he was weighed, and his height, chest-measure, etc., carefully noted. A brilliant series of gymnastics followed. The candidate was made to swing first one arm and then the other, after the fashion of a wind-mill in a strong breeze. He then dropped on his knees, rose on one leg, hopped across the room on his right foot and back on his left, executed a standing jump, and finally stood erect and kicked backward three times—each movement being directed by the examiner. The whole person of the man in undress was then carefully gone over for imperfections and evidences of disease. Varicose veins were looked at with especial attention, and feet examined for in-growing toe-nails, flatness, etc. A small anchor in India ink was found on one arm.

"We don't object to tattooing in general," the examiner remarked, "but once in a while we find a fellow with some obscene picture or other pricked into his skin. That cooks his goose. Uncle Sam don't want to collect a picture-gallery of that kind."

After the candidate's various birth-marks, scars, etc., had been taken account of and the color of his eyes and other points of identification all noted he was requested to dress himself. He then answered a long series of questions respecting hereditary diseases in his family, his previous occupations, experience or lack of it in jail, and the like. Finally enlistment papers in triplicate were made out and the process of "listing" was complete.

"We get some queer letters some times," the officer said, when the examination was finished. "One man wrote a few days ago asking if he could live with his wife if he enlisted, and if they would have a separate house. He also wanted to know whether he would be given a house in Washington or Detroit. I merely said in answer that we took no married men—which is the fact. Of course the requirements are very much more exacting than they are in war times. We don't care to enlist very many men, and we are careful to pick out the very choicest that offer themselves."—*Detroit News.*

THE GREAT MAJORITY.

A Michigan Farmer's Experience with Strapped Theatrical Companies.

"No, it isn't the tramps I complain of," said a Wayne County farmer, as he called for ginger ale yesterday. "I can drive a tramp off by simply bringing out my shot-gun, but with this other class it's different."

"What class?"

"Why, these busted theatrical people who are hoofing it back to Detroit. They come along at all hours of the day and night, and in all sorts of shapes. When a chap turns into your gate and announces that he is Damon, and that Pythias is in a fence-corner half a mile back, too far gone to foot it another rod, and he backs this up by quoting Shakspeare and giving you the route of his company for four weeks, why, you've got to do something."

"Of course."

"Romeo came along the other night and roused me up, and I went to find Juliet on the grass under a pear tree, resting after a walk of twenty-two miles. They had to have something to stay their stomachs and put new life into 'em, and I thought they'd eat me out of house and home. I'd had leading men, leading ladies, villians, lovers, chambermaids and property men walk in on me singly and by droves, and I wish the season was over. Curus how they all tell the same story."

"What is it?"

"Why, they had the boss play and the keenest manager. Everything was calculated right down to a cent, company was the best on the road, and there couldn't be no such thing as a failure. But there was. The treasurer skipped with the funds—weather too hot—too many roller rinks—allus some good reason for busting up. Poor critters! Whenever I am woke up at night by a voice calling out: 'Me noble lord, a tranger begs a glass of buttermilk of thee,' I get into my clothes and go down, feeling as if all the cold meat in the house likewise belonged to him."—*Detroit Free Press.*

The British Museum.

According to a British Parliamentary paper the number of persons who visited the general collections in the British Museum in the year 1884 was 468,873. This number is the least recorded in six years, and is less than that of 1881 by nearly 300,000. On the other hand, the number of visits to particular departments was greater than in any of the five preceding years, being 200,269, of which 154,729 were visits paid to the reading-room for purposes of study and research. The number of persons admitted to view the collections in the Natural History Museum was 375,231, the greatest number in any one year since its opening on April 18, 1881.

"HER CHANCE."

A Practical Illustration For Mothers and Their Marriageable Daughters.

About thirty years ago two young girls were graduated from the same school in a quiet town in one of the Middle States. Each was clever, good-tempered and attractive, and the daughter of a farmer who could give to his children a comfortable home, but no fortune.

The mother of one of these girls (we will call her Mary) declared that her child should "have her chance." An outfit of silk, velvet and evening dresses, Paris hats and jewelry was provided by selling off part of the family acres; and the mother set out with her on a round of visits to the springs and other fashionable resorts. The girl was shown off to every eligible young man, precisely as a horse would be exhibited to a buyer, but in vain. The effort was renewed summer after summer, until the mortification and shame which the girl had felt at first were worn away, and she became at heart a hard, vulgar adventurer, whose sole object was to make a brilliant match: in other words, to sell herself for a good price. Just as she was beginning to grow old and soured with disappointment, she succeeded in marrying a man of sixty with a large fortune. His habits were dissolute and his temper intolerable. Her two children, having grown up in an atmosphere of show and pretense, unwarmed by a spark of love, truth or religious faith, naturally were indifferent to their mother. The son became a spendthrift and drunkard; the daughter an almost imbecile, fashionable woman. Mary has the stately house, the servants, the equipages, for which she planned and struggled so many years. But she has nothing more.

Her classmate, leaving school, entered at once into the work and life of her home. She was the friend and companion of father and mother, the teacher of her little sisters.

"She shall be fitted to become a wife and mother," her mother said. "If God sends her that great happiness. But she shall not go out in the world husband hunting. The hare should not chase the hounds."

According to this homely philosophy she remained at home, among her own friends and neighbors, and married a young man who had no wealth but industry and honesty, whom she heartily loved. They live still in her native village. Their small income goes far there. They have comforts and luxuries; their children are healthy, intelligent, successful men and women and all devoted lovers of their mother.

Mary sometimes sees her classmate in town, in her old-fashioned country carriage, with rosy cheeks beneath her gray hair, and pities her because she never "had her chance."

Girls, remember your chance in life is something higher and deeper than the chance of being sold as from an auction block to the highest bidder.—*Youth's Companion.*

CHOLERA.

The Theory That the Disease May be Rendered Harmless by Inoculation.

People are much more willing to accept Dr. Ferran's theory that cholera may be prevented by inoculation than they were Dr. Jenner's positive demonstration of the efficacy of vaccination. One is the complement of the other; and belief in the one is likely to be followed by a willingness to be convinced of the worthiness of the other, but as yet Dr. Ferran refuses to reveal the secret process which he uses, and the world must be permitted to express a certain degree of incredulity until it knows the cause which produces the effects claimed by him. Jenner's discovery was so simple that the dullest mind could comprehend it, yet the learned scoffed at it for years, and the ignorant even now have a superstitious horror of being operated upon. Had he possessed some secret device which he would not reveal even to scientists, the beneficial effects of vaccination would not have been known when they were, if at all. Dr. Ferran lives in a very different age, as is proved by the fact that, although no one but himself knows exactly what his process is, he finds many people who are willing to be operated on.

The report of the experiments in the town of Alcira, Spain, as made by himself, are of great importance, if true. Of the 20,000 inhabitants he inoculated 9,100 and of the 130 deaths from cholera only ten were of persons who had been thus treated. This record is convincing enough on its face, but it may be that the persons inoculated were ones not exposed to the full rigors of the plague, and if so the mortality might be considered sufficiently large. The doctor will have to reveal his secret and give others an opportunity to experiment with it before the world will be prepared to acknowledge him as a second Jenner. The American medical journal's query that since one attack of the cholera itself is no safeguard against another one, how can inoculation be expected to accomplish anything? will also haunt a great many people, professionals as well as laymen.—*Chicago Herald.*

The Water Supply.

It should never be forgotten that water is of more importance to animals than solid food. Every drop of water taken into the stomach is absorbed into the blood and passes through the system, leaving behind it in the blood whatever injurious impurities it may have contained. Moreover, the water swallowed by an animal goes at once into the stomach and is absorbed into the blood in a few minutes. If the water is icy cold it takes from the stomach and blood a large amount of heat and chills the system dangerously. Most of the ailments and diseases of cattle, sheep and horses at this season are due to impropriety in the water supply; either it is impure, or scant, or is too cold; and all these defects should be carefully guarded against. In the dairy the water supply is the most important part of the whole business.—*N. Y. Times.*

SOME FIGURES.

Calculations Showing That the World Is the Heritage of the Caucasian.

Among the little-noticed but most important facts in the history of the world is the enormous recent increase of the number of white men in it. It is barely two centuries (1683) since those races, though even then the most energetic of mankind, formed but a small fraction in the total of humanity—probably ten per cent. of the whole—and were by no means certain that they could defend themselves against the remainder. The white races in and out of Europe, under the influence of some still mysterious call upon their energies, have multiplied nearly threefold, and are to-day, as Mr. R. Giffen has shown in his recent address to the Statistical Society, 420,000,000. As there is no evidence of any corresponding increase in the dark races, and as, indeed, such increase has been, outside India, nearly impossible, the white men are now, by the best calculations, one-third of the entire population of the world, instead of being, as they were only two centuries ago, a little more than ten per cent. They have, moreover, if anything, increased in physical strength and have so developed in brain and consequent power of organization, that it may be doubted if the whole remainder of mankind, even if all were reduced to equal weapons, could seriously injure the white third, which again, if it chose to act together and employ without pity the weapons its intelligence has enabled it to construct, could in a few years reduce the remainder of the world to an uninhabited desert. They have lately taken to conquering Africa, and are entering at a hundred points at once; seizing almost silently, certainly without serious effort, huge slices like French Africa, South Africa, Madagascar, the vast valley of the Niger, and the still more extensive region drained by the system of rivers called the Congo. Nor is there much reason to believe that the process will soon be checked, for the white men are urged forward by an irresistible spur over which they have no control. The increase of the yellow race, which must once have been so incredibly fast, has stopped, and that of the dark races of India, which for a century has been amazing, is being checked by recurrent famines; but that of the white people goes on so fast that the transport of a huge army every year across the Atlantic makes no impression on their numbers, and at their present rate of increase they will in 1984 be a thousand millions, or much more than half of then existing mankind.

The world is the heritage of the white man; that is the first lesson of Mr. Giffen's figures; but there is another, also, which Englishmen will do well to think over patiently, and, if they can, without hatred in their hearts. They have no right to anger with the visible will of God. If Mr. Giffen's figures are correct—and, subject to some arrest of existing law, they must be as correct as if they were merely unapplied calculations—there is but one race on earth with whom it behooves the Teuton, in all his branches, to keep friends. This supremacy of the white man will in the end—and, recollect, children may be born to-day who will see the end, and then be younger than Sir Moses Montefiore—be the joint supremacy of the Teuton and Slav. In 1984, when the world contains 1,000,000,000 of white faces, 600,000,000 of these will be English and Germans, and 300,000,000 will be Slav. There will practically be no other white races, the French not increasing, the Spaniards increasing slowly—if, indeed, as in Mexico, they do not rather suffer absorption in a dark people. If the Teuton and the Slav can keep friends, the world is theirs; and if not, there will be the most terrible struggle recorded in history since the white barbarians fought the white Romans and their darker allies. We are not sure that an agreement is possible until a great fight has taken place, for Slav and Teuton seem unwilling to comprehend each other, though there is not between them the internecine hatred sometimes observed in history; but if their statesmen could arrange terms on which the conflict could be permanently avoided, a huge mass of misery might be saved to our immediate descendants. To avoid the quarrel will be difficult, for the Slav is just now strangled; and to reach the open water, and so take his natural part in the greater movement of mankind, he must pitch himself on somebody, be it on Turkey, on England or on China; but the means of avoidance are worth the study and patience of years.—*London Spectator.*

ACCIDENTS THAT ARE COSTLY.

The Expense That Railroads Are Put to by Even the Most Ordinary Accidents.

"You occasionally hear people find fault because managers of railroads do not prevent accidents," said a railroad man in Jersey City the other day. "There may be bears among railroad owners who rejoice in wrecking railroads that they do not own, but to the practical railroader a train wreck is a big loss directly, besides the loss in prestige which follows."

"Is the rolling stock so costly?"

"Yes, a freight train for instance, that rolls down an embankment, where half of it is burned will give you a good idea of the loss. The average engine is worth $7,000. A common freight car is worth $475, or perhaps $500. The ordinary gondolas are worth from $400 to $425. An engine is rarely ruined beyond repair, but a wreck can knock $3,000 out of it just as easy as rolling off a log. A burned car is a ruined car, of course, and repairs on those that are crushed may cost any where from $50 to $200 each. If a passenger car, such as is used on ordinary roads, is burned, $3,500 goes up in smoke. These figures are for the cars in use, and not new out of the shop. From this you can see that wrecks may happen which cost a company $10,000, and yet nothing is likely to be said about them in the papers unless some one gets hurts, and not then if the railroad men can keep it quiet."—*N. Y. Sun.*

—They have twenty-eight base ball clubs and twenty brass bands in Salt Lake City.—*Chicago Inter Ocean.*

FOR OUR YOUNG FOLKS.

ONE THING AT A TIME.

One step at a time, and that well placed,
We reach the grandest height;
One stroke at a time, earth's hidden stores
Will slowly come to light;
One seed at a time, and the forest grows;
One drop at a time, and the river flows
Into the boundless sea.

One word at a time, and the greatest book
Is written and is read;
One stone at a time, a palace rears
Aloft its stately head;
One blow at a time, and the tree's cleft thro',
And a city will stand where the forest grew
A few short years before.

One foe at a time, and he subdued,
And the conflict will be won;
One grain at a time, and the sands of life
Will slowly all be run.
One minute, another, the hours fly;
One day at a time, and our lives speed by
Into eternity.

One grain of knowledge, and that well stored,
Another, and more on them;
And, as time rolls on, your mind will shine
With many a garnered gem
Of thought and wisdom. And time will tell,
"One thing at a time, and that done well,"
Is wisdom's proven rule.

—*C. G. Tharin, in Golden Days.*

JOHNNY'S POOR RULE.

It Proved a Very Unpleasant and Disagreeable One When Worked Both Ways.

Johnny James had been growing sullen for some time whenever he was asked to do anything he did not exactly want to.

And when he once began yielding to the inclination to refuse obliging people, it was astonishing how the tendency increased to do less and less to help others.

Johnny's kind parents did all they could to make him happy, and his mamma especially tried every way she could think of, to show the little boy how wrong and selfish it was to want only to please himself. No matter whether little sister Mattie had a good time or not, Johnny didn't care so long as he enjoyed himself, and no matter how tired mamma was Johnny never could be made to feel it was his duty to help her.

And things went on from bad to worse, until actual disobedience began, which was so promptly punished that Johnny made up his mind it was no use trying to break rules, but he went as far as he could go without incurring punishment.

One night, Mr. James came home and found his wife very much discouraged. And to his kind inquiries as to what troubled her, she said it seemed utterly impossible to make Johnny do right. She had coaxed and punished him; she had read to him from the Bible showing how God hated disobedience, and a naughty, unwilling disposition; had read and told him stories of children who were not kind and obliging, but it was of no use, Johnny pouted and muttered, and only obeyed when spoken sternly to and obliged to.

She had told him three times through the day to go to the post-office, and he declared he had forgotten it; and when sent for a dozen eggs, he had managed to carelessly break three, and didn't seem in the least sorry.

"Well," said Mr. James, "I'll talk to Johnny."

That evening he took Johnny and said in a very kind but decided way:

"Now, my boy, your mother and I have tried every way we could, properly, to make you a good boy, but, as all our efforts have seemed to fail thus far, I think we must try a new plan. Did you ever hear it said, Johnny, 'that it's a poor rule that won't work both ways?'"

No, Johnny had never heard of that.

"Well, now that means," explained his father, "that it is a poor rule which will do for one person, but won't do for another. For instance, how do you think it would do for mamma and for me to treat you as you treat us? Suppose we disregard your wants, forget to do what you ask us and forget or neglect to treat you politely or with kindness, now do you think it would do?"

"Don't know," said Johnny, sullenly.

"Very well," continued papa, "now I warn you, my little son, that hereafter we may try what seems to be your rule, and if it doesn't please you, why there'll be only yourself to blame."

This talk set Master Johnny to thinking, and all the next day he took care to do as he was told, and really avoided any direct naughtiness. But bad habits are not easily conquered, and, the second morning after the talk, papa called to him before breakfast and asked him to go and get a morning paper just in the next street.

"Can't Mattie go?" he whined. "I ain't got no boots on."

"Put them on then," said papa. "I want you to go, not Mattie."

His papa heard the muttering and flinging of things around so customary when Johnny was displeased, and the moments went gliding by until the breakfast bell rang, and no Johnny had appeared.

Just as all were seated at the table, a cross-faced boy appeared, and seeing breakfast all steaming on the table he asked, fretfully:

"Can't I go for the paper after breakfast?"

"No," said papa. "I'll get it myself after breakfast."

Johnny looked satisfied and went directly to the table.

"Why, where's my plate?" he whined again, "and my napkin, and ——"

"Oh we didn't feel like giving you any breakfast," said papa, in so surly a tone that Johnny looked at him in surprise.

"I want my breakfast dreadful!" said Johnny, half crying.

"Well, you can't have it if you do! I don't feel like working all day just to buy breakfasts and dinners and suppers for a little boy who never feels like doing anything for anybody but himself, so run away and don't bother us."

"But there's milk toast and omelet, my two favorites," said Johnny, really crying.

"Well, so there was a speech from my favorite speaker in the morning paper," said papa; "but I've had to do without it. It's a poor rule that won't work both ways, my boy, so now go into the library at once."

Johnny thought there never was such an abused boy as he, when he was actually obliged to make his breakfast on a slice of bread or nothing at all, but the lesson proved a good one, for Johnny remembered it for some time, then he began falling into the same trying old habits again.

Papa asked him to weed the flower pot one morning, but at night he said he had forgotten it. Mamma asked him to please stay in the house with Mattie, Wednesday afternoon, because she had a cold and couldn't get out, and at night he said he didn't stay in because he didn't feel like it, and mamma didn't say he must.

Then papa asked him another morning to weed out the flower bed, and at night when asked why it had not been done, he replied: "'Cause you didn't say I must, and I didn't want to."

Papa went into the house without saying a word, and Johnny somehow felt very uneasy. He followed papa around and watched him closely.

Just after supper papa remarked, quietly:

"I had a letter from your Uncle Fred this morning, Johnny, and your cousins Will and Joe have a birth-day party to-night. They invited you."

Johnny's eyes surely would have made any one laugh to see how widely a boy's eyes could open, then he fairly gasped in astonishment:

"Why—papa—James! why didn't you tell me?"

"Oh, I didn't feel like it;" fretted papa.

"But I'm invited to the party!" cried Johnny, "and I must go, I wouldn't miss one of those parties for the world!"

"Well," said papa, indifferently, "yes, they invited you if I chose to let you go, but they didn't say I must, and I don't want to."

Well, it was a hard lesson, a dreadfully hard lesson; but nothing except a dreadfully hard lesson was going to make any lasting impression on Johnny's mind or help him overcome his faults. Uncle Fred's house could have been reached by a ride in the horse-cars, and nothing could be more enjoyable than the birth-day parties the cousins Will and Joe were often allowed to give. Johnny had attended two or three, staying all night afterwards, and always thought them the most delightful occasions imaginable.

In vain he coaxed, and cried, and promised; all he could get papa or mamma to say was that they didn't feel like letting him go, or didn't want to. Kind-hearted little Mattie tried to persuade papa to forgive Johnny, "just this once," but papa laughed and said Johnny had been forgiven "just this once" so many times, he should feel it was wicked to forgive him again. Besides mamma didn't feel like dressing him for a party.

But poor Johnny grew so thoroughly disgusted with a miserable rule which could only work two ways in such a wretched, disappointing way, that he finally grew wise enough to make up his mind to have nothing to do with such rules.

Then as soon as he showed a disposition to do right and began making real efforts to be a good, willing boy, his kind parents helped him in every possible way, and he began to find how pleasant it was to be good and helpful, and so by degrees papa's experiment proved itself to have been an excellent one, for Johnny adopted rules which it was pleasant to have work both ways.

—*Faith Irving, in Golden Rule.*

OLD SHOES.

The Parts They Fill in the Boudoir and Parlor.

It may be a surprise to some people to learn that the old shoes cast into the ash barrels are liable to appear in the boudoir and parlor. A New York reporter who saw a couple of rag-pickers quarreling over a lot of worn-out and seemingly worthless foot gear interviewed one of the chiffonniers, and found that they sold them to the manufacturers of wall paper. He followed up the clew, and on questioning the foreman of one of these establishments elicited the following bits of information:

"We buy," said the foreman, "all the boots and shoes that the scavengers can bring us. We pay different prices for the different qualities of leather. A pair of fine calfskin boots will bring as high as fifteen cents. We don't buy cowhide boots. The boots and shoes are first soaked in several waters to get the dirt off them. Then the nails and threads are removed, the leather ground up into a fine pulp, and is ready to use.

"The embossed leather paperings which have come into fashion lately, and the stamped leather fire screens, are really nothing but thick paper covered with a layer of this pressed leather pulp. The finer the quality of the leather, the better it takes the bronze and old gold and other expensive colors in the designs painted on them. Fashionable people think they are going away back to the mediæval times when they have the walls of their libraries and dining-rooms covered with embossed leather. They don't know that the shoes and boots which their neighbors threw into the ash barrel a month before form the beautiful material on their walls and on the screens which protect their eyes from the fire.

"We could buy the old shoes cheaper if it were not for the competition from carriage houses and bookbinders and picture-frame makers. I don't know how many other trades use old shoes and boots, but the tops of carriages are largely made of them, ground up and pressed into sheets. Bookbinders use them in making the cheaper forms of leather bindings, and the new style of leather frames with leather mats in them are entirely made of the cast-off covering of our feet."—*Scientific American.*

—A girl with three arms is an attraction in a Louisiana side-show. She can play the piano with two of them and turn the music with the other, thus saving the expense of a young man.—*Drake's Travellers' Magazine.*

—There seems to be trustworthy evidence to the fact that boiled celery—not the raw stems—is a preventive of rheumatism.

LAWN TENNIS.

The Idiotic Tendencies of the Average Young Person.

The Present Craze as It Appears to the Reporter of Base-Ball Matches—Gibbering Idiots Whose Proper Place Is in the Insane Asylum.

Those who have made insanity a special study are of the opinion that a new cause of mental disturbance has arisen in the shape of printed rules of lawn tennis. Any one who has seen the frantic efforts of a man engaged in trying to master the details of this game and has watched his facial contortions and bodily agony as he strove in vain with terms the meaning of

which is withheld from the uninitiated, will readily coincide with the above expressed opinion. Those who have themselves attempted to master these rules and have preserved their sanity will tremble at the peril they have escaped. How many gibbering idiots there are now in our asylums who wander around with their heads full of terms like "swift overhand service," "high front delivery," "right-hand twist," "fore overhand," "lobs," "skyers," "volleys," will never probably be known. It is only of late that the attention of scientists has been directed to this matter, and a commissioner should be promptly appointed to look into the matter.

There are many ways by which this committee could be placed in a proper position to ascertain the facts, but the best way is to go to the Prospect Park grounds and study the subject in its worst and most aggravated forms. Here many games are going on at once, and all varieties of players are present, surrounded by a crowd of friends, some standing, others seated or in carriages, but all staring at the players with a common expression of intense stupefaction. They all pretend to be intensely interested in the proceedings, but with few exceptions they don't know what on earth it is all about, and don't care. Many are in tennis costumes, especially the ladies. It is wonderful what an assortment of stockings one sees on these occasions—more varieties than you would suppose existed.

There appears to be no quarreling about tennis. It is milder even than croquet in that respect, and it also appears that the element of danger is eliminated from the game. A holy hush is over all. You know they are playing something because they move around nimbly and whack at flying balls with an object that looks like a petrified crab-net, and they are separated from one another by a long, low fish-net across the field. The fun goes on inside of a place marked on the grass by wide lines of powdered chalk, reminding one of the boyhood's game of hop-scotch on a large scale. The more you look at it the less you understand what it is they are trying to do. Now a young girl with beautiful clocks on her ankles trips forward and bangs the ball towards the fish-net, and a tall young man, whose brow is furrowed with care on account of the fit of his knickerbockers, ambles forward, takes a crack at it and calls out: "Love fifteen!" and casts an amorous glance at another little beauty, whose quick, responsive eyes flash back that she "catches on" to the point, whatever the point may be. Then another fellow runs over and knocks the ball into the eye of a sleepy old matron on a side seat. In his hurry to apologize to her he rushes forward, gets his feet tangled in the ropes of the net, plunges head first into a baby-carriage and creates a real lively little diversion for a few minutes.

This is lawn tennis. There is not much excitement about it. The most you ever hear is a slight disagreement over counts, and then the umpire makes a speech something as follows: "It's 15 for the first ace, you know, 30 for the second, 40 for the third and game for the fourth, you know. When the score stands at 1 to nothing, it's 15 love. When the tally is 40 to 40, you know, the call should be 'deuce;' when the next ace is scored after deuce the call is vantage, and the next ace scored after vantage, if by the same player, is game. If the next after vantage is by the opposing player, ye know, the call is deuce again." Whereat they all agree that they don't know, and go on poking the balls around. When you get your strength back you crawl away and go see a game of college foot-ball and have the satisfaction of seeing three men killed, eighteen limbs and three heads broken, and enough blood shed in fifteen minutes to put a new course of life into as many consumptives, and you rub your hands and say: "There is a game worth seeing."—*N. Y. World.*

A Very Effective Hint.

"Don't you think ear-rings would become you?" inquired Kosiusko Murphy of Birdie McGee. Kosiusko had been paying Birdie very assiduous attentions of late.

"O, I don't know," replied Birdie, demurely.

"I suppose the reason you don't wear them is because it will hurt to have your ears bored."

"O, not in the least," said Birdie, with animation. "I've had that done already quite often—almost every evening, in fact, for the last three weeks."

Then Kosiusko reached round to the piano, dragged his hat off the cover, and commenced to fade gradually from the room. He fairly melted away into obscurity, and now a wide chasm separates the gallant Kosiusko and the charming Birdie.—*Texas Siftings.*

After the Soiree.

Dusenberry—"Charming woman, old boy! I congratulate you."

Judge (languidly)—"Thanks."

Dusenberry—"Such grace! Such wit?"

Judge (as before)—"Y-a-a-s."

Dusenberry—"Such conversational powers! I could listen to her for hours."

Judge (gloomily)—"I often do."—*Philadelphia Call.*

DISASTER.

Under her bonnet I kissed her,
Under her bonnet of straw—
It would not have been strange had I missed her,
For but half of her visage I saw.

A glimpse of her chin and her dimple—
And her nose showed its exquisite tip;
And it seemed so remarkably simple
To carom right there on her lip.

And under that mighty poke bonnet
I dived for a moment of bliss—
You may wager your wardrobe upon it,
I delivered a lightning-speed kiss.

Yes, under her bonnet I kissed her—
And somehow—the bonnet shows how—
I found 'twas her Boston-bred sister.

* * *

There are *two* girls don't speak to me now.
—*Puck.*

JANE'S GRAMMAR.

The Meanderings of the Childish Mind Through the Intricacies of English Grammar.

Little Jane had repeatedly been reproved for doing violence to the moods and tenses of the verb "to be." She would say "I be" instead of "I am," and for a time it seemed as if no one could prevent it. Finally, Aunt Kate made a rule not to answer an incorrect question, but to wait until it was corrected.

One day the two sat together, Aunt Kate busy with embroidery and little Jane over her doll. Presently doll society became tedious, and the child's attention was attracted to the embroidery frame.

"Aunt Kate," said she, "please tell me what that is going to be."

But Aunt Kate was counting and did not answer. Fatal word, be! It was her old enemy, and to it alone could the child ascribe the silence that followed.

"Aunt Kate," she persisted, with an honest attempt to correct her mistake, "please tell me what that is going to am!"

Still auntie sat silently counting, though her lip curled with amusement.

Jane sighed, but made another patient effort.

"Will you please tell me what that is going to are?"

Aunt Kate counted on, perhaps by this time actuated by a wicked desire to know what would come next. The little girl gathered her energies for one last and great effort.

"Aunt Kate, what am that going to are?"—*Philadelphia Call.*

TWO VIEWS.

NO. I.—FROM THEIR STAND-POINT.

NO. II.—FROM OUR STAND-POINT.

Investigating the Children.

"I ain't gwine ter stay in dis heah country no longer den I ken he'p," said an old negro whose general good humor and satisfied condition rendered his observation significant.

"What's the matter, Eli?" some one asked.

"Never mine whut's de matter, I kain't stay hyar."

"Anybody been abusing you?"

"Yas, sah, da is."

"Infringe on your rights?"

"Sah?"

"Trample upon your rights?"

"Yas, sah, da did. Tramped on me wit bof feet."

"Tell me about it."

"Wall, yer knows, sah, dat I'se a mighty han' fur chillun. I'se got twelbe ur fifteen at my house, yer know. Dis mawnin' while da wuz all out in de yard it struck me dat dar wuz er powerful chance o' them, so I 'gunter count. Wall, sah, I counted twenty-three. 'Look heah, wife,' s'I, 'how come all dese chillun in heah?' She sorter 'vaded the subjec, but at las' she 'knowledged dat de extra chillun 'longed ter her sister whut wuz dun run away. Now, boss, how long does yer reckon I had been er totin' dat extra load?"

"I have no idea."

"No, sah, I doan' 'spoze yer has. I'd been feedin' dem chillun fur two munts, sah. I thought dat it tuck a powerful chance ter eat, but I didn't think, sah, dat my wife wuz er stuffin' de ballock box dat er way. No, sah, I ain't gwine ter stay heah."—*Arkansaw Traveler.*

THE ART OF GOOD TALKING.

The Virtue in a Good Subject and the Value of Silence.

Those who are not very good talkers, and are mortified sometimes by being the wall flowers of the evening, may get some consolation from the consideration that there is a great deal of talk that could very well be spared, and that idle words must be accounted for. Indeed, they also serve who only listen. A Frenchman once said of a gentleman in whom he could detect no other quality worthy of compliment, "that he had a great talent for silence." And some people are very valuable in that way. We have known people who could listen so inspiringly as to draw eloquent discourse from very ordinary people.

"The whole force of conversation," some one says, "depends on how much you can take for granted." The good listener may contribute to that force by intelligent nodding. We once introduced two friends who were going in the same car on an all-day journey. One of them was an inveterate talker; the other, also a good talker, could keep still when necessary. Meeting the latter a few months after, we inquired how they enjoyed that day together. "The doctor enjoyed it first rate," said the quiet man. "He began talking when the train started, and never stopped until it pulled into Jersey City, encouraged by only intermittent nods and smiles from me. Parting as we left the train, the doctor remarked effusively, 'We have had a good day; I don't know when I have enjoyed a conversation so much.'"

Talk and silence do make good conversation sometimes, if they be rightly adjusted to each other. Successful conversation assumes, in the first place, sympathetic people. There must at least be a willingness to get on common ground. Dr. Johnson once tried a fellow traveler in a stage coach on various topics and could get nothing out of him. At last the poor fellow, realizing the humiliating situation, in despair exclaimed, "Try me on leather!" He did and found an eloquent talker. He who can adjust himself to his company will always be entertaining. A good talker must have, in the second place, a good subject. Gossip leads to affectations. The man or woman having a worthy subject will talk naturally. Small natures talk about people, earnest souls talk about things. It is easy to be fluent in canvassing our neighbor's peculiarities, but one can't gossip about astronomy and Free Trade and inductive philosophy.—*Boston Beacon.*

HINDOO TIME.

The Curiosities of the Eastern Method of Reckoning Time.

The Hindoos also employed ages in the computation of time, and these, too, divided into periods of different durations. The present age is the *kali yuga*, or the age of iron; 4,985 years of it have already passed, but its total duration is supposed to be 432,000 years. The succession of the ages, counting back, is given as follows:

Fourth age—*Kali yuga*, age of iron, or of woe (the present age), to be of 432,000 years.

Third age—*Dvapara yuga*, 864,000 years.

Second age—*Treta yuga*, or age of silver, 1,296,000 years.

First age—*Krita yuga*, age of gold, or of innocence, 1,728,000 years.

These four ages form the *maha yuga*, or great age, of 4,320,000 years. The length of a patriarchate is seventy-one maha yugas, or 306,720,000 years, to which is added a twilight period of 1,728,000 years, making in all 308,448,000 years. Fourteen of these patriarchates, augmented by a dawn of 1,728,000 years, gives 4,320,000,000 years, which form a *kalpa*, or the *æon* of the Hindoo chronology.

A kalpa is only a day in the life of Brahma, whose nights are also of the same duration. Now, Brahma lives a hundred years of the three hundred and sixty days and three hundred and sixty nights. The present epoch is the *kali yuga*, of the twenty-seventh grand age of the seventh patriarchate of the first æon of the second half of the life of Brahma, who is now in his 155,521,972,848,985th spring. Yet the whole life of Brahma is only a little longer than a single wink of Siva's eye!—*M. L. Barre, in Popular Science Monthly.*

MR. RUSKIN'S LATEST.

A Writer Who Will Not Be Popular With the Children of the Well-to-do.

In future, we should say, Mr. Ruskin will not be particularly popular with the children of those who are well-to-do, to judge from a letter he has been writing. "The father," he says, "should never provide for his children. He should educate and maintain them to the very best of his power till they are of mature age." Then, "when they are strong enough, throw them out of the nest, as the bird does." "No fortune" should be "left to them." The "nest" should always be at their disposal—"father's house open, says Mr. Ruskin—but "nothing more." Mr. Ruskin does not say what he means by "mature age," so that we are left to fix the period of maturity for ourselves. Some would place it at one time, some at another. And, moreover, Mr. Ruskin does not tell us what is to become of the property which would, in ordinary course, be handed over by a father to his children, if he had it to hand over. Is it to go to the State, or to an institution, or to any other relatives than the unfortunate offsprings? "Honorable children," says Mr. Ruskin, "will have their own houses." But that is not always the case; and what is the use of the said children "providing for their parents," if the said parents do not require to be provided for? Mr. Ruskin is good enough to lay down that "no guilt should ever stand between child and parents;" but, though this sounds generous, it is not wholly intelligible. People will still want to know why, if they have the means, they should not "provide for" their children; and the only persons, we fear, who will salute Mr. Ruskin as a prophet are those who may be glad of an excuse for casting their progeny upon the world.—*London Globe.*

MISCELLANEOUS.

—Alaska pays a greater revenue to the General Government, in proportion to the population, than any Territory now or heretofore in existence in the United States.—*Chicago Herald.*

—Two young men, one of whom was disguised as a woman and passed as the other's wife, have been reaping a harvest from charitable citizens of Stockton, Cal., by their pitiful tale of destitution.—*San Francisco Chronicle.*

—At Seneca Falls, N. Y., the largest single electric light ever produced was recently placed on exhibition. It was 50,000-candle power, and placed on a tower at a height of seventy-five feet it lighted up the whole village.—*Buffalo Express.*

—As two men were fishing in a mill-pond at Valatie, Columbia County, N. Y., the other day, they saw a crocodile about six feet long crawl into the water. It was put into the pond six years ago, when small.

—One of the greatest puzzles to the observing spectator who watched the youngsters playing Copenhagen at the children's jubilee was to know why those little girls who fought so hard against being kissed played the game at all. They didn't have to.—*Pittsburgh (Pa.) Commercial.*

—A swallow has made its nest and is rearing its young in one of the railway signal balls at Bow Crossing, N. H. The covering of the ball became torn, which allowed the entrance of the bird. The signals are lowered and raised many times daily, but the pets of the switch-tender appear to like their home very much.—*Boston Post.*

—Joseph D. Fuller, an old gentleman of seventy, claims that he is entitled to 160 acres of Philadelphia. It was willed to Sally Mercer Fuller by William Penn before he went back to England the last time. When she died nobody claimed the land and it was taken by the city and sold. Mr. Fuller has been looking up the genealogical record of the family and is convinced that he is an heir.—*Philadelphia Press.*

—It is said that when old Green Hill Protestant Episcopal Church, on the Wicomico River, was built, in 1733, the people drove their cows to the building, milked them, and with the milk mixed the red ochre with which the pews were painted. The color still remains. The effort to restore the old church has taken a practical shape and will be successful if its friends promptly respond to the appeals made in its behalf.—*Baltimore Sun.*

—The man who drives the sprinkling-cart revives the ancient feud, turns on the water with a start, and almost drowns the dude; the man who draws the lager beer awakens from his sloth, and does it so that very nearly all of it is froth; the man who eats bananas drops the peelings on the street, the man who follows after flops along for twenty feet; and, so on, half a hundred things combine to make it clear the heated term, with all it brings of cussedness, is here.—*Chicago Tribune.*

—A few days ago a Watervliet, (N. Y.) farmer was induced by a stranger to act as agent for a wire fence, signing what he was told was an agent's certificate. Soon after two men visited him and showed him a paper, the one he had signed. It was a contract to purchase $5,000 worth of wire. He invited the men into his barn, where he snatched the paper from the hands of the one that held it and drove both from the premises with a pitchfork.—*Troy Times.*

—One of the neatest retorts ever made in Cambridge, Mass.—not a bad soil for good things—was a brief response lately given by a young lady to an undergraduate, who offered her, with some hesitation, his seat in the horse-car. She got in with an elder companion. The car was crowded, and two young men sat near. One gave his seat at once to the elder lady; the other kept his place. His friend asked him—disguising it, however, in German—why he did not give his place to the young lady. "Because she is not pretty enough." After a little reflection, however, he, too, rose and surrendered his seat. The young lady took it, and thanked him—in German—*N. Y. Tribune.*

SCORPIONS IN MEXICO.

Dark Victims Preferred to Fair Ones—Stinging at Midday.

The most common of these pests are the scorpions—alcarans—for they become hale and hearty grandparents within twenty-four hours, and their numerous progeny are forever darting everywhere with inconceivable rapidity, their tails, which hold the sting, ready to fly up at an instant's warning. They are in the wall, between the bricks of the floor, lurking within your garments. Turn up a corner of the rug or the tablecloth and you disturb an interesting family of them; pick up your shoes in the morning and out they flop; in short, every article you touch must be treated like a dose of medicine—"to be well shaken before taken." The common variety hereabout are about three inches long, and the yellowish-brown ones are considered most poisonous. In Durango they are black and so alarmingly numerous that the authorities offer rewards—so much per tail—to the boys for killing them. Their sting is usually fatal to a child and more or less severe in its effects on adults, according to the state of the system. Some have been known to recover after remaining for eight days foaming at the mouth in convulsions and with stomach swollen as in dropsy; others, by prompt and energetic treatment, do not suffer much. The favorite remedies are brandy, taken in sufficient doses to stupefy the patient, gulacum, ammonia and boiled silk. It is said that scorpions have the poor taste to prefer dark people to fair ones, and that their sting is most to be apprehended at midday. My irrepressible Betsy has become expert in catching them with lassos of thread, after which we suspend them, head downward, in bottles of alcohol, to send to microscopically inclined friends at the North. The Indians eat them, after extracting the sting—as delightful a morceau, no doubt, as crabs, clams, frogs, snails and similar delicacies of civilization; but I beg to be excused from rendering other than hearsay testimony on the subject.—*Fannie B. Ward, in San Francisco Sunday Chronicle.*

"Wait Awile, Girls."

When a man chooses the profession of law he does not expect to be a musician and a journalist also; he knows that if he would succeed he must devote himself to the one chosen calling. When a woman marries she realizes that in order to reach the lofty heights of wife and motherhood she must sacrifice lesser aims. She must willing to lay aside the delightful occupations that make her girlhood pleasant: she must know that from the hour when the baby is laid in the little cradle, dressed with loving forethought, to that darker hour when the mature man lies down in his last sleep, that she will give full meaning to the words 'constant care' that her mind, once unfettered, will be at liberty no more, but is bound by ties stronger than life or death to those who have come to her from out the great unknown.

Wait awhile, girls; think it all over before you promise to become wives—to take these duties and burdens upon you. Sweet and satisfying as are the obligations of wife and mother, they are not to be taken lightly. A husband must not be looked upon as a sort of perpetual beau; and children as extremely uncertain and improbable adjuncts. Unless, like Wilhelm Meister, your apprenticeship ended, you reach out of yourself and ask for larger duties, for a wider field of labor, you had better stay at home with father and mother, dignifying the relation of daughter, filling the old established home with mild radiance, which would seem but a dim light in a new one.

Pearls of Thought.

Friendship is not to be bought at a fair.

Willows are weak, yet they bind other wood.

Never was a sincere word utterly lost, never a magnanimity fell to the ground; there is some heart always to greet and accept it unexpectedly.

The vain abhor the vain, but the gentle and unassuming love one another. It is the effect of sympathy in the latter, the want of it by the former.

Do you think of one falsity as harmless, and another as slight, and another as unintended? Cast them all aside; they may be slight and accidental, but they are ugly soot from the smoke of the pit for all that.

Remember if thou marry for beauty, thou bindest thyself all thy life for that which perchance will neither last nor please thee one year; and when thou hast it, it will be to thee of no price at all.

To revenge one's self is to confess that one has been wounded, but it is not the part of a noble mind to be wounded by an injury; a great mind and one which is conscious of its own true worth, does not avenge an injury because it does not feel it.

The sphere of our affections is one in which we are very apt to expect too much from others, and thus to cause bitterness and often estrangement. Where we love we naturally crave to be loved; but this craving, if not regulated by reason, is very likely to blossom into a selfish oppression.

Two Singular Lunatics.

A lunatic at the Morris Plains Asylum was mute for five years. Even the physicians thought he had lost the power of speech. One day two of his fingers were mangled in a washing machine. To the astonishment of everybody who heard him he exclaimed: "By the great and jumping Moses, a devil is better than an inventor." That was three years ago, and he has not spoken since. Another patient, a boy in the same institution, is a lightning calculator. The most intricate problems are solved by him in fractions of a minute. The boy believes that his head is filled with little blocks with figures upon them, and they instantly fall into different positions and work out the problems. He thinks his brain in fact, is a multiplication table. His insanity seems pardonable, for only a few sane men can compete with him as a mathamatician. Every day he soaks his head in water to prevent the blocks from rattling, and occasionally he begs for oil to put into his ears so that the imaginary squares will slip upon each other more easily.

Business Notes.

An agreement without consideration is void.

The acts of one partner bind all others.

Contracts made on Sunday cannot be enforced.

The law compels no one to do impossibilities.

A receipt for money paid is not legally conclusive.

A contract made with a minor is invalid.

Signatures made with a lead pencil are good in law.

Agents are responsible to their principals for their errors.

A contract with a lunatic is void.

All Ages and Both Sexes.

An insane physician has just been discovered in Boston. He told his patients that they were not very sick, and went to work and cured them of what little did ail them in very quick time. He has been sent to the asylum.

"Pa," said Johnny, at the circus the other day, "if one of those Arabs should fall down and knock all of his teeth out would he talk gum Arabic?"

A New York woman set a speckled hen on a dried apple pie, and in three weeks the hen hatched fourteen nightmares with blue ribbons on their tails.

"So the misis is to be married, eh?" said the gardener to the cook. "Yis; and in illigant stoyle, too. She's goin' fer to have duress thray yarruds long and four pall-bearers ter kerry it."

The spring chicken was on deck. Old bachelor Crusty remarked that it was as tough as leather. "Shoo leather, I suppose," remarked the boarder who never laughs.

A stranger was asked if he was not afraid to sleep in the ghost chamber. He was not. In the morning he was asked if he had seen any ghosts. "I did. And I laid a subscription list before him, asking him to help our base ball club along. I did not see him again."

"In the new Bible that pa brought home," said Bobby, joining the conversation, "sister is four years younger than she was in the old one. Is that what is meant by the revised edition?"

Nasby on the Situation.

Toledo Blade.

It hez bin the rool uv my life never to question to the doins uv the dispenser uv patronage, but my outraged soul must cry out at this, or bust. Wuz it to hev a President go to the Adirondax afore singin my comishn that I rallied the Dimokris-y uv Injeany, votin there twict myself and contribbitin uv my slender meens to a fund fur tranportin Kentuckians in to the State? Wuz it fur this that I organized the groseries and seen to the distribushen uv liker in Southern Injeany and Ohio? Wuz it fur this that fur forty years, in season and out of season, I hev labored for Dimocrisy? Wuz it fur this I crossed Lake Erie in an open boat to avoid servin in the Federal army, and afterward permitted myself to be drafted in the Confedrasy? Ef I hev no voice in the Administration, my suffrins and sacrifices hev each a tongue, And yet the President—a Dimocratic President—goes to the Adrondax, and leaves my petishn unheeded. Wood that we hed reversed the tikket and made Hendrix President and Cleveland vice.

An Advertiser's Novel Expedient.

One of the largest advertisers in New York says: We once hit upon a novel expedient for ascertaining over what area our advertisements were read. We published a couple of half-column "ads" in which we purposely misstated halfa dozen historical facts. In less than a week we received between 300 and 400 letters from all parts of the country from people wishing to know why on earth we kept such a consummate fool who knew so little about American history. The letters kept pouring in for three or four weeks. It was one of the best paying "ads" we ever printed. But we did not repeat our experiment because the one I refer to served its purpose. Our letters came from schoolboys, girls, professors, clergymen, school-teachers and in two instances from eminent men who have a world-wide reputation. I was more impressed with the value of advertising from those two advertisements than I should have been by volumes of theories.—*New York Sun.*

Mosels for Sunday Contemplation.

It is easier to suppress the first desire than to satisfy all that follow it.

He is the happiest, be he king or peasant, who finds peace in his home.

When you bury an old animosity never mind putting up a tombstone.

One act of beneficence is worth all the abstract sentiment in the world.

Conversation enriches the understanding, but solitude is the school of genius.

Trees in the forest may be barren, but trees in the garden should be fruitful.

Those days are lost in which we do no good; those worse than lost in which we do evil.

NEW ADVERTISEMENTS.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. Reference given when required.

ANDREW J. HARNE.

Oakland, May 19th, 1885.—1 y.

NEW ADVERTISEMENTS.

A Lady's Opinion.

Mrs. Geo. Gilbert, Bryan, Ohio, writes: "DR. S. B. HARTMAN & Co., Columbus, Ohio: I commenced on the fifth bottle of your PERUNA this morning, and should just as soon think of doing without my meals as without my medicine. I have been doctoring for about four years, and kept getting worse all the time and was just giving up in despair when I got one of your books, "The Ills of Life." I was in bed at the time. I read and re-read your book and felt like trying your medicine. My folks thought there was no use in trying anything more, I was too far gone, and might as well make up my mind to die. I told them PERUNA was the medicine I needed, and I intended to try a bottle. It proved a success in breaking the chills, and if it had not done one thing more, I would have been satisfied. But it has done more, and I feel like another person. Everybody that sees me is surprised to see me looking so well, as they all thought I was dying with consumption, and now my own folks have as much to say for the PERUNA as I. I recommend it to everybody I see. There were two of our neighbors in yesterday inquiring about the PERUNA. I gave the one my book to read; told her to bring it back, as I prized it very highly. The other got the name of the PERUNA to send to his son in Chicago. He is a telegraph operator. My disease is something similar to Mrs. Milo Ingram's, though nothing compared to being so bad. There was a lump raised on my collar bone, and it was a long time before it looked like opening. The doctor said he would have to lance it in a few days, but I thought I would attend to that myself, so I put a little fly blister on it and it opened; then I put a poultice on and then salve, and kept the salve on all the time. It got so bad and spread upon my left shoulder, and one place under my left breast. Then there were two places on my head, one near the temple and one back of my ear that was just dreadful. No tongue can tell what I suffered. My head felt so strange sometimes, I thought I was going crazy. Since I have used the PERUNA (I don't use the salve any more) my sores healed up right away. And oh, what a relief it is to get around without chilling and having to suffer with my sores. I feel like letting everybody know all about it."

John Ferguson, Gallitzin, Pa., writes: "Your PERUNA is a good medicine, and we sell lots of it. Will you please send us some more 'Ills of Life,' with a few German."

To Dyspeptics.

The most common signs of **Dyspepsia, or Indigestion,** are an oppression at the stomach, nausea, flatulency, water-brash, heart-burn, vomiting, loss of appetite, and constipation. Dyspeptic patients suffer untold miseries, bodily and mental. They should stimulate the digestion, and secure regular daily action of the bowels, by the use of moderate doses of

Ayer's Pills.

After the bowels are regulated, one of these Pills, taken each day after dinner, is usually all that is required to complete the cure.

AYER'S PILLS are sugar-coated and purely vegetable—a pleasant, entirely safe, and reliable medicine for the cure of **all disorders of the stomach and bowels.** They are the best of all purgatives for family use.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTS.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably expels all blood poisons from the system, enriches and renews the blood, and restores its vitalizing power. It is the best known remedy for **Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin,** as also for all disorders caused by a thin and impoverished, or corrupted, condition of the blood, such as **Rheumatism, Neuralgia, Rheumatic Gout, General Debility, and Scrofulous Catarrh.**

Inflammatory Rheumatism Cured.

"AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years.

A Common Want.

"People air allus askin' you all sorts of questions, and I don't know why I shouldn't," writes Aunt Betsey Allen to *The Christian Union*. "You must know lots of ministers, and we want you to help us find one. Our minister has just gone, and we don't propose to go a candidatin' till every body wants a different man. Our folks ain't very hard to suit, and I think we ought to get somebody right away. We want a young man. Parson Goodrich wasn't very old, but we all got kinder tired of him. It was the same old story all the while—sin, repentence and faith; we want somethin' different, somethin' new. We want real stirrin' sermons that'll warm you right up every Sunday, for our church has got kinder cold. But we don't want a man who is allers preachin' to us as if we was sinners. Our congregation is all good, respectable folks, and don't need that kind of talk. We don't want too young a man, one jest out of the seminary, and full of this new-fangled theology for some of our old folks are mighty stiff on the doctrines. Old Squire Hardman never got over it because Parson Goodrich sed onct that he hoped more would be saved than was lost.

"Our young folks hes bin wanderin' off to the church down to the lower village. They're allers hevin' neck-tie sociables and chicken-pie suppers and missionary tabloods and that makes religion interestin' to young people, you know. Parson Goodrich didn't believe in them things much—leastwise he never helped 'em along any. Now, ef we could only git a young man who would stir 'round lively, and keep somethin' of that kind goin' all the while, it would build us up, don't you see? Our Sunday school is kinder run down too, and our minister jest wants to tackle that; and the prayer meetin's are purty thin. But we want a man who won't git all beat out and discouraged. Parson Goodrich used to look down so in the mouth sometimes in prayer meetin's, when the brethren didn't eckerpy the time much, that folks got kinder out of patience with him.

"'Twon't do for the minister not to be married; for, sence our young men got to goin' off to the city so, there's lots of girls left, and 'twould be sure to make hard feelin's if he married one and didn't the others, and they never'd forgive him ef he went out of the parish for a wife. Besides, our Sewing Society and our female prayer meetin' hain't done much lately and we want a minister's wife to start 'em up ag'in. Mis' Goodrich wa'nt what you would call a real drivin' woman; she was allers kinder sickly. Some folks sed 'twas the house they lived in; but, law! them edicated folks are allers talkin' about drains and sich. The houce did stan' in a holler, and the grave-yard was on a side hill jest above the well, but, merciful man! everybody can't think jest where they'll hev their wells. That was the only house in the village where the minister could live, and they allers had lived there. She had a spell of typhoid fever one winter, and her little boy died of diphtheria that spring, and she never chirked up afterwards. But, bein' a minister's wife so, seems to me ef she hed ought to be cheerful end resigned ter Providence. She allers kep' a girl for as much as three months every time she hed a baby (and she hed five in the ten years they lived there,) and allers put out her washin', so she didn't hev a very hard time. But she never did much in the parish, so we hope the next minister's wife will be one of the go-ahead kind.

"I most forgot to say that ef we ken git a real smart man, ef everybody likes him, especially Squire Hardman, we will pay him five hundred dollars a year, jest as fast as we ken collect it. They was rather slow about paying Parson Goodrich, after Squire Hardman got down on him, for he wouldn't pay his pew rent punctual cos he didn't like the minister. Folks sed that when Mis' Goodrich's mother died, down in Conn., he had to borrow five dollars of one of the deacons to pay their carfare down to the funeral. But, law! everybody knows ministers ain't no hands to manage money-matters. I don't know as there is anythin' more we want, only he ought to be kinder good-lookin' and not wear a shabby coat. I declare I used to get real ashamed of Parson Goodrich's overcoat and Mis' Goodrich's bonnet to Conference and fellowship meetings.

"Oh! there is one thing more. We don't want a mad that's too rabid on the temperance question, for Squire Hardman rents a store for a saloon, and he's awful techy about it. Our church is *strong* temperance, so we don't need preachin' to about it. Besides, it makes trouble with the votes, and Squire Hardman has a hankerin' after the legislatur.

"Our folks ain't pertikeler, you ste, and I think we oughter git suited in a few weeks. They say there's lots of ministers lookin' fur places. Squire Hardman sez the woods is full of 'em.

"Hopin' to git a letter in a few days sayin' that you have got just the man for us.

"Yours in the love of the church."

For bilious fevers and malaaial disorder, use Ayer's Ague Cure. Taken according to directions, its success is guaranteed.

Despised Because they are Cheap.

"Style is everything nowadays," said a Market street merchant to a Pittsburg *Dispatch* reporter yesterday, as he ordered a street arab out of his store and reprimanded a clerk for throwing a piece on the floor. "Yes, style is everything," he continued. "We have departed from the inexpensive and simple customs of our fathers. We are democrats no longer; we are aristocrats, whether we have money to carry out our pretensions or not. The utility of a thing is not taken into consideration in our purchases. Look at the calico on that counter. It is beautiful, makes handsome dresses and wears well, but scarcely any one buys it. Why? Because the price is only 8 or 10 cents a yard. There can be no other reason. At that rate a dress-pattern would cost about $1. What lady would be caught wearing a dress chat cost only $1? She would feel everlastingly disgraced. But the price up to 75 cents or $1 a yard, and they would all want it. The high price would make it fashionable, and there would be such a rush for it we would be troubled to supply the demand.

"Do you ever talk to your wife in that style?" inquired the reporter.

"No; but she is like the rest of them," he replied, tartly. "When I was a boy," he resumed, "rabbits were so plentiful as to be a drug on the market. They could be bought for 5 and 10 cents apiece. At that price nobody would eat them. Here in Pittsburg, where they command from 50 to 60 cents a pair, they are considered a great delicacy, and everybody eats rabbit. What makes the difference? The price. What else could it be? There is no difference in the animal, for rabbit is rabbit the world over."

After pausing a moment and glancing sharply at his clerks, the merchant continued:

"Beef liver is considered a plebeian article of diet, solely because it is dirt cheap. If by chance any person buys it, it is tucked away in the bottom of the basket, so as to be secured from prying eyes. The average man or woman would feel disgraced if it were kown they had eaten liver. Raise the price for liver to 15 or 25 cents a pound, and there would be a rush for it. It would be the fashionable dish. Ladies would serve it at their teas, and pass it around at their social gatherings. But so long as it can be had for the asking it will remain the despised thing it is. And so with many other things. You see how it is; style and price are everything, utility is nowhere. The man or woman who don't throw money away is looked down upon. If they have none of their own to squander they must squander somebody else's.

"I could tell you more of the same sort," he added, "but it is my supper hour," saying which he directed the cashier to turn out one of the two gaslights he was using, and walked off toward home, leaving the reporter to draw a moral from the discourse he had listened to, which task is submitted to the reader as the quickest way out of the difficulty.

An Important Discovery.

The most important Discovery is that which brings the most good to the greatest number. Dr. King's New Discovery for Consumption, Cough's, and Colds, will preserve the health and save life, and is a priceless boon to the afflicted. Not only does it possitively cure Consumption, but Coughs, Colds, Bronchitis, Asthma, Hoarseness, and all affections of the Throat, Chest, and Lungs, yield at once to its wonderful curative powers. If you doubt this, get a Trial Bottle Free, at Nydegger's Drug store

Terrible Loss of Life.

WASHINGTON, D. C., August 27.—Details of the destruction in Canton, China, and vicinity by the recent great rain storm there have been received by private parties in this city. The flood was the most serious which has visited Canton in thirty years. More than 10,000 people lost their lives and a far greater number are left in a starving condition. Entire villages were engulfed and the rice and silk crops in the vicinity were almost ruined. The price of rice has been raised 18 percent in consequence of the loss of the crop. The rain fell the latter part of June, filling and overflowing all the rivers. Many of the streets of Canton were flooded for over a week. At Sez Ni City the water broke through the city wall. It is reported that several thousand people were drowned in that place. The embankments of the river were broken in numerous places and the waters swept across the surrounding country, carrying everything before it.

A foreigner, who was an eye witness of the scene of the devastation, reports that one night the boat he was on anchored near a bamboo grove. By morning the water had risen to the tops of the bamboos. At other points it rose as high as forty feet during the night time. The inhabitants fled from the villages and camped on the hillsides. At Kun In, a market place situated near an embankment of one of the streams connected with the river, which brings water from the north and west rivers, the majority of the inhabitants were drowned by the water breaking through the embankment. Some escaped to a piece of rising ground in the neighborhood, but the water continued to rise and gradually overtopped the elevation, drowning those who stood upon it. Seventeen Chinese graduates in Canton hearing of the distress and suffering prevalent in their native villages, took passage on a boat with a view to proceeding home to render what assistance they could. On the way the boat was capsized, and all who were on it were drowned.

In some places parents tied their children on the high branches of trees whilst they instituted measures for their general safety. The trees were washed up by the roots, and the heartrending cries of the children were silenced in the surging water. The body of a bride dressed in her bridal robes was found floating in the river at Canton. A large tub was also seen. It was picked up and found to contain a boy and a girl. With them was found a paper stating their names and the day and hour of their birth. The parents had instituted this means to save the lives of their offspring. The writer added that the suffering which thousands are enduring is heartrending, parents replying with tears in their eyes to their children's requests for food that they have none. The people are obliged to use the filthiest water, and this, added to the disease which will ensue upon the subsidence of the waters, will greatly aggravate the horrors of the situation. Meantime all that is being done by the inhabitants to abate their misery is the beating of gongs, burning of incense, and howling of prayers to idols.

He Went.

Washington Cor. N. Y. Sun.

Mr. Montgomery, the new commissioner of patents, while engaged in "turning the "rascals out," decapitated a messenger in his bureau who had been in office for several years without doing much of anything to earn his salary. Upon receiving his discharge he made a great ado over it, and insisted that the axe had fallen on the wrong neck. He was a Democrat, he said, and had always been a Democrat, had voted the ticket straight at every election, and stood by his party even in the face of discharge by a Republican administration. Mr. Montgomery looked him over and then called for the letters of recommendation upon which he was originally appointed.

"You are a Democrat, are you?"

"Yes, sir," replied the man.

"And always have been?"

"Always."

"Then you are discharged for falsehood and for obtaining an office under false pretences. In this application for appointment filed five years ago you state that you are a Republican, no one but Republicans endorse you, and every one of them commend you as a faithful member of that party. You can go."

There are a good many department clerks turning up who have always been Democrats, but this example has assisted to make such pretensions unpopular.

The Republican.

A HAMMOCK HORROR.

Softly she is singing,
Sweet and low,
In a hammock swinging
To and fro.

Just a yard above her
Hangs a worm,
Wriggling under cover—
See him squirm!

Now the maid sings louder,
Strong and high;
Nothing doth o'ercloud her
Life's bright sky.

Soon the worm gets weary,
Loses grip;
Like a bummer beery,
Down doth slip.

Maiden's mouth is open—
In a worm goes!
! ! ! *** +++ ???
Just at present no pen
Tells her woes.

Still the hammock's swinging
Overhead;
Hushed the maiden's singing—
Worm is dead!

DIAMOND DECEPTIONS.

Some of the Tricks Resorted to by Swindlers.

Persons Not Experts Taken in by Numerous Clever Devices—Some Famous Cases—Other Interesting Talk About Gems and Their Wearers.

"Is there a large amount of imposition at present in your business?" asked a *Tribune* reporter of a diamond dealer.

"In an article where not one in a hundred has any knowledge whatever, and not more than one in 10,000 is a good judge, there must necessarily be a good deal of imposition. The methods of cheating may be divided into three classes. The first and most common is when flawed, imperfect, or off-colored diamonds are sold for first-water, flawless gems. This takes place every day and every hour of the day. Those who are the principal sufferers are would-be smart persons who snatch at a so-called bargain and deserve what they get. If people would remember that fine diamonds are the easiest things to sell in the world, that any jeweler who deals in gems is always willing to purchase at a small reduction from current rates, they would not be bitten so often. The next two methods are swindling pure and simple. There are several precious stones which are of an entirely different composition to the diamond, but resemble that gem so closely that none but experts can distinguish them. Even experts have often to test these before they can discover the imposition. The basis of the diamond, as almost everybody knows, is carbon. The basis of the stones I now allude to is alumina, and they are known under the generic term 'carodums.' The principal stones substituted and sold for diamonds are the white sapphire, white topaz and the zircon or jargon. White sapphire and topaz are worth from $2 to $8 a carat, zircon much less. Bushels of these stones have been and are still sold for diamonds. They can be at once identified by experts for their inferior hardness and difference in specific gravity. The specific gravity of the diamond is 3.9, that of white sapphires and topaz is 3.5, zircon 4.4. The last method of swindling is when imitation stones made in various ways are sold for the genuine article. More of this is carried on than you would think possible. In Europe, especially in Paris, the art of making fine imitations of diamonds has been brought to perfection. Many of these, of course, are sold for what they are, many are made to order for wealthy people who in temporary difficulties wish to raise money on their diamonds, and have these stones set in the same manner to wear while the real article is out of their reach, but large quantities are set in fine style and sold for first-water diamonds. A dealer or jeweler is seldom victimized in this way, except when one or two stones are mixed with a very large parcel."

"Have there been any very successful frauds in your line lately?"

"There is always something going on, but the most extensive and successful swindle in which I as well as a great many others suffered first came into operation about two years ago. It is the coating system. By saturating off-colored flawless stones—worth about $25 a carat—in a peculiar solution it gave them the appearance of first-water goods, worth $100 a carat. The solution soon wears off, or it may be removed by a good application of hot soap suds. But the trade was quite unacquainted with this method, and before we got to the bottom of it the sharpers had made an enormous pile. This is still being practiced at present to a small extent, principally for the working of pawnbrokers."

"Can you call to mind any well-planned gem confidence operations that have not been made public?"

"Did you ever hear of the clever dodge worked in London in 1881 by one of the best-known 'con' practitioners of New York? He went to London and purchased in Hatton Garden a magnificent stone weighing about twelve and a half carats. He paid between $7,000 and $8,000 for it. He then made his way to Paris and put the stone in the hands of the best maker of paste goods and ordered thirty fac-similes of it. He then had the whole of them mounted in rings of exactly the same design. In London are many large pawnbrokers who lend sums of $5,000 and upwards for short terms—fourteen days or so—at one-half or three-fourth per cent. He left the original ring with each of them in turn, took it out again, and repledged it two or three times until they were well acquainted with him and the gem. One Saturday, which is their busy day, he rushed around to the whole collection and left one of the imitations for sums ranging from $4,000 to $6,000. He placed twenty-eight in all. They possibly did not examine them closely, as he was so well known and his appearances and manners were calculated to ward off suspicion. The shrewdest pawnbrokers in London were taken in by this schemer. The Attenboroughs (this family have about eight establishhad five of these rings, the Russells had three, and so forth. A much cleverer though not such an extensive scheme was worked in Paris in 1878 by a notorious French 'chevalier de industrie.' He had a magnificent stone worth 30,000 francs, of which he also had an imitation made and set in the same manner as the original. He then went to the most extensive retail dealer there, and, handing him the genuine gem in a ring, asked him how much he would charge to reset it in a combination setting, or in a setting where the stone could be used as a ring, scarfpin and stud. The jeweler named an amount which he said was much more than he wished to spend, as the stone was only an imitation and not worth the outlay. The jeweler was astonished to hear that the fine stone he had in his hand was an imitation, and testing it slightly, assured the owner that it was a real diamond. At this the sharper laughed and stated he had bought it in Baden Baden from a gambler out of luck for 250 francs and that the jeweler must be mistaken. He willingly left it until next day for further testing. When he came the following day the jeweler assured him it was a real diamond (as he well knew) and to back his opinion offered to give him 22,500 francs for it. The sharper still asserted that the jeweler was mistaken, but agreed to sell it for that price on condition that he would not be held responsible if it was afterwards discovered to be an imitation. This was agreed to and a document was drawn up by which the jeweler agreed to give 22,500 francs for the ring and to hold the vender, who had bought it and still believed it to be imitation, not responsible after the sale. The transaction was concluded in the presence of witnesses. Just before the money was paid over and the ring delivered, the sharper skillfully substituted the imitation and palmed the diamond. In a few days afterwards, when the fraud was discovered, although the schemer was still on the spot, the dupe had no remedy, as, in the document he had signed, he had agreed to purchase the stone whether imitation or not. I could tell you many well-verified anecdotes of this description, but they are all variations of one plan. After confidence is inspired a sudden skillful stroke is played which is generally undiscovered until it is too late."

"Is it a fact that stones having all the properties of the diamond have been produced by scientific means?"

"The first effort to produce diamonds dates back to the middle ages. It must be admitted, however, that during the last half century the systematic experiments of many scientists, in France especially, have been awarded with some amount of success. Such great minds as Sir David Brewster, De Latour, Gannal, Depretz, etc., have given themselves to this exciting pursuit. The scope and method of their experiments are too involved for a brief explanation. It is undeniable from the experiments of Depretz and De Chancourtois (which are the most recent) that diamonds can be produced by the action of strong electric currents and intense heat. The gems produced so far have been of the very smallest size; the only problem now is whether gems of merchantable dimensions can be manufactured in the same way."

A few days ago a *Tribune* reporter renewed his acquaintance with a member of one of the largest New York firms who import precious stones. After some general conversation the talked veered around to the present condition of the gem business. "How have you found trade this trip?" was asked.

"Tolerably good," replied the importer.

"What are the quotations for diamonds now. Are they higher or lower than in former years?"

"That all depends on the grade. The tendency for the last few years seems to be as follows: For old mine stones or fine specimens of other kinds the price is almost stationary, or if there is any change it is in an upward direction. The flawed or imperfect goods are continually going down, and from the present outlook it is hard to say what will be the ultimate value of the stuff."

"I have heard a great deal of old mine stones; what does the term mean?"

"An old mine stone originally was a gem of peculiar color and especially fine fire found in the Golconda district. Now the term is much broader. It embraces all stones of the bluish white cast so prized by connoisseurs. Many called old mine now were found in Brazil, some fine specimens even in Africa. These gems, wherever found, always command the highest price; that is to say for white stones; of course, a rarity in the shape of a fine black or rose-colored diamond always brings an extraordinary price."

"What is the present selling price of fine stones?"

"Storekeepers generally ask between $100 and $125 for flawless carat stones of the first water. Our carat is the same as the English, and in ordinary troy weight is 3.174 grains. The price I have named is that usually obtained for average fine stones, but there are always especially fine gems in the market which bring almost double that amount. I have at present a paper of carat stones that I can not sell under $175 a carat net. To make the average profit on these goods the storekeeper will have to get from $220 to $230 per carat for them."

"How do you compute the value of stones above a carat in weight?"

"The old rule formulated by Tavernier two centuries ago was 'that the prices of two diamonds are proportioned to the square of their weight.' According to this, if a one carat stone of the first water is worth $100, a two carat would be worth $400, and so on. This rule, which was quite correct at that time, would now be very misleading. It assigns to diamonds a much higher price than at present. Here is the list we go by now, prepared during the last ten years by the best authorities in America:

¼ carat..	$ 35@.....		3 carat..	$ 500@	550
½ carat..	60@.....		3¼ carat..	600@	650
¾ carat..	100@	125	3½ carat..	700@	750
1 carat..	150@	175	3¾ carat..	800@	850
1¼ carat..	200@	225	4 carat..	900@	950
1½ carat..	250@	275	4¼ carat..	1,000@	1,050
1¾ carat..	300@	325	4½ carat..	1,100@	1,150
2 carat..	350@	375	4¾ carat..	1,200@	1,250
2¼ carat..	400@	425	5 carat..	1,300@	1,400
2½ carat..	450@	500			

"You see by the last example the five-carat stone, which would be worth, according to Tavernier's formula, taking the carat standard at $100, 100 x 5 x 5=$2,500, is now only listed between $1,300 and $1,400."

"What is the price of flawed and off-colored stones?"

"That is rather a hard conundrum to answer. There are so many graduations that each large parcel is taken on its merits and disposed of at a special price. If we have time to sort them properly and can strike the right customers we can often make much larger profits on these goods than on the finer varieties. But it's a risky business, as after a large shipment from Africa they go down with a rush. I have sold stuff as low as $9.50 a carat and up to $45. Large stones, from four to ten carats, always fetch a fair price, as there is a class of people about who will buy a big diamond even if it looks like a fragment of a soda-water bottle. All they want is to wear a large genuine diamond; the quality is quite a matter of indifference to them."

"Who are the largest buyers of this class of goods?"

"We generally sell ours to pawnbrokers and small dealers, who have them set in handsome mountings, either alone or in combination with fancy stones, for gamblers or the sporting trade, or where there is a large parcel of almost uniform size, say from one-quarter to three-quarter carat, we sell them to setters, who mount them in common gold in a showy manner, sometimes a gross or more of one pattern, and they are distributed broadcast throughout the country and worked off at holiday times. There is a large profit in these goods; they average from 150 to 200 per cent."—*Chicago Tribune.*

THE THYROID GLAND.

Affections to Which This Gland is Subject—Goitre, Etc.

This is situated on both sides of the trachea (windpipe), near its top, the two parts being joined by a so-called isthmus just below "Adam's apple." It is relatively much larger in infants than in adults. It averages about one and a half inches in length, and is about half as thick as long. It is larger in females than males. It is sometimes wanting, and in the aged it sometimes wholly degenerates.

While secreting glands have ducts, through which they empty their secretions, either out of the body or into some cavity within, the thyroid and some others—the spleen, for instance—are *ductless.* They simply withdraw some elements from the blood, effect a chemical change on them, and then give them back, through the absorbents, into the circulation.

Among the affections to which these glands are liable is *goitre,* in which they become enlarged. The enlargement may be slight, or it may be so great as to reach upward to the ears, and extend down to the breast. One case is recorded in which it reached below the thighs! In some parts of the world the affection is quite rare; in others quite common, though in the latter it is largely confined to certain districts.

In England its prevalence in Derbyshire has given it the name of the "Derbyshire neck." It markedly connects itself with some mountains, and yet it occurs in some level tracts. It is generally thought to be due to something in the drinking water—some say magnesian limestone, but it is more probably due to some metallic substance.

In many cases the goitre may be merely a deformity. In others it may obstruct the breathing by pressing against the windpipe; or may cause headache, dizziness, fullness of the head, singing in the ears, by hindering the circulation in the vessels of the neck; or it may interfere with swallowing, by pressing on the œsophagus (gullet).

It is quite frequently associated with *cretinism*—that peculiar idiocy in which the brain ceases to grow, and the whole body becomes stunted and hideously deformed, but the latter is often found without the former. Doubtless each is due to a common cause.

The most effective treatment consists in the removal of the patient to another locality.—*Youth's Companion.*

SELLING FOR PROFIT.

The Hebrew Clothing Gentleman Who was Cured of Selling Goods Below Cost.

There is a Hebrew dealer in clothing in Bloomington who has recently been cured of selling goods for less than cost. During the very hot weather he was visited by Wallace Blackwart, who wished to buy a seersucker coat and vest.

"Dere vash voust der ardicle you vash need," said Moses, "und he vash so sheap like dirt."

"How much are they worth?" asked Blackwart.

"Vell, I tole you dot," Moses replied, speaking very confidentially, "He vas vort five tollar——"

"Great horned spoon!" snorted Blackwart, "I can buy the same goods at a half dozen places for three dollars."

"Vell, you see I vash not tole you all apond dot. He vas vort five tollar, but I vash sold him mit you mit thri tollar. Dot was less than he vash cosht mit der wholesale."

"So you will lose money on it, if I buy it?" asked Blackwart.

"Yah, dot vash how I vas!" Moses replied.

"Well, then, I will buy one around at Spreckel's place."

"Vy you do dot?" asked Moses, greatly amazed.

"Well, Moses, I am a warm friend of yours and don't want to see you lose money. I will go around to Spreckel's and buy a coat and vest from him. I don't like him very well, and here is a chance to get even," and Blackwart was gone before Moses caught his breath. The Hebrew clothier would not offer a customer anything at a figure pretending to be less than cost now for forty-three cents cash in hand and a promise of a life interest in the land that is fairer than day. He thinks the public has penetrated the gauzy swindle he has practiced so long and successfully.—*Through Mail.*

—During all seasons of the year, it is said, the earth at Yakutsk, Siberia, is frozen from the depth of fifty feet to that of about 1,000 feet.

LONDON SEWAGE.

What It Is Estimated to Be Worth, and Plans for Its Disposal Considered.

It has been computed that the annual value of London sewage amounts to 8s. 9d. per individual, and, estimating the population at 4,000,000 persons, the total value would be more than $8,000,000 per annum. It would thus appear, on the face of it, that in some way or other this sum should be saved for the city. There are two ways of deriving profit from sewage: One is by the application of sewage to land, as, for instance, is done at Pullman, Ill., or from treatment by chemical processes. Precedents for the first plan exist in Great Britain, the more notable ones being in Edinburgh and Doncaster; but from neither of these could the commissioners derive sufficient encouragement to infer that the pumping and other expenses would not cancel all of the possible profits. The second plan is regarded as yet more unfavorably, for the "available material value of the sewage is at present too small to admit of obtaining from it any product which can be sold at anything like the cost of its production."

With reference to the plans for the treatment of the metropolitan sewage, four possible schemes are presented and analyzed. These are broad irrigation, filtration through land, processes of deposition or precipitation, and precipitation supplemented by application to land. The testimony seems to be quite decisive and uniform that for every 100 persons one acre would be needed in broad irrigation, and that the sewage should be strained or purified before permitted to finally pass upon the surface of the land. When it is remembered that 40,000 acres are equal to about sixty-two square miles, the impracticability of this scheme is apparent, for no such farming area can be found in the neighborhood of London.

The method which meets with the greatest favor from the commission is the last one mentioned. The chief advantage is that the sewage is thereby much more thoroughly deprived of its noxious qualities. The process is found in actual use in Birmingham, and is described as follows: "The sewage is treated with lime and allowed to deposit in a series of large tanks; the clarified liquid is then passed through porous land, after which it runs into the river, being found perfectly innocuous. The sludge deposit, which amounts to 330 tons a day, is allowed to run in its semi-fluid state upon a portion of the land laid out to receive it, after which it is dug into the ground, which is covered with soil, planted, cropped, and used for filtration. One acre per week is allotted for this purpose, and the land so used remains for three years before sludge is put upon it again. Thus the quantity of land required for the disposal of the sludge would be 156 acres." Such a system meets the chief difficulties. It does not require the large area demanded for broad irrigation, and it clarifies the filth which is now polluting the Thames, even up to the bridge. The history of London's sewerage experiment conclusively shows that a city has not solved the problem when it has even devised a method for drawing off its drainage. The termini must be considered, as well as the lines of transportation.—*Bradstreet's Reports.*

HAD MONEY.

How Prosperity Affects the Average Colored Man.

"I'spz a ter see er man, 'cause he's got money, think hisse'f better'n uder folks," said old Martin Smith, the shuck-collar maker, addressing a prominent citizen.

"What's the matter; some man thinking himself better than you are?"

"Yas, sah, dat blamed Tony Sevier, whut runs de gin down on de Haywood place, passed me jes' now an hill up his head like one o' dese heah crab apple shoats. He wouldn' speak ter me. Reckon he's dun forgot de time when he chopped wood down in de swamp. He wuz er powerful fren'ly man in dem times."

"What's the matter with him now?"

"Oh, he's got money, sah, an' is too proud ter speak ter er po' man, like myse'f is. I'se gwine ter figger er roun' an' see ef I kain' hab him turned outen de church, an' I'se got de Bible on my side, 'case it say er rich man an' er camel kain't go ter Heaben nohow. When I had money I didn' hol' myse'f erbove uder folks. O, sah, I tuck ebery 'tunity o' showin' po' folks dat I wuz dar fren'. O, I wan't proud when I had money."

"So you were once well off, were you?"

"Yas, sah, I wuz. I had money."

"What became of it?"

"Los' it, sah."

"How?"

"Los' it outen my pocket."

"How much had you?"

"Lemme see. I hed er fi' dollar bill, two quarters an' some dimes, sah; but I wan't proud, 'cose I doan b'lebe in er rich pusson grindin' er po' man down."—*Arkansaw Traveler.*

—It doesn't make any difference how handsome or how stylish a young man is, he may have been an object of admiration to every woman in the horse-car; but the instant a girl gets in with a brown paper parcel labeled "fine millinery" on the outside, his charm is gone. No woman can resist the superior charm of that delightful mystery.—*Somerville Journal.*

—A girl ten years of age has reached San Francisco safely after having traveled alone from Harwich, England, via Liverpool, Philadelphia, Chicago and Omaha. She tells of nothing but kindness experienced at the hands of the officials all through her long journey.—*San Francisco Chronicle.*

—A local set of Baptists called "the Koonites," with one association, five churches and 130 members has been founded in Florida. They hold that the body of Christ was unlike ours.—*Christian Union.*

—The editor of the Montgomery (Orange County, N. Y.,) *Standard* reports his discovery that the Horseshoe Falls at Niagara have worn away more than fifty feet in the past thirteen years.

FEASTS AND FASTS.

The Unaccountable Scarcity of Feast Day in the United States Compared With the Days of Rejoicing Observed by Other Nations.

There is an inherent love of festival and feasts in human nature, a desire to express joy, and that not in solitude, but surrounded by sympathetic friends; a desire to experience pleasure, and to experience it unselfishly, shared by everyone within reach; a desire, possibly, to make ourselves one in our joy with all the surrounding human race. It is certain, at any rate, that public festivals do that work for the time being; for as long ago as the period of the celebration of the Greek games, which really had their origin far back in mythical times, the Olympic games kept alive a common interest between all the Greek States, and had much to do with the existence and preservation of a national feeling, while so important were they deemed in this regard that the year of their revival, some eight hundred years before our era, was used as a chronological period from which to date.

The Romans had fixed, movable and occasional feasts; the Egyptians made them of such moment that it is recorded of one that nearly three-quarters of a million of men and women were present, while the East Indians still make their festivals quite beyond the usual range of our imaginations with numbers and with treasure. The Jews had an immense variety of feasts, all of a sacred nature, among them being the Sabbath, the Passover, the Pentecost, the Feast of Trumpets—marking a day on which every one's doom for eternity was supposed to be set down, although with mitigating possibilities, in the case of disastrous doom, should repentance take place before death—the Feast of Tabernacles, the Purim and the Dedication; while the Christian Church has, with others, its Advent, Christmas, Epiphany, Easter and Whitsuntide, all joyous spiritual feasts.

But just as strong a tendency with humanity as that to festivals is that to fasts. Indeed, with many, there may be a preference as to the latter, owing to a feeling that after duly keeping fast one can enjoy more freely the riotous living of feasts. The Jews had at first but one fast, that of the Atonement, which they kept with great severity, although later the Pharisees were wont to fast every Monday and Thursday. The Egyptians, Phœnicians and Assyrians all kept their fasts and the Mohammedans keep the whole of the ninth month, Ramadan, most strictly, neither eating nor drinking, however great their suffering, from sunrise till starshine. The Sibylline books ordered a fast to be kept every fifth year in honor of Ceres. And with the Holy Orthodox Church of the East, the Fast of the Mother of God begins the 1st of August and lasts fourteen days, that Church in especial keeping two hundred and sixty-six days of the year as days of fast. Every one, meanwhile, is familiar with the customs of the religious sects about us, and with our own national feasts and fasts.

It is certainly astonishing how very few national feasts we have, on the whole—the more astonishing that in our great pleasure of business, and rapid deed and thought, we need rest and relaxation more than most. Christmas is not universally kept among us, nor is New Year's; we make nothing of the 8th of January or of the 22d of February, a little bell-ringing or a few guns compassing the most of our observance of these days; we forget the April day of the battle of Lexington till after it has passed; and we content ourselves with a sorry and solemn parade that can not be called a feast, if it can not be called a fast, on Decoration Day. The anniversary of the battle of Bunker Hill has sometimes a good send-off in New England and sometimes not—seldom anywhere else; and in truth we lie back and reserve all our strength for the Fourth of July, and now we celebrate that and now we don't. And when we do celebrate, we have not much idea of doing so other than with cannons and with flags, fire-crackers and torpedoes, by day, and the blue-lights and their kind by night—music, flowers, and the gentler arts seeming to us of insufficient import to turn to exterior use.

It is rather a pity that we rest so contentedly, as a people, with so few opportunities of general merry-making and acquaintanceship. It would not be amiss, at all events, if in the sweet spring and early summer season we made the most of the chance that comes to us in pleasant weather and turned it to account in general social ways. If the 19th of April, that initial day of our independence of Kings and Crowns, can not be made of much practical out-door use on account of the inclemency of that part of the year, yet the 17th of June, when we first discovered that farmers with their rusty weapons could hold the trained regulars of the King in check, can not claim any such immunity, for winds are soft and skies are blue and roses are in blossom then, and all things invite to joy and its expression. Yet however it be with those days, the heart that does not beat more quickly on the Fourth of July, and does not wish to celebrate it even when it is impossible to do so, if by no more than doing reverence to the flag, ought to beat in some more ignoble bosom than an American's.—*Harper's Bazar.*

Presence of Mind.

Pugsby (concluding story)—Thus was I saved by mere presence of mind.

Bolgertop (gloomily)—Great thing—presence of mind. I might have been a rich man to-day if my presence of mind had not failed me one time.

Pugsby—Indeed! When was that?

Bolgertop—You remember my Uncle George—rich old duffer? Well, sir, I was with him one day when he was taken with a fit. I was so frightened that I lost my presence of mind and called in a doctor, and Uncle George is living yet.—*Philadelphia Call.*

—The "oyster bug" is declared by Mr. Cudington, of Fair Haven, Conn., to be a good sign, rather than one of destruction. He says: "The story about the brown, coral-like insects on oysters is all nonsense. The excrescence found on seed oysters a year old is a natural growth, and is always an indication that the young oysters are healthy and vigorous."

SCHOOL AND CHURCH.

—Fourteen of seventeen pupils of a class in a school at Bronson, Fla., rejoice in the euphonious name of Smith.

—The British Bible Society issued the New Testament at two cents a copy. In nine months 950,000 copies have been sold.

—"One High Jens and Fizzeology" was a North Carolina school-teacher's requisition for a new manual just published by the State.—*Chicago Times.*

—The land belonging to Cornell University comprises 240 acres, of which 120 is specially devoted to the farm. Not originally fertile, it has been made sufficiently so to yield $6,000 annually in gross products.—*Ithaca (N. Y.) Journal.*

—The venerable little church at Tadousac, the oldest in Canada, having been built by the Jesuits in 1615, is soon to be replaced by a more spacious temple. But the judicious pastor has determined to keep it intact all the same.

—The Commissioner of Education reports that in the South the school enrollment of white children has increased 297,185, and of the colored children 199,231 during the past two years. The total expenditure for public schools in 1884 was $17,053,467, an increase of $2,232,495 over that of 1882.

—The *Central Baptist* thus happily hits off the fallacy of calculations and prophecies based on ratios: "If our numbers should increase in future as in the past, then in eighty-seven years everybody would be a Baptist, but if the decrease in contributions continues, then in ninety-one years nobody would give a cent to the cause of Christ."

—On the Isle of Patmos there are more churches than houses. The churches stand together in couples and triples, and in groups almost like hamlets. All of them are small. The largest have domes, but the great majority are merely small, oblong, vaulted apartments, with a small apse at the end, and incapable of accommodating more than twenty or thirty persons with comfort.

—The past year in the Illinois Wesleyan University has been the most satisfactory and successful in the history of the institution. The professors have been earnest and thorough, the laboratory and museum are in fine order, and the students have studied with zeal and profit. A good religious interest has pervaded the school, and many were converted.—*Chicago Interior.*

—The instrumental music question, which has been debated annually for fifteen years by the Presbyterians of Ireland, but never satisfactorily settled, well nigh caused a schism this year. Indeed, a number of ministers and elders did secede from the assembly for a short time and held an opposition meeting. In a few hours, however, a truce was arranged, but such was the tension of feeling that it was deemed expedient to continue debate on the subject, which was accordingly postponed till next year.—*Chicago Journal.*

PUNGENT PARAGRAPHS.

—When the bad small boy returns at night to his home he often finds there is a breeze brewing. And usually it is a spanking one.—*Chicago Current.*

—Although a million copies of Webster's spelling book are annually circulated, some people still persist in spelling their names "Smythe."—*Oil City Derrick.*

—Bell, the telephone man, has an article in *Science,* telling how to avoid icebergs. We haven't read it, but one good way is to travel only by railroad.—*Burdette.*

—O, where does beauty linger?" sings a Philadelphia poetess. Considerable of it usually lingers upon a young man's shoulder, unless her head rests very quietly.—*N. Y. Sun.*

—The Mormon Bishop Snow has been in Mexico to negotiate for the purchase of large tracts of land in that country for the occupation of colonies. We should think Mexico would be too hot for Snow.—*Norristown Herald.*

—The pine tree, says an authority, serves as a refuge for more than four hundred species of insects. We can now understand why Mr. Longfellow was so strenuous in advising the aspiring young men to "beware the pine tree's withered branch."—*Boston Transcript.*

—A forlorn-looking man said: "I've tried everything that I could turn my hand to, but couldn't make anything answer; and now I have decided to go up among the hills, where they say there's a wonderful echo, to see if I can make that answer.

—"It's terribly galling to a man of my sensitive pride to depend upon relatives for my living," remarked a youth; "but what is one to do?" "I thought that Smith & Smith offered you a situation at fourteen dollars a week?" "So they did," replied the sensitive youth, indignantly, "but do you suppose that I'd sell dry goods over a counter for fourteen dollars a week? No, sir!"—*N. Y. Times.*

Plain Black Dresses.

Mohair of demi-lustre, tamise cloth, albatross cloth and black flannel are used for plain dresses. These fabrics cost from fifty cents to $1 a yard double width. The mohairs, alpacas and brilliantines have never been given up by English women for useful mourning dresses, as their smooth surface sheds dust and is not injured by moisture. The tailor styles so popular for winter dresses are repeated in these serviceable fabrics, and such a dress may be worn in the house throughout the autumn and winter. Tucked and pleated waists that may be worn with or without a belt are especially liked for flannels and mohairs. One pretty way to make these is to let the fronts lap plainly for about three inches, buttoning on the left side with small buttons and holes, and have a corresponding row of buttons on the right side; then just beyond the buttons have three or four small tucks a third of an inch wide, and repeat the tucks down the middle form of the back; these tucks can be overlapped at the waist line to taper nicely with the lining, and thus a belt is not needed, though it may be added if liked.—*Harper's Bazar.*

MISCELLANEOUS.

—A huge lemon was recently picked at Pansoffkee, Fla. It measured twenty-four inches in circumference one way, twenty-two inches the other, and weighed four pounds and thirteen ounces.

—During a trial in London it was developed that the plaintiff, a woman, had been divorced from her former husband because of her misconduct with her present husband, who had been divorced from her sister.

—Milton Miester, formerly of Lancaster County, Pennsylvania, and now of Utah Penitentiary, remarks in a letter to a friend: "I am serving out a six months' sentence for loving, cherishing and caring for my dear families, consisting of three of the best, noblest and loveliest wives in the Union and twenty-three just as good and pretty children as ever came from Heaven to sojourn for a season on this mundane sphere."—*Chicago Tribune.*

—The yield of grain in Texas for the present year has been the greatest ever known in the history of the State. The Galveston *News*, commenting upon the fact, says: "With no untoward disaster to the cotton crop the State is on the eve of the grandest period of agricultural prosperity she has ever enjoyed. The commercial and general business situation may naturally be expected to sympathize with this prosperity."

—As an evidence of the ignorance which prevails through Wales, the vicar of a large district writes that he gave to a poor woman, whose daughter was ill, a little jar of extract of meat, telling her to boil it with certain seasoning. The woman complained there was something wrong with the thing. She had boiled it for hours, and could get no charm out of it. The fact was she had left the jar unopened.

—"How can I ever pay you?" "Don't try." "Don't try?" "No, if you really wish to do me a favor." "I don't understand." "So long as I know you never can pay up you will be valuable to me in another way. Whenever a bill is presented that I can not conveniently meet I will simply say that I have money due me that must be collected before I can pay my creditors. Do you see?" "Yes; and as a special favor I give you my word and honor I will never pay you."—*Harper's Bazar.*

—Here is a hot weather conundrum: A gentleman remarked the other day that if he were in an elevator and it dropped from the fifth story he would break the force of the fall by jumping four or five feet in the air just before the elevator hit the bottom. And now people are arguing as to whether he could or not jump four or five feet in the air with nothing under him but a falling elevator. Could he? And would he break the fall or not?—*Chicago Times.*

—The great majority of people pay no attention to their health or their mental sanity. Their whole time and energy are devoted to securing wealth and distinction. They leave their health to the doctor, their quarrels to the lawyers, and their souls to the ministers. A little education in the right direction would change this. But it may be asked why pipe to those who will not dance. It may be that people will some time learn that health and mental sanitation are worth more than wealth and distinction.—*Philadelphia Press.*

—A tadpole, the larva of a frog, has a tail and no legs, gills instead of lungs, a heart precisely like that of a fish, a horny beak for eating vegetable food and a spiral intestine to digest it. With the approach of maturity the hind legs appear, then the front pair; the beak falls off, the tail and gills waste away; the lungs are created; the digestive apparatus is changed to suit the animal diet; the heart becomes reptilian in type by the addition of another auricle; in fact, skin, muscles, nerves and blood-vessels vanish, being absorbed atom by atom; and a new set is substituted.—*Boston Budget.*

—The principal crops of Japan and their annual products are as follows: Rice, 196,000,000 bushels; wheat, 11,500,000 bushels; barley, 49,421,000 bushels; maize, 1,382,000 bushels; soy beans, 11,556,000 bushels; buckwheat, 3,367,000 bushels; raw cotton, 10,251,000 cwt.; hemp fibre, 133,700 cwt.; tea, 394,048 cwt.; tobacco, 382,441 cwt.; sugar cane, 7,149,000 cwt.; potatoes, 17,980,000 cwt.; bark of paper mulberry, 357,000 cwt.; indigo leaves, dried 880,000 cwt. The exports are annually $36,000,000, or nearly one dollar for each person on the island. The imports are $28,000,000 annually.

LEGUMINOUS PLANTS.

Their Peculiarity of Adding Largely to the Fertility of Soil.

The term leguminous is derived from a Latin word meaning a seed which grows in a pod. This essential characteristic is made the type of a large family of plants called by botanists leguminous, and in this class are included all such plants as clover, peas, beans, lentils, and lupins, and such trees as locust, cassia, acacia, laburnum, and many others, whose pea-shaped flowers, hanging in large and beautiful clusters, are cultivated in ornamental plantations. It is a peculiarity of this family of plants that they gather from the soil in some way or other a large quantity of nitrogen which they store in their roots and leaves, and leaving these in the soil add largely to its fertility. The plants of this kind which are grown upon farms as crops are clover, peas, beans, lucern and some others of less note. It has long been an experience with practical farmers that these crops clean the soil of weeds and leave it in the finest condition for a succeeding crop of grain, which thrives better after such a crop than by any other preparation. The reason for this was not known until the long continued investigations and experiments of Dr. Lawes, of England, showed how it was that wheat following a crop of clover produced a much better yield than if it had been grown even upon a summer fallow. It has been the experience of farmers that peas have this same result, and a crop of beans even leaves the soil in better condition than if the land had lain idle.—*N. Y. Times.*

THE ORIGIN OF "O. K."

A Suggestion That Jackson Got His Famous Abbreviation From the Choctaw.

In the language of the Choctaw Indians, one of the most frequently recurring expressions is the emphatic oke, with which an affirmation or denial is concluded. This oke (pronounced with strong accent on the last syllable) is one of the substitutes for the copulative verb to be, which is wanting in Choctaw. Oke, as pronounced in Choctaw, has exactly the same sound as the alphabetic pronunciation of the letters O. K. in English.

The meaning of expression, as nearly as it can be conveyed in English, is: "That is true; "That is all so." A few examples, out of many that might be cited, will illustrate this. "The Choctaw Indian is a good fellow" is expressed thus: Hattak api huma Chahta achukmah oke, in which hattak api huma means "Indian" (literally, man-body-red,) achukmah means "good," and oke is the copulative expression, "it is so." In the Rev. Cyrus Byington's Choctaw New Testament the first sentence of Matt. 5, 13: "Ye are the salt of the earth," is: gakni in huppi huchchia hoke, literally: "the earth is salt ye: that is so."

To General Andrew Jackson is attributed the introduction of the Choctaw word into our Anglo-American speech. Before the war of 1812, in voyages up and down the Mississippi and in trading expeditions overland from Nashville, Tenn., to Natchez, Miss., through the Choctaw Nation, he was brought into frequent communication with the Choctaws.

General Jackson, as everybody knows, was prone to the use of downright and energetic methods of assertion. Hearing this emphatic oke so frequently uttered by the Choctaw people, he learned the meaning conveyed by it to the Choctaw mind and appropriated it, out of hand, to his own purposes. From him it passed over to the multitude. This account of the origin of O. K. has been current in the South for many years, If not true, it is, to say the least, *ben trovato.*

No one who has ever read an autograph letter of General Jackson's will easily credit the story that he was in the habit, when he was President of the United States, of indorsing, in *kaltem Blute*, applications for office, with the letters O. K., under the belief that these were the proper initials for "all correct." Jackson was no scholar, but he was not so grossly ignorant of English orthography as to fall into a blunder of that sort. He may have indorsed documents with the letters O. K. as a jocular symbol of his favorite Choctaw expression. The story that these letters were seriously intended by him as an abbreviation of "oll korrect" was probably, as Mr. George Bancroft suggests, an *a posteriori* invention of the enemy—to wit, the Whigs—during the hot political contests in the days of the roaring '40's.

That the abbreviation O. K. was coined by Jackson himself and used by him long years before it passed into current slang, finds curious confirmation in an extract from the old court records of Sumner County, Tenn, quoted by Parton in his "Life of Jackson," vol. 1, p. 136:

"October 6, 1790. Andrew Jackson, Esq., proved a bill of sale from Hugh McGary to Gasper Mansker, for a negro man, which was O. K." ["A common Western mistake," adds Mr. Parton, "for O. R., which means Ordered Recorded. Hence, perhaps, the saying O. K."]

Is it not more likely that the O. K. of this entry was suggested by Jackson himself, as a brief way of saying, after the Choctaw fashion, that the claim had been legally made out?—*American Magazine of History.*

Flax.

A remarkable instance of the waste of a valuable product is afforded by the fact that out of 85,320 tons of flax fibre grown last year in the United States only 699 tons were utilized for manufacture. At the same time 5,000 tons of fibre are imported yearly. This waste, no doubt, occurs because farmers have given more attention to growing seed than to the fibre. Seed and fibre cannot be grown together. For seed, thin sowing and stout stalks are required, and this produces coarse fibre; for fine fibre, thick sowing and slender stalks with few side shoots are desired; moreover, for the fine silky fibre the stalks are cut before the seed is ripe. The ripe stalks, however, are exceedingly valuable for twine, but unfortunately this fibre is driven out of use by a substitute made out of paper.—*N. Y. Times.*

A Bright Boy.

Colonel Percey Yerger has got a boy named Sam, who has never been trained to habits of obedience. He gives all manner of impudence to his parents, who, having become desperate, put the boy in the grocery store of Mr. Sid Bluford, who has the reputation of being very severe, and is one of the heaviest retail grocers in Austin.

"Now, Sammy," said Mr. Bluford to the incipient tradesman, "when you see me waiting on a customer and clap my hands, you come to me right off. Now mind, I don't want any nonsense."

"I don't want any nonsense, either," retorted Sammy, "when you are waiting on a customer and clap your hands, if you see me shake my head you may know I'm not coming till I get ready."—*Texas Siftings.*

The "Knowsomethings."

A new secret political organization, called the "Knowsomethings," was gotten up in 1854, by some German Republicans, to offset the "Knownothings." The founders were Germans, and their constitution opposed the extension of slavery, stringent Sabbath laws, and the Maine liquor hypocrisy. It was short-lived, but upward of six thousand members were enrolled, and for some time an "organizer" made a good living by going about the country and organizing lodges, each one of which paid him twenty-five dollars for a charter.—*Boston Budget.*

CREATION'S FAG END.

A Mexican State Where Disease, Revolution and Intense Heat Are Ever Present.

"A place where they can change the head of government by revolution four times in seven months, where the mercury is perfectly at home at 105 degrees in the shade, where the people eat snakes, and where small-pox and yellow fever follow each other in regular succession, year in and year out, may not be a lively enough country for some folks to live in, but it filled the bill for me," said an oil-well operator from the Pennsylvania regions.

"That locality," said he, "is the State or district of Tabasco, in Mexico. I went down there for some parties three years ago to see what there was in the reports about petroleum deposits of great richness in the region. There was no way to travel except by canoe and on bronchos, and it was no uncommon thing to travel two hundred miles or so to reach a place fifty miles away as the bird flies. There is plenty of natural pitch or bitumen there, but I couldn't see the prospect of an oil region ever being developed, although Boston capitalists were pegging away with drills in various parts of the district in hopes of striking oil. There are ninety thousand persons living in that district, and all I saw of it was one vast area of pestilence. The inhabitants are mostly Indians, and they haven't begun to be civilized yet. One loose garment, reaching from the neck to the knees, is all the clothing that either sex wears, and the children run entirely naked the year round. I got there in November, and left in July. At no time was the mercury lower than seventy-four degrees in the shade, and when I came away it was 105 degrees.

"The day before I got to San Juan Baptisa, the capital of the State, a couple of citizens had adopted the usual method of changing the government, and had shot the Governor, whose name was Foncher, his private secretary, and another member of his council, while the three were walking in the street. Foncher was the fourth Governor who had been removed in that way since the preceding May. The Governor's secretary and the other official were killed instantly. Governor Foncher fell to the ground but regained his feet. The two assassins were running away. The Governor fired two shots. One of the assassins fell dead, and Foncher dropped to the ground and expired immediately afterward. The second assassin ran on. During the night a man was found in the street, suffering, it was supposed, with the cholera, it being the season for that annual visitor. He was treated for the disease, and it was not until after he died that a bullet-hole was discovered in his back. The bullet was found in his bowels. He was undoubtedly the second one of the assassins, showing that the dying Governor's shots had both taken effect.

"Small-pox appears as soon as winter weather sets in. The natives were dying at the rate of twenty-five a day during my stay in Tuxpan, a coast village, and the coast was under quarantine. The yellow fever takes up the work as soon as the small-pox takes its yearly vacation, and that in turn rests in the fall, and cholera varies the monotony of the region until small-pox comes back again. A wagon goes around every night, and gathers up the dead at the different houses, and the bodies are loaded in and carried to the dead lot, a large piece of ground inclosed by a high brick wall. The remains are sorted out and buried next day. I was told at Tuxpan that it often happened that persons were, in the hurry of collecting the dead, placed in the dead wagon before life was really extinct, and that it was not uncommon for a person to rise up suddenly in the wagon as it passes on its rounds, glance wildly around until he recognizes his situation, and then disengage himself from the dead piled about him, jump from the wagon, and move away as long as his strength lasts, or until he is captured by others and stowed away in the hospital. Neither is it an uncommon circumstance for the custodian of the dead lot, on opening the gates in the morning, to find two or three persons waiting to get out, having been placed in the lot the night before with a load of dead.

"The natives live on cracked corn, the flesh of a hideous snake-fish called the lagarta, and the flesh of that cheerful-looking reptile or animal, or whatever it is, the armadillo. The lagarta is the favorite morsel. It is caught in the stagnant water that is everywhere in the locality. It has the head of a serpent, and a half-fish, half-reptile body, covered with horny scales. The mode of cooking is to take it as it comes from the water, run a stick down its throat, and hold it over a fire until it is baked. The few Spaniards and Mexicans who live in the district have their tables supplied with decent food; but its preparation is not such as to tempt the appetite. I found other parts of Mexico so delightful in every respect that I could hardly bring myself to believe that there could be such an altogether wretched portion of it as that same State of Tabasco."—*N. Y. Sun.*

Sensational Experiments.

Electrical experiments on the heads of guillotined murderers have been too much the fashion of late, says the Paris correspondent of the London *Times.* Sensational accounts of the results have sometimes been published, and only recently at Caen a doctor professed to have produced movements of the tongue by electric action on a nerve. It is satisfactory to find that H. Paul Bert, who has been held up to odium by English anti-vivisectionists, denounces these practices. The distinguished physiologist and Deputy holds that such experiments have no scientific interest and that they ought to be prohibited. If they succeed in making the murderer live again for an instant, which, however, he regards as impossible, the law of 1791, which forbids the torturing of criminals, would be violated in its spirit, if not in its letter. Such experiments may, moreover, be made under better conditions on animals. M. Bert's colleagues in the Academy of Medicine coincide in this view.

CABINET AND MINISTRY.

The Difference—A Peculiar Feature of the British Government.

The governing executive body of Great Britain is spoken of sometimes as the "Cabinet," and sometimes as the "Ministry." The two terms are thus used indifferently in the papers and in books, as if they meant the same thing. And in one sense they do mean the same thing; that is, each is used to describe the body to which is committed the executive affairs of the Kingdom.

The word "government" is also often used to describe the same body. We had the "Gladstone government," the "Salisbury government," used with this meaning.

But in their composition the Cabinet is one body, and the Ministry is another. Every member of the Cabinet is a minister, but every minister is not a Cabinet officer. The Cabinet is what may be termed a select committee of the Ministry. It is the inner circle, the chosen spirits of the Ministry.

The Ministry consists of all the heads of the executive departments of the Kingdom. The members of the Cabinet are the heads of the most important of these departments; and they also compose, which the ministers not in the Cabinet do not, the select and secret advisors of the Crown on matters of national policy.

Mr. Gladstone, in one of his essays, speaks of every member of the Cabinet as exercising three public functions. He is the head of a department of the State. He is always a member of one of the Houses of Parliament, and so acts in a legislative capacity. And he is a confidential adviser of the Crown. It is in the latter capacity that he differs from a minister not in the Cabinet.

There are certain great departments of State, the chief of which always occupy seats in the inner circle of the Cabinet. These are, the First Lord of the Treasury (who almost always also presides over the Cabinet as Prime Minister); the five Secretaries of State—for foreign affairs, home affairs, war, the colonies, and India; the Chancellor of Exchequer, the Lord High Chancellor; the First Lord of Admiralty; the Lord President of the Council; and the Lord Privy Seal.

There are other departments, the heads of which sometimes are and sometimes are not in the Cabinet, though they are part of the Ministry. These are the Lord-Lieutenant of Ireland, the Postmaster General, the Chancellor of the Duchy of Lancaster, the Chief Secretary for Ireland, the President of the Board of Trade, the President of the Local Government Board, and the Vice President of the Council.

Finally, there are offices held by Ministers who are never members of the Cabinet; for instance, the Junior Lords of the Treasury and Admiralty, the Attorney-General and Solicitor-General for England and Ireland.

The Ministry, as such, never meets in a body. The Cabinet, on the other hand, holds frequent meetings, according to the gravity of public affairs always confers in secret, and has no record kept of its proceedings. Often its decisions are kept secret from the rest of the Ministers.

No law compels a Cabinet Minister to be a peer or a member of the House of Commons. But custom has made this an invariable rule. When a member of the House of Commons is called to the Cabinet, he resigns his seat in the House and goes to his constituents for a re-election.

Every member of the Cabinet must be a Privy Councillor, and if he has not previously been one, is so created when he enters the Cabinet. Privy Councilors have the title of "Right Honorable."

The English law does not recognize any such body as the Cabinet, or any such official as Prime Minister. Both the collective power of the Cabinet and the dignity of first Minister have grown up gradually, and have taken their places in the British political system without the appliance of any statute.—*Youth's Companion.*

THE CARE OF THE HAIR.

It Should Be Washed But Once in Six Weeks With Castile Soap.

The care of the hair is an important branch of fashion at all times, though often fashion dictates an injudicious treatment and prescribes modes against all rules of health and reason. Such importance has been given to the hair that some philosophers make the chignon, coils and puffs the index of civilization, and show how eccentricity in head-dress and coiffure marks the degradation of the time. It is well understood that masses of false hair injure natural growth, but a freak of fashion which seems harmless may be made equally hurtful. This apparently innocent fashion is that of fluffiness and lightness of the hair produced by continual washing. The best specialists on treatment of the hair say that the hair should be washed once in six weeks and not oftener, and that castile soap and not borax, soda or any other drying material should be used. After washing it is well to rub the scalp with some reliable ointment. The natural oil, which to some appears objectionable, is the life-giving ointment of the hair and should not be destroyed. Dry hair has a dead appearance, the ends split and growth is retarded. The fine comb is most hurtful, but a soft brush, used judiciously, gives vigor to the scalp and keeps it in a healthy condition. The practice of cutting the ends of the hair is useful, and can be accomplished easily by braiding the hair and then cutting the ends. The care of the hair is certainly as important as that of the teeth, but is much more neglected. The rules of its preservation are simple and important. Vigorous brushing, cutting the ends when necessary, washing with castile soap once in six weeks, and the desirable avoidance of false hair should preserve and strengthen the hair. But if the hair comes out and becomes lifeless and thin in spite of this treatment, the best remedy is to seek a reliable specialist on scalp diseases, and to submit to thorough professional direction.—*Boston Journal.*

TEMPERANCE.

WHAT DO YOU WANT TO BE?

How All the Drunkards in the World Have Been Made So—The Only Safe Way.

(Proverbs xxiii, 29-35.)

If I could bring together a thousand boys and girls from one city, and a thousand from another, and so go all over this country, and ask each one: "What do you expect to be when you grow up?" not one would say: "I expect to be a drunkard." No one wants to be a drunkard. When we hear the name it brings up in our minds a picture of a man in shabby clothes, with red, bloated face and bloodshot eyes, reeling along the streets, saying foolish things, quarreling with those about him, fighting, and at last lying down helpless in the gutter.

That is a dreadful sight that nearly all of us have seen, and drunkards must have been just the same in the days of Solomon, although they had no whisky then, and could only get drunk upon wine. Hear what Solomon says about these drunkards of his day: "Who hath woe? who hath sorrow? who hath contentions? who hath babbling? who hath wounds without cause? who hath redness of eyes? They that tarry long at the wine; they that go to seek mixed wine."

But all the drunkards in the world have been made. They were not born so; they have been made out of bright-faced children, with clear eyes, and pure, sweet breath, and strong, steady steps, and happy voices—children who never meant to be drunkards, and who never would have been if they had taken Solomon's advice. He says there is only one way to be safe, and that is not to begin: to let the wine alone; not even to look at it. He says: "Look not thou upon the wine when it is red, when it giveth its color in the cup, when it moveth itself aright; and at the last it biteth like a serpent and stingeth like an adder."

This red wine that sparkles in the cup, and has a pleasant taste, is like a beautiful serpent that is moving its beautiful coils and getting ready to bite you. A cluster of ripe grapes is a beautiful thing, and when you crush the grapes in your mouth and swallow the delicious pulp you are taking what is harmless and nourishing. But if you squeeze out this refreshing juice and let it stand a very few hours it begins to change. A part of it turns into the poison that is called alcohol: all that could nourish and feed your body is destroyed, and the juice becomes wine, just such wine as Solomon said bites like a serpent.

If you eat an apple, the juice that is ground out by your teeth is exactly the same as that which is crushed out by a cider-mill; it is wholesome and nourishing, and you like it, because it is mixed with the spicy pulp. But what is called "sweet cider" is this same juice that has stood a few days until it has begun to "work;" that means that a part of it has changed into this same poison that makes it no longer nourishing, but dangerous. The more of the poison there is in it the more it sparkles and the better it suits the taste of those who have learned little by little to love it. So, when people say to you: "What harm can there be in the juice of grapes or in sweet cider?" you can answer them: "No harm at all, if you take them just as God made them. But the juices of the grapes and the juices of the apples begin to change as soon as they are crushed out, and the poisonous alcohol is formed, and then there is always harm in it. If you were dying of thirst it might be worth while to take a drink from a spring that you knew was impure and unhealthy; but, with so many good things to eat and drink in the world, do you think it is sensible to drink what may have poison in it, just because you are not *sure* it has? If you let *all* cider alone you will be sure never to drink the wrong kind, or let your example lead any one else to do so." That is about what I would say on the cider question if I were a boy or girl; and when I had made up my mind I would stick to that of course, whatever any one else said or did. Why, one of my neighbors, at great inconvenience and expense, has all his water brought from a distance, although he has a well in his own yard. The water looks pure, and tastes pure, but he knows *some* wells have poison in them, and he thinks it quite possible his may have, and so he lets it alone. Is he not more sensible than his neighbor, who went on drinking the water because he could not see anything wrong with it, until half his family were attacked with typhoid fever?

If you mean to take Solomon's advice, and not even stop to look at this dangerous enemy, that can seem so harmless at first and yet sting like a serpent afterward, you must remember and not go with those who drink wine. Don't be found among them; keep away from them; give them no chance to tempt you; for if the children should grow up right for one generation we should have no more drunkards.—*Emily Huntington Miller, in Youth's Temperance Banner.*

REMOVING THE SIGNS.

A Heroic and Faithful Wife and Mother—A New England Incident of Fifty Years Ago.

In the old, historic and beautiful town of Lexington, Mass., more than fifty years ago, there might have been seen across the front of a large, substantial-looking building on the principal street, a sign bearing these words: "William Simonds, Inn-keeper." That this house was the resort of sleighing parties and merry making generally, needs not be told—nor that the hot mugs of flip, egg-nog and other drinks, were the chief attractions of the place. This same William was alert for the pennies of his customers, hoping thereby to replenish his exchequer.

Now, at the head of the family was a woman of sterling character, a Christian and a mother, with noble boys growing up to manhood surrounded by these contaminating influences, for whom she felt the most active interest. Having expostulated in vain with the good husband and father in regard to this business, and implored that the sign be taken down, and the legitimate products of the farm constitute their support, she took the opportunity one day, on his absence in a distant part of the city, to say to the boys: "The sign is coming down."

That the magnitude of the work may be more apparent, we will say that the sign covered nearly the entire front of the house in length, and was of conforming width, the thickness being such as in those times was deemed proper for substantiality.

Assembling her forces on the front piazza, with ladders and ropes, the oldest boys mounted the ladders, and soon the obnoxious object was swinging in mid-air, on its way to the ground. Being safely landed, the next thing was to get it up in the garret. "Where there's a will there's a way." It was pushed up the first flight of stairs without much difficulty, but the second flight was narrower and winding, which caused it to stick fast. A call to the mother was readily responded to, and with cheering words and her determined "Now boost, boys, for your life!" up it went, with the aid of her sturdy shoulders; the good woman saying: "There let it stay, boys."

Upon the return of the father at night all was as serene as though nothing had happened, the boys having been instructed to say, when asked where the sign was: "Go to mother." Not having occasion to pass the front of the house for two days the loss was not discovered by the father until on the third day, when, on coming from the barn with a wheel-barrow, his youngest son, a lad of ten years, helping, he looked up, and turning to the boy with a face livid with rage, he said:

"You villain, where is that sign?"

Quaking with fear, yet full of laughter, the urchin replied:

"Ask mother."

Dropping the barrow, with hasty, nervous strides, he made his way to the house; from whence, after the lapse of about ten minutes, he came forth with the pleasantest look upon his face, a look which he continued to wear as long as he lived.

What was said is not related, but the *mother's love* conquered. Through the many changes of occupants of the old tavern, that sign has remained where it was placed at that time, until a little while ago, when it was given in keeping of the Historical Society of Lexington.

This faithful mother reared these boys to noble manhood, the youngest, now at a mature age, giving the facts of this history. Mrs. Simonds was a sister of Cyrus Peirce, Esq., teacher of the first normal school, then at Lexington, subsequently at Newton. The spirit of this worthy woman is such as the soil of Lexington abundantly produced during revolutionary times, and such as should be emulated during all time. A grand-daughter, of this city, active in Temperance reform and works of charity generally, is proof incontrovertible that true worth descends even to the third and fourth generations.—*Cambridge Tribune.*

The Curse of Our Era.

The drink habit is beyond all question the greatest curse of modern life. Social drinking ruins more homes and destroys more young men and young women than all the social habits combined. The drink traffic does more to corrupt politics, perpetuate and multiply poverty, to incite to violence and brawls, to keep the poor poor, and to make them poorer, than all other curses combined. It costs the Nation more in life and money than war, pestilence and famine. It more urgently demands quarantine than the cholera; it is a more serious menace to national well-being than armies and fleets of foreign powers. It is the obstacle to all moral and social progress.

"The temperance cause," says Richard Cobden, "lies at the foundation of all social and political reform." How shall we lay out this foundation? How shall we establish this quarantine? How shall we decrease this awful expenditure? How shall we check, restrain, regulate or extirpate this drink habit? This is the immediate question which addresses itself to every citizen, every parent, every social reformer.—*Christian Union.*

Temperance Circular.

The W. C. T. U. of Philadelphia County, Pa., send out to the pastors and deacons of churches and the superintendents of Sunday-schools a blank, with questions and place for answers, concerning Temperance work. The questions are all pertinent, and some of them unusually suggestive:

Have you any organized Temperance society or work in connection with your church or Sunday-school?

Do you have Temperance taught in any systematic way? If so, in what way?

How many have signed the pledge in your church and Sunday-school?

How many Temperance meetings have you held and how many Temperance sermons have you preached since September 1, 1884?

Do you use unfermented wine at communion?

Do you use Temperance Sabbath-school Lessons; if so, how often?

Are you willing to give the use of your church for Temperance meetings, and if so, when?

Would you like a union formed in your church for Temperance work?

Will you do me the favor to send me the name of some lady member of your church to whom I can send communications?

We believe such a circular sent to churches and returned with their answers to the County Union will tend to unify the work of the church and the work of the W. C. T. U.—*Union Signal.*

If all of the teachers of the country were to bring before the youthful minds intrusted to their care the Temperance question in its hygienic and moral bearings, the seed thus sown would *soon* bear fruit well worth the trouble. England has, of late, availed herself with extraordinary success of this preventive means. She has found among teachers the most zealous furtherers of the good cause. A "Temperance Lesson-Book" is in the hands of the scholars as well as the teachers of Great Britain and the Colonies, and in a translated form in foreign countries.—*Consul-General Oppenheimer, of Germany, in Law and Order.*

The hotels in a district of New Zealand having been closed by the action of the people, the police officer writes to his brother as follows: "I am the happiest man in the village. There has not been one case of drunkenness before the court since the licenses were taken away."

THE REPUBLICAN.

OAKLAND, MARYLAND.

JAS. A. HAYDEN,
Editor and Proprietor.

TERMS OF SUBSCRIPTION.

e copy, one year..... $1 50
six months..... 75

INVARIABLY IN ADVANCE.

TERMS OF ADVERTISING.

First insertion, $1 per square of 10 lines 0 cents per square for each additional insertion. Special contracts for advertising longer han three months

Correspondents must enclose full name and address, not necessarily for publication, but as a private guarantee of good faith. Rejected communications will not be returned.

SATURDAY, SEPT. 5, 1885.

ATTENTION, REPUBLICANS.

The Republican voters of Garrett county are requested to assemble in primary meetings in their respective districts, on

Saturday, September 19th,

to select five delegates from each district to attend the county nominating convention at Oakland, on

Tuesday, September 22,

to nominate a candidate for State Senator; two candidates for members of the General Assembly; one candidate for Clerk of the Circuit Court; one candidate for Sheriff; three candidates for County Commissioners; one candidate for County Surveyer, and to select three delegates to the State Convention to meet in Baltimore on the 24th instant, three alternates to said delegates, and three members of the State Central Committee for Garrett county.

The delegates are requested to come prepared to select three persons to act as a district committee for their respective districts.

JAS. A. HAYDEN,
Chairman County Committee.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

In this number we publish a call for primary meetings and a county convention to nominate a ticket for the various offices to be filled in November next. We urge upon all the Republican voters the importance of attending the primaries and sending delegates to the county convention who are in favor of nominating good men. We have often heard men complain that primaries and conventions had been packed, and use this as an argument in favor of scratching or bolting the ticket. If the people would attend the primaries and support the men of their choice they would not have cause to grumble, If the people stay at home and leave the primaries in the hands of a few local politicians and place hunters who send themselves to the convention and then seek to nominate themselves for office, well may they expect to have an unsatisfactory ticket. We know it may be a small sacrifice of time for some of our people to lose a day to come as delegates to the convention, but if you want a good ticket, if you want men nominated who, when elected, will be a credit to your party and a credit to the county, you must make the sacrifice. Come to the convention and do the work thoroughly. If you do this we feel sure you will have no cause to complain after the ticket has been nominated.

In another column of this issue we publish a list of the cases, civil and criminal, which are on the dockets for trial at the September Term of the Circuit Court for Garrett county, which commences on the 14th day of September A. D. 1885. This report will be a matter of interest to all persons having business in Court, as they can see the number of these cases and form an opinion as to the time when they will probably be reached. As the Term progresses we will give the disposition of the various causes. It may be well for those having cases to file the paper containing these reports.

Mr. Hiram P. Tasker, late editor of the *Herald*, at the request of many friends throughout the county, will announce himself in the *Democrat* this week as a candidate for the House of Delegates, subject to the decision of the Democratic county nominating convention. Mr. Tasker's long service in the party entitles him to consideration at the hands of the party representatives when they shall meet in convention, and his earnest contest for the right of local self government will no doubt be gratefully remembered.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

The Dreaded Scourge.

New York Sun.

Up to last Sunday there had been 61,521 deaths from cholera in Spain, since the beginning of the epidemic, out of a total of 156,077 cases. At the present rate of its ravages, the deaths in that country will reach 70,000 by the end of this week, and the total number of attacks nearly 200,000. In Marceilles, Toulon, and other parts of southern France the scourge maintains its foothold.

Thus it is clear that while last year the excitement and terror over the presence of cholera in Europe may have been greater, the present year has been far more terrible in its ravages. The deaths from this pestilence in Italy during 1884 were computed at 10,000; but already during the present season those of Spain have been sixtimes as many. It is further evident that in spite of modern experience and appliances the present visitation of cholera in Europe is one of the most destructive ever known.

The persistence of the epidemic and its greatly increased fury during the present season are very suggestive. The notion that because cholera did not reach England and America last year, and has thus far not reached these countries during the present year, there is now less likelihood of its attacking them, is not in accordance with historic facts. The conception of its progress as being like that of a fire on the priarie, which swiftly passes and leaves its ruin wrought, is wholly erroneous. When it once gains a foothold in a country it invariably occupies it for several years, breaking out again and again in the same or some fresh quarter. Before several of its visits to America it had first ravaged Europe during several successive years.

Thus the epidemic of 1832, the first that afflicted America, had been raging in Europe nearly two years before it crossed the Atlantic. It appeared first at Moscow on the 28th of September, 1830. During the entire year 1831 it swept all over Europe east of the Rhine, causing probably 100,000 deaths in Germany alone. 1832 it spread over Great Britain and France, and the deaths in the latter country were estimated at 120.000. It was during this second year of its European course that it found its way to America.

In like manner our second epidemic, that of 1848, had broken out half a dozen years earlier in India, and thence had spread through Persia between the Black and Caspian seas to Russia, and then, like its predecessor was carried to Berlin, Hamburg, Bremen and Havre, as well as to the cities of southern Europe, and so found its way to this country after years of destruction in the Old World.

The epidemics of 1854 and 1865, on the contrary, were fully developed in this country not many months after their appearance in Europe. That of 1873 reached this country after ample warning, there having been 70,000 cases of cholera in Germany alone during the preceding year.

Of the present epidemic, we know that it began its westward march four years ago; that it was in Egypt in 1883, and in France and Italy in 1884. Instead of relaxing efforts to keep it away from America on the false theory that it would have reached this country before had it been coming at all, we should remember that cholera has repeatedly harassed Europe for years in succession before crossing the Atlantic.

Even in this country, while we habitually speak for convenience of the epidemics of 1832, 1848, 1873, and so on, as if these were the only years of their continuance, the uniform rule is that they have raged from three to five years successively, and occasionally much longer. The first epidemic in this country did not subside until the lapse of five years, and two years after its first appearance it raged furiously. Some authorities have declared that in New York city there was scarcely a year from 1832 to 1854 without well-defined cases of cholera. But the first year is one of terror and excitement; and if a season in which 50,000 victims perish is followed by others in which the losses are only 5,000 or 10,000, these latter are apt to attract little notice. This unfailing quality of persistence and reappearance through successive seasons should be a warning to continued vigilance against the pestilence. The progress of cholera is not only a march, as it is often called, but a conquest and a prolonged occupation.

Encouragement, it is fair to add, is afforded by the success which has attended the corroling of the pestilence in the southwestern corner of Europe. It is really astonishing that for two years the disease, in spite of its horrible ravages, has been kept, save for unimportant scattered cases, confined in Italy, Spain and the extreme south of France. It is almost too much to expect that it can be held and stamped out there. If this should be done, through vigorous quarantine systems, the triumph will be memorable.

State of Trade.

NEW YORK, August 29.—*Bradstreet's* in its commercial summary says:

While the general trade situation as reported this week in special telegrams to *Bradstreet's* continues to be favorable, there is less to be said of the indication, as to permanence in the increased activity shown. In addition to what has been said of the improvement in textile lines, the demand for pig iron at Philadelphia, and generally West of the Alleghenies, except at Cleveland, has shown some gain. In the East this is not the case, and while there may have been some improvement in the inquiry, there is none in price or demand. Dealers in Eastern markets are inclined that, unless the competing Southern furnaces are cut off by finding ample markets nearer home or by higher freight rates, Eastern pig irons are not likely to advance much in the near future. Steel rails are stronger, but not so much higher as irresponsible reports have mentioned. The mill owners have avowed their intention of putting rails up to $30 per ton.

Notwithstanding the continued strength in the Eastern dry goods market and the upward tendency of prices some manufacturers continue to curtail production. There are others making preparations to enlarge their output. The strength of prices in leading lines continues.

In grocery staples sugar has shown an improvement, but tea and coffee are still behind last year. Dairy products are improved and higher. Wheat has been somewhat stronger at times since the severe depression of the two preceding weeks. The small advance made has served to check exports and stop business sufficient to indicate that, however short the crop may be, foreign consumers are not yet ready to assist in a material advance. In North Minnesota and Dakota it is believed that a two-thirds crop will be harvested. Spring wheat farmers are better able to hold their grain this year than last, and in view of the short crop it is expected that they will market no more than compelled to.

The demand for money at Chicago, St. Louis and at San Francisco is light, considerably less than a radical increase in the demand for merchandise would warrant.

BOSTON, August 20.—The *Advertiser* in its weekly review of the wool market says: The firm tone which has been manifested for the past few weeks continues, and wool is still selling freely at full prices. During the past seven weeks the sales foot up about 29,500,000 pounds, against 22,500,000 pounds for the same time last year, and 21,300,000 pounds for the same period in 1883. The continued demand for wool by manufacturers is rather more than has been expected, as it was supposed that most of the mills would be filled up after their heavy buying; but they are still in the market, and dealers find no difficulty to sell their wool as fast as they can open it. The demand for woolen goods continues brisk and manufacturers are taking orders freely at last year's prices, while raw wool is fully 1c, if not more, less than a year ago, which leaves them a fair chance for a profit, and they are taking full advantage of it, as the large sales of wool prove.

Tariff Reduction.

PHILADELPHIA, August 31—A Washington correspondent of the *Press* telegraphs: From what I gather here from the most reliable authorities the views of the Administration on the subject of tariff reversion may be stated as follows:

First—The reduction of the revenue at least $30,000,000 and perhaps $40,000,000.

Second—The reduction of the rates of duty in accordance with this.

Third—Intense anxiety to revive the drooping industries of the country.

How to effect this puzzles the most astute. The representatives of the industrial pursuits, embracing iron and steel, wool growing and manufacturing, manufacturing of textile machinery, chemical manufacturing, silk and paper making etc., in their replies to the Treasury Department already filed, have frankly told, and will frankly tell the Secretary that they cannot, under the existing condition of business and the amount of profit arising therefrom, submit to any reduction of duties. They furthermore claim that any lowering or simple reduction of the present rates of duty would, instead of reducting the revenue, increase it,

The manufacturers take strong ground against anything approaching a revenue tariff. It will be found they say, by careful investigation of the subject, that the United States can not wisely enter upon a plan that may be called a "revenue tariff system," nor can it enter upon one that upholds tariff for revenue with incidental protection. Only one of two courses is possible, Protection for Protection sake, call it if you will high protection, or its opposite—radical Free Trade, based on the tariff system of Great Britain.

There is no middle ground where the two systems can meet, and the sooner the Administration and Mr. Randall, if their anxiety to revive the drooping industries of the country is sincere, abondon the scheme of bringing the two ends of the party together on this question the better, The representatives of the important industry will be in a position to prove, even to the satisfaction of a Democratic administration, that the present condition of the affairs of the country renders any revision of the tariff at the present time unwise and dangerous.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, August 31, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¾@5¾ c. that generally rated first quality 4¾@5¾ cts; medium or good fair quality 3¾@4 cts; ordinary thin steers, oxen and cows 2¾@3 cts; extreme range of prices 2¾@5¾ cts; most of the sales were from 3¾@5¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,175 head, against 2,866 last week and 3,012 head the corresponding week of last year, and the sales 1,498 were head against 1,957 last week, and 1,735 head the corresponding week of last year.

The offerings to day, though several hundred head less than on last Monday, were rather in excess of the demand, and a number of them (generally thin cattle) are left over unsold. Prices for tops, as to quality, show little change, the figures for them being a fraction higher, but the quality fully equal the difference. Other grades were rather weaker than they were last week, some dealers reporting a decline of ¼c., on thin common cattle, which they had hard work to dispose of, except at a concession. Prices 2¾@5¾c., with most sales from 3¾ to 5¾.

THE SWINE MARKET.

The receipts, though some 2,000 more than last week's offering's, constitute rather a light supply. Prices, as compared with quotations last Monday, are ¼c., lower, and trade at the decline is generally reported fair in all the yards. The quality will average quite as good as last week's offerings—in one only not quite as good, and in the others a little better. Prices 6¾@6¾c. for common and grass hogs, and 6¾@7¾ for better grades. Same time last year hogs sold at 6¾@7¾c., for grassers, and the better grades 8@8¾, and few at the latter price.

THE SHEEP MARKET.

The offerings number nearly three thousand less than they did last week, and although there is no active demand, trade is fair, but only for good sheep and lambs. Common stock is dull. The quality is about the same as it was last week Prices range at 2@4c., for butcher sheep, and at 3@5 for lambs. Same time last year sheep sold at 3@4¾c., and extras 4¾; lambs 4@5, and a few extras 6.

NEW ADVERTISEMENTS.

EXAMINATION OF TEACHERS.

OFFICE OF THE BOARD OF COUNTY SCHOOL COMMISSIONERS, OAKLAND, MD., Aug. 18th, 1885.

Public Examinations of public school teachers for Garrett county, will be held as follows:

At Accident, Sept. 1st and 2nd,
At Oakland, Sept. 8th and 9th,

at 9 A. M. Candidates will provide themselves with pens and paper.

By order
C. B. LUDWIG,
7 22 2 Examiner.

PUBLIC SALE
—OF—
MILITARY LOTS
IN GARRETT COUNTY.

On MONDAY, Sept., 14th, 1885,

at 3 o'clock, P. M., in front of the Glades Hotel, in Oakland, we will, on behalf of P. M. Lusson and wife, the owners, offer at Public Sale to the highest bidder the following

MILITARY LOTS to wit:

Nos. 2724, 2721, 2726, 2727, 2660, 2664, 2668, 2691, 2692, 2693, 2694, 2497, 2494, 2463, 2460, 2429, 2431, 2472, 2473, 2582, 2490, 2493, 2441, 2442, 2490, 2493, 2593, 2584, 2585.

These Lots are a part of the tract of land called

"INTERNAL IMPROVEMENTS,"

and lie in the neighborhood of Accident. The tract, "INTERNAL IMPROVEMENTS" was patented to General Walker K. and John B. Armistead, April 28th, 1834. On June 30th, 1847, the widow and heirs at law of General Walker Armistead filed their bill in Equity for a sale of said land, No. 861 Equity, Allegany county. A decree was passed by which W. M. Price was appointed trustee to make said sale. Said Price, trustee, sold and conveyed said lots to P. M. Lusson, and said sale was ratified and confirmed by the Court.

Any person desiring to examine the title of Lusson and wife to said lots can do so by calling on the undersigned who will furnish any information in their possession with reference to the title.

STATIONARY STEAM SAW MILL
On Cheat River, at Rowlesburg, W. Va.

Built in 1881, 25 by 85 feet, two stories high. All in first class order with 600 feet river front. There is a two-story dwelling house, office and dry kiln on property. Also a break-water 100 feet long, 22 feet wide and 13 feet high. Splendid chance for the saw mill business. There are immense tracts of timber lands untouched on river.

Good reasons for selling, and will be sold cheap on reasonable terms.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1885, and recorded in Liber W. H. T. No. 10, folio 371, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

WEDNESDAY, SEPT. 30, 1885,

at 11 o'clock, A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O. Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
9 5 4t Attorney for Mortgagee.

Order of Publication

Joel Wiland vs. Florissa Biddinger, Simeon Biddinger and James Bowser.

In the Circuit Court for Garrett county. No. 160 Equity.

The object for which the bill of complaint was filed in the above cause, was to have certain deeds therein mentioned set aside as fraudulent, and to procure a decree for a sale of the real estate conveyed by Florissa Biddinger and Simeon Biddinger to James Bowser, and to subject the same to the payment of the plaintiff's claim.

The bill states that in the year 1875 Simeon Biddinger was largely indebted to the plaintiff for work done and materials provided for him, the said Biddinger, and for board and clothes for the children of the said Biddinger, and that the plaintiff continued to furnish board for the children of said Biddinger up to the time of the filing of said bill.

The Bill further states that on the 25th day of June, A. D. 1878, he instituted suit in the Circuit Court for Garrett county, to recover from said Biddinger the amount due him, and that on the 9th of September, A. D. 1879, a judgment was rendered by said Court against the said Biddinger in favor of said plaintiff for the sum of $33.45, and $75.75 costs.

The Bill further charges that after the institution of said suit at law, and until the filing of the bill in this cause, the plaintiff continued to furnish board and clothing for the child of the said Biddinger, and that the said Biddinger is indebted to the plaintiff in the further sum of $142.50, making an entire indebtedness on the 15th of September, A. D. 1879, of $611.70.

The Bill further charges that prior to the month of May, A. D. 1876, the said Biddinger purchased from Jacob Hare and wife, a tract of land in Garrett county, called "Mount Airy," containing fifty acres of land; that the said Biddinger paid the entire purchase money for said land, amounting to $750.00 or more. That after said Biddinger had purchased said land and paid for it, he intending to cheat, defraud, hinder and delay the plaintiff in the collection of his said claim, and with a view to cheat and delay his other creditors in the collection of their claims, fraudulently procured and induced said Hare and wife to convey said land to Florissa Biddinger, his infant daughter, by deed dated May 22nd, 1876.

The Bill further sates that at the time said deed was made and at the time of filing said bill, the said Florissa was an infant, under the age of twenty-one years, and that she had no money of her own, and that she was wholly incapable of earning any money, that she had not inherited anything, and that she paid no part of the purchase money for said land.

The Bill states that the said Biddinger further intending to cheat the plaintiff and hinder him in the collection of his said claim, did on the 14th day of January, A. D. 1879, procure, induce, and require his said infant daughter to join with him in executing a deed for said land to James Bowser, and that the said James Bowser knew all the circumstances surrounding the whole matter, and that his object was to cheat the plaintiff.

The Bill further charges that the said Biddinger was indebted and had not means apart from said property to pay his debts, and that the said conveyances were fraudulent and void and contrary to Equity and good conscience.

The Bill then prays that said deeds be set aside and that said land be sold for the purpose of paying the plaintiff's claim, and for general relief and for process.

It is thereupon ordered by the Court this Second day of September, A. D. 1885, that the plaintiff cause a copy of the order together with the object and substance of the bill to be inserted in some newspaper published in Oakland once a week for four successive weeks before the fifth day of October, A. D. 1885, giving notice to the said Florissa Biddinger, the non-resident defendant in said Bill, and warning her to appear in person or by Solicitor on or before the 5th day of October, A. D. 1885, to show cause, if any she has, why a decree should not pass as prayed.

Mortgagee's Sale

—OF VALUABLE—

REAL ESTATE

In Garrett County, Maryland.

By virtue of a power of sale contained in a mortgage from Alpha Hinebaugh and Fannie B. Hinebaugh, his wife, and John Hinebaugh and Mary A. Hinebaugh, his wife, to Matthew Cullen, dated June 8th, 1882, and recorded among the Land Records of Garrett county, in Liber W. H. T. No. 6, folios 468, &c., and assigned to Henry A. Rasche by said Matthew Cullen, the undersigned, assignee of said mortgagee, will offer at public sale, in front of the Court House, in the town of Oakland, Garrett county, Maryland,

On Monday,
SEPTEMBER 14TH, 1885,

at 3 o'clock P. M., all the following Real Estate, viz:

First, All that tract of land situate, lying and being in said Garrett county, known as

"SWALLOW FALLS,"

containing about eight hundred acres.

Second, All those pieces or parcels of land situate, lying and being in Garrett county aforesaid, known and designated as

Military Lots Numbers 1256, 1258, 1260, 1261, 1262, 1263, 1264, 1265, 1266 and 1269,

containing fifty acres of land each, and included in a tract of land called

"The Falls of Muddy Creek."

All of which said lands are more particularly described in the said mortgage, reference to which is here by made.

Said lands are situated on and near the Youghiogheny river, about seven miles north of the town of Oakland, are well timbered, and improved by several DWELLING HOUSES and out-buildings, and the same property on which the said Alpha Hinebaugh recently operated a saw mill.

TERMS:—Cash on day of sale.

HENRY A. RASCHE,
8 15 4t Assignee of Mortgagee.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. Reference given when required.

Our New Flouring Mill.

The new mill in Oakland, a large and commodious building, is now receiving the finishing touches. All the new machinery is being placed in position as fast as possible and will be ready for work in a week or ten days. In this building a want felt for a number of years has at last been supplied, for we venture to say that, from all appearances, so far, there will not be a finer mill in the State when completed, a full description of which will be given through these columns hereafter.

Marriage Licenses.

Marriage Licenses were granted to the following parties during the month of August:

John Ople and Catharine Miller.

James C. Keys and Harriet A. Male.

John S. Carter and Maggie Metts.

Charles G. Georg and Emma B. Lohr.

Garrett J. Wolf and Minne M. Herman,

Chas. L. Wamsley and Harriet L. Sanders.

Wm. L. Riley and Mary A. Lewis.

Martin P. Altman and Mary Bond.

Real Estate Transfers.

The following is a list of real estate transfers filed for record in the office of W. H. Tower, Clerk of the Circuit Court for Garrett county, for the month of August:

Jos. R. Anderson and wife to Hannah Spiker, 20 acres and 5 perches of "Glen Eyry"; $100.

Jos. R. Anderson and wife to Thos. R. McRobie, 25½ acres of "The Pink of Allegheny"; $182.

Jos. R. Anderson and wife to Mrs. M. A. West, less ¼ of an acre of "Latent Worth"; $50.

Fredk. Gortner and wife to Peter P. Gortner, 11¼ acres of "Swan Meadows"; $115.

Silas Teats and wife to Jackson Teats, part of the Gleamings, 50 acres; $500.

G. S. Hamill and wife to Handy Gipson, lots Nos. 2 and 3 on the subdivision of lot No. 57 of Wilson's First Addition to Oakland; $450.

Daugald McLane and wife to Onesime Guay, ½ interest in part No. 4 of the Buffalo Marsh Property; $10 &c.

Amaziah Turney to Samantha J. Turney, a tract of land containing 113½ acres; $1300.

Hiram V. King to Clara A. King a piece of land containing 37½ acres; $250.

Richard Selby and wife to Martin V. Selby, military lot No. 2775; $709.

Joel Miller and wife to Wm. R. Getty, lot No. 16 in Miller's Addition to Grantsville; $100.

Thomas R. McRobie, admr. to Buckner Mason, 43 acres of land; $500.

Gertrude E. Stahl to Geo. M. Mason, a lot of ground in Oakland; $1,000.

Norman Barnard and wife to Johnson King, 49 acres of military lot No. 1530; $185.

John Bradley and wife to Francis B. Ross, lot No. 103 in "Wilson's First Addition to the town of Oakland;" $175.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

Friendsville.

Among those who attended Quarterly Meeting here from a distance were Mr. and Mrs. S. M. Friend, Judge Friend and daughter, Miss Minnie, Mr. and Mrs. Frantz and Mr. George Browning, of Sang Run. Misses Carrie and Liza Smith, Lou and Sadie DeWitt, Jennie Custer, Rob. and Will Smith, A. DeWitt and D. Custer, from Johnstown.

Mr. L. M. Albright, of Albrightsville, W. Va., has sold his store here to Wm. Ryland.

Messrs. Albright and Wagner are off on a business trip to Stalstown Pa.

Prof. and George Steele started for Tennessee last week, where they will teach a term of school the coming winter.

Mr. L. E. Friend, the handsome photographer, is at Friendsville for the present.

Misses Annie Frantz and Alice DeWitt, of Johnstown, were visiting here one day last week.

Do you know that everybody ought to subscribe for THE REPUBLICAN.

That it would enlighten the Democrats.

That we are going to have a new store at Friendsville.

That everybody thinks they know

BETSIE.

Mountain Lake Park.

Rev. John Thompson's family left us, and so have Rev. N. L. Reynolds and his company, also Messrs. J. M. Davis and J. M. Jarboe have gone back to their homes in Oakland.

Rev. Wilcox, of Harrisburg, Pa., is now occupying Rev. J. B. Young's cottage.

Rev. W. J. Sharps, and other hay fever patients, of Moundsville, is occupying his own cottage.

Prof. White's child is getting along as nicely as could be expected.

The stockholders held their annual meeting in the new hall on Tuesday, the 25th inst. They elected as directors the same ones who had just retired, viz: Dr. J. B. VanMeter, President; Rev. C. W. Baldwin, E. J. Stone, C. W. Conner, directors; J. M. Davis, Secretary and director, and A. S. List, Treasurer. They have not yet fully decided upon the plan of work for the year, but will endeavor to increase the comfort and convenience of the people, and add greatly to their numbers. Already the programme is being arranged for next season, cottages are being engaged and companies are forming in different places with the intention of spending next season at this place.

Dr. Locke, of the east Ohio conference, preached for us an earnest and eloquent sermon on Sabbath morning. A very good meeting was held in the evening for the young people by Mr. H. H. VanMeter.

Mr. Lloyd Chambers has completed the stone work on Miss Hariss' cottage, and Mr. Brooke, the contractor, has the frame well under way. He is also putting up an addition to Mrs Blake's cottage.

Mr. E. J. Stone is fencing in his cottages in Cosey Row.

We are very glad to have with us again Rev. J. B. Young, who has fled to the mountains to escape the hay fever.

Miss Jennie Smith has completed arrangements with the B. & O. Co. for very low excursion rates from Grafton and Cumberland and intermediate stations for the purpose of having a grand Sunday School and temperance pic-nic on the 21st of September. All Sunday School and temperance workers are cordially invited to come and bring their baskets and spend a happy day with us on these beautiful grounds. I am very glad to state that Rev. J. B. Young will be one of our speakers on that day. The well known "Pansy" is invited to be with us.

J. A. E.

McHenry, Md.

MR. EDITOR:—Will you please allow me space in your valuable columns for a short essay on the subject "Behind the Counter." Every age of the world has had its heroes and martyrs whose names are inscribed on imperishable monuments, and whose deeds are made eloquent in history and in song, but strange to say there have been as yet no drum beatings, orations or loud hurrahs in honor of that large and respectable class of men and women who serve the public behind the counter. The jubilee day for them has not yet arrived, but when it does appear they shall then verily have their reward. I am willing to concede without argument, that the patriarch Job was the most patient man of his time, but it is well to bear in mind the fact that he was not suffered to be tried behind the counter. He was thus spared an affliction which might have tempted him to renounce his integrity and yield to the wicked counsels of his wife. Do not think, my dear reader, that they who tip the scales and wear the scissors dwell daily in gardens of roses, on the contrary, they find thorns on the yard-stick, and provacations inwoven with the purple and liven. I have served among them and gathered experience of their traits from the molasses jug to the lace counter. I beg to say that I have a warm place in my heart for many who have been considerate and kind in their manners and dealings, but no sweet memories shall ever be entertained by me for the McFlimseys and fastidious shoppers, who more than once led me almost to the verge of violating the third commandment. I dream at night of the professional sample beggars and store-to-store-runners, of the great piles of goods pulled down to gratify the curious who never buy anything, of the exactions and time spent in the bargains of a dollar, of the shylocks who always demand two for one, and I regret to say that as this panorama of daily occurrences passes around my pillow my sleep is far from sinless. I am not sanctified and cannot expect to be while in this state of mind. I venture the assertion that a great many of the Ananias and Sapphira family are still living, and that you will not find all of them behind the counter. They can be found in front of it also, with no scruples which are not readily overcome on the turn of a penny or a dime. One may see from behind the counter all the varieties of the wonderful make-up called human nature—the fiction and the fact, the poetry and the prose, the light and the shadows, the proud and the humble, the timid and the confident, the generous and the closefested, and sometimes a meanness exceeding that of the youthful Jacob in the transaction of cheating Esau out of his birthright. I am willing to admit by way of fairness that there are snobs and offenders on the side next to the shelves, who are wearers perhaps, of clean linen and starched collars, whilst they also show more polish on their patent leathers than in their manners. These and those before refered to, are the exceptions to both sides of our subject, but as the numbers are large enough to justify all that I have written, I shall have no apology to offer, and therefore subscribe S. P. S.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

Court Docket.

Below will be found a complete list of the cases which stand for trial on the several dockets at September Term, which commences on the 14th inst:

Advertise

If you want a farm put a small advertisement in THE REPUBLICAN; you will get more information in that way, in spending $3 or $5, than you would by spending $50 in traveling. If you want to sell your land, advertise in THE REPUBLICAN; it goes to all parts of our county, as well as to adjoining counties in Maryland, West Virginia and Pennsylvania, and is seen by those who are looking for new homes. If you have anything to sell or buy, any wants, advertise in the paper having much the largest circulation of any paper in the county. It gives value received, and can not fail to reach the most desirable parties, and bring excellent results.

Too Much for Belief.

From the New Orleans Times-Democrat.

A prominent citizen of Jones county, Miss., who stood high in the church, made a visit to Meridian recently, and upon his return told his neighbors he had seen ice manufactured in that town with the thermometer standing at 98 degrees. It soon became a settled fact in the minds of the members of the church that Brother Blank had degenerated into an able liar. Charges were preferred against him, and a committee of church members was appointed to visit Meridian and convict the erring brother of lying. They went, saw the ice manufactured, and returning home so reported to a meeting of all the church members. A look of astonishment on the faces of the assembled brethred soon gave way to one of indignation, and Brother Blank and the entire committee were incontinently expelled from the church.

NEW ADVERTISEMENTS.

COMMISSIONERS' MEETING.

OFFICE OF THE
GARRETT COUNTY COMMISSIONERS,
OAKLAND, MD., Aug. 26th, 1885.

The County Commissioners of Garrett county will meet in their office at Oakland, on

Monday, Sept. 14th, 1885,

for the purpose of the transacting of general business.

By order

G. W. MERRILL,
8 30 2t Clerk.

NOTICE!

To the Qualified Voters of the Respective Election Districts of Garrett County.

Notice is hereby given that the undersigned Officers of Registration of Voters in and for the respective election districts of Garrett county, will sit in their respective election districts in said county, on the Tuesday, Wednesday, Thursday, Friday and Saturday, after the first Monday in September, that is to say on the 8th, 9th, 10th, 11th and 12th days of September, in the year 1885, and also for two successive days commencing with and including the first Monday in October, that is to say on the 5th and 6th days of October, in the year 1885, at the respective places and on the respective days hereinafter named, for the purpose of ascertaining and registering in the proper registries of voters and poll-books persons qualified to vote in their respective election districts, and of revising and completing their respective registries of voters and poll-books of their respective election districts.

The undersigned Officers of Registration will commence their said respective sessions on the respective days, and at the respective places herein named at the hour of 8 o'clock A. M., and continuing the same until the hour of 7 o'clock P. M. of each of said days, as follows, to wit:

Election District No. 1—Swanton.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Swanton.

Election District No. 2.—Selbysport.

Tuesday, Wednesday, Thursday and Saturday, the 8th, 9th, 10th and 12th days of September, at William Ryland's store, and Friday, the 11th day of September, at Rush's school house, and Monday and Tuesday, the 5th and 6th days of October, at William Ryland's store.

Election District No. 3—Grantsville.

Tuesday and Wednesday, September 8th and 9th, at the residence of the Officer of Registration, and Thursday, Friday and Saturday, September 10th, 11th and 12th at Grantsville, and Monday and Tuesday, October 5th and 6th at Grantsville.

Election District No. 4—Bloomington

Tuesday and Wednesday, the 8th and 9th days of September, at Geo. T. Michael's house and Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Bloomington.

Election District No. 5—Accident.

Tuesday and Wednesday, the 8th and 9th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Accident, and on Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, at Sylvester H. Ryland's house.

Election District No. 6—Sang Run.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at the house of Nathan Browning, in said district.

Election District No. 7—Oakland.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Oakland.

Election District No. 8—Ryans Glade

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, at Fort Pendleton, and Monday and Tuesday, the 5th and 6th days of October, at Mrs. Thomas Grimes, in said district.

Election District No. 9—Frostburg.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October at Johnson's.

Election District No. 10.—Deer Park.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at Altamont, and Monday and Tuesday, the 5th and 6th days of October at Deer Park.

Election District No. 11.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at the house of Jehu H. Gregg, and Monday and Tuesday, the 5th and 6th days of October at the house of Jacob Strickland.

All naturalized citizens applying for Registration will be required to produce their certificates of naturalization to the officers of Registration.

H. O. HAMILL,
Officer of Registration 1st District.
R. E. FRIEND,
Officer of Registration 2nd District.
ISAIAH FULLER,
Officer of Registration 3rd District.
GEO. T. MICHAEL,
Officer of Registration 4th District.
SYLVESTER H. RYLAND
Officer of Registration 5th District.
N. C. BROWNING,
Officer of Registration 6th District.
ANDREW J. HARNE,
Officer of Registration 7th District.
WM. F. DEAKINS,
Officer of Registration 8th District.
GEORGE L. LAYMAN,
Officer of Registration 9th District.
PERRY M. STEMPLE,
Officer of Registration 10th District.
JOHN C. CHANEY,
Officer of Registration 11th District.

LAND! Claims a specialty. Warrants, and ADDITIONAL HOMESTEAD CERTIFICATES and all kinds of LAND SCRIP bought and sold. SUSPENDED ENTRIES, LAND, PATENT and PENSION cases attended to. Correspondence solicited. A. A. Thomas, Attorney at Law, Room 25 St. Cloud Bld'g, Washington, D. C.

OAKLAND, GARRETT CO., MD.

MOTHER EARTH.

O, mother earth, how sweet to rest
Here on thy breast,
While overhead the fair blue sky,
With sun-lit cloud-wraiths floating by,
Bends lovingly.

How sweet the moist smell of thy sod
Where grasses nod:
Where, halo-crowned in her own rays
One slender stem the daisy sways
Through summer days;

Where clovers tempt the wandering bees
With honeyed lees;
Where lolls the wind on lazy wing,
While in his breath the light leaves swing—
Faint fluttering.

O, mother earth, so kind art thou,
My t red brow,
So long with weariness oppressed,
Forgets the aching and unrest
While on thy breast;

Forgets the striving and the pain
That racked the brain;
The blight that fell on hopes so fair,
The dreams that vanishing in air
Left heavy care!

O, mother earth, sometime to rest
With n thy breast,
With folded hands in dreamless sleep,
In peaceful slumber long and deep,
While grasses creep,

And daisies come to swing and nod
Upon the sod,
That roofs the narrow house where I,
Unconscious how the swift years fly,
Shall peaceful lie!

O, mother earth, thou art so fair
And yet somewhere,
Beyond that sky so lovingly,
So radiantly bent over me,
Shall I not see,

Awaking with unclouded sight,
In God's clear light,
A land to which thy fairest dream
A vague uncertain, flickering gleam
Shall ever seem?

Yet so, O mother kind, I trust,
When dust to dust
This throbbing head now pressed to t
These feet that walk so stumblingly,
Shall gathered be,

My soul with rapturous joy shall stand
In that sweet land;
Content if but His simple child
May in the Master's likeness mild
Walk undefiled.

—*E. F. Merrill, in Louisville Courier-Journal.*

THE WHITE LADY.

Her Machinations Against the Young Heir of Beroldstein.

My father had been clergyman in the quiet little English parish where I was born, and I, his only child, had reaped the benefit of a careful education, which he had given me during his spare hours. When, a little after my twentieth birthday, my father died, leaving his untarnished name as sole inheritance for my mother and myself, I began to realize the value of his teaching, for it—aided by my vigorous health and a fair spirit of determination—must now keep the wolf from the door.

My father had rich influential relatives, but they were too much occupied with the responsibilities which wealth brings to take to heart the troubles of their poorer kindred—though perhaps I am ungrateful to say this, for it was through the intervention of my uncle that I gained the position which assured to me at last the happiness of my life.

In Southern Prussia, in the Duchy of Beroldstein, the position of nursery-governess to two children was vacant—a most desirable place, the children being the infant son and daughter of the late Duke of Beroldstein, who had died only six months before. Thanks to my uncle, I was the chosen applicant for this position. I felt fairly confident with respect to my proficiency, for at first my task would be only to have the supervision of the noble children and to teach them to speak my English tongue correctly; but I confess that I felt very down-hearted as I went on board the boat that was to take me to an unknown country.

"Your brother need not be uneasy about you—we shall land safe enough on the other side," said the cheery Captain, standing near me.

I smiled through my tears, for the tall, frank-eyed young fellow who watched me from the shore with such a look of anxious regret on his face was not my brother.

As Charlie kissed me—he had never kissed me on the lips before—and whispered, "Keep a good heart, Alice, my darling—we shall meet again when prospects are brighter," I felt more hopeful than I had for months before, for his words seemed to contain in them a certainty of fulfilment.

Charlie Kent and I had been lovers almost from babyhood; and, now that childhood had long since passed, I can not say that our feelings for each other had changed, save to intensity. We were both very poor, but were content enough to wait for better times.

Schloss Beroldstein proved to be a very stately old mansion, a trifle repellant in its air of antiquity and isolation from the rest of the world. A park extending many miles lay before the castle, and from my windows at the back I had a beautiful view of the Eifel mountains. The grounds at one time must have been laid out and tended with royal care; but now the statues were broken, the fountain out of repair, and an air of neglect pervaded the avenues and shrubbery.

The Duchess lived in the strictest seclusion on account of her recent bereavement, her only concern being the welfare of her children. My little charges were charming—a twin brother and sister, and the only surviving children of the famiiy.

Roderic, the young heir to the dukedom, was a truly beautiful child, rosy and cherub-like, with a promise of intelligence in his face which well befitted the high rank to which he was born. Amalie, the little girl, was a quieter, softer copy of her brother, and already the pair were devotedly attached to each other.

The children were rather more than a year old when I arrived at Beroldstein—certainly too young to derive much benefit from my presence, I thought; but, as it was customary in high families to have the children learn foreign tongues from the cradle, my conscience quieted itself.

Very little time elapsed before I found myself the friend and confidant of Frau Brenner, housekeeper at the Castle. Among other bits of information she told me what I rather expected to hear, that Schloss Beroldstein was haunted.

"It is quite the spot for a ghost to choose for midnight wanderings," I remarked, and though secretly amused at the old woman's credulity, I encouraged her by my air of deep interest to tell me more of this spectral visitant.

It was the well-known story of a lady in white appearing as the silent herald of a death in the family. Three years before, one dark, stormy night, the sentinel at the gates had seen the White Lady gliding among the trees towards the Castle, and before morning the uncle of the late Duke was stricken dead with paralysis. Three times the white apparition was seen during the week before his Highness Duke Albrecht died; and, according to Frau Brenner, no member of the Von Beroldstein family had ever been gathered to his fathers without the assistance of the White Lady. The mere mention of her name made every servant in the place shudder, and even the more enlightened members of the household did not deny her evil influence. In fact, I had frequent occasion after this to wonder at the amount of superstitution prevalent among even the higher class in this little corner of the world whither fate had drifted me.

Some months later I was out in the park with the two children. It was mid-winter, and there was snow enough for sledging; the children, clothed from head to foot in soft white fur and half buried in a polar bear robe, were enjoying a ride in their swan-shaped sleigh in white and silver, with an arch of tinkling bells attached before, in the Russian fashion.

While a footman pushed the dainty little vehicle I walked on one side talking to the children and enjoying their babyish delight at the glistening frost and snow.

Roderic was brimming over with life and excitement, and his restless little hands, mittened in fur, clutched at every low-hanging icicle and glittering twig, thereby letting in much of the cold breath of winter on his more composed sister. As we went briskly down the avenue a lady richly dressed in black velvet and sable met and stopped our little cavalcade. I wondered who this *grande dame* could be who preferred a lonely walk in the deserted avenues to a drive in a luxurious carriage with good company.

"I must pay my respects to the young Duke," she said pleasantly.

She took Roderic's hand in hers and looked at him long and intently, but not with the expression that his rosy cheeks and bright blue eyes ought to have awakened in the face of a woman. Her look was more as if she bore the innocent little fellow malice, and when he pointed with delight to the lion's heads in dead gold which fastened her mantle, she drew away impatiently. After asking a few questions about Roderic's health and mental development, which I was proud to answer with glowing praise, she resumed her walk with a stiff adieu to me and not a word or look for little Amalie, who, aided by her brother, threw most affectionate kisses from her mittened fingers after the retreating figure.

I felt a sudden unconquerable dislike to this woman; she was tall, stately and beautiful in a statuesque, heartless way, but I knew there was no more tenderness in her than there was blood in her velvety, cream-like complexion.

"Who is that lady?" I asked of the footman, when she was out of hearing.

"Mme. Elizabeth of Beroldstein, the wife of the late Duke's younger brother. She would be Duchess now if it were not for this little man"—gently touching Roderic's curly hair. "They say her mind is sometimes astray, and I believe the gossips are right."

In feature, carriage and gesture she was much more the high-born dame than was the amiable mother of the two children in my charge, and it seemed afterwards to me as if Mme Elizabeth protested silently against the fate that had not elevated her to the place which she would have adorned so well.

"Has Mme. Elizabeth any children?" I asked.

"Yes, two boys; but they can not be Dukes of Beroldstein unless misfortune overtakes my young master, which Heaven forbid! Mme. Elizabeth can not become reconciled to the fact that her husband is only the second son."

The dislike I had conceived for the newcomer only increased on nearer acquaintance; she had come for a visit of some weeks, perhaps months to the castle, and I noticed that without exception the older servants of the place either spoke ill of her or never mentioned her name.

"She is one of the beautiful demons that one hears about in the stories of my country," remarked Frau Brenner with a shake of her head. "But one should not judge her too hastily; she lived all her youth in a lonely part of Russia, with no mother to guide her and under the influence of a father who was none to saintly."

Shortly after this my attention was taken up by an event much more interesting to me than the intrigues of the Von Beroldstein family. Charlie, my lover—bless his faithful heart!—had by dint of persistent search obtained a position in a bank at Trier, a trifling distance by rail from Beroldstein, and had installed himself in that town. The delightful knowledge of a true friend and protector being near at hand gave the world a wonderful brightness for me and even little Amalie began a baby attempt at repeating the simple home tunes which from sheer lightness of heart I sang in her ears all day.

To see each other again was happiness enough for Charlie and me, and we found no time during our brief meetings to mourn that the prospect of our beginning life together was still in the dim future. I had a most trustworthy messenger for my innocent communications to Charlie in the person of an Alsatian nursemaid, Lisette by name, who declared herself ready and anxious to serve me by every means in her power. Her attachment dated from an occasion when I had shielded her from a severe reprimand. She had carelessly allowed little Roderic to play with a dog known to be fierce, and the little fellow had been bitten just below the knee—only a slight wound, but enough perhaps to cause the girl's dismissal if discovered. With a little forethought I arranged to dress and undress Roderic for a few days so that the wound would not be noticed, and neither Lisette nor I ever called attention to the three little scars left on the baby's round white leg. Lisette repaid me by accounting most ingeniously for my brief absences with Charlie.

* * * * * *

Little Roderic had been slightly ill with some childish malady, and for a few nights I had slept beside his bed, until, at the urgent request of Mme. Elizabeth, I went to take undisturbed rest in my own room. I wondered at her solicitude, for she was usually selfishly indifferent with respect to the comfort of others. Rather unwillingly I resigned my care of Roderic to a rosy-faced country maiden who promised to keep a vigilant eye on the young Duke.

In the early gray of the following morning I was awakened from a sound sleep by an uproar in the house, at the thought of which I still shudder. Cries and lamentations sounded from the children's apartments, and, rushing to the spot, I saw the Duchess on her knees before Roderic's bed, with a group of frightened servants gathered near her, the one who had been left in charge of the baby moaning and calling on the name of all the saints, her face ghostlike with terror.

"In Heaven's name, what is the matter?" I cried.

"Look!" was all the Duchess could utter, pointing to a little form moving uneasily on the pillows.

Instead of the beautiful sleeping cherub that I had kissed only a few hours before a terrible face, purple and distorted with wild eyes, and limbs rigid with suffering, lay before me.

"When did this happen?" I asked, with a shaking voice, seizing with a grip like iron the arm of the nursemaid Lottchen.

"The Holy Mother forgive me," the girl began, "for the five short minutes that I dozed! His young lordship was sleeping like one of the blessed angels or I should not have given away. As I opened my eyes I glanced towards the door, when—the saints defend me!—I saw the long trailing garments and ghostly form of the White Lady disappearing in the darkness! My voice was gone with fright or I should have screamed. As the life came back to me I looked at the bed and saw the awful change that had come over the young master. O, Fraulein, am I to blame because the White Lady stole away his health and beauty in her death kiss?

The girl fell upon her knees in a paroxysm of grief, and I could understand no more of her incoherent exclamations.

The whole scene was so weird and shocking that it seemed as if my senses were leaving me. Every possible remedy had been tried for the child, who was evidently dying. The whole household had been aroused; but Mme. Elizabeth had not yet appeared on the sorrowful scene. I inquired where she was; but no one seemed to know. Before the physicians for whom servants had been dispatched in all directions could arrive the baby had breathed his last. One could not help a feeling of relief that his sufferings were over, and no one seemed able to realize fully the great loss that the ducal house had sustained.

The doctors confessed themselves completely baffled and unable to account for the sudden and fatal turn of the child's apparently slight illness. The story of the White Lady and her deathly kiss was firmly believed in by the servants, and among the more responsible members of the household it seemed to gain credence.

The whole occurrence seemed to me monstrous and impossible, and I half believed it all a horrible dream, but there was the dead child before me—a sad reality. Late in the afternoon I had stolen in unknown to every one and stood before the bed where he lay. As I looked at the quiet, rigid form, the conviction seized me with a strange force that this child was not the heir of Beroldstein—treachery might so easily exist where misfortune was traced to supernatural influences.

The little face, marked and drawn as if from a burn, gave no idea of how the child had looked in health—the limbs seemed the same, and the light curling hair was like Roderic's, but still my eyes were dry, and I could not mourn over this mysterious changeling. Something within me rebelled against the mockery of the ducal coronet and rich lace adorning the deathbed of a poor little stranger.

I told no one my suspicions—I had, alas, no proof—and to lull my excitement I went out into the gathering darkness, paying little heed to the distance I walked. At last, feeling weary—I was miles away from the castle—I was about to return when I saw a light glimmering from a cottage window within a few steps from where I stood. I was surprised to find a house in that lonely spot, for I had been told that that portion of the moorlands was too low lying and barren for human habitation. As the idea of a short rest was not unwelcome I looked through the thinly curtained window, and saw that a tall, dark woman bending over a steaming saucepan on the stove and a little child in ragged clothes making friends with a shaggy dog were the only occupants of the room.

I was about to make my arrival known, when a second look at the child, whose face was turned full towards the window, made me pause suddenly. Was I dreaming, or were those really little Roderic's blue eyes looking up with the frank wide-open gaze that I knew so well? The soft golden curls had been cut off, and the coarse rustic clothes were a good disguise, but I knew my young charge too well to be deceived.

Like a mad woman, I flew back over the long, dark road to the Schloss. It was no safe to let my investigation go farther alone; so I seized on the first servants I found—Max, the coachman, and the maid Lisette, whom I had befriended—and, giving them a hurried account of what I had seen, I led them back to the lonely cottage.

We made our way in unceremoniously enough. At the first glance the room seemed vacant, and my heart sank; but the next moment we discovered the baby asleep upon a pillow in a dark corner. The man gathered up a little bundle and bore it to the light; the baby awoke and looked with sleepy, hazy eyes at the disturber of his rest. Even then I saw no look of recognition on the servants' faces. Could I be mistaken? The thought was misery.

But, becoming fully aroused, the little child sat up and held out his arms to me, claiming in baby language an old friend.

"It is our young master—I have no longer any doubt!" the man said instinctively raising his hat.

"Look fo; the mark of the dog's bite on his knee, to make sure," put in Lisette, trembling with excitement.

I had not thought of this before, and was thankful for the girl's suggestion. As I expected, we found the three little prints made by the dog's teeth in the baby's tender flesh. At this additional proof of my darling's identity I fell upon my knees and sobbed for pure delight, thanking from the depths of my heart the mysterious Providence that had directed my steps to the desolate cottage.

At that moment the woman whom I had seen on my first visit entered the room, and the look of terror that came over her face at seeing us I shall never forget.

"What—who," she began confusedly; but Max interrupted her by saying coolly:

"We have come to relieve you of the care of this child; he is needed at the Castle, where he belongs."

Putting the little boy into my willing arms, he whispered a few words to me to the effect that I was to go back with all speed and send two or three men to relieve his guard over the suspicious premises.

An hour later the Schloss Beroldstein was the scene of the greatest excitement. The news spread like wildfire throughout the whole neighborhood that the young Duke had been restored from the dead. I dressed little Roderic in his own clothes, gave him "on the hearthrug, and then brought his grief-stricken mother to look at the pretty picture. I shall not attempt to describe how the house of mourning changed to one of rejoicing. A last but striking proof that the young heir had returned was the unfeigned delight with which little Amalie welcomed back her brother.

* * * * * *

The dark woman of the cottage was put under arrest, and with very little hesitation made a statement to the following effect: She, Anna Freitschler, had come some weeks before from Thuringia to Beroldstein with the lady known as Mme. Elizabeth. She had brought with her her little boy, one year old—a pretty child when in health, fair and blue-eyed, but at that time much disfigured by illness. The doctor had said that the child was too ill to travel, that he might die any day; and she, Anna, had not wished to make the journey; but Mme. Elizabeth had given her a large sum of money, with a promise of more if she would bring the child; and she, being a poor widow, had not been able to resist the offer. She was required to give a promise to live alone in the cottage that Mme. Elizabeth would choose for her, and to tell no one who she was or whence she came. She did not know for what reason she had been sent for, or what purpose she was destined to serve; she was only content that the promised money was paid her at regular intervals. The baby grew much worse and became shocking to look at, with its face like a scarlet mask. One night when Anna thought it very near its end, Mme. Elizabeth, dressed in white, came alone and on foot to the cottage—her second visit there that day. She seemed very much excited, and said Anna must let her take the child to the Castle, where there was a great physician who might perhaps cure him. The woman was accustomed to obey, so she wrapped the baby in a blanket and gave him to her. Mme. Elizabeth came again that night, very late, still holding something in her arms. "They could not cure your baby—he is dead," she said, "but I have brought you this child in his place." And she laid in Anna's arms a little boy not unlike the one she had taken away. Mme. Elizabeth then gave her an astonishingly large sum of money, and told her that she was to prepare to go with the child back to Thuringia as soon as possible, there to rear him as her own, and she made her promise never to tell a soul of the exchange that had been made. Anna had no idea of the great wrong she was doing; she had only blindly obeyed every order of the mistress who had her completely in her power.

* * * * * *

It was proved beyond a doubt that Mme. Elizabeth, disguised as "a ghost," had stolen away the young heir of Beroldstein, with the intent to secure the succession of her son, a crime deserving bitter expiation. But a worse punishment than the law could inflict awaited the miserable woman—she became permanently insane, and in the asylum where she was kept in close confinement it was said that her mental sufferings were terrible.

For my efforts in restoring little Roderic to his ancestral home I received a recognition from the Duchess which made my union with Charlie possible, without fear of want in the future.—*Family Herald.*

BRIDESMAIDS.

Some Old Notions Concerning Wedding Attendants.

Importance was formerly attached to the colors which the bride wore on her wedding day. Thus, in an old book entitled the "Fifteen Comforts of Marriage," a bride and her bridesmaids are represented conversing together respecting the colors to be used for the decoration of the bridal dress. It was finally decided, after various colors had been rejected, "to mingle a gold tissue with grass green," this being considered symbolical of youthful jollity.

Again, that the office of a bridesmaid was in time past not altogether a *sine qua non* may be gathered from the fact that during the period of the wedding festivities, which often extended over a week, the bridesmaids were expected to be in attendance and to do whatever they could to promote their success.

Then there was the custom of "flinging the stocking," at which the bridesmaids took a prominent lead; a ceremony to which no small importance was attached. It has been made the subject of frequent allusion by our old writers, and one rhyme, describing a wedding, tells us:

"But still the stockens are to throw;
Some throw too high, and some too low,
There's none could hit the mark."

Misson further informs us that if the bridegroom's stocking, thrown by one of the bridesmaids, fell upon his head, it is regarded as an omen that she herself would soon be married; and a similar prognostic was taken from the falling of the bride's stocking, thrown by one of the groomsmen. It was the bridesmaid's duty, too, to present the bride with the "benediction posset," so called from the words uttered over it: a practice thus noticed by Herrick, in his "Hesperides:"

"What short sweet prayers shall be said,
And how the posset shall be made
With cream of lilies, not of kine,
And maiden's blush for spiced wine."

Suckling thus alludes to this custom:

"In came the bridesmaids with the posset
The bridegroom eat in spight."

Once more the bridesmaids were supposed to look after the bride's pecuniary interests. Thus, at the church porch, when the bridegroom produced the ring and other articles relating to his marriage, the chief bridesmaid took charge of the "dow-purse," which was publicly given to the bride as an installment of her pin-money. Horace Walpole, writing to Miss Berry, in the year 1791, speaks of the dow-purse as a thing of the past, and writes as follows:

"Our wedding is over very properly, though with little ceremony, and nothing of ancient fashion but two bridesmaids. The endowing purse, I believe, has been left off since broad pieces were called in and melted down."

It has been pointed out, however, that a survival of this usage is preserved in Cumberland. The bridegroom provides himself with gold and crown pieces, and when the service reaches the point, "with all my worldly goods I thee endow," he takes the money, hands the clergyman his fee, and pours the rest into a handkerchief which the bridesmaid holds for the bride.

In Scotland the bridesmaid is popularly known as the "best maid," and one of her principal duties was to convey the bride's presents on the wedding to her future home. The first article generally taken into the house was a vessel of salt, a portion of which was sprinkled over the floor, as a protection against the "evil eye." She also attended the bride when she called on her friends, and gave a personal invitation to her wedding.—*T. F. Thistleton Dyer, in Cassell's Family Magazine.*

THE ESPINOSILLA.

A Plant That Is of Great Value to the Mexicans.

The espinosilla, or thorn plant, says Marchial Oropeza, a well-known Mexican naturalist, is native to Mexico, and abounds in various parts of the republics, principally near this capital, at San Angel, Texcoco, Santa Fe, etc. It is one of those beautiful wild plants which adorn the plains of Mexico, and is found particularly in cold, dry spots. It has been thus christened because on touching it a sensation is felt similar to that which a plant covered with thorns would produce.

The Aztecs lacking soap—so necessary to their health and happiness—found its substitute in the espinosilla. They agitated a bough in water and it produced a lather, with which they washed, using the plant as a scrub-brush. Even to-day it is used by women as a hair preservative, having extraordinary powers in that direction. But its most useful application is as a medicinal agent to fight fevers, as it is an excellent diaphoretic.

Its ancient name is beautiful. Holtzitzilxochitl, a compound word: Holtzitzil — humming-bird and xochitl flower; thus translated meaning "flower of the humming-bird."

The Spaniards called it Huichichile, signifying sparrow—a name given it on account of the resemblance between the color of the flower and that of a sparrow's head-plumes.

Those who know the Aztec tongue assert that its real name is cuachile.

The espinosilla belongs to the polemoniaceas family, and the Hoitzia coccinea genus and specie, cav.; loeselia coccinea, G. Don.; cantua hoitzia, Willd.; hoitzia Mexicana, Lauck; cantua, Poir.

It is a perennial plant of variable height, but never more than three feet in height; of a pivotal root, rather flexible, of white surface, corrugated, from which spring secondary roots, thin and separated.

In general the plant is rough and thorny, more so as its age increases. The taste is bitter, especially of the leaves; but the root has two tastes, when first tasted being sweet, after which it is bitter.

There are other varieties in the Republic—the læsalia glandulosa, growing in the hot lands; the L. supertus, in Oaxaca; the L. ciliata, in Vera Cruz; the L. involucrata, in Acapulco, and the L. amplectens, between San Blas and Tepic. —*The Two Republics.*

—The sea-serpent captured by the schooner-crew in Lake Michigan recently was covered, the whole length of its body, with burr instead of scales. Upon removing this burr the serpent proved to be a chestnut.—*Current.*

ADVANCED STEPS.

Farm Animals and Cultivated Grasses the Main Dependence of Educated Farmers.

There are two important directions in which the farmers are making advanced steps; and that, too, in matters that are not likely to undergo any retrograde movement. These are (1), steady accessions to the number of farm animals that are of improved lineage, and (2), the steadily increasing surface devoted to the cultivated grasses. Grass is the natural food of four-footed beasts. The digestive organs of the ruminants are especially roomy, made so to provide for the more bulky kinds of food. This is especially true of cattle, and a cattle beast bred for meat production is not what it should be, and is far from being up to possible development for this particular end, unless quite capable of being made fit for the butcher upon good pasture.

The natural coarseness in grass, made so by its woody fibre and its succulency, from the abundance of juices and water contained, render it particularly well calculated to keep digestion and assimilation up to their highest state. Digestion is not often disturbed by grass feed, given alone in abundance, as is evidenced by the fact that offensive gases are seldom given off with, or from the evacuations of cattle fed upon grass alone, while it is not uncommon for digestion to be disturbed while upon free rations of grain, especially if the ration is wholly or mainly of corn, as to render the offensive odor almost unbearable. The value of grass in its green state is quite well illustrated by the greater value of early-cut hay as compared to hay cut late. Early-cut hay more nearly compares with grass in the green state than any other feed, and the greater value of the early-cut is speedily shown when cows giving milk, previously fed upon it, are abruptly changed over to late-cut hay. The observations of some farmers have been so fixed upon these results as being uniform under uniform circumstances, that they have settled upon the grass ration as second to no other factor upon the farm in insuring success in feeding.

It is hardly yet known to what extent meats are affected, favorably or unfavorably, by the feed given being in the highest degree favorable to a rapid digestion and assimilation: or, on the other hand, by these processes going on tardily, feculent matter remaining for too long a period in the system, offensive gases being generated, and, through the taint, naturally communicated to all the tissues by these, on the same principle that milk is tainted by foul odors or gases in the milk-room, and through a degree of blood poisoning setting in from absorption of fecal matter. Taking, on the one hand, a bunch of steers tied up in a close, filthy stable, and crammed with still slop during an entire winter, receiving a scant ration of poor hay as the only variety —and, on the other hand, a bunch of like age and kind, on abundant grass from early spring till late frost, with access to pure running water—who will presume to say that the flesh of the one lot would not be tainted, while the flesh of the other lot would, from the nature of the influences acting upon it, be clear of any possible taint. Take two collections of dairy cows, placed under like circumstances, how well we know that the milk from the one lot would, through that same principle that causes the fluids within the body to intermingle pretty much without restraint, be perceptibly tainted. Milk so produced will hardly keep from soaring from night till morning, and a young infant fed upon it becomes thoroughly imbued with its taint; takes on a putty color, and, more clearly defining the condition, is under a state of blood-poisoning, loses flesh, and ceases to grow. It hardly requires an expert dairyman, or competent housewife upon a farm, to detect the effects of such a course of feeding, when contrasted with the grass-feeding plan, upon the milk, and, later, upon the butter product. This permeation of the tainted product of foul food through the milk and blood, and, as a consequence, through the agency of the latter to all the tissues of the body, is as invariably a necessary sequence as any other physiological process that occurs within the body of a beast.

It is not the purpose to pass lightly over the subject of feeding corn and other grains, but the point we desire to make plain is, that the rule which governs the making of a tub of butter, a loaf of bread, or any other article that requires absolute fitness in the material used, should be applied to our modes of feeding for the production of edible meats; for, in the case of the latter, the animal flesh eaten is as clearly the direct product of the food given from day to day, and as necessarily influenced by it, are the other articles named. Not perhaps perceptible to the same degree, but nevertheless there is no escaping the conclusion that more or less taint will be imbibed by the meat if it be made from blood, the product of digestion befouled by bad food.—*Live Stock Journal.*

The Laughing Plant.

It is called the laughing plant because its seeds produce effects like those produced by laughing gas. The flowers are of a bright yellow and the seed pods are soft and woolly, while the seeds resemble small, black beans, and only two or three grow in a pod. The natives dry and pulverize them, and the powder, if taken in small doses, makes the soberest person behave like a circus clown or a madman, for he will dance, sing and laugh most boisterously, and cut the most fantastic capers, and be in an uproariously ridiculous condition for about an hour. When the excitement ceases the exhausted exhibitor of these antics falls asleep, and when he awakes he has not the slightest remembrance of his frisky doings.—*Shanghai Celestial Empire.*

—A paper piano is the latest product of Parisian ingenuity. The color of the instrument is cream white and the material is so tightly compressed that it has a hard surface and will receive a perfect polish. The tone of the instrument is said to be very sweet and its music without the short, sharp sound that marks every touch of the keys of the ordinary piano.

CÆSAR.

History of a Warlike Politician who Died Before Susan B. Anthony was Born.

Caius Julius Cæsar was born 100 years before Christ, and was one of the most remarkable men that ever lived. He was remarkable as a scholar and a statesman, and also for the odd manner in which he spelled his name. In 83 B. C., Cæsar divorced his then wife, if you will allow me that expression, on the ground that she had utterly failed to support him. Her maiden name was Cassutia. He then married Cornelia, the daughter of Cinna. Sulla, then in the height of his power, commanded Cæsar to divorce Cornelia or be proscribed. Cæsar then told Sull to shoot his dye stuff. "Go ahead and fly-up-the-creek," said Cæsar, one day. "Crack your whip. You can proscribe for me if you want to, but you can't compel me to take your old proscription."

Sulla once said to a friend, referring to Cæsar: "In that young man there are many Mariuses." Probably that was the reason Sulla proscribed for him. Whether the Marius was a species of microbe or not, I do not know. I can not remember so far back.

Soon after this Cæsar went to Asia Minor as a Roman soldier. While on his way to study oratory with Appolonius Molo, he was captured by pirates. He used to threaten, while in captivity, that when he got his liberty he would put the pirates to death. The pirates used to laugh at this a good deal, and regarded Cæsar as the rising young humorist of Rome; but when the required ransom was paid, the historian says Cæsar manned several wheat barges and put for the pirates' lair, and having captured them, he crucified them all. Cæsar made a specialty of crucified pirates, and for years after that any one who had pirates that they wanted crucified would always bring them to Cæsar.

In the year 68 B. C., Cæsar was made quæstor, and in 65 B. C. he was made ædile, but he had a robust constitution, and he pulled through all right, never repining nor complaining, and steadily refusing to allow any one to proscribe for him. He often said that a Roman proscription filled out by a Roman druggist was worse than a case of malignant Roman botts.

At the time of the Catiline conspiracy Cæsar was in the Senate. A majority of the Senate favored putting the conspirators to death, but Cæsar opposed it in a speech two hours long, in which he worked in a great many Latin quotations. He was then accused of complicity with the conspirators by Cato.

In 62 B. C., Cæsar, who had barely escaped the conspiracy trial with his life, was made prætor and the following year proprætor, but he had been vaccinated and so escaped. In 60 B. C., he formed with Pompey and Crassus the first triumvirate, a kind of blind pool for passing any kind of a bill they thought would be a good thing.

Cæsar then went into the war business, and it was a cold day when he did not sound from one to five tocsins, and with a loud whoop go on the war path. Every little while he would fire the culverin, and then you would see him roll up his pantaloons with great sang froid and wade in blood. He did not care whose blood it was, so that is wasn't his own and so that it was warm.

Cæsar's daughter, Julia, who became the wife of Pompey by request, afterward died, and a coolness sprang up between Pompey and his father-in-law, for Pompey was a leader of the aristocracy, while Cæsar ate pie with his knife in order to conciliate the common people.

Cæsar soon found himself at the head of a small army and Pompey at the head of another. He was ordered to disband his forces, which he agreed to do, provided that Pomp would do the same, but the latter refused, and on the banks of the Rubicon, with 5,000 infantry and 300 cavalry, he considered the perilous situation of going to war against his son-in-law. After thinking it over for a long time he finally exclaimed: "The die is cast." His language was at once telegraphed to the New York papers and has been used with more or less success ever since.

He then crossed the Rubicon and marched on rapidly to Rome, where he made it red-hot for Pompey. Pompey soon took his troops and went over to Greece, where it was cooler and where Cæsar could not follow him without getting his feet wet. Soon afterward, however, the two enemies met on the plains of Pharsalia. Pomp had 52,000 troops, but Cæsar succeeded in putting the kibosh on Pomp, who went to Egypt, claiming that he and Cæsar never could get along together, and as Cæsar would not go to Egypt, he would go there himself. Pompey was afterward assassinated by parties who are still at large. It is thought that they are concealed somewhere in Canada.

When Cæsar had cleaned out a large army, he would make a report to the Senate something like this:

To the President of the Senate:
SIR—Veni, vidi, vici. Yours truly,
CÆSAR.

He was afterward made imperator or emperor for life or during good behavior, with a large salary. This office he held with marked success until the ides of March, 44 B. C., when he was assassinated by a committee of influential citizens, who waited on him for that purpose.

Cæsar's great coolness in a crisis is here most noticeable, for while surrounded by assassins and with his system full of large irregular holes, seeing Brutus, whom he had been led to believe solid, he exclaimed, "Et tu Brute," and expired. In the excitement naturally incident to an assassination, in which Cæsar had been chosen to act as the corpse, his great sang froid in addressing Brutus in perfectly correct Latin shows that he well deserved the tribute paid him by an eminent historian, whose name at this moment has escaped my memory, in which he stated that "Cæsar was no slouch."—*Bill Nye, in N. Y. Mercury.*

—By falling from a wagon a Chinaman in California, whose life was insured for a large amount, was seriously hurt. There was some doubt as to his ever getting better, and at length one of his friends wrote to the insurance company: "Charley half dead; likee half money."

FOR OUR YOUNG FOLKS.

THE TABLES TURNED.

The Story of a Little Boy Who Went Fishing.

A little boy, one pleasant day,
Toward a creek pursued his way;

He kept the school-house out of sight,
Looking behind oftimes in fright,

And in one hand, as on he stole,
He clutched a willow fishing-pole.

Down by the meadow swift he passed
Until he reached the creek at last;

Then, with no thought to mar of school,
He cast his line into a pool,

And, with a smile of calm delight,
He waited for the fish to bite.

The moments glided swiftly by;
The sun o'erhead was getting high;

But not a fish would deign to look
The while at his seductive hook;

Though hungry insects o'er his head
Bit condescendingly instead.

A frog upon a lily-pad
Kept grinning at the luck he had.

The smile contracted to a frown;
The little boy he sat him down,

And there, upon the stream's soft brink,
His drowsy eyes began to blink;

Till, with his head upon his breast,
He sank back in the sedge to rest;

When suddenly he heard a "swish,"
And from the water rose a fish—

A fish of such prodigious size
That it would make a thousand fries—

A fish off which a troop might dine—
With a gigantic rod and line!

And in gruff tones the monster cried,
The while the little boy it eyed:

"By no barbed hook can we be caught;
We're not so foolish as you thought;

"The tables have been turned on you,
And we can go a-fishing too!

"This very night shall all enjoy
A chowder made of little boy!"

And, looking hideously grim,
The creature cast its line at him.

The truant watched the hook descend,
While every hair stood up on end;

Till, with a twist expert and neat,
It caught him by his trousers seat;

And then, with juvenile despair,
He dangled wildly in the air!

And while, with a complacent grin,
His scaly captor drew him in,

A piercing scream the silence broke,
And then—the little boy awoke!

And, though of fish there was no trace,
Fresh danger threatened in its place;

With look foreboding little good,
Before him his stern father stood!

—*Malcolm Douglas, in Youth's Companion.*

UNCOVER THE FAULTS.

How Reginald Was Taught the Difference Between Being and Merely Seeming to Be Pure and Truthful.

"Uncle, what are you doing?" inquired Reginald, with a perplexed face.

"I am getting rid of these offensive vegetables," replied Uncle Prescott, as he pinned two great snowy sheets of paper together and reached for the third; "I see Dugald has neglected matters since I have been ill, and left this poisonous heap upon the barn floor."

"But what is the paper for, uncle?"

"To cover it up, to be sure," replied Uncle Prescott, rapidly pinning away, until the thick white paper began to stand like a great white cone over the offensive heap upon the floor.

Reginald did not quite know what to say, and Uncle Prescott having completed the cone and glanced back at it as though with satisfaction, left the barn, with Reginald walking quietly at his side, deep in thought as to what Uncle Prescott's idea could possibly be.

"I am glad that uncomfortable object is out of sight," said Uncle Prescott, at length; "I wonder Dugald never thought to cover it up."

"Uncle, what is the use of covering it up?" inquired Reginald; "it is just as offensive."

"It is surely better covered up than exposed to the eye. It is best, is it not, always to cover up any such object?"

"But, uncle, it is there all the same."

"So it is, but if nobody sees it, the fact of its being there can not amount to anything, can it?"

"Yes, sir," replied Reginald, a little uneasily; "we know it is there just as if it were not covered."

"We know, of course, but other people do not, and we will not be likely to tell them."

Reginald glanced, a little slyly, towards Uncle Prescott, but did not seem inclined to give up the subject.

"It poisons the air just the same, does it not, uncle? I have heard you talk a great deal about all such things being unwholesome to have around."

"What is the difference so that people do not find it out? You see nobody would suspect anything impure under that snow-white paper."

"But, uncle," exclaimed Reginald, in perplexity, "what is the use of having it there; why not uncover it, and clear it out, and be done with it?"

"Why do you ask such unreasonable questions, Reginald? Your words and your actions do not agree."

Reginald thought, although he did not dare to say so, that Uncle Prescott's present action and past words did not agree, but he simply asked: "Why, uncle?"

"I can not tell why they do not agree, unless it is because it is better always to cover up our real motives and manner of doing things when we know they are not quite as they should be."

Reginald's face flushed, and Uncle Prescott continued:

"Why is it that you do not approve of my covering up the poisonous matter, and of making all pure to the eye? You know, boy, you work every day to pin white paper over a place of poison."

Reginald looked up in dismay.

They had reached the house, and Uncle Prescott sat down on the long settee in the hall, and drew Reginald close to his side.

"Reginald," he said, in a low and tender voice, "I am more sorry for you than you can guess. Your heart is not a pure, true heart; it sends out poisonous thoughts. Why do you cover them up and keep them; why do you try to seem white while underneath is the hidden trouble?"

Reginald's eyes sought the floor; he could not look in his uncle's face now. He knew his heart was not pure and true, that it only appeared to be so, but he had thought that his uncle believed in him.

"When you broke the rosebush, why did you make it appear that your baby cousin had pushed the box over and damaged the bush? When you dropped the hatchet in the cistern, why did you cast the blame on your little friend? When you broke my choicest grapes from the vine, why did you arrange that Dugald should be suspected of the act? Had you acknowledged the wrong deeds you would have been endeavoring to lay bare the poison in your heart, and taken the first step toward getting rid of it; but, though you know it is there, and is dangerous, and degrading, you keep it, and cover it, and work to hold on to it, and want nobody to know about it, and try to appear white and clean, when, in fact, under your pleasing face and manners is a corrupt heart."

Had Uncle Prescott struck Reginald a blow he would have been man enough, in his own way, to have borne it, but those words were worse than blows. He had a certain amount of pride which made him wish to be respected and thought well of. He did not care so much about being honorable, but he liked to be thought so. He had imagined that Uncle Prescott believed all he said, and thought him a fair, square boy.

His pride was wounded; his good opinion of himself was humbled; he looked so utterly wretched that Uncle Prescott took his hand and drew him close to his knee.

"Reginald," he said, kindly, "I am only pulling some of the white paper off, and looking at the impurity underneath. Tell me truly, do you think you have a corrupt heart?"

Reginald quailed under the question. To be asked to own having such a possession was a staggering requirement; yet he knew his uncle's charge was true, and he could do nothing but acknowledge its truth.

"You can not easily be rid of the impurity, my boy," said Uncle Prescott; "you have hidden it, and kept it, and fed it until it has overgrown the good in you. You have made it your sole object to try to appear good and pure; do you wish to go on feeding and hiding the poison, while it grows more and more powerful and impure?"

Reginald was too heartily ashamed of himself to have much to say, and while declaring that he did not wish to continue doing as in past, was much concerned to know how much of his deception, and how many of his tricks, perpetrated during the past few weeks spent in his new home, had been discovered by Uncle Prescott.

"If you do not wish to continue hiding and keeping this poison, let us begin now to pull the pure white paper off of it," said Uncle Prescott; "what did you cover up yesterday? I must have the secrets of each day since the time you came to share my home. Tell me frankly, what did you cover up yesterday?"

Reginald glanced at his uncle and then at the floor. He was not all bad; he did think it would be more comfortable to be true and honorable. He did feel a longing to be rid of his present inner life; he saw himself as he had never seen himself before; he felt a loathing for the acts he had only thought clever, smart.

"Uncle, you would hate me!" he exclaimed, passionately; "I never can tell you the half."

"Suppose I do hate you; suppose I never do and never can forgive or forget it; suppose you lose me as your friend; what can that matter in comparison to losing your soul, your self-respect, the respect of the whole world who may ever happen to hear of you, losing your own heart of honor? Uncover the poison, Reginald, and let me help you get it out of you, no matter how it hurts, or where it hits, or what becomes of you and of me afterward. You can afford to lose me if you can get rid of the dishonor which is destroying all the good that ever was in you."

Reginald was looking in his uncle's face; he was brave with a sudden bravery; he was true with a sudden honor; he was filled with a determination to be free with a new freedom. He recounted trick after trick, accident and deception, and Uncle Prescott could have been angry enough had he not been in soul-earnestness, helping Reginald fight a fight never to be forgotten.

Reginald, having confessed every fault he could think of, waited to hear the words which would banish him from his new home, but his uncle took his hand kindly, saying: "I believe you have faithfully torn off the covering, and tried to take the first step toward removing the impurity underneath; do you promise me at this moment, which is a solemn one, my boy, that you will faithfully, honorably bring the faults of every day to me and uncover them, no matter what their nature, rather than hide them to turn to poison in your heart?"

Reginald's promise was not a promise meant to be broken, and if in after-time he was tempted and failed and began again, are you not very sure that his heart of dishonor gradually shrunk away, as it was kept uncovered and brought to the light, while the owner grew to be happy, honorable and true?
—*George Klingle, in N. Y. Observer.*

—Among the immigrants of the steamship Eider who landed at Castle Garden the other day was Fanny Wiskochillowa, a young woman who would be "bearded" if it were not for the fact that she shaves her face three times a week. Her chin appears like that of the ordinary man who shaves. Fanny, who is twenty-five years old, appears masculine in other respects. She has two sisters with the same peculiarities. She is on her way to Chicago. She says that she has no intention of placing herself on exhibition.—*N. Y. Times.*

—A gentleman informed us recently that on one occasion he was out fishing at Barrow's Pond when the pond was so low that it was impossible to run the mill. After looking around the pond for some time it was discovered that all of the snakes had crawled out of the water and had caused it to fall several feet. To remedy this they drove them back into the pond, when the grinding of the mill was resumed without further trouble.—*Jackson (Ga.) News.*

—Ants may be killed by placing a teaspoonful of cobalt in three tablespoonfuls of sweetened warm water near their haunts.—*Boston Post.*

—It is well to change the cattle and sheep pastures occasionally. Weeds that are rejected by cattle will often be relished by sheep.—*Chicago Journal.*

—When a cheese which has been much salted and kept dry, is washed several times in soft water and then laid in a cloth moistened with vinegar, it gradually loses its saltness, and if it be a rich cheese, becomes soft and mellow.—*N. Y. Post.*

—Cocoanut Pudding: Boil one pint of milk with one teaspoonful of butter in it. Pour it over a very small grated cocoanut. When cool add three eggs, beaten, with half a cup of sugar and a pinch of salt. Have a deep dish lined with nice pastry, pour the mixture into it and bake until is set.—*Christian Union.*

—In planting an orchard, observes an exchange, the young trees should be slightly inclined toward the direction of the prevailing winds. All the old orchards lean as the trees were bent while young, and most of these old orchards were set when there was more forest and winds were much less violent than now.

—Experiments by Dr. Sturtevant, of the New York Experiment Station, show that unripe tomato seed will grow and give a gain of fifteen days in earliness over ripe seed from the same plants. He also says that peas and corn fit for table use will grow and produce earlier crops than ripe seed; but plants from immature seed are feeble compared with those from ripe seed.—*N. Y. Sun.*

—Corn Muffins: One pint of corn meal, one pint of flour, one teaspoonful of salt, two teaspoonfuls cream tartar and one of soda, one cupful white sugar, two eggs, one tablespoonful of melted butter, or one-half a cupful of sour cream, and sweet milk to make a batter like pound cake. Beat eggs very thoroughly and then add the other ingredients. Sift the cream tartar and soda both into the flour. Bake in the oven in muffin rings or little pans placed in a hot dripping-pan.—*Indianapolis Journal.*

—Lunch Cake: Two cupfuls butter, two cupfuls sugar, one and a half pints of flour, one teaspoonful baking powder, six eggs, one teaspoonful each of extract rose, cinnamon and nutmeg. Rub the butter and sugar to a very light cream; add the eggs, two at a time, beating five minutes between each addition; add the flour, sifted with the powder, wine, extracts; mix into a smooth batter; put into a thickly papered, shallow cake pan and bake in moderate oven one and a quarter hours. When cold, ice the bottom and sides with white icing.—*Philadelphia Call.*

FEEDING MOWING LAND.

Better to Suffer from Short Pasturage—Why the Practice is Injudicious.

There is no general practice among farmers that is so injurious in its effects as that of the close feeding of mowing lands.

After the crop of hay is removed and the aftermath has made a good start, when the feed in pastures becomes short, and with cows the flow of milk begins to diminish, the temptation to get benefit from the mowing lands overcomes any thought of what the final consequences may be.

After the removal of a crop of hay, especially if the field is not unusually rich, to allow the removal of the second growth by close feeding will very soon tell in the continual diminishing of succeeding crops. It is not to be understood that all aftermath is to remain upon the soil, because it might be so heavy as to injure the grass by lying too closely upon the ground, especially upon a rich soil. It is upon fields of average fertility, such as many farms possess, where a second growth suitable for cutting would hardly be expected, that there should be an avoidance of feeding. Such a growth of aftermath, if left from year to year, will have a tendency to enrich the soil, and increase the crops that follow from year to year.

This conclusion has been reached from practice and careful observation.

When, in one case, mowing fields are fed but very little, if fed at all, and there is a very gradual increase of the annual crop from year to year; while in the other case, where fields are fed close, down to the very roots of the plants, and the annual crop diminishes very rapidly and requires reploughing every four years in order to get a fair crop, with a natural character of soil about the same in both cases, it is very reasonable to attribute results to the mode of procedure, and it becomes an exceedingly difficult matter to prevent the conclusion that feeding mowing lands may be carried to a decidedly injurious extent. It would be better even to suffer from short pasturage than to inflict an irreparable injury upon mowing lands. Rather let a supplemental feed be provided to meet emergencies in the shape of fodder corn, sorghum or something similar.—*Prof. Yeomans, in Boston Globe.*

Curious Facts.

The Russian newspaper *Zarya* mentions the following curious facts: Recently there has been presented to the Kieff Archæological Museum a complete Egyptian mummy, about four (?) vershoks in length (one vershok is equal to 1.75 inch.) At Baturin, in the Chernigoff Government, a subterranean chamber was accidentally discovered under what was known as "Mazeppa's Rampart." Here were found a quantity of clay statues, which the inhabitants took for Slavonian gods. M. Tereshkevitch, who happened to be passing through Baturin at the time, forwarded one of the statues in question to his friend, M. Sitrogofer, one of the lecturers at the Kieff University, who in his turn presented it to the museum, where it was recognized as an undoubted Egyptian mummy, and it has been accordingly sent to St. Petersburg for examination by the Egyptologist, M. Lemme.

The Epidemic of Crime.

Whence comes this epidemic of suicides and murders? Recent discussions have named several causes. Hon. C. H. Reeve, of Indiana, charges it to infidel teachings—holding that hopelessness of a future state cripples fortitude for bearing life's ills. Another declares suffering from the universal business depression the cause. A third writer attributes it to increasing insanity, a physician thinks much of the tendency is inherited, while temperance advocates lay the responsibility upon strong drink.

Free-thinkers have committed suicide, but so have orthodox churchmen. Financial straits have beset many, but the wealthy have also taken their life.

Insanity and dissipation have preceded suicides and family murders.

One feature common to almost every such crime challenges attention. Well nigh every report of suicide and family murder mentions the perpetrator as having "for some time been subject to melancholy." Whence comes this? All recognized medical authorities tell us that the fire which consumes the brain is always kindled by derangements of digestion; that good digestion is impossible without pure blood, and pure blood is never known when the liver and kidneys are out of order. Under such circumstances, a preventive should be sought, and for this Warner's safe cure is sovereign—a fact conceded by the best authorities in the land, and it is especially commended by the celebrated Dr. Dio Lewis.—*Rochester Democrat.*

Gum-Chewing Girls in Maine.

The chewing of gum appears to be another favorite occupation among women of this part of the country. Most of those whom I have thus far met are addicted to the practice, and the effect of the proceeding upon the observer unaccustomed to that sort of thing is somewhat peculiar, to say the least, especially when he comes across, as I did the other day, a party of four young women, all of whom were busily engaged in extracting comfort from the operation. I may be doing the females of the "up country" an injustice, but I have seen just thirteen of the tender sex since I left Skowhegan, and eight of them were chewing gum.—*Cor. Boston Herald.*

—Japan is feeling very keenly the commercial depression which prevails throughout the world, and there is great misery among the people. In some provinces they are obliged to live in caverns, while some are dying of starvation. It is a peculiarity of the Japanese that they do not save for periods of emergency, but spend their earnings as fast as they are received.

—The late Commander Gorringe cherished among his other treasures a fragment of coal marked distinctly with fern leaves, which had been found in the Arctic snows by a polar explorer.—*Boston Journal.*

A WOMAN and a fiddle are something alike. They always come out strongest when there is a woman about.—*Boston Budget.*

"She tried her prentice hand on man,
And then she formed the lassies, O!"

"What is woman's worth?" asked a fair damsel of a crusty old bachelor. He did not know, so she said: W. O. man (double you O man). But a woman feels worth little if disease has invaded her system and is daily sapping her strength. For all female weaknesses, Dr. R. V. Pierce's "Favorite Prescription" stands unrivaled. It cures the complaint and builds up the system. Send two letter stamps for pamphlet to World's Dispensary Medical Association, Buffalo, N. Y.

A WELL-KNOWN New York tailor recently attempted to kill his wife, and subsequently committed suicide. This is evidently not a case of the survival of the "fittest."—*Life.*

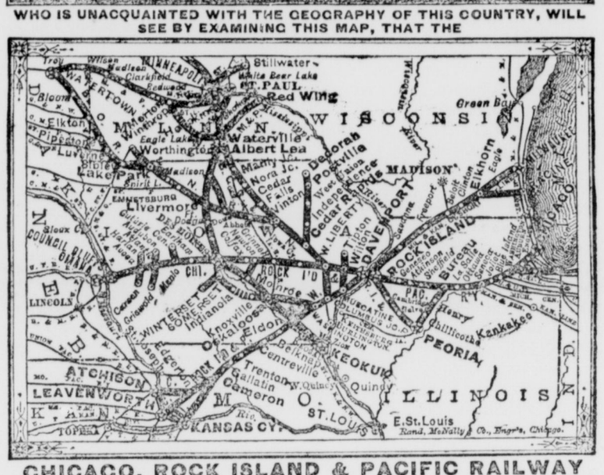
FOR
Man and Beast.
Mustang Liniment is older than most men, and used more and more every year.

A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE



CHICAGO, ROCK ISLAND & PACIFIC RAILWAY
By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.
The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.
THE GREAT ROCK ISLAND ROUTE
Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.
The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.
THE FAMOUS ALBERT LEA ROUTE
Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.
Still another DIRECT LINE via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.
For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or, by addressing
R. R. CABLE, President and General Manager, Chicago.

Delays of the Law.

The question is often asked as to why there is such an increase all over the country of a disinclination on the part of the people to let the law punish crime, instead of taking the matter, as they do, into their own hands, and executing summary vengeance upon the offenders. Within the last few years, the number of persons lynced has multiplied in an astonishing manner—in fact, it has become necessary, in case of any aggravated outrage, to take instant precautions to shield the suspected offender in order that he may have any kind of trial.

No doubt the reason lies in the long and vexatious delays of the law. The feeling has become general that the chances are about ten to one whether the guilty individual escapes, or suffers the penalty of his crime, and in the first heat of indignation, the thought is to put the first beyond human power. It is certain that while in everything else the world has progressed, in the matter of dealing out justice by law it has fallen behind. Steam and electricity are the two forces which have enabled the generations of the present to do in one day what their forefathers could not accomplish in weeks, but they are powerless to hasten the movemenss of the law, in spite of the fact that they aid in catching criminals and hunting up evidence. The whole legal machinery appears to be moved now in the direction of delay, which, as a writer in the *North American Review* well says, in the case of a capital offense, "puts off punishment to such a time that its infliction seems to be a eruelty," The American people are quickly aroused to a fever heat of indignation against wrong and cruelty, but it as quickly passes away, and a sort of sentimental pity for the offender takes its place.

The litigation and delays in civil suits are almost interminable, and a wrong decision would often be more welcome than such long, heart-sickening waiting, which frequently brings more expense than the amount involved. The slightest excuses are accepted as a reason for putting cases over to the next court. The defendant is not ready with his witnesses, or he has some reason for a postponement, which is quite as likely to be one made for the occasion and without real force, as to be a good one.

Instances are given where the trial has been kept off in this way for many years, five and six being not uncommon. Then when the case is finally tried, it is by no means certain that it is ended. There are appeals upon appeals. The defendant may go through all the courts to the highest, have the case decided in his favor there, go back to the lower court for the new trial armed with this decision, have it affirmed, and then the plaintiff may appeal on some ground for a new trial, and the round is gone over again. Such things do happen. If both parties live to be old as Methuselah the suit may come to an end in their lifetime.

It is profitable work for the lawyers, but exceedingly unprofitable for those involved. Besides the pecuniary outlay, the wear and tear of body caused by anxiety and vexation of spirit cannot be calculated.

It is evident that there should be a reform in some way. It is evident that justice should not be made a foot-ball to be played through the courts of the country. Crime should be punished with as little delay as possible. The law should take time enough to give the accused all the chances to which he is entitled and no more. Could this state of things be brought about, thieves and robbers and murderers would not, as now, pursue their nefarious callings with almost complete immunity, or terrify whole communities into an ever-abiding sense of security. Where justice has any show, order rules.—*Toledo Blade.*

The elephant Albert, of the Barnum show, who was shot because he had killed his keeper, was given to the Smithsonian Institute by Mr. Barnum, and two of the institute staff were sent to dissect him. The head and trunk were first removed, and then the hide was taken off in two pieces, being split on the back and belly. The hide was in many places an inch and a quarter thick, and the work required nearly three hours, The skeleton was then dissected, and every bone sayed intact. The firing party that executed Albert consisted of twenty-nine men, twelve of whom fired at the heart and seventeen at the head. During the autopsy, so to speak, six bullets were found in the heart, and they had all been flattened. In the evening those of epicurean tastes dined on elephant steak, and it is reported that many who did not know what they were eating pronounced the steak unusually fine in flavor, but a bit tough.

Ayer's Sarsaparilla will cure your Catarrh, and do away with that sickening odor of the breath.

How to Breathe.

New York World.

While a reporter was in the office of a wellknown physician of this city the latter asked him if he had noticed a young man who had just passed out. The reporter answered that he had, because he thought that he had met the young man in Brooklyn a short time before.

"That was probably another person suffering from the same trouble," said the doctor.

"This is a curious affliction. It is more common than is supposed, occurs in infancy, at manhood and at middle age, and causes a great deal of suffering; yet it is a strange thing that people in general do not seem to pay any attention to this affection when occurring in their own families, in spite of the manner in which it distorts the face, until some actual disease sets in and medical aid is necessary. Even physicians do not seem to reflect that this trouble may cause any one of a large number of diseases affecting the system in general,

"Why" continued the doctor, "you can tell one of these mouth breathers anywhere the moment you see them. From disease of the nose his lips are retracted, his mouth is continually open, his gums recede and his teeth protrude, particularly those in the upper jaw; the flesh that forms the lower part of the nostrils is shrunken, the openings of the nostrils are diminished in size, there are wrinkles at the outer edges of the eyes, and deep lines run from the nostrils to the angles of the mouth. These all give the person either an expression of idiocy, silliness or suffering.

"But the principal thing I want to call your attention to," said the doctor, "is the necessity of parents and nurses watching children when they fall asleep and prevent them from breathing with their mouths open. In grown persons, diseases of the nose and throat may lead to mouth breathing and the resulting distortion of the features, but it is the other way with children. They should be taught to use the mouth for eating and speaking only, and if they fall asleep with their mouths open the lips should be gently pressed together. Thus many constitutional diseases, such as spinal trouble, pigeon breast, and, perhaps, even rickets may be avoided, not to speak of affections of the nose and throat."

It seems that medical men are not the only ones who have studied more or less carefully the habit of mouth breathing. George Catlin, the portrayer of American Indian life and customs, claimed in one of his works that it was a known fact that a man can inhale mephetic air through the nose for a certain time in the bottom of a well without harm, but if he opened his mouth to answer a question or call for help, his lungs are closed and he expires, Catlin says; "I have seen a poor Indian woman in the wilderness lowering her baby from her breast and pressing its lips together as it falls asleep." Among 2,000,000 people he found that deafness, dumbness, spinal curvature and deaths from teething and diseases of the respiratory passages were almost unknown. He attributes this exemption from these ailments, so very common in civilized life, solely to the habit of breathing through the nose.

A Lesson in Politeness.

Exchange.

I have come to the conclusion that the street car is an admirable school in which to study human nature in all of its phases. On one occasion I saw a neat return lesson in politeness administered which was extremely amusing. The car was full of passengers and side-by-side sat a big, burly negro and a nervous, rather cross-looking white man. Presently a lady entered and stood half a minute or more, when the white man turned to the negro and asked:

"Why don't you offer that lady your seat?"

"Sartainly, sah, sartainly, sah," replied the negro, as he at once rose up, politely offered her the seat and stepped to the front part of the car. Soon after a negro woman entered the car and not a motion was made to give her a seat. The negro waited a minute or two, and then stepped to where his late instructor in courtesy was sitting took off his hat and said:

"S'cuse me, sah, but why don't yo' offer dis lady yo' seat?"

The man looked as if two or three bolts of lightening had struck him, hesitated a moment and blurting out, "I will!" left the car.

Visitor (at a dime museum)—I see nothing remarkable about that man. Is he on exhibition? Showman—He is. Stand up, please, Colonel. I next introduce to you, ladies and gents, a Kentucky Colonel, born and brought up in the Blue Grass region, who never drank a drop of whisky in his life. Keep moving, please, so that each and every one may have a chance to view the wonderful curiosity.

NEW ADVERTISEMENTS.

No Wonder.

A MAN WHO SUFFERED MENTAL AND PHYSICAL AGONY EIGHT YEARS PROCLAIMS HIS HAPPINESS.

Mental agony is dreadful, but when that and physical ailment combine, it is simply terrible. Such was the condition of Geo. W. Frampton, of Huntingdon, W. Va., for eight years. He was a sufferer of necroses—that is, the leg bone at the ankle was inflamed and mortified, which caused running sores. He says: "Pieces of bone the size of a silver three cent piece came out of the sores on my leg. The discharge from the sores was almost continual, and I was unable to walk. For eight years I have been doctoring. I had been under the treatment of a physician at Newport, Ky., for a year; another at Burlington, O., attended me for three years, and a doctor here at Huntingdon worked with me for a long time. None of them did me any good, and they all finally said my case was hopeless. A few months ago I commenced trying PERUNA, and now I am well. I can walk as good as anybody, and have perfect use of my limbs."

Mr. Alf. Lusk, Wooster, Ohio, writes: "DR. HARTMAN, Columbus, O, I have been a great sufferer from that dreaded disease, chronic catarrh of the stomach. I have thoroughly tried your MANALIN, and it has done me more good ten-fold than all the doctors' prescriptions, and I have used legions of them.

Mr. Edgar Harte, Smeltzer P. O., Elk county, Pa., writes: "I have bought several bottles of your PERUNA, and find it to be of great benefit. I also gave it to some of my friends; they experienced the same result."

Mr. L. R. Wollen, 45 and 47 Ross street, Pittsburgh, Pa, writes: "I am taking PERUNA with good results, and can highly recommend it to all. I have applied at the different drug stores for one of your books. They claim they have none on hand at present. Please do me the favor to send me one."

W. W. Russell, druggist, Canonsburg, Pa., writes: I handle your medicine, PERUNA. I have sold immense quantities of it, and consider it a staple article. I have a great many customers who think there is no medicine like it for a tonic or for building up the system. I recommend it as a safe and reliable remedy."

Calista Fishel, Malvern, Ohio, writes: "I take pleasure in recommending the use of PERUNA and MANALIN to any one afflicted with any form of lung or bronchial trouble. I have been for some time afflicted with a very troublesome cough, but a few bottles of PERUNA entirely cured me."

HALL'S VEGETABLE SICILIAN Hair Renewer.

Seldom does a popular remedy win such a strong hold upon the public confidence as has HALL'S HAIR RENEWER. The cases in which it has accomplished a complete restoration of color to the hair, and vigorous health to the scalp, are innumerable.

Old people like it for its wonderful power to restore to their whitening locks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beautiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply because it disappoints no one.

BUCKINGHAM'S DYE FOR THE WHISKERS

Has become one of the most important popular toilet articles for gentlemen's use. When the beard is gray or naturally of an undesirable shade, BUCKINGHAM'S DYE is the remedy.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

NEW ADVERTISEMENTS.

An Old Soldier's EXPERIENCE.

"Calvert, Texas, May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe **cold,** which terminated in a dangerous **cough.** I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for **throat and lung diseases.** J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all **bronchial and lung affections,** by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

A Thrilling Episode.

"If you write stories for the paper," said a Rock Island railway freight conductor, "let me tell you a true one that came under my observation last winter out near Des Moines when I was running on the Iowa division. This is no railroad yarn, but a fact. I saw it with my own eyes. One day we were running along and I was in the engine. As we began to cross a bridge we looked ahead and there was a little girl about six years old clambering over the timbers. She had some school books in her hand, and was evidently on her way home from school. The engineer whistled when she turned her face toward us. I never forget that face as long as I live. It was just as white as the snow on the ice in the creek thirty or forty feet below her. But she didn't scream, nor try to jump, nor do nothing. She just looked at us with a steady glare as if she'd stop the train with her eyes that we were unable to do with our brakes. At first we were all so broke up we hadn't any idea what to do, and I believe we'd of stood there like posts if she hadn't suddenly streiched out her little arms towards us in a mute appeal for help. Well, sir, that broke the charm, and we all started up wildly. I swung way out as far as I could, holding by one hand, and with the other motioning her to get down—down between the timbers. Would you believe it? That little thing followed my directions as if she'd been a man. And she took her time to it, too, and climbed down as deliberately as if she'd been at home. She was none too quick, though, for her little brown hood, with a red ribbon fluttering from it, had no sooner disappeared between the timbers than we thundered over her.

"'Let her out, Bill,' I shouted to the engineer, 'let her out lively, or that little thing will never be able to stick down there till we get over the bridge. Turn her loose!'

"So Bill he let her out, but she'd no sooner reached the bank than I jumped off and went heels over head in a snow bank. I got back to the bridge as soon as I could, and waited for our long train to get by. Don't mind tellin' ye that as I stood there I did something I never did afore—yes, sir, I stood there and prayed that that little one might be able to stick it out till I could get to her. But I guess my prayers are no good, for when the train was by I rushed out on the bridge, over timbers by the dozen, expecting every minute to see that little red ribbon. But it never showed up. Tears began to fill my eyes so that I could hardly see the crosspieces—I have a little girl of my own, you know—but on and on I went, and no brown hood or red ribbon could I find. Then I turned and looked to the ice below, and there she was. Yes, she had fallen thirty or forty feet through the bridge.

"How I got down to her I don't know, but I got there. I lifted her up in my arms. Her eyes were closed but she opened them, looked at me a second, and said:

"How did you get down here?"

"This question would have made me laugh if I had felt sure she wasn't hurt, but as it was I hurried up the bank and to the caboose. She said she wasn't hurt much, but I knew she couldn't tell, and we started for the next station.

"I am going home, ain't I?' she inquired, after we had fixed her up in our bunk.

"I told her 'yes,' knowin' that minute we were going right by her house. I was in such a hurry to get a surgeon that I thought it right to deceive her. Pretty soon she went off to sleep, and she looked so deathly lying there that all of us went to wipin' our eyes like women.

"'Boys,' says I, 'if she never wakes up I'll quit the road. I never want to see that bridge again."

"And you have quit the road?"

"No, I'm at the old business. She got well, and all the spring used to watch for my train as she would for her papa coming home from work. We never passed her house unless she was out waving that little brown hood at us and making that red ribbon dance. Our engineer used to whistle for her regularly, and she got so she could tell that whistle as far as she could hear it. Once in awhile, when not in a hurry we'd stop and talk with her. She said she loved us all, even the old engine, but she has never set her foot on the track since that day she fell through the bridge. This is a true story, and the little girl's name is Lily."—*Chicago Herald.*

The Worm Will Turn.

We were winding down one of the mountain roads of Tennessee in a cart drawn by a mule. The land was barren, the cabins no better than hovels, and it was a query how people made a bare living or were content to stay. By and by we came to a turn in the road where there was a trough to water horses, and the cabin of a settler. This cabin was the poorest of all, and nothing around it indicated that the owner made any attempt to cultivate the soil. We reached the place just in time to witnest a tableau. A woman, poorly dressed, and her face bearing the look of one who had seen much worry and suffering, stood near the trough, and a satchel filled with clothing sat on the ground beside her. Five feet away stood her husband, a burly tough-faced mountaineer, and he held a switch in his hand. Neither minded us as we drove up, and it was a full minute before the husband said:

"Mary, I'll wollop ye."

"Jim, ye dasn't," she replied.

"Mary, ye can't leave me, nohow."

"Jim, I'm gwine ter do it. I've starved an' suffered till I'm clean gone. I'm going home."

"Mary, if ye don't take up that sachel an' march in I'll wollop ye good and stout."

There were two of us beside the driver. The woman looked up and scanned our faces, as if to judge how far she might count on our help, and the driver said:

"Tain't rulable for strangers to mix in, Mary, and Jim's got a knife and would kill somebody. Better go in."

"Never!" she hissed.

"If ye don't," said the husband, as he came a step nearer, "I'll make the fur fly. Take that!"

With a swish he brought the switch down across her shoulders and raised it again. She stood stock still for a minute and looked him in the eye, and then walked into the hovel.

"Rayther peart, but the gad will cure her!" grinned the husband, as he drew the switch through his fingers.

His triumph was short-lived. In sixty seconds Mary reappeared. She had the mountaineer's heavy rifle in her hands, and as she came out she raised it on a line with the man's heart.

"Jim, I want ye to git!"

"Shoo! Can't do it."

Click! click!

"Mary, what ye gwine ter do?"

"Kill ye like a wolf in yer tracks if ye don't walk away."

"Whar to?"

"Nobody keers! Go sumwhar—keep goin'—don't never come back! Hurry up, fur I'm goin' down on the stage!"

He looked into her eyes and saw the change. Poverty and brutality had come to an end. Love had turned to disgust, and in place of fear was such bravery he would not have looked for in a man on the road. He saw "shoot" in her eyes, but he still hesitated.

"Mary, drop that rifle," he whispered.

"Jim, git! If you are here when I've finished counting twenty I'll kill you as sure as there's a God in heaven!"

He began backing away. When he had gone twenty feet he turned and walked. When he had gone a hundred feet he halted, wheeled about, and after a long look, muttered:

"Wall, by gosh! Mary, let's make up."

"Keep a-gittin' Jim," she replied, as she still covered him with the rifle.

In five minutes he was out of sight up the road. The woman placed the gun and sachel in the cart, walked into the hovel to be gone two minutes, and when she came back to the cart and took a seat with us, flames were seen creeping through a hundred crevices between the dry logs. Without a word she climbed in, and only once during the five-mile ride did she utter a word. At a bend in the road she looked back at the pyramid of smoke and flame wrought by her hands, and said, as if to herself:

"Jim didn't know Mary, Jim didn't.—*Detroit Free Press.*

What we learn with pleasure we never forget.

Facts About Self-Destruction.

It seems from statistics with respect to the subject, carefully gathered by the *Insurance Chronicle*, that the number of suicides in this country varies little from year to year. Reckoning from the first of March to the end of February, the figures for the last three years are: 1882 3, 1,606; 1883-4, 1,469; 1884-5, 1,608.

These years are included in the period which has been marked by a severe business depression, commonly regarded as an efficient cause of self-destruction, and yet the largest number of suicides in any single month occurred in August, 1882, when they were 212, though at that time we were only hearing the faint rumble of the coming commercial and financial catastrophes. The total for 1884, when we were in the midst of the troubles, was not more than the total for 1882, when the business sky was comparatively clear. But it seems that after the financial panic of May, 1884, the life insurance companies complained of a very considerable increase in the number of policies which were terminated by suicide. Still the fact remains that 514 killed themselves during the comparatively prosperous summer of 1882, while the suicides during the black summer of 1884 reached only 383.

The causes of suicide in 1884-5, so far as they could be determined, are thus classified:

Business troubles	174
Chagrin at parental discipline	24
Destitution	78
Dissipation	114
Election of Cleveland and Hendricks	3
Family trouble	214
Grief	39
Insanity	94
Love troubles	87
Sickness	84
Undergoing or threatened with punishment	44

Little reliance can be placed on this table, however, for it is not possible to get the true causes of the self destruction for publication in a large number of cases. Families refuse to reveal them, and the suicides themselves may leave behind them no reasons for their act, or may give false ones. But probably the majority of suicides in this country are due, more or less directly, to the use of stimulants.

Yet it is startling to see how many children take their lives because of rebellion against parental and school discipline. For instance, a Chicago girl was so much cast down by a scolding from her mother that she destroyed herself with Paris green. A New York girl swallowed rat poison because her father refused to allow her to go to a skating rink. An Illinois boy took poison in a sleeping car because he had been expelled from college.

The ages of those who committed suicide in 1885 ran from eleven years to ninety-six years. The chief methods used were, in 531 cases, shooting; in 310, poisoning; in 275, hanging; in 155, cutting the throat; in 137, drowning. Beside these thirty-seven persons killed themselves by jumping from or standing in front of moving railroad trains, twenty-five by cutting arteries, eighteen by jumping from heights, eleven by stabbing, eight by burning, and one each by scalding and starving.

The suicides were engaged in nearly every kind of occupation, but the great majority were farmers, merchants and laborers, though commonly it is supposed that the tendency to self-destruction is among men of strictly intellectual pursuits. But, in fact, suicide, like insanity, is less among those who work their minds chiefly than among those who lead sluggish lives in which their intellectual faculties are not kept bright by use. New York, though the most populous of the States, had fewer suicides in 1884 than Illinois—166 to 169.

Finally, the number of suicides in this country is small in comparison to Europe. Out of the more than twenty five thousand cases of self-destruction which occur annually in Europe and the United States together, we furnish only about sixteen hundred.—*New York Sun.*

A Great Discovery.

Mr. Wm. Thomas, of Newton, Ia., says: "My wife has been seriously affected with a cough for twenty-five years, and this spring more severely than ever before. She had used many remedies without relief, and being urged to try Dr. King's New Discovery, did so, with most gratifying results. The first bottle relieved her very much, and the second bottle has absolutely cured her. She has not had so good health for thirty years." Trial Bottles free at Nydegger's Drug Store. Large size 50c. and $1.00.

CONTEMPT OF "COURT."

'Twas a case of attachment, the lawyer said,
And he seemed not loth to tell,
When asked by a friend how the matter sped,
That his suit was prospering well.

Though young he argued his case with power
As soon as the writ was returned,
And argued so long that the midnight hour
Oft came ere the "court" adjourned.

But her father came down and the case he closed
By booting the youth one night,
And the latter declared such an act opposed
To legal procedure quite;

And he said to the maid, as he rubbed his spine,
He would bring an action of tort,
And ask the Judge to inflict a fine
On her pa for contempt of "court."

AMONG THE INSANE.

Some of the Peculiar Characters at the Dayton, (O.) Asylum.

A Beautiful Crazy Woman Who Wanted to Bottle Men's Souls—Charley's Trip to Cincinnati and His Game of Billiards—The Suicidal Mania Among the Unfortunates.

In the past few weeks I have spent, upon different occasions, a portion of a day in the Dayton Asylum for Insane, and have picked up quite a number of matters which I believe will be of interest. One of the first matters of consequence that dawned on my mind was the fact that any such institution where six hundred individuals bereft of the power of their reason are huddled together, there surely must be skeletons in the closet, and this thought is strengtenhed by the fact that there was a perceivable effort on the part of all the officials and attaches of the institution to be as obliging and polite as possible, yet they, none of them, showed any desire to talk of the very matters that I wanted to learn something about. And this was not because of any fear of newspaper notoriety, as not a living soul but myself knew I was collecting material for a newspaper letter. It seems to be the even tenor of their ways with all visitors, and indeed it could not be otherwise, if the welfare of the institution is to be considered, for were they to tell the secrets of a hospital of this kind the people would be shocked with amazement. I know from what I learned that there are secrets in this asylum of which even the officials know nothing.

This incident I picked up through a reporter in this city previous to my visits to the asylum, and I reproduce it here because of its fantastic eccentricity. The young man who tells the story is now engaged in this city, though previously he was in the employ of the asylum. Among the numerous patients of the institution are a great many who are allowed to wander about the grounds. Among this number was a young woman, who shortly after the birth of her first child became insane. She was an extremely handsome creature, who when talked to gave no indications of a weak mind. She came from some small place in Preble County. Before her mind gave way she was known as a happy, vivacious creature, who enjoyed life, but after becoming insane she took a religious turn and then became melancholy, and would not talk except when it was necessary. She was a handy person about the asylum, and could be put at most any work. Her name was Maud, and she probably had more sympathetic friends than any other patient in the institution, which can be attributed to her beauty of face.

One day she accosted my informant, asking him if he did not want to see her two souls. The question, as was natural, aroused the young man's curiosity, and he followed her into the cellar of one of the buildings adjoining the asylum proper. She took him to the darkest corner, where she held up before him a two-ounce bottle she had taken from a crevice, and remarked:

"There they are, and bound to keep, too. The one is the soul of Stonewall Jackson, and the other my husband's."

The young man took the bottle nearer to the faint rays of light that shot through the cellar grating, and saw that the bottom was covered with a greenish liquid, evidently water discolored by age. The lady maniac went on to explain there was no need of any souls being lost; that she could save them all if the people would only let her cut them out and put them into her bottle. She knew the soul's home was on top the heart, and could be cut out without any trouble.

Stonewall Jackson's soul was in the bottle when she got it from the spirits, and she had since put her husband's in. After explaining all these things she asked the young man for his pen-knife, and told him if he would lay down she would get his soul out in a few minutes, and put it in the bottle to keep the other two company. But the young man seemed to have no desire to have his soul preserved. This young lady has since recovered, and is now at home with her family, attending to her household duties as well as any woman in the land of the free.

A cunning maniac was Charley, the scion of a wealthy and widely known family living in Miami County, just beyond the Montgomery County line. I have used the term "was" because he has been cured of the particular attack of which he was suffering at the time of which I write, but has since become insane again and is now an inmate of a private asylum in Cincinnati. He is a magnificent-looking young man of not more than thirty years of age, and when not suffering from the dread affliction to which he seems to be subject, is one of the most entertaining men possible to find anywhere. These things I say of him because I know them to be facts. When suffering from the awful disease he is, indeed, a raving maniac, though never very threatening. He is a very ingenious fellow at all times, and this is what always made him a troublesome prisoner.

At night, when the patients in a ward are locked in their rooms, they place their clothes outside of the door in the hallway, so that an attendant knows they are all in their places. This is always done. On a certain night the attendant of the ward in which Charley was a patient had performed this duty and retired, feeling confident every thing was secure and all right. But for two or three nights previous to that Charley had been at work on the heavy iron bars on his window with a file he had procured somewhere—evidently from one of the insane who had the privilege of the grounds. On the night in question he completed his work, filing through one bar and springing two others so he could get out. But there were his clothes outside the door and his overcoat in the clothes room at the end of the hallway. These he needed, for it was a bitter cold night in midwinter. With his file he worked the wood away from the locks in both doors, got his clothes, overcoat and all, and soon was tramping through Dayton.

He went direct to the depot and got on top the last car of the midnight express, bound for Cincinnati. So thoughtful was he that he inquired as to what stations the train stopped at, and when it left Hamilton he ran forward to the first car, and when the conductor passed through he clambered down off the top while the train was running thirty miles or more an hour, and took a seat in the warm car, as independently as if he was the President of the road. The conductor did not come through the train again, for Hamilton was the last stop before reaching Cincinnati, and Charley, insane as he was, seemed to understand that he was safe inside the car after it left Hamilton, for the train, making no stops, could, of course, not take on any passengers. That he remained on top the car in the bitter cold until the train reached this point is evidence conclusive that he knew exactly what he was doing.

He reached Cincinnati without any trouble, went straight to the Gibson House and registered. As luck would have it, the next person to register, who stepped up to the counter not ten minutes after he left it, was an acquaintance of his from his home. The name met his eye, and after speaking to the clerk he managed to catch sight of Charley as he came from the bath-rooms. The friend at once telegraphed his folks, and they the asylum authorities. The telegram they received was the first intimation the officials of the institution had that any one had escaped.

Charley was busy playing billiards when, at ten o'clock the same morning, his keeper walked into the hall and slapped him on the back.

"Hello, Tom!" was Charley's greeting. "I've got a sucker here." The same evening he was again in the asylum, but it amused him for weeks to think how he "went to Cincinnati just to play a game of billiards," as he put it.

If ever a man had determined to die, come what may, that man was Francis ——, a powerful farmer from Auglaize County. He was one of the few farmers who take a great interest in politics, and the first symptoms of insanity in his case were noticed after he was defeated for an office at the polls. Then followed financial reverses, and finally his mind gave way to the extent that he was determined on self-destruction. He was sent to this asylum and placed with the other unfortunates suffering from suicidal mania. He was not by any means a dangerous man, but an eye had to be kept on him all the time to keep him from destroying his own life in one way or another.

Tom, a young but powerful man, was his keeper. Besides Francis there were twenty-four other maniacs in the ward, and one can easily imagine what a nice time an attendant must have watching and caring for these poor people. Every keeper must shave his patients at stated intervals, and one day when Tom had one of his subjects in the chair he complained of the razor scratching him, whereupon Tom laid it on the window-sill and got out another one. While he was stropping it he noticed Francis standing in the door, looking furtively into the room. Before he could think the maniac bounded by him and had the open razor which Tom had laid on the window-sill in his hand. It was no time for thought, but action was what was needed. Turning quickly, Tom grasped the hand in which the maniac held the razor, while he in turn, equally on the alert, grasped Tom by the wrist of the hand in which he held the open razor with which he had been beating the strop.

"Let go!" yelled Tom.

"Let go yourself!" retorted the maniac, glaring savagely at the attendant.

The next instant began a battle for life. The two men pushed, tugged and twisted, but neither could be forced to loosen his hold on the other's wrist. The third person sat quietly in his chair as unconcerned as if nothing unusual was going on. Finally the insane man got his feet entangled in an old coat lying on the floor, when the keeper managed to throw him and wrench the razor from him. Francis got up, gave Tom a terrible look and walked from the room. In a few minutes he returned and explained that he did not wish to injure Tom, and only fought for the razor because he wanted to cut his own throat. He said:

"Tom, I ain't mad at you, but I want you to know, once for all, that I am going to cut my throat, and I'll do it, no matter how much you watch me." And, indeed, he kept his word.

The next day Tom was aroused by a terrible crash of falling glass at the extreme end of the ward, where is located the wash and bath-rooms. He ran to the place, and there stood Francis with his throat cut almost from ear to ear. He laughed derisively at Tom as he entered the room. He had broken the window with his fist, and with a piece of the glass cut his throat. He had severed the windpipe, and when he attempted to laugh a gutteral sound was all that could be heard.

Tom grasped the gaping wound in one hand and held it together as much as possible to stop the flow of blood as much as was in his power. Two of the asylum physicians were on hand almost instantly. They took the patient in hand, and by sheer force sewed up the horrible wound, but as soon as the maniac was put to bed he tore out the stitches. The wound was sewed up a second time, and the suicide's hands incased in a pair of leather muffs, when he managed to tear the stitches by jerking his head backward and forward, and from side to side. He was then put in a crib, and a box made to place his head and shoulders in, so that it was utterly impossible for him to move the least bit. He was kept in this contrivance for nearly seven weeks, much of which time it was very doubtful whether he would recover or not. After being taken from the crib he was transferred to ward 19. His hands for a long time afterward were kept in the leather muffs, but he finally induced the attendant, on promise to not again attempt suicide, to take them off. Tom, his old attendant, upon learning of this fact, called on the new keeper and told him he would regret taking off the muffs before the week was over, and sure enough he did. The third day after the muffs were taken off the attendant was in his room cutting a small piece of tobacco off of a large plug with a small pen-knife, when Francis sprang into the room, grasped the knife out of his hand, and before the keeper could interfere, drew it across his own throat.

It then became necessary to put him in the crib again, where he was kept another spell of several weeks, but the doctors again pulled him through. He never after that attempted suicide. One remarkable feature about this maniac case was that he never attempted it, seemed to contemplate ending his life any other way than by cutting his throat. After recovering from his second terrible experience he seemed to improve. He continued growing better, until finally his folks, upon their own responsibility, took him home, where he continued doing well until some time in May last, when he again showed symptoms of returning insanity, but before he grew bad enough to be returned to the asylum, he was kicked on the head by a horse, sustaining a fractured skull, which in the course of a few days resulted in his death.

Many other equally as thrilling and horrible truths can be picked up at almost any insane asylum of any note. Many more incidents that would make very interesting reading came to my notice during my visits, some of them very ludicrous, others pathetic, while the above are among the most terrible. There is one old man at present in the Dayton Asylum who donated $400 to the institution when it was built, and this fact is one of the very few things he never loses sight of. It seems to burn into the poor fellow's very soul. There are a number of the inmates who in some way have got it into their poor brains that they are there waiting for pay-day, and the attendants tell me it is very touching when several of them become impatient and demand their money on threats to leave. They often claim their wives and children are starving, and they must have their money or they will die. It is utterly impossible for one to imagine the harrowing thoughts that a short study of an insane asylum and its patients will awaken. It must be experienced to be appreciated.—*Ida May, in Cincinnati Enquirer.*

TOO LATE.

The Intricate Problem Which Confused the Colored Gateman.

We finally came to a toll-bridge, at the gate of which was a colored man. The charge for the two of us was seven cents, and it so happened that neither of us had even a small bill. A five was the smallest, and when it was handed out the toll-keeper was in a fix. He hadn't change enough into three cents.

"Well, we've got to cross," said the Colonel.

"Reckon you has, but I want dem seben cents."

"It isn't our fault if you have no change."

"Dat's true, but I reckon we has got to fix it somehow. Let's see? Dar am free cents comin' to you?"

"Yes."

"Or seven cents coming to me!"

"Exactly."

"Now, boss, dar cums my son Jim. Jim am lame an' doan' git 'long nohow. He am a good boy, an' I reckon you'll be inclin' to help him a little. He's ridin' my ole mule, an' dat beast hasn't had any fun since de wah. 'Sposen you let Jim ride dat free cents out?"

"How?"

"Why, he nebber crossed a toll-bridge in his life. It would do him up proud, you see, an' nobody knows how much good it would do de ole mule."

The Colonel consented, and Jim rode the beast in the most solemn manner to the other side. We followed him across and rode away with the father calling:

"White man, come back heah! How I gwine to git dat boy back heah widout payin' fo' cents toll at de odder eand!"

—*Detroit Free Press.*

Keep an Eye on the Chickens.

Hens like to have their liberty and to roam over the garden and fields and to select their own nesting places in the barn or among the bushes or tall grass in the vicinity of buildings, but the profits to their owners under such circumstances are not always sure to be satisfactory. Hens in the garden are generally unmitigated nuisances, surely so if they are your neighbor's hens. Many persons seem to think that poultry can not be profitable unless they can have their full liberty and can obtain most of their living from what they can pick up while foraging on their own account. But this is a mistake. Hens running at large, unless closely watched and cared for, seldom pay very well. They often have to scratch too hard for their living, and what eggs they lay are largely lost or in some way wasted. Then the chickens get caught by hawks, foxes or other animals of prey.—*N. E. Farmer.*

—The most desirable eggs for setting are those the freshest laid. A liberal daily sprinkling of tepid water upon them when incubation is near its accomplishment, say a week before hatching, is an aid to the free issue of the chicks at maturity.—*Troy Times.*

—"I do love dress!" exclaimed a young society belle. "Then I should think you would wear more of it," retorted the cynical bachelor friend of middle age. —*N. Y. Independent.*

CARD SHARPERS IN PARIS.

Fondness of the Parisians for Gambling—The Devices of Unscrupulous Dealers.

If we may judge by the pages of M. des Perrieres the Parisians are restless and hardened gamblers and ready to play anything anywhere with anybody. There are three places where they may play chiefly—in the real clubs, in the clubs which are open to almost any one and which, in fact, exist only that gambling may be carried on, and in the illegal gaming houses. Of real clubs there are not many in Paris and access is not easy; but there is no end of gambling clubs dignified by some glittering and loud-sounding title. Strangely enough there is a greater danger of being cheated in the former than in the latter, for in the gambling clubs there are always a lot of cheats watching each other and well watched by the proprietor, who is up to all their little games, while in the real clubs, although it would be difficult for an adventurer to gain admittance, there is no suspicion, and once in, a rascal might cheat with impunity if he were cautious and not over-grasping. At ecarte or piquet, where he has but one opponent to deceive, the Greek ought to be able to win what he likes; but at baccarat, where he plays against the whole table, the simple devices of tete-a-tete deceit must be abandoned. M. des Perrieres reveals the secrets of the players who cheat the dealer and of the dealer who cheats the players. By collusion with a card-room attendant, the dealer may distribute cards carefully arranged in what the conjuror would call a chaplet. With a chaplet the dealer reduces the chances against him to those expressed in the old formula, "Heads I win, tails you lose." A thorough shuffle is a sure cure for the chaplet; and of course cutting has no effect. There are various chaplets known to the initiated. M. des Perrieres tells us of a player who was losing steadily to the dealer and who suddenly recognized the sequence of the cards as they fell on the table. "Why, that is the Marseilles chaplet," he cried; "the next card will be the king of hearts." And the dealer turned it up and it was the king of hearts, and then the player proceeded to declare every card before it was turned, to the great amusement of the players, who ceased betting at once. The feelings of the dealer are not described; probably language could not do them justice.

Another device which an unscrupulous dealer may employ is a survival from the last century; at least it is closely akin to a trick of that time, in which a snuff-box took the place of a cigarette case. It is of a great simplicity. The dealer provides himself beforehand—to use the pleasant phraseology of the old-fashioned handbooks of conjuring—with a highly polished silver cigarette case. This he places on the table before him and immediately under his left hand as he distributes the cards. If he has some slight manual dexterity, a quick eye and unfailing self-possession, the reflecting surface of the silver will keep him fully informed as to the value of every card before it leaves his hands, and he may act accordingly. Self-possession, and indeed self-confidence, are necessary requisites of a successful gambler, even when he is not given to aiding chance. Fortune favors the brave, and gambling is like swimming in that the first touch of fear is fatal. Especially must the dealer at baccarat abound in courage; let him but begin to show the white feather and his banking funds will speedily take wings and fly away to feather the nest of some player of more stomach.—*London Saturday Review.*

RUSSIAN OFFICERS.

How the Youth of the Empire are Prepared for Army Service.

The aristocratic youth of Russia commence their military career in gymnasia (schools), where they receive a liberal education at the age of ten. Religion, languages, history, mathematics, etc., form part of the course, which lasts for seven years; but drill, fencing, gymnastics, and swimming are subjects to which considerable prominence is given, and each school has a uniform in which the scholars invariably appear. At the end of the course they are medically inspected, and only those who are physically fit are permitted to be examined for cadetships; those who are rejected may be appointed to different offices under Government. The *corps d'elite* are held out as inducements to those who pass the highest standard of examination. There are eighteen or twenty of these at present in the different portions of the empire. They feed the eight cadet schools which provide the higher class of officers. Of these the imperial corps of pages is the most aristocratic, and supplies most of the officers for the guard. The remainder are at St. Petersburg, with the exception of the Alexander school at Moscow, and the Finland cadet corps at Helsinfors, the latter being exclusively for natives of the duchy of Finland. The Machael artillery and Nicholas engineer cadet schools furnish, as their titles imply, the higher class of artillery and engineer officers. The progymnasia, of which there are eight, receive boys of any class, ten years of age, a small percentage of whom join the army direct as non-commissioned officers; the remainder supply the Junker schools, after a seven years' course. The Junker schools provide the body of officers. The course lasts for two years, and only those cadets who obtain a certain figure of merit are appointed to commissions. The cadets, in addition to theoretical instruction, have a most practical course of study in sketching and outpost duty; they also go into camp for four months in the year, and take part in all drills and exercises. Batteries, squadrons, and battalions are formed, all manned by cadets. These schools are in the different military districts and under the staff of those districts, and the instructors are taken from the best officers in the district.—*Contemporary Review.*

—Physicians in the Sandwich Islands have come to the conclusion that the only way to stop the alarming spread of leprosy is to begin vaccinating with leprosy microbes. They think the operation will be a success.

THE COMPLEXION.

Some Interesting Hints Relative to Its Beautification.

As a woman can not be beautiful without having a good complexion, and as many women are decidedly ignorant of even the simplest rules for keeping the complexion in good condition, a reporter obtained the following hints as aids to the complexion: Some women are born with beautiful skin, clear, soft, and peach-like, but there are very few women in this climate who can keep their complexions clear and handsome without considerable care. There is something in the New York air, its harshness or saltness most probably, that tends to coarsen or roughen the skin. No where will one see such bad complexions among the general run of women as in New York. In Philadelphia and Boston, in Washington, Chicago, even in grimy Cincinnati, the complexion of the girls and women have a freshness, a soft color, which those of New York girls and women lack. Of course, there are a number of exceptions to this rule. There are both women and girls in New York whose complexions are exquisite.

The first thing a woman should remember if she wants to improve her complexion is that nothing rubbed on the skin itself is going to help it very materially. The lotions and "creams," and preparations of one kind and another which are prepared by quacks for "beautifying" the skin, are all humbugs, and no sensible woman should be led into buying them. To obtain a beautiful skin one must begin and diet properly. Butter, fat meat and greasy food of every kind must not be eaten. Coffee and tea must be given up, so must claret and all kinds of wine, and milk or lemonade substituted. Fruits and vegetables should be eaten in abundance, rich candies and cakes avoided, pie never should be touched, and pickles and acid food generally should be dispensed with. A woman who follows the above rules will find that her skin will become smooth and clear after several months have passed. Of course the dieting must be thorough and careful. No improvement can be made unless it is.

A tablespoonful of sulphur taken every other morning for a week, and then not taken again for three days, and then taken every other morning for another week, is one of the best things to clear the complexion. It acts like magic. It should always be mixed with molasses or something that will clear it from the system.

Salt—a tablespoonful dissolved in a goblet of milk—is an old-fashioned recipe for beautifying the complexion. It certainly is a simple remedy, and if it does not help the complexion it will strengthen the system. A great deal depends upon the constitution of the person and the kind of complexion she has. What will help one woman wonderfully will have no effect whatever on others. One thing is certain, however, milk is always conducive to softening and whitening the skin, and it is a noticeable fact that girls who have never been allowed to drink tea or coffee, and who have drunk quantities of milk, have generally, when they reach the age of twenty, very beautiful complexions.

Boiling water is also one of the best things with which to keep the complexion in order. A tumbler should be drunk one hour before every meal. If it is disagreeable by itself the juice of half a lemon should be added. Sugar should not be used. Most women in summer time are too careless of their complexions, and when winter comes and they go out to balls and parties they regret it. The sun is excellent for the complexion if it does not get too much of it. A little browning and freckling is oftentimes very beneficial, but when the face is exposed to too great measure of the sun's rays the skin is apt to become coarse. Veils—very thin ones—should always be worn at a seaside resort, unless parasols are carried. The salt air and sun together are bad for the complexion, though excellent for the general health.

Fashionable women and girls in New York always have their arms and necks "polished" before going to a ball or other entertainment where they appear with very decollette dresses. The "polishing" greatly beautifies the skin. First the arms and neck are rubbed very thoroughly with glycerine and rose-water. After this has been rubbed off, the arms and shoulders are covered with cold cream, which is allowed to remain on fifteen minutes. This is then rubbed off with a piece of soft white flannel and the arms and shoulders are covered with "baby" powder and rubbed very thoroughly. This finishes the operation. When this is completed they look like polished marble, and the skin seems to take on a wonderfully fine and beautiful texture. Some one has suggested that the face be treated in the same way with good effect, but this would be next to impossible, as the texture of the skin on the arms and shoulders is always different from that of the face. The face should always be washed in water that has the chill taken off it. Warm water is not good for the complexion, despite all that has been said to the contrary; neither is real cold water. The one makes the skin flabby, and in time wrinkles it; the other roughens it. Cosmetics of every kind should be avoided. They are always disgusting, and even a little powder put on on a warm day, to "take the shine off," is objectionable. Powder and paint always stamp a woman at once as common, no matter how small a quantity may be used. Oat meal and Indian meal water are both excellent for washing the face and hands in. The meal softens the skin and gives to it a delicate flush which is very becoming. The majority of women will also find that salt water will help their complexions. Get ten cents' worth of rock salt every month and wash in a basin into which a good lump of it has been placed. Rain water is an excellent thing for the skin, and there is as much truth as poetry in the saying that the "early dew of the morning will make like the face of an angel the woman who bathes in it."—*N. Y. Morning Journal.*

—The hair may be kept from falling out after illness by a frequent application to the scalp of sage tea.—*Exchange.*

TEMPERANCE READING.

A JUDGE'S REBUKE.

What He Said When Passing Sentence Upon Violators of the Laws of the State.

Hon. F. M. Hubbard, District Judge of the Eighth Judicial District of Iowa, in passing sentence upon some liquor dealers for violation of the Prohibitory laws of the State, said:

"While there are greater crimes known to the law which are punishable with great severity, there are none which involve more of those qualities known as despicable meanness and audacity than the selling of intoxicating liquors. There is something in the taking of human life so instantaneous that it shocks and terrifies the minds of all; and yet we look upon the man who takes human life quite as surely, but by a slow, lingering process, if not without condemnation, at least without horror. You who stand before the court for sentence are in every moral sense murderers, and you are within the spirit, if not the letter, guilty of manslaughter; for the law says that whoever accelerates the death of a human being unlawfully is guilty of the crime. Your bloated victims upon the witness stand, and who undoubtedly committed perjury to screen you from the law, not only abundantly testify that you are accelerating death, but that you are inducing men to commit still greater crimes than your own. You still maintain the appearance of respectability, but how morally leprous and scrofulous you are inwardly. The ruin, poverty and idleness which you are inflicting upon this community declare as from the housetops that you are living in idleness and eating the bread of orphans watered with widows' tears; you are stealthily killing your victims, and murdering the peace and industry of the community, and thereby converting happy, industrious homes into misery, poverty, and rags. Anxious wives and mothers watch and pray in tears nightly, with desolate hearts, for the coming home of your victims, whom you are luring with the wiles and smiles of the devil into midnight debauchery.

"One can have no adequate conception of a cataract until he has seen Niagara, nor of the terrible fury and grandeur of a storm in mid-ocean until he has witnessed one; so no one can know the utter degradation and total depravity to which his species can be brought until he looks upon the desolate ruin caused by your hellish traffic. You are persistent, defiant law-breakers, and shamelessly boast that in defiance of the law and moral sense of the community you will continue in your wicked and criminal practices. It has, therefore, now become the imperative duty of this court to let fall upon you so heavily the arm of the law that you shall either be driven from your nefarious traffic, or ruined in your fortunes or wicked prosperity. You have become a stench to the nostrils of the community, and all good men are praying that you be speedily reformed or summarily destroyed. By the providence of God and the favor of this court these prayers shall be speedily answered by signal and exact justice for your crimes. And finally, let me entreat you, if you are not lost to every sentiment of humanity, to desist from your criminal vagabond traffic and betake yourselves to some honest calling for a livelihood, that you may yet become virtuous, useful citizens and entitled to the respect of a Christian community. If you persist in this way, your ruin is certain, and you will receive, as you deserve, the execration of mankind. You may think that the sentence of the court is harsh and unjustly severe, but the court assures you that, compared with your crimes and the desolation you have already brought upon the community, it is mild in the extreme."

THE DRINK CURSE.

A Broken-Hearted Wife Whose Husband Has Become Like an Untamed Beast.

Not many years ago a young man of the highest promise and bearing an honored name, his profession being that of a lawyer, united in marriage with one of the loveliest of her sex. Every one present at the wedding feast remarked: "What a brilliant future." Nothing seemed wanting to complete his worldly bliss. But, alas! intemperance came like a thief in the night time (for he was a secret drinker at first) and robbed him of his honor, his eloquence, and gradually transformed him into a fiend, and his beautiful wife, with ill-disguised fear, watched and waited for the coming of her lost loved one, striving by every skillful device imaginable to shield him from the unfeeling world. Only a few days ago, I received a letter (we were schoolmates) written by her own hand, and her words of intense suffering and despair haunt me:

"My friend, my heart is broken. My once kind husband is no longer a man of feeling. His actions remind me of an untamed beast in our little poverty-stricken home. What shall I do; oh! what shall I do?"

Ah! Men in their daily walks of life know but very little in regard to the worst features of intemperance. It is the poor wife who must witness its horrors and endure its curse.

Look at the young men of to-day, wearing the flushed cheek. Notice, too, their nervous, unsteady hand and observe their watery eyes—a sufficient proof of the use of intoxicating liquors, which is slowly but surely doing its deadly work.

Statistics show that the amount of mortality among persons of intemperate habits is ten times greater than that of the temperate community. But the persuasive voice of temptation has only to be heard: "Come, boys, let us take a drink." Ah! young men, pause in your downward course.—*Eunice Butler, in Louisville Courier-Journal.*

THE results of drink in Prussia are shown in part by these figures: In the hospitals 3,106 sufferers from this cause; in the insane asylums 597 gone mad from the same; 1,174 die annually of delirium tremens; 108 suides, and 311 fatal accidents, must be added to the dreadful list.

DISENCHANTMENT.

She stood on the cool piazza
As the shades of evening fell,
And I gazed on the lovely maiden,
Entranced by her beauty's spell.

The balmy evening zephyrs
Played with each golden tress;
And her azure eyes were swimming
In a sea of tenderness.

Her lips, just slightly parted,
Were tinged with the coral's flame,
And I thought that her cheeks' bright blushes
The hue of the rose would shame.

While gazing in admiration
On the rare and radiant lass,
I thought sweetest music only
Through those coral lips could pass.

But a sudden change came o'er her,
Gone was the smile so bland;
And she smote in sudden anger
The back of her lily hand.

And she cried: "Ha! ha! I've got you,
You'll trouble my peace no more;
You're the same blamed old mosquito
That I tried to mash before!"

—*Boston Courier.*

LES HUMORISTES.

A Long Distance After the Late Victor Hugo.

The Love Story of an Alleged Funny Man—A Daring Scheme, and How It Was Consummated—Happy Conclusion.

CHAPTER I.
WHO IS HE?

Alphonse Bertin was a humorist.

The poet's lyre has a thousand strin
that of the humorist has ten.

The ten are the Mule, Mother-in-la
Church Fair Oyster, Book Canvasser, Se
ant-girl with coal oil can, Vassar Girl, C
cago female foot, Poverty of Editors, Sh
of modern ice-cream plates and "Did
know the gun was loaded."

Striking these strings singly and
choras produces humor.

Alphonse struck the strings.

The multitude laughed rudely.

When he heard of a skillful artificer
Florence who made five hundred li
dishes so small that they would lie in t
bottom of a thimble, and could only be se
with a microscope, he said: "This is wi
our modern ice-cream dishes are model
after."

For this wild burst of humor he receiv
five centimes.

He wrote:

"Did you hear about the washou
asked the baggage-master of the report
"No," said the latter, with great show
interest. "What line was it on?" "
here on Mrs. Mulligan's clothes line," s
the baggage-man. The reporter collap
with a loud report.

For such a joke he received ten centimes

"Ten centimes and five centimes ma
fifteen centimes," said he. "For t
amount of money one can purchase Wien
wurst."

No one need starve when he can purcha
Wiener-wurst.

"My fortunes are at the wurst point," r
marked Alphonse.

For this joke he received nothing.

CHAPTER II.
THE PLOT THICKENS.

One day while out walking Alphonse sa
a pug.

The pug was tied to a dude. At th
dude's side was a beautiful girl. The gi
was named Adriennette and the pug wa
named Juno.

Alphonse fell in love with the girl Adri
ennette.

She was a proud and aristocratic maid,
whose father's carriage bore an eagle of the
sun for a crest.

The old man had got his start in life ped
dling ham sandwiches in the Bowery.

Therefore he had an eagle for his coat of
arms.

Adriennette loved before all things in the
world her pug.

The pug Juno dined on all delicacies of
the season.

He sat in an arm-chair blazoned with
gold.

He was allowed to run over the table
and seize the choicest tid-bits, while grace
was being said.

A place had been reserved in the family
cemetery for him, next to Adriennette's
great grandfather, against the time when
he should turn up his paws.

If Adriennette's lovers felt like kissing
her, they had to kiss Juno first as an evi-
dence of good faith.

It was into this family that Alphonse's
fate led him.

He felt a wild passion for his *bella inamorata* (see back part of Webster's dictionary).

But she would not even give him a glance.

From a gay, dashing, eight-dollar-a-week humorist, Alphonse became a pale, wan shadow. He acted both as Adriennette's shadow and his own.

He followed her everywhere.

He could do nothing but write sad poems and elegies. When he tried to make a joke about the size of the block of ice that the ice-man leaves nowadays, the words died in his throat, and he wrote a poem about the "dark willows that wave o'er the dark, deep pool."

When he tried to write an account of a goat lunching off a tin can, he turned to describe, with tears in his eyes, "the chestnut hair on my true love's brow." He attempted to run these in on the managing editor, instead of the jokes. He was kicked down stairs. He, so full of ethereal passion, was actually kicked, like an ordinary gas-meter man.

This story will be continued in the next chapter.

CHAPTER III.
DAY BREAKS.

One day when Alphonse watched Adriennette riding in her sumptuous coach with her pug Juno clasped to her throbbing breast: "She loves Juno better than her life," he muttered; "I love him because she does; I will steal him."

A wild look of mighty emotion swept across Alphonse's face, making it almost clean.

"She could not live without him. There will be a reward. What reward? Who knows?"

Alphonse could not speak what he only dared to hope.

For months he awaited an opportunity, finally one day it came.

...nand a very large stock of Clothin
for men, boys and children, which I
will sell within the next ninety day

Oakland, Md.

Notice.

The Republican voters of District
No. 8, on the north side of Backbone
mountain are requested to meet at
the Yutzy place on September 19th
to select two delegates to attend th

We'll drink the sparkling lemonade,
The sandwiches we'll munch.
Base-ball we'll play, likewise croquet,
And daily with the lunch.

CHAPTER II.

Oh, what a jolly time I've had!
I dance and laugh with glee.
A beetle has crawled down my back,
I feel him round my knee.

A bumble-bee has toyed with me,
And in my shoes are ants.
I sat upon a lemon pie,
And spoiled my Sunday pants.

—*Chicago Rambler.*

Advice to a Teacher.

Johnny Fizzletop is one of the boys that attends the University of Texas. He plays hookey, breaks his slate, and makes the life of his professor miserable by shooting spit-balls at him. Some weeks ago Johnny showed signs of reformation, but it did not last, for yesterday the professor caught him in the act of putting a bent pin on his throne.

"Johnny, I know you seem to be a bad boy," said the professor, sadly, "but I hoped there had been a change for the better in your conduct. I even told your father that you were a changed boy. I hoped that you had become a better boy, but I see I am mistaken. I am grieved and disappointed. I see that my hopes were premature."

"Yes, that is all your fault. You shouldn't go off at half-cock that way. Remember what David Crockett said: 'Be sure you are right, and then go ahead,' but you'll learn after awhile."—*Texas Siftings.*

The Chestnut Grows Everywhere.

Out West, right under the eaves of the Rockies, lives a patriotic editor and last Fourth of July he concluded to enthuse, so he announced that his paper for that week would appear in the National colors. On the day of issue an old subscriber was on hand and got the first copy from the press.

"How's this?" he exclaimed, looking over the sheet.

"How's what?"

"Why, this paper isn't in the National colors as you announced; there's nothing here but white and blue."

"Well, ain't that right?"

"Of course not. Where's the red?"

"O, it will be read, just as soon as the issue gets into the hands of the subscribers."—*Merchant Traveler.*

MISCELLANEOUS.

—The African elephant will be extinct in another hundred years unless a stop is put to the indiscriminate massacre now going on. So says Josef Menges, the great importer of African wild beasts, and probably the most eminent authority on such subjects.

—According to the statistics of the past year up to the age of fifteen more males die than females. From the age of fifteen to forty-five more females die than males. From forty-five to ninety more males die than females. At ninety the mortality of males and females is the same.—*Chicago Inter Ocean.*

—There are no hod carriers in Germany. Bricks are passed by hand. The higher up the bricklayers are, the more men are required to toss the bricks. Two men to a story is about the average, with enough more to lead from the front of the building to the place where the bricks are needed.

—The tropical gooseberry, which is cultivated in Florida, grows on a handsome tree from ten to fifteen feet in height. The fruit is rather smaller than the Siberian crab apple, and the shape a flattened globe. It contains one hard seed. The fruit is only moderately valuable, but the tree is ornamental.

—The word consols is an abbreviation of the term consolidated annuities. The English consols differ from our national debt in this way: The principal may vary in amount, but the interest never. They constitute a perpetual obligation of the United Kingdom, bearing three per cent. interest, and representing an irredeemable principal.

—The story is told of Mr. Evarts that he once sent a donkey up to his farm at Windsor, Vt., and about a week afterwards received the following letter from his little grandchild:

DEAR GRANDPA: The little donkey is very gentle, but he makes a big noise nights. He is very lonesome. I guess he misses you. I hope you will come up soon, and then he won't be so lonesome. MINNIE.

—Many mocking birds are shipped from Atlanta every season to the North and West. The young birds are caught by the hundreds by small boys who peddle them at fifty cents each. They are kept in their native clime until they are four or five months old, and then are sent by express to all parts of the country. A good bird, four months old, is worth from three dollars to five dollars. They sing well when a year old.—*Atlanta Constitution.*

—There has been a steady increase in the number of convictions in England for smuggling during the last ten years. Ten years since—that is, in 1876—the total number was 1,114, whereas in the financial year just ended it amounted to 1,950. The authorities, however, do not attribute these facts to an increase in the practice of smuggling, but ascribe them chiefly to improvements in the system of guarding the coast.

—A female office-seeker in Washington maneuvered her way into the White House with six small children in tow, and made a most pathetic plea for an appointment which would enable her to support her widowed brood. It was a neat bit of strategy, but it wofully miscarried when she was recognized by one of the attendants. She was never married at all, and the squad of juveniles had been borrowed for the occasion. The author of so ingenious a device almost deserved success.—*Chicago Times.*

—The girls in the Philadelphia Mint made a favorite of a sparrow that was permitted to pick up their lunch crumbs. A little boy stole its nest the other day, and upon drawing his hand from the box it was found full of shining particles. An examination of the box showed it to be flecked not only with gold dust, but that it was carpeted with sparkling, soft, yellow gold. The sparrow had been regularly carrying away gold dust in its feathers, which it shook out when making its toilet.—*Philadelphia Press.*

—A Tennessee man finds there are 300,000 worthless dogs in that State, which consume food enough, if fed to hogs, to make 30,000,000 pounds of bacon, which would be equal to feeding meat to 100,000 able-bodied men a whole year. At ten cents per pound the bacon would be worth $3,000,000, and if in silver would load down ninety-four two-horse wagons and make a wagon train more than half a mile long. Again, the worthless whelps prevent farmers from keeping 2,000,000 sheep, the mutton and wool from which would be worth $5,000,000. Including the sheep annually killed, the whole expense of keeping the dogs of the State amounts to the pretty sum of $9,000,000. —*Chicago Herald.*

MAN'S ORIGINAL TASTES.

The Cannibalistic Tendency of the Paleolithic Species.

Paleolithic man used to eat his brethren; and so used his comparatively highly civilized successor (we must not say descendant) of the new stone age. In Italy, in the dried-up lakes, (terra-mares,) which contain remains of the old stone age, one finds human bones not gnawed only, but broken for the sake of the marrow—treated just like the beasts' bones among which they lie. In France it is the same; experts say they can tell the difference between the marks of a rat's or tiger's tooth and of that of a man, and no animal has ever got so far as breaking the bones that it mumbles. In our British barrows there is not the slightest doubt, from the arrangement of the remains, that, when a chief was buried, not only were his slaves killed and buried with him, but their bodies first furnished out the funeral feast. The horrible old Hellenic myths, such as Tantalus cooking his son Pelops as a meal for gods, and Atreus dishing up his brother Thyestes' children and asking him to dine off them, are survivals of a time when the man-cooking oven was as much an institution in Greece as it was the other day in New Zealand or in Fiji. Dog does not eat dog; very few animals will devour their own kind, unless, like sows or rabbits, they do it under the influence of terror; but man in this, as in some other matters of conduct, soon got below the brutes, even if he was not a cannibal at the outset.—*All the Year Round.*

GRANT'S CAREER.

His Life Savoring More of Romance Than of Reality.

The story of General Grant's life savors more of romance than reality; it is more like a fable of ancient days than the history of an American citizen of the nineteenth century. As light and shade produce the most attractive effects in a picture, so the contrasts in the career of the lamented General, the strange vicissitudes of his eventful life, surround him with an interest which attaches to few characters in history.

His rise from the obscure lieutenant to the commander of the veteran armies of the great republic, his transition from a frontier post of the untrodden West to the Executive Mansion of the nation; his sitting at one time in a little store in Galena, not even known to the Congressman from his district; at another time striding through the palaces of the Old World with the descendants of a line of kings rising and standing uncovered in his presence; his humble birth in an Ohio town scarcely known to the geographer; his distressing illness and courageous death in the bosom of the nation he had saved—these are the features of his marvelous career which appeal to the imagination, excite men's wonder, and fascinate the minds of all who make a study of his life.

Many of the motives which actuated him and the real sources of strength employed in the putting forth of his singular powers will never be fully understood, for added to a habit of communing much with himself was a modesty which always seemed to make him shrink from speaking of a matter so personal to him as an analysis of his own mental powers, and those who knew him best sometimes understood him the least. His most intimate associates often had to judge the man by the results accomplished, without comprehending the causes which produced them. Even to the writer of this article, after having served with the General for nine years continuously, both in the field and at the Presidential Mansion, he will in some respects always remain an enigma. His memoirs, written on his death-bed, to be published only after his decease, furnish the first instance of his consent to unbosom himself to the world. In his intercourse he did not study to be reticent about himself; he seemed rather to be unconscious of self. When visiting St. Louis with him while he was President, he made a characteristic remark showing how little his thoughts dwelt upon those events of his life which made such a deep impression upon others.

Upon his arrival a horse and buggy were ordered, and a drive taken to his farm, about eight miles distant. He stopped on the high ground overlooking the city, and stood for a time by the side of the little log house which he had built partly with his own hands in the days of his poverty and early struggles. Upon being asked whether the events of the past fifteen years of his life did not seem to him like a tale of the "Arabian Nights," especially in coming from the White House to visit the little farm-house of early days, he simply replied, "Well, I never thought about it in that light." — *General Horace Porter, in Harper's Magazine.*

A CURSE.

This is What the Possession of Too Much Land Involves.

The natural tendency of this age is towards too much expansion. Men are not satisfied with a moderate business, with making a good living and a reasonable sum besides; but they wish to amass millions, and so spread out and worry themselves prematurely old, and in a majority of cases die, leaving no more than they would had they confined themselves to the smallar fields and not having taken a tithe of the comfort they would have then enjoyed. The *Rural New Yorker* makes a note of this, and calls the attention of farmers to the fact that in no business is this more the case than in farming. There is many a man who, when the owner of a single farm of fifty or one hundred acres, was a splendid farmer, keeping his fields clean and well cultivated, putting in his crops in good season and in the best order, and securing each as soon as mature, and keeping the best of stock, and thus made money, lived in comfort, and, besides supporting his family well, laid by a small sum for a "rainy day," and was happy. But, ambitious to be rich, he reached out after another farm, and since this was bought he has found so much work to do, so much business to look after, that he has not had time to do anything well; his fields are weedy, his crops, always sowed late and in a poor manner, and not more than half manured or tended, give but poor return, and even these are not harvested until over-ripe, and then in a slovenly manner, leaving him no profit. As a result, he is always hard up, and works beyond his strength, while his family have to get along with the bare necessaries of life, and no one has any time for comfort or happiness.

Is this a fancy picture? Look about and you will find its reality in every neighborhood. And many a one, burdened with too much land, would be glad to sell the surplus and return to the home farm, only for a false pride. By far the safest and most sensible way is to be sure that one farm is improved all it can be, and made "as rich as a garden"—forced to produce its largest crops at the greatest profit—before another acre is added. As a rule larger profit lies in the direction of better farming and larger crops, rather than in more acres.—*Cleveland Leader.*

—Minute instructions are given to the officers of the Salvation Army how to behave, what to read, what to wear, and as to marriage. They may not marry or court the first year, and may not become engaged at any time without the consent of the General. As to reading, they are told that is better not to read secular newspapers, but if they do look at them, it is to be only a look. They are to read no novels, to avoid all the ordinary religious books, all the twaddle and trash and goody-goody, milk-and-water stuff, and to confine themselves to the Bible, general orders, the hymn book and the War Cry.—*N. Y. Sun.*

LORD NAPIER.

How a Great Military History was Conceived and Written.

One day early in 1823 he went for a walk with Lord Langdale, one of his intimate friends, over some fields which are now covered by the mansions of Belgravia. The conversation turned on Southey's recently published narrative of the Peninsular war. Lord Langdale was greatly struck by Napier's remarks on the events of the struggle and the characters of the principal actors. Suddenly he asked him what he was thinking of doing. "Do you mean," replied Napier, "where am I going to dine?" "No," said Lord Langdale; "what are you thinking of turning to as an occupation?" Then he urged him to turn to literature. The article on Jomini proved that he could write. He must not waste his life in mere amusement. Why should he not write a history of the war himself? On returning home Napier told his wife what Lord Langdale had said, and added that he himself felt doubtful whether he was clever enough to write properly such a book as a history of the war. But she, believing firmly in her husband, encouraged him to try. For several nights he lay awake thinking over the matter. At last his scruples were overcome by the thought that he might be able at least to vindicate the calumniated memory of Moore, and he resolved to make the attempt. Those of his acquaintances who did not really know him were surprised to hear of his intention, and remarked that being a comparatively young man, he was presumptuous to think that he could write such a history. Having formed his resolve he lost no time in proceeding to execute it. First of all, he called upon the Duke of Wellington and asked him for the loan of his papers. The Duke replied that he had himself thought of writing a plain, didactic history of the war, which should be published after his death. Till then it would be impossible to make known the whole truth without giving pain to many worthy officers, whose only fault had been dullness. For these reasons he told Napier that he could not lend him his private papers; but he intrusted him with a number of important documents, and gave him authority to obtain from the Quartermaster-General, Sir George Murray, all his orders of movements. Of his own accord he promised to answer any questions as to matters of fact which Napier might wish to ask him in the course of his work. Murray, however, refused to let Napier have the orders of movements, stating that he reserved them for a history which he himself intended to write. After taking these preliminary steps Napier went to Paris to collect materials for the French side. He walked about the streets, exploring the contents of the bookstalls, and bought every book that seemed likely to be of any use to him. He also went regularly to the Depot de la Guerre and made copious extracts from the documents which were stored on its shelves. On returning to England he took up his abode for a time at Strathfieldsaye for the purpose of consulting the Duke. Marshal Soult, with whom when in Paris he had struck up an acquaintance, lent him valuable papers; he corresponded with Marshal Jourdan, and received information from officers who had served on the staff of Ney and Massena. He also collected an immense mass of letters and journals from British officers. —*National Review.*

THE BODY'S TOLERANCE.

Little Things Which Often Prove Dangerous, While Severe Injuries Sometimes Produce Trifling Results.

Sometimes a slight blow on the head has resulted in death, or, what is worse, in the permanent loss of reason. A mere scratch on the hand, or a sliver in the foot, or a grain of dust lodging in the eye, or the tiniest fish-bone entering the wind-pipe, has proved fatal. Such facts may lead us to accept the poet's statement, "The spider's most attenuated thread is cord, is cable, to man's hold on life." But there is another class of facts quite as surprising, that are different from these.

An iron bar has been driven through the brain, with a considerable loss of brain substance, and yet no permanent harm has come to body or to mind. The fact is, while a mere prick in a particular part of the brain (the medulla oblongata) may cause death, the great bulk of the brain is exceedingly tolerant of many forms of injury.

Even the heart is much more tolerant than is generally thought. The physician may thrust his fine instrument through it with safety. An insane woman sought to kill herself by piercing it with a hairpin, but wholly failed of her purpose, although the pin interfered with the natural movements of the heart.

A woman swallowed a paper of pins. The pins traversed various organs and tissues of the body, and yet she recovered from the local inflammation.

A boy was brought to the hospital insensible, and nearly dead from asphyxia (want of breath). The doctor having run a catheter down the wind-pipe, a piece of chestnut was coughed up. The next day there was evidence that another piece was lodged in another of the bronchial tubes. It was impossible to dislodge it. There followed all the symptoms of acute consumption (pthisic): high temperature, sweating, emaciation, copious expectoration of offensive matter, and a large cavity. Yet the boy in three months returned home convalescent, and six months later the cavity had disappeared.—*Youth's Companion.*

—A Texan inventor claims to be able to send the voice across the Atlantic Ocean by means of a magnetic telephone which he has contrived. His instrument, which differs essentially from the telephone now in use, has successfully transmitted sound seventy-five miles. This invention, if it will do all that is claimed for it, will go far toward assisting those devoted persons who are seeking to bring out a universal language.—*Chicago Current.*

—There are five hundred persons employed in the United States signal service.—*Washington Post.*

MARSHALL'S DISCOVERY.

An Account of the Finding of Gold in California.

I see a notice of the death of James W. Marshall, who discovered gold in California. I became acquainted with Marshall, at Coloma, California. I knew him intimately, and was associated with him in business at that place, which is on the south fork of the American River. Marshall was a native of New Jersey. Gold was discovered in February, 1848, by Marshall and another man named Wiemer. I have forgotten Wiemer's first name. Marshall and Weimer built for Colonel Sutter a saw mill at Coloma, and had finished it in February, 1848. I am a stockholder in a company which now owns that saw mill. The mill had been erected at the head of a bar where the river bends around it in the form of the letter U. The mill race had been cut through the bar, and when the mill was started it was found that the race was too shallow, and for this reason the wheel of the mill was partially under water. The water was shut off, and Marshall and Weimer went down into the race to ascertain where it was to be dug deeper. A point about fifty yards below the mill, they concluded, was the place which obstructed the flow of water. Here Marshall said to Weimer: "What is that which shines just at the toe of your boot?" Weimer then picked up the shining piece, and they both thought it a piece of brass. They began to conjecture how it was possible for a piece of brass to get into the race. From the fact that no brass had been used in the construction of the mill, and that the piece found had been worn smooth, they concluded that it was not brass, and might be gold. On that day Mrs. Weimer was making soap, and for this purpose had made lye by leaching wood ashes. To test the metal found Mrs. Weimer boiled it several hours in this lye, and when she removed it from the lye it was as black as ink. These facts were stated to me by Marshall, Weimer, and Mrs. Weimer. I went with Marshall to Weimer's house to see the first piece of gold found in California, and then and there the whole history of the discovery was talked over by all three of the persons who participated in the discovery. Mrs. Weimer then showed the piece of gold. Its weight was 87, or, the value of the ounce being $16, in other words, 8¾ pennyweights. The form of the piece was that of a long, irregular pumpkin seed. It was still black as when taken out of the lye, except at one end, where the incrustation formed by the lye had been removed.

This discovery was made in February, 1848. The day I do not remember. As soon as this lye test had been made Marshall and Weimer went into the mill race and with wooden bowls washed out some two or three ounces of gold, and Marshall carried it to Monterey to ascertain if it were gold. This was the nearest place where the means to make the test could be had.

Colonel Sutter resided at his fort, near what is now the city of Sacramento. He was a Swiss and a classmate of Napoleon III. One evening, when going down the Sacremento River in a steamboat, Colonel Sutter told me the story of Marshall's return from Monterey. Colonel Sutter said: "I was in bed, and it was about two o'clock at night. I heard some one ride up to the fort, the horse running at the top of his speed. Then a banging at the gate; then I heard the clank of the spurs on the brick floors of the fort; then a pounding at the door of my room, and when I opened the door in rushed Marshall, shouting: "It's gold! it's gold!"

At the time Marshall and Weimer built the mill at Coloma the labor used was Indian labor. There were no other white men besides Marshall and Weimer. Marshall was unmarried and had no children. I think Weimer had, but do not distinctly remember.

When Marshall returned from Monterey to Coloma he brought with him about 300 Indians, and took to Webber Creek, distant about six miles from Coloma. There with his Indians he washed out a large amount of gold. His part was sufficient to buy from Sutter the saw mill at Coloma. In 1849 Marshall and John Winter owned the mill together, and they also owned Winter's Hotel. They sold the lumber at $500 a thousand, and the demand was greater than the mill could supply. I paid at the hotel $100 a week board, without a room. Marshall was then worth more than $100,000, but his generosity was without limit. He gave to all who asked of him. He had no business qualifications, and when sharp business men came in and built up the little town of Coloma, Marshall was soon traded out of all his property. His money he had lent where it would never be returned or had been given away.

Then Marshall became a prospector for gold mines. Several times I fitted him out with mules, men and provisions to go prospecting. He knew the country better than any other man at that time, and led the way to many rich placer mines; but he never found any that were rich enough for him. Often has he left mines where he could take out six or seven ounces per day to each man to seek an El Eorado where hundreds of thousands could be made in a week.

Since 1852 I have known nothing of Marshall, but I concur in the opinion that it is a disgrace to the State of California that she has suffered Marshall to die in want. To Sutter first and Marshall next is California most indebted. —*Henry C. Gardiner, in N. Y. Sun.*

Lace Dresses.

Gauze and lace dresses have two waists provided for them, one of which is of lace or gauze, and the other of velvet. White and pale pink velvet corsages with white lace skirts are elegant toilettes for watering-places. Shot velvet in such colors as brown with green or red with blue is the novelty for dark corsages worn with light canvas skirts. The trimming on the skirt is rows of velvet ribbon sewed on the canvas flounces before they are pleated. Plaid and striped velvets and those dotted over with small metallic balls like beads of gold or lead are worn as jackets with various light fabrics for skirts.—*Harper's Bazar.*

THE REPUBLICAN.

SATURDAY, SEPT. 12, 1885.

ATTENTION, REPUBLICANS.

The Republican voters of Garrett county are requested to assemble in primary meetings in their respective districts, on

Saturday, September 19th,

to select five delegates from each district to attend the county nominating convention at Oakland, on

Tuesday, September 22,

to nominate a candidate for State Senator; two candidates for members of the General Assembly; one candidate for Clerk of the Circuit Court; one candidate for Sheriff; three candidates for County Commissioners; one candidate for County Surveyer, and to select three delegates to the State Convention to meet in Baltimore on the 24th instant, three alternates to said delegates, and three members of the State Central Committee for Garrett county.

The delegates are requested to come prepared to select three persons to act as a district committee for their respective districts.

JAS. A. HAYDEN,
Chairman County Committee.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

In the Anne Arundel Democratic Convention Tuesday the Wells faction succeeded in obtaining control, and gave the Bannon delegates very little show.

In the Allegany county convention the Canal wing refused to allow the Walsh men what they considered a fair show, and the result was a bolt. Two sets of delegates to the state convention were chosen.

Citizens who stand aloof from political affairs and speak of politics in general as "a dirty pool," make a great mistake. Politics is the science of government; and in a land where the government is administered by the people it is a first essential the people should familiarize themselves with the science. A man who does not read politics or discuss politics cannot vote intelligently, and is out of his place in a country like this He should emigrate to a clime whose government is a despotism. Absence from the primary meetings and from the polls on the part of the better class of citizens is largely responsible for the eminence and wide sway of unprincipled mounte-banks in our political affairs.

Driving out the Chinese.

CHEYENNE, WY., Sept. 3.—The *Leader* has the following special from Rock Springs, Wy.: The largest coal mines in the entire Union Pacific system are at Rock Springs, 250 miles west of Cheyenne. The company recently imported a large number of Chinese to take the places of the white men employed. Yesterday afternoon the entire force of white miners, about 150 strong, organized, and, arming themselves with shotguns, marched to Chinatown. After firing a volley into the air, they reloaded and ordered the Chinamen to leave. The order was obeyed at once, the Chinamen fleeing to the hills, closely pursued by the miners, who fired several volleys at the fugitives with fatal effect. The Chinese quarter was then set on fire and 39 houses owned by the company were destroyed, together with their contents.

The miners next visited the various mines in the camp, unearthed all the Chinamen at work therein and bade them flee. Of 400 Chinamen here yesterday morning not one remains. All are in the hills headed for Green River, 14 miles west of here. Seven were killed outright by the shots fired by the miners and many were wounded. It is said several who were feeble and helpless from disease perished in the flames.

Sheriff Young arrived from Green River on a special train yesterday afternoon with a posse of deputies, but they were too late to prevent the mob from carrying out their plans. The miners quietly dispersed, after having made sure of the departure of the Chinamen. Everything is quiet at this time.

CHICAGO, ILL., Sept. 3.—Advices received here from Rock Springs, Wy., this forenoon indicate a worse state of affairs than was first reported. All the Chinamen, over 500 in number, have been driven out of the town. Thus far, 15 dead Chinamen have been discovered, and there are probably as many more dead bodies in the ruins. Fifty houses belonging to the railroad company and 50 more owned by Chinamen were burned. The Chinamen are yet in the hills west of the town. They are without food and are afraid to go to Green River City, about 10 miles distant. Governor Warren is now at Rock Springs with General Superintendent Dickinson and Superintendent Wustele, of the Western division of the Union Pacific Railroad. No more disturdance is anticipated. Food will be sent by the authorities to the starving Chinamen in the hills.

SAN FRANCISCO, CAL., Sept. 3.—Colonel Bee, the Chinese consul, received the following despatch from Evanston, Wyoming, to-day relative to the massacre of Chinese at Rock Springs yesterday: "The number of Chinese killed outright was 11. There are a large number of wounded still in the hills, many of whom will probably die. The Chinese dare not go out in search of them." The despatch concludes by stating that it was nothing but a massacre of defenseless people.

CHEYENNE, WY., Sept. 3.—The worst has evidently not been told regarding the anti-Chinese outbreak in the western portion of Wyoming. According to advices from Evanston, where the second largest coal-mining camp of the Union Pacific Road is located, the outbreak was a preconcerted one. It has been arranged that the first attack upon the Chinese was to be made in Carbon, a mining town about 150 miles east of Rock Springs, to be followed by a like movement in the latter place and Evanston. The Rock Springs miners, however, took the initiative, and the result there has been announced. The mob at that place looted the houses of the Chinese before setting on fire. The outrages commenced in mine No. 6, where three Chinese miners were attacked and killed. Then the riot commenced all over the town, even women joining in it with loaded shotguns in their hands. Superintendent Evans, of the coal mines, had been warned to leave town, and he did so with alacrity, passing through here to-day en route for Omaha. Nothing can be heard from Carbon, as the operator there is evidently afraid to send news from Evanston. The sheriff of Uinta county telegraphed this evening to Governor Warren as follows:

A large number of citizens, with myself, are satisfied that the outrages committed at Rock Springs will be repeated and are liable to break out at any time. We need troops to protect the lives and property of our citizens.

Governor Warren is at Green river but he has telegraphed to the commanding officers at Fort Steele and Fort A. D. Russell, and the troops have been ordered to hold themselves in readiness to move at a moment's notice.

CHEYENNE, W. T., Tept. 5—A special from Rock Springs gives the latest information that can be obtained from the scene of the recent anti-Chinese troubles. All is quiet to-day and the miners have returned to work. At a meeting held last night measures were taken to put a stop to the drunken carousals of a few of their number who had been celebrating the removal of the Chinese.

Two more dead Celestiale were found to-day, one in the ruins of Chinatown and the other beneath a railroad bridge about a mile east of the place. The latter had been wounded and had managed to walk that far before giving up. Miners who took an active part in the attack upon Chinatown say that less than one-third of the dead Chinese in the ruins of the houses have been found thus far. They declare that no less than twenty-five were shot down inside the burned buildings. These buildings had dirt roofs, which covered up the dead Chinamen when the buildings succumbed to the flames, and, as no actual search has been made in the ruins, it is quite probable that the miners' statements are true.

Chinamen are still arriving at stations East and West almost dead from fright and weak from fatigue and lack of food. All are shipped to Evanston by the company. They reiterate the statement that many have died in the hills from wounds received in the attack upon them.

It is reported that the white miners at Almy, in the western end of the territory, have notified the Chinese laborers in the mines that they must leave within three days, and it is said that the Union Pacific Company has guaranteed their removal within the time specified. The Celestials all along the road refused to work to-day and demanded passes to Evanston.

State of Trade.

NEW YORK, Sept. 5.—*Bradstreet's Journal* in its commercial summary says: The general business situation as reported to *Bradstreet's* continues quite as favorable as reported last week. The activity is mainly confined, as heretofore noted, to print cloths, bleached cottons, wool and boots and shoes, but the feature of the week is found in the improvement noted in eastern iron markets. Notwithstanding the reported gain in this line in the South and West, manufacturers and dealers east of the Alleghenies had failed to report a like gain. Within the past week the improvement has become more general. The inquiry for pig iron has increased and one sale at New York is noted at 7,000 tons of forge at $15, for which $14 50 had been offered. While none in the trade admits the likelihood of a boom, all appear satisfied that there is a better business in sight. Dealers in Scotch pig have advanced prices 50 cents per ton, and orders have been cabled in some instances for shipment to this port. Steel rails for moderate sized lots may be had at $28a30, while smaller quantities command $29. No large orders extending in delivery beyond January 1 will be taken at these figures. One small lot for prompt delivery has been sold during the week at $32, furnace delivery. These are very encouraging features, Scotch pig at Glasgow is 9dals higher, with some speculative buying.

The movement of dry good from agents' and jobbers' hands at the East has been free, and previous advances has been fully sustained. August sales of dry goods at Boston are heavier than those of that month in 1884. The movement of general merchandise, affected as it is in the lines noted, is regarded as seasonably active. A special to *Bradstreet's* reports serious damage to the crops in Minnesota and Dakota from frosts.

BOSTON, Sept. 5.—The *Advertiser* in its weekly review of the wool market says: Contrary to the expectations of some, the market shows increased sales of nearly 1,000,000 pounds over last week. There certainly appeared good ground for these expectations, for the average of the sales of the previous seven weeks has been over 4,000,000 pounds, and more than the immediate wants of manufacturers should have been met by them.

The feature of the market is practically the continued sharp demand for low wools, which are from 3 to 4 cents per pound higher than the lowest point.

CONNELLSVILLE, Sept. 5.—The *Keystone Courier* has the following: The coke trade is just a shade better this week. The principle change to note is an increased activity among the independent ovens, notably the works of W. J. Rainey and Company, Moyer and Dawson. They have secured orders for 20 cars per day additional and this has had the effect of putting them on full time again. The outlook continues promising.

Repairing Farm Implements.

Germantown Telegraph.

Mechanical ingenuity does not come to every farmer. There are those who are possessed of excellent intelligence, and yet who have not enough of mechanical skill to make a respectable milking stool. Such farmers are from necessity compelled to employ a mechanic for every little job that demands attention. On the other hand, there are those who are possessed of great ingenuity and are skillful in the use of tools. This is a faculty that is not wholly acquired, and yet it can and should be cultivated as far as possible. Every farmer should have a work-shop in which little jobs of work can be done on rainy days. This should not only be supplied with a good selection of tools usually required, but also with materials such as are likely to be brought into use. The room need not of necessity be large, but of sufficient size for convenience. It should be systematically arranged so that all tools should have their appropriate places. These should comprise saws, chisels, augers, bitstock, bits, hammer, axe, shop hatchet, planes, wrench, files, and many others which it is unnecessary to mention. In the line of stock there should be a supply of a variety of nails add screws, bolts of various kinds and sizes, tacks, wire and leather, and various kinds of lumber and pieces of wood as would be called into use. With these at hand the farmer can many times save not only a journey to a mechanic, but a bill which, with each addition in the course of the year, would be considerable. Frequently the loss of a nut or the breaking of a bolt necessitates a journey to the blacksmith shop if no supply is at hand; but if the farmer has a supply, he has only to replace the missing or broken part and his work progresses undisturbed. If time is money, then the farmer is benefited in avoiding unnecessary journeys for repairs. At all events, he can if he will spend the time so saved in rest or reading for the improvement of his mind, a thing which is for the advantage of every tiller of the soil. During the winter the farmer should examine his implements and see that all repairs are attended to.

A Monster Gun.

On roughly hewn trunnions in the center of Ribbon & March's shops in Jersey City there rested a peculiar looking mass of tubing that was explained by the foreman to be the most powerful gun in the world. The monster was cast by the Pneumatic Dynamite Gun Company, and if the expectations are realized nothing afloat can withstand one of its terrible broad-sides. The barrel is 60 feet long, breech-loading, and weighs forty-three tons. It is of heavy wrought-iron, brass lined throughout and with a full bore of 8 inches. It was cast in four sections, 15 feet long, with iron collars, which are welded together with stout steel bolts. The barrel is bolted to eight reservoirs, where the compressed air necessary to fire it is stored. Brass nozzles connect the reservoirs to the barrel and the amount of air necessary to throw out the projectile is regulated automatically. Upright castings carried on twelve-inch channel irons support the whole, which is moved by compressed air to any position desired by the gunner. More formidable looking than the gun itself is the projectile fired. The cartridge, which is of brass, is five feet long and fits the bore snugly. In an iron cone at the head of the projectile 180 pounds of dynamite are stored, covered with a slight cap of thin metal, which is easily broken off, exploding the projectile wherever it strikes. When the gun is charged the gunner takes his stand on a platform behind the barrel, and by means of a lever closes the breech. By simply turning a crank the desired elevation is obtained and fixed. The lowest of the levers opens the nozzles leading from the air chambers and instantly the shaft cartridge is thrown out. Sufficient air to fire six projectiles is stored in the cylinders. There is no recoil. As soon as the carriage is completed and the gun mounted it will be taken to Fort Lafayette, where the test will be made under the supervision of a commission of naval men appointed by the government. It is the biggest piece of ordnance ever built in the world. It puts in the shade anything ever built by Krupp. Work was begun in October, but the boring was so difficult that it required much longer time than was calculated. It has been tested and shows no sign of weakening under a pressure of 2 500 pounds to the square inch. The company expect to sell the gun to Secretary Whitney if it proves serviceable.—*New York World.*

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, Sept., 7, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5¼@5¾ c. k that generally rated first quality 4@ 5¼ cts; medium or good fair quality 3¼@3¾ cts; ordinary thin steers, oxen and cows 2@2¾ cts; extreme range of prices 2@5¼ cts; most of the sales were from 3@5¼.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 3.551 head, against 2,175 last week and 3,742 head the corresponding week of last year, and the sales 1,718 were head, against 1,498 last week, and 1,675 head the corresponding week of last year.

Trade has been somewhat more active to-day than it was last Monday, but prices throughout were off ½c. on the better grades and ¼ on the others; in some instances ¾@½c. lower figures were accepted to effect sales. The tops were a shade better than were those of last week in quality, and there were a fair number of good butchers' cattle in the yards. Prices 2@5 3-5c.; most sales 3@5¼.

THE SWINE MARKET.

The receipts, though several hundred head less than the offerings last Monday, foot up a number about equal to a fair demand. The quality is of hardly as good an average as last week, there being more common hogs among them. Those weighing 160 to 180 lbs. net, seem to be most desired by the butchers, though a few extra fat hogs are called for. Prices range from 6 to 6¾c. Common rough hogs (piggy sows, grassers and stags) are not quoted, as they have to be sold for pretty much what they will bring, with ¼ off and extra weight besides. Same time last year hogs sold at 6@8¾c., net.

THE SHEEP MARKET.

There is quite a full run of sheep this week, and their quality will average fully as good as last week's effering. Trade is slow. There is no outside demand, and butchers buy slowly. Sheep are quoted at 2@3¾c., gross, and lambs at 3@4½, with a few extra at 4¾; stock sheep $1@2.50 per head. Same time last year sheep sold at 3@4½c.; lambs 3@5½; stock sheep $1.50@3.50 per head; wethers 3½@4¼.

NEW ADVERTISEMENTS.

PHYSICIAN AND SURGEON,

Offers his services to the citizens of Oakland and vicinity. Office and residence on Oak street, second house East of Catholic church. Sept. 9, 1885.—1 y.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1585, and recorded in Liber W. H. T. No. 10, folio 271, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

WEDNESDAY, SEPT. 30, 1885,

at 11 o'clock, A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O. Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
9 5 4t Attorney for Mortgagee.

preparations of one kind and anr which are prepared by quacks for autifying" the skin, are all bums, and no sensible woman should be into buying them. To obtain a utiful skin one must begin and diet perly. Butter, fat meat and greasy of every kind must not be eaten. fee and tea must be given up, so st claret and all kinds of wine, and k or lemonade substituted. Fruits vegetables should be eaten in ndance, rich candies and cakes ided, pie never should be touched, pickles and acid food generally uld be dispensed with. A woman follows the above rules will find that skin will become smooth and clear several months have passed. Of rse the dieting must be thorough careful. No improvement can be le unless it is.

tablespoonful of sulphur taken y other morning for a week, and not taken again for three days, then taken every other morning for ther week, is one of the best things lear the complexion. It acts like c. It should always be mixed with asses or something that will clear it the system.

alt—a tablespoonful dissolved in a let of milk—is an old-fashioned pe for beautifying the complexion. ertainly is a simple remedy, and if es not help the complexion it will ngthen the system. A great deal nds upon the constitution of the ion and the kind of complexion she

What will help one woman wonully will have no effect whatever on rs. One thing is certain, however, is always conducive to softening whitening the skin, and it is a noble fact that girls who have never allowed to drink tea or coffee, and have drunk quantities of milk, generally, when they reach the of twenty, very beautiful complex-

oiling water is also one of the best gs with which to keep the complexin order. A tumbler should be k one hour before every meal. If disagreeable by itself the juice of a lemon should be added. Sugar ld not be used. Most women in mer time are too careless of their plexions, and when winter comes they go out to balls and parties regret it. The sun is excellent for complexion if it does not get too h of it. A little browning and kling is oftentimes very beneficial, when the face is exposed to too at measure of the sun's rays the is apt to become coarse. Veils—y thin ones—should always be worn seaside resort, unless parasols are ried. The salt air and sun together bad for the complexion, though exent for the general health.

fashionable women and girls in New k always have their arms and necks dished" before going to a ball or entertainment where they appear very decollette dresses. The ishing" greatly beautifies the skin.

PUBLIC SALE

—OF—

MILITARY LOTS

IN GARRETT COUNTY.

On MONDAY, Sept., 14th, 1885,

at 3 o'clock, P. M., in front of the Glades Hotel, in Oakland, we will, on behalf of P. M. Lusson and wife, the owners, offer at Public Sale to the highest bidder the following

MILITARY LOTS to wit:

Nos. 2724, 2721, 2726, 2727, 2660, 2664, 2668, 2691, 2692, 2693, 2694, 2697, 2494, 2463, 2460, 2429, 2431, 2472, 2473, 2582, 2490, 2493, 2441, 2442, 2490, 2493, 2593, 2584, 2585.

These Lots are a part of the tract of land called

"INTERNAL IMPROVEMENTS,"

and lie in the neighborhood of Accident. The tract, "INTERNAL IMPROVEMENTS" was patented to General Walker K. and John B. Armistead, April 24th, 1831. On June 30th, 1847, the widow and heirs at law of General Walker Armistead filed their bill in Equity for a sale of said land, No. 861 Equity, Allegany county. A decree was passed by which W. M. Price was appointed trustee to make said sale. Said Price, trustee, sold and conveyed said lots to P. M. Lusson, and said sale was ratified and confirmed by the Court.

Any person desiring to examine the title of Lusson and wife to said lots can do so by calling on the undersigned who will furnish any information in their possession with reference to the title.

In Garrett County, Maryland.

—:o:—

By virtue of a power of sale contained in a mortgage from Alpha Hinebaugh and Fannie B. Hinebaugh, his wife, and John Hinebaugh and Mary A. Hinebaugh, his wife, to Matthew Cullen, dated June 8th, 1882, and recorded among the Land Records of Garrett county, in Liber W. H. T. No. 6, folios 468, &c., and the lassigned to Henry A. Rasche by said Matthew Cullen, the undersigned, assignee of said mortgagee, will offer at public sale, in front of the Court House, in the town of Oakland, Garrett county, Maryland,

On Monday,

SEPTEMBER 14TH, 1885,

at 3 o'clock P. M., all the following Real Estate, viz:

First. All that tract of land situate, lying and being in said Garrett county, known as

"SWALLOW FALLS,"

containing about eight hundred acres.

Second. All those pieces or parcels of land situate, lying and being in Garrett county aforesaid, known and designated as

Military Lots Numbers 1256, 1258, 1260, 1261, 1262, 1263, 1264, 1265, 1266 and 1269,

containing fifty acres of land each, and included in a tract of land called

"The Falls of Muddy Creek."

All of which said lands are more particularly described in the said mortgage, reference to which is here by made.

Said lands are situated on and near the Youghiogheny river, about seven miles north of the town of Oakland, are well timbered, and improved by several DWELLING HOUSES and out-buildings, and the same property on which the said Alpha Hinebaugh recently opperated a saw mill.

TERMS:—Cash on day of sale.

HENRY A. RASCHE,
8 15 4t Assignee of Mortgagee.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. Reference given when required.

ANDREW J. HARNE.

JOHN H. RILEY.

July 7, 1885.

FOR COMMISSIONER.

At the earnest solicitation of many friends I have consented to announce myself as a candidate for County Commissioner, subject to the action of the Republican County Convention.

WM. W. FRAZEE.

—Rev. B. Ison spent this week at his home in Oakland.

—Miss Mollie E. Moulden, of Washington, D. C., is visiting at Rev. B. Ison's.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—Oakland Woolen Mills flannels for sale at Harne & Lawton's Grocery.

—Mr. Wilson Vance was called to Findley, Ohio, Monday, to attend the funeral of his mother.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—The September term of the Circuit Court for this county convenes next Monday and will probably be a long session.

—The Oakland Hotel closed Monday. A number of the guests removed to the Glades Hotel and boarding houses in town to remain a short time.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—Try our Rolled White Oats and Cerealine at Harne & Lawton's Grocery.

—Married, at the residence of Joel Orendorf, Forks, Garrett county, on Thursday, 3d inst., by Rev. J. B. Shoup, Christian P. Miller, of Grantsville, to Julia A. Bittinger.

—All persons knowing themselves indebted to John Shartzer are hereby notified to call and settle on or before Oct. 1st, 1885. 9 4 4t

—There will be a pic-nic on the farm of William Browning, near Offutt's saw mill, on Saturday, Sept. 12th. A general invitation is extended.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—Rev. J. W. Duffy, of Trinity church, Baltimore, will preach at the M. E. church in Oakland on Sunday morning at 10½ o'clock.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—A "Golden Apple Entertainment," for the benefit of the Oakland Ev. Lutheran church, will be held in Offutt's Hall, Saturday evening, September 19th. All are invited.

—The railroad excursion to Mountain Lake Park, announced for the 21st, has been postponed until Tuesday the 22d. A brass band and good speakers will be present. The trains will arrive at the Park at 10 o'clock A. M. A large crowd and a good time is expected.

—Died at the residence of his parents in Oakland, Sunday, after an illness of several years of consumption, George S. Bell, in the 29th year of his age. Through the ministrations of his pastor and members of the Young Men's Christian Association of Oakland, he was converted last April, and died in peace and with a full assurance of a home in heaven.

—Mr. P. T. Garthright, at his store at Mountain Lake Park, has now on hand a very large stock of Clothing for men, boys and children, which he will sell within the next ninety days at a small advance on cost. Also boots and shoes, stocking yarns and many other lines of goods. Call and examine goods and prices.

Aug. 22, 13t.

—The Parkersburg (W. Va.) State *Journal* "learns with regret that Dr. W. H. Ravenscraft will shortly settle in Oakland, Md., near where he formerly resided. The doctor is a very pleasant, thoroughly cultured gentleman, and we bespeak for him a hearty welcome on his return to his old State. He has many friends here who will be sorry to learn of his intended departure, and with them we wish him success in his new field."

Church Services--Sunday.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

—Died, at her residence near Fairfield, Iowa, on July 10th, 1885, Mrs. Ann McCarty, wife of the late Isaac McCarty. Ann Devecmon was born at Westernport, Allegany county, Md., on May 3d, 1794, and at the age of twelve years was brought to reside near the present site of Oakland, her parents having spent the intervening years partly at Cumberland, and partly at Clarksburg, West Va. She was married to Isaac McCarty January 22d, 1815, and resided near Oakland until 1855, when they removed to Iowa, and purchased the farm upon which both their lives were ended. Grandmother McCarty was converted about 50 years ago, and has ever since been a consistent member of the M. E. Church. Her advanced age rendered it impossible for her to attend the public means of grace for several years preceding her death, but her life was proof that "the path of the just is as a shining light that shineth more and more unto the perfect day." As she advanced in years she grew in grace and brought forth the fruits of the Spirit in such abundance and perfection that it might truly be said of her "her last days were her best days." Her long, long life was not without its trials; the rearing of her eleven children to manhood and womanhood brought a heavy burden of responsibility and care; parents, brothers, sisters and dearly loved friends, one by one left her and crossed to the other side, and the graves of her husband and two beloved daughters opened at her feet, as she trod the down-hill path to the end of life. During her widowhood of eighteen years, she was the comforter, guide and counselor of her family, and mind and memory were retained to the latest moment. Peacefully and painlessly she fell asleep, and was laid by the side of the husband of her youth, in a quiet country graveyard, to rest until the resurrection morning, when children, grandchildren and great-grandchildren, and a host of neighbors and friends will rise up and call her blessed.

Harvest Home.

A harvest home pic-nic was celebrated by the Forks congregation, of the Lutheran church, Saturday, September 5th. This was an occasion to which the people of that community had long been looking with the happy anticipation of a pleasant time. They had toiled long amid the harvest and beneath the burning rays of the summer sun, and, after the golden harvest had all been garnered away, doubtless they felt that a day of thanksgiving and of social enjoyment would be necessary to complete the harvest of the season. Despite the unfavorable appearance of the morning the people commenced to repair to the place of meeting, and continued to pour in until there was present perhaps the largest number ever seen on a similar occasion in this county. All present were evidently intent on having a pleasant day, but wishes were of no avail and hopes were vain. The day proved so unfavorable that the programme for the occasion was changed entirely and the exercises were held in the church. The Pastor, Rev. J. B. Shoup, delivered an able and appropriate address from the following text: "While the earth remaineth, seed-time and harvest, and cold and heat, and summer and winter, and day and night shall not cease to be."

After service the church and school house were offered to as large a number of those present as could find shelter in them, and an ample dinner was served by the generous-hearted people, which did credit to themselves and to the occasion. The enjoyment of the day, though not entirely destroyed, was nevertheless interrupted, and the people, with looks of disappointment on their faces, and with expressions of regret on their lips returned to their homes. The day, however, was designed to diffuse through all those present a spirit of submission to the will of Him who in wisdom sendeth rain or sunshine upon the earth.

The harvest home celebration of the Forks will be a permanent annual institution in the future as it has been in the past three years. This idea is a very good one. The sons of agriculture upon whose honest toil all the complex fabrics of society rest for support, will greatly increase the dignity of their occupation by promoting among themselves a greater spirit of sociality. A day set apart for thanksgiving by the people who have been the recipients of a bountiful harvest, teaches them to set their common dependence on Him to whom the eyes of all living beings look for food and for support, leads them on account of like occupations and like interests to feel a closer social relation to each other, and unites them in firmer bonds of friendship. At no other time of the year are the people so well prepared to enjoy a day of this kind, and at no other time are they so ready to respond to the call as they are immediately after the long continued toil of the harvest is completed. It has been my privilege to attend similar occasions in other parts of the country, and I have observed that they are truly devoted to the best interests of the people and well deserve the patronage of all who are engaged in agriculture,

Deer Park.

The summer months have gone again and the Equinox is on its way toward us. The majority of our summer visitors have returned to their city homes, and the few who can still remain are enjoying the fresh mountain breezes, and the delightful forest tramps for lovely autumn leaves, which are just coming forth in all their glory.

The Hotel will close in a week or two. The season has been a remarkably prosperous one for the Hotel, and there are still so many guests remaining that it may be kept open later than usual.

The fair and festival of the Lutheran Society was a very successful one, beyond the anticipations of any of the participants.

An oyster supper is in progress for the benefit of the U. B. Church, at the Deer Park House, four evenings this week.

Maj. W. A. Armstrong, of Baltimore, has taken charge of Davis & Bro.'s store in place of Mr. D. F. Graham, who removes to Elk Garden.

Mr. and Mrs. U. B. McCandlish, of Piedmont, visited Mrs. W. R. Davis last week.

Miss Katie Davis will leave next week for a college course at Hollin's Institute, Virginia.

Mrs. A. C. Lott is absent on a visit to relatives in Fairmont, W. Va.

Mrs. Catherine Graham was in Deer Park on Monday.

Miss Helen Harrison is visting her sister Mrs. Graham.

The Band of Hope meets on Saturday evening next.

Miss Lucie and Camille Hendrickson of Alexandria, are visiting relatives in Deer Park.

Last night (Tuesday,) a very lively crowd of Miss Minnie Lott's friends called in a body to congratulate her on her birthday anniversary. Dr. McFarlan, of Washington delivered a very impressing address suited to the occasion, in behalf of the gentlemen present, and Mrs. E. J. Roberts, of Brookly, N. Y., followed in a fluent, spicy speech, conveying the congratulations of the ladies. An adjournment to Wing-and-Wing was then proposed so that the festivities could conclude with music and dancing, and the whole evening was one of unalloyed pleasure.

Registered at Wing-and-Wing:

Wheeling, W. Va,—C. A. Basnett and Julius Waddle.

Washington, D. C.—Dr. Danl. McFarlan and wife, Jas. Jamison, Maj. B. J. O'Driscole, Miss Kate F. Daly, and Chas. W. Clarke and wife.

Baltimore, Md.,—Wm. J. Digges.

Caldwell, Ohio,—James Carr and Davin Young.

***

Mountain Lake Park.

The season just closing has been the most pleasant of any in the history of the Park. The resident population is a little over three times that of the first year. There has been quite an increase in the transient population also. The entertainments have all been of an extraordinary character this season. The aim of the officers having this in charge will endeavor to make the programme more attractive next year.

Although the weather was cool on Sabbath morning, there was a good audience who listened with so much pleasure to the thrilling words of Rev. J. B. Young. Our pastor M. W. Rider preached for us at 3 o'clock, and in the evening Mr. R. W. Armstrong conducted a very interesting meeting for the young people.

Rev. C. P. Masden returned from Europe on last Saturday night. He is very much pleased with his trip. If he does not have to go on to St. Louis before, he will preach for us on next Sabbath morning at 10:30.

The beginning of scoool and other business interests, have taken several more of our people away.

J. A. E.

Davis City, W. Va.

Mr. A. H. Porter, son of W. E. Porter, Esq., left here for Baltimore, Md., last Friday.

The W. Va. C. & P. R. R. Co. Machine Shop and engine house will be completed by the 15th inst.

Messrs. Ladeau are about to establish a tannery here.

Mr. R. W. Eastman the famous hunter is building a large store house on Williams street.

Messrs. Carrier & Haskins are also erecting a store house on Williams street.

On and after Sept. 15th, the W. Va. C. & P. R. R. Co. will run but one train daily.

'Tis but a short journey across the isthmus of Now.

Pleasant Hill, W. Va.

As this place has not been heard from through The Republican for several months we will try and give a few items.

The grasshoppers are doing a great deal of damage in this county. They injured the meadows to some extent before they were cut and now they are eating off every green blade as as soon as it comes. A great many meadows look like a fire had passed over them. As soon as the meadows were cut they attacked the oats and cut them down until the ground was covered in some places. They are now destroying the corn and buckwheat in some parts of the county to an alarming extent. It is feared that they will destroy everything next year.

Miss Sue Spindler, of Uniontown, Pa., is visiting relatives here and at Terra Alta.

Mrs. Marshall Spindler, of Terra Alta, is visiting relatives here.

D. H. Chadwick, Esq., a prominent merchant of Morgantown, is rusticating in the Pineswamps.

Wm. Hartman has been lying very sick for several months, with cancer of the stomach. His recovery is very doubtful.

Henry Albright has just received a new engine for his saw and grist mill.

Mrs. Annie Windle, of Keyser, who has been visiting relatives here for several weeks, returned to her home on last Tuesday.

Mr. and Mrs. Charles Friend, of Sang Run, have been visiting Mrs. F's parents near Terra Alta.

B. B. Savedge, of Sang Run, frequently comes to Cranesville on "pressing" business.

The Rev. Henry E. Friend, of Johnstown, preached a very able sermon at the Kelly church, on last Saturday night.

E. T. DeWitt, of Mountain Lake Park, is visiting relatives here.

Levi May has just completed a large barn; likewise Ezra H. Wolfe.

Miss Teresa Mattingly is home from Oakland on a visit.

We had a heavy frost in some parts of the Pineswamps a week or two ago, but it did not do any serious damage.

I have been informed that two young women were bitten by a rattlesnake near Nichola's mill about two weeks since, but did not learn the particulars nor can I vouch for the truth of the story. R. R.

A New Cleveland Badge.

The Toledo *Blade* of last Friday says: A note to a private letter from Wheeling, W. Va., to a Toledo citizen is too good to keep. It is as follows:

"We are in the midst of a Democratic boom—the mills shut down, and almost everybody is wearing the new Cleveland badge. Have you seen one? It is a patch on the seat of your breeches. They are becoming very common in our city."

Words of Wisdom.

The heart has always the pardoning power.

Presumption is our natural and original disease.

The greatest of faults is to be conscious of none.

Break through this pretense of existence; determine what you will be and be it.

What is joy? To count your money and know that it does not belong to creditors.

Compliments of congratulation are always kindly taken, and costs nothing but pen, ink and paper.

When we are alone we have our thoughts to watch—in our families our tempers, and in society our tongues.

Nature is upheld by antagonism. Passions, resistance, danger are educators. We acquire the strength we have overcome.

John Rosenmeyer, a well-to-do faamer, residing near Weisburg, Ind., who was suffering with delirium tremens, and who imagined he was pursued by devils and hissing serpents, last Friday drove his family from the house and then piled the bedding and furniture in heaps upon the floor and set fire to them. Then, armed with a gun, he placed a chair upon a table in the centre of the room, and amid the blazing fire, sat upon his elevated seat bidding defiance to the imaginary demons, until the flames had entirely surrounded him and he toppled off into the fire, from which he was pulled by a crowd of neighbors, with both his eyes burned out, the hair and beard singed from his face and head, and his clothing entirely burned off. The house with all its contents was destroyed, causing a loss of $3,000. Rosenmeyer lingered in terrible agony until Monday, when he died.

—Persons indebted to us on subscription account will bring or send the amount during Court, "and don't you forget it."

NEW ADVERTISEMENTS.

THE OLD-FASHIONED HOUSE.

Of all the tender and comfortable things
That now and then sweet memory brings,
There's nothing dearer that love recalls,
Than the old-fashioned house with its white-washed walls.

Not a mansion to-day, though a marvel of art,
Can ever usurp its place in my heart;
For there my earliest prayers were said,
And I slept at night in a trundle bed,

'Neath coverlids reaching from feet to chin,
By a mother's hand tucked gently in,
And a good-night kiss on my tired brow—
O, earth holds no such blessing now!

The garden was fragrant in flower-beds
Where marigolds lifted their velvet heads,
And warmed by sunshine, refreshed by dew,
The bachelor-button and touch-me-not grew.

In the river that curved like a shepherd's crook,
We fished for minnows with bent pin hook,
Or with little bare feet oft waded through,
And bravely paddled our own canoe.

'Twas a home of welcome no one could doubt,
Whose latch-string hung invitingly out;
And many a stranger supped at its board
While blazing logs in the chimney roared.

O, this is an age of reform and change!
And things æsthetic, modern and strange—
Improvements that savor of silver and gold—
Are superseding the cherished and old.

But I turn from palaces built for show
With Mansard roofs and stories below
Of frescoed, kalsomined, dadoed halls,
To the old-fashioned house with its white-washed walls.

—*Boston Budget.*

BLEEDING HEARTS.

Kate's Novel—A Romance in One Act and Two Scenes.

Two girls burst into the library of E—— Seminary, and, finding it apparently empty, the elder began: "I just hate her, so there! Spiteful old thing! She's just jealous of us girls. Never wants us to have a bit of fun. Never had a beau in her life, I know, except old Dr. Stone, and he's deaf as a post, has buried three wives already, and only wants her for a nurse and governess for his ten brats, half of 'em twins, I do believe! She's too sharp for that, though. Catch her! Wants one of the Professors over at the college; that's why she's so cross about our running off with the juniors night before last for a sleigh-ride. Think's she'll please President Foster, and all that. Never mind, Cad! Brother Will said he'd come over to-night, and when he pulls a string tied to a nail that ticks on my window, I'll slip out and smuggle him in under my water-proof. We'll fix a nice place in the closet to hide him if any one comes, and we'll just have the jolliest times! He'll bring a can of oysters, and we'll eat 'em raw with pickles and crackers. You hide some salt and pepper in your apron pocket at supper; and we've a dipper, and a tin cup, and a vase that'll do for soup dishes. So we'll laugh in our sleeves at the old snap-dragon, and she can't help herself—now, Cad, don't cry. If there's anything I *hate* it's a cry-baby. Just as if girls at boarding-school hadn't had just such times over and over again, and actually lived through them before our day. For *my* part, I told Uncle Tom if he sent me back here I'd do just as I pleased, and they might send me home in disgrace as often as the fit was on. *I'm* going to have a good time. I've a postoffice under a flat stone in the corner of the grounds, and I get lots of letters from the boys up at the Commercial. Last Christmas, when you and the Old Cat were off for the holidays, I played sick so as not to go to service. Then I rolled up some blankets, dressed them in my wrapper, laid them in the bed, and paid Nora a dollar to pretend every time any one asked for me that I was asleep and must not be disturbed. Then I slipped out and went off with Brother Will to Excelsior after the gayest horse in a bit of cutter that fairly flew. We went to the hotel, and asked all over town for a minister, just to make believe we had run away to be married. Why I should die in this poky old sem if Will didn't know all the boys and help me out." Thus the wild girl rattled on until her companion's eyes were fairly dried and laughing again. But the teacher, who sat in the curtained recess of a deep window, an unwilling listener to this daring recital, grew gradually more grave and serious, and when the bold, confident voice rang out with:

"Of course, she was never in love as you and Will are. What does she know about love? Why Will would just die for you. He fairly worships your very shoe-bottoms, and all that sort of thing. He would wither right away and go into a decline if you refused to see him. It would kill him, I know it would. He is so affectionate and so sensitive! But she makes you think it's wicked to be in love, to love deeply and truly and to the bitter end. But I know better!"

As these words fell upon the listener's ear the hands passed up before the eyes, merely resting lightly at first upon the level brows, then gradually pressing more and more closely upon the tight-shut lids, while one by one the tears stole down and fell upon the soft, gray fabric of the teacher's dress. She thought of one she knew so long ago, of the love-story she had lived, and scarcely knew, until it had vanished in the morning of her life, and left her pale, forlorn and lonely, a stranded wreck upon the shore of time. It had indeed been a sorry task to pick up the beaten remnants of what once had been a gallant craft and hoist sail upon a henceforth trackless sea. To-day was an anniversary. She remembered and she kept it. Without it was snowing wildly, and the bare boughs of the trees chafed angrily against each other, sometimes rocking in the mad blast until they tapped with icy fingers against the window-panes. She had been chiding these two girls, and justly, for letting themselves out of a window with two sheets, and joining a pair of boys from a neighboring college in a midnight sleighride; said boys having borrowed Deacon Potter's horses and sleigh, without permission—"Just to show the old fellow what we *can* do," said saucy Will Carney. But, although it was not mentioned, the lecture was less severe and the teacher's opinion of the girls' escapade was very, very different indeed from the fact that the party had kept together and that two of the quartet were brother and sister.

Indeed Kate Carney, the defiant school-girl had been sent home so often that the faculty had seriously debated the necessity of refusing her readmission in November after her suspension in October, but Miss Chesterfield had stoutly pleaded for her. She had argued thus: "The girl has no mother. Turned loose to hotel-life, I should feel personally responsible if harm came to her just now. She is warm-hearted, trustful and without a thought of evil. It might be much worse. Try her once more, and let me take all the care and responsibility. Tell her guardian this. I may not succeed; but, with your permission, I will try.

So Kate had returned, and as a punishment for her transgressions her uncle Tom had kept her at the institution during the Christmas holidays. Miss Chesterfield's vigilance had been so far rewarded. Only these two flagrant breaches of discipline had occurred: Once during the Christmas holidays, when Miss Chesterfield was away, and the other the moonlight sleighride, both the result of harmless high spirits. These had only compromised herself and her room-mate, whereas, during her first two years at the seminary she had not only been in constant trouble herself, but on each occasion managed to draw in with her from six to a dozen companions and as many college lads.

As the teacher sat there in the window, the tears trickling through her fingers, she did not hear the door close after Caroline as she tripped lightly out. She forgot that it was cold; forgot that it was winter; forgot the necessity for present action, and seemed to be sitting for that last time on the door-steps at home in his favorite rose-tinted dress, with the soft, white cashmere wrap lying across her shoulders, her golden hair pressed smoothly down upon her cheek and gathered up in shining braids behind, after the fashion of the day, a fashion that her dear, dead mother's hand knew so well how to adjust. Another sat beside her, and into his dark eyes she dared not look. They had been very silent. And then he raised with tender touch the spray of "bleeding hearts" she had fastened at her throat, and said: "The Indians wear the scalps of their victims fastened to their belts; you carry the hearts of yours slung at your breast-pin." Next he rose, laid a reverent hand upon her shining head (it *did* shine then) and said: "Farewell!" adding, "Ruth, you have never kissed me. Will you kiss me now just one good-by?" She had kissed him and watched him down the path in the soft May moonlight, a little shivering sigh of the breezes running through the tops of the evergreens. Then she ran up-stairs, and cried, and rocked herself to and fro, and she had prayed to see her way more clearly—had *agonized* in prayer—had risen and stumbled blindly on just the same as if she had never prayed at all. And they had never met again, and never would. And all the sweet old songs he loved were out of fashion long ago—dear "Bonnie Doon" and beautiful "Lorena." She felt just now as if her heart must break, and one quick sob escaped her before she quite remembered where she was. Dropping her hands, she looked up to find Kate Carney's astonished eyes regarding her in blank dismay.

"Miss Chesterfield, what is it? Are you crying for what I said? O, Miss Chesterfield, forgive me! I didn't know; I was so angry! Don't cry, Miss Chesterfield, and I won't let Will come in to-night, nor ever. I'll be good as long as I possibly can, if you only won't cry." For the teacher's hands again covered her face, and her frame quivered with the overflow of emotion. Making an effort, Miss Chesterfield soon raised her head, and, taking Kate's hand between both her own, she said, with a faint smile, "I can not talk to you to-day. I will some time, and soon. No, don't let Will in to-night. But you and Caroline and Fanny come to my room, and we'll persuade Mrs. Dolittle to let us pull some candy in the kitchen. It is just the weather for a candy-pull." Kissing Kate's glowing cheek, she passed out and to her own room, where to welcome her a silver-throated canary trilled out, "Tell it—tell it—tell it—why-y-y-y don't you tell it!"

And she *did* tell it.

For several days Miss Chesterfield was confined to her room. She had taken cold sitting in the window, and it had never affected her so strangely before. When perfectly still she was comfortable, but when she raised her head, quick, sharp pains darted about her brows and eyes, and the well-known room spun vaguely out into space. As she had always declared, Kate Carney had a tender, affectionate heart, and, feeling herself partially responsible for the teacher's indisposition, she was indefatigable in her attentions, studying at the bedside, and attending to her slightest wishes very gently and quietly. Now, Dr. Parker had allowed her to sit up a little while yesterday, to be dressed to-day, and next she might, he promised, hear some of her classes in her room. Kate Carney had come up from her last recitation, and Miss Chesterfield had urged her to take exercise in the bright, clear January air; but Kate begged so piteously to remain that the teacher reluctantly consented.

"Now, Miss Chesterfield," began Kate, with a little half air of defiance, "you said on that Saturday that you would talk to me some other time about the dreadful things I said to Caroline and which you happened to hear. If you are strong enough I wish you'd do it to-day. I don't want to have it hanging over my head like somebody's sword Uncle Tom talks about."

The little bird perked its head on one side and twittered at Miss Chesterfield: "Tell it—tell it—tell it—why-y-y-y don't you tell it!"

"Yes, I will," she answered to both, bidding Kate draw her chair closer, and, calling her attention to a very quaint picture of an old-fashioned girl in an ambrotype case on the book-shelf, she continued: "Kate, you and I are friends, I know, and you must not any longer think that I cried that day because you called me a few foolish names. One who has taught fifteen or twenty years does not expect to please everybody. Certain restraints we must place about our pupils for their own good and the mutual benefit of their associates. But I must not tire myself by philosophizing to begin with. I am going to tell you a love-story."

"A *love-story!*" O, Miss Chesterfield! Is it real? Did you know it?"

"Yes, I knew it, for I was in it. After I have told you, you must not speak of it again. It is just yours and mine to know. I don't know why I tell you. Partly because you saw me so undignified as to cry that day, and you know (smiling) you *hate* a cry-baby!' But I can not tell you all the *'becauses,'* for I do not know them myself. Kate, I want you to believe in me; to believe me human like yourself; to know that I sympathize with you in your joys and sorrows, and would not deny you any pleasure it were good for you to have. When I looked like that picture I met my hero. As I remember him he was tall and slight, with large, dark eyes, black, waving hair, and very pale. He was then a student, and an industrious one. He was my brother's friend, and he was so often at the house informally that we never thought of love. Books and study we mutually adored, and both of us graduated twice with all the joy of conquered studies and friendly interest in each other. And, dear child, for three years (the brightest I have ever known) we were daily together and engaged more or less in the same pursuits. What could be expected? We were happiest when together, and that was all we ever acknowledged, even to ourselves."

Then the teacher told her story. There came, first, the separation of distance; next, misunderstanding and alienation; the longing of each for reconciliation; the pride that rebelled against advances, followed by her engagement to another. Then, by accident, the removal of the barriers that estranged them, and neither had been to blame. How he entreated her to be true to him! Then came the deciding voice—her mother's! For some reason the change had gratified her; and now the prospect of a return to the first love pained her inexpressibly. Distressed and bewildered, but obedient and dutiful, after long deliberation, she refused and gave to hope and love an eternal farewell. But that had not been all. He had gone she knew not where.

"But wherever he went, dear Kate, my heart went with him, and my heart is his to-day."

Kate's eyes were filled with tears, as she softly patted on the pillow, and asked:

"But the other one! What became of him?"

"O, his had been a heart *caught in the rebound;* he had quarreled with another. He returned to her."

"And left you? How mean! how shameful! After all——"

"No, no! Kate, he was right. Our marriage would have been a bitter, hollow mockery. I am happier as it is, and I believe that Charles Chapin is true to me to-day somewhere, if he yet lives. Listen, Kate! After all these years (and it was long ago) I cried that day over all this, and not at anything you said. I am tired now. If you'll draw the blind to shade my eyes, you may take down that book of poems and look at the scanty relics of my past. I have nothing else left of my story—only the sword of Damocles has fallen, and I have said it all."

Kate did as requested. The book was a volume of Jean Ingelow's, and between the leaves that held the lines of that matchless poem, "Divided," were pressed a love-letter yellow with age, a leaf from a lemon-tree, a spray of "bleeding-hearts," and a fragment of an envelope on which was written in a manly hand, "Amo: in hoc spes mea;" also, finely-written in Miss Chesterfield's most careful penmanship, these stanzas:

ONLY A NAME.

A name, a name, and that was all!
Out of the skies it seemed to fall—
A whispered name I used to know
In dreamy days long years ago.
Only a name, but such a glow
Of old emotions touched me so;
It caused a blush of youth to start
Quick from the pulses of the heart,
It filled my soul with sad regret,
My eyes with sudden tears were wet.
Out of the past two starry eyes
Seemed fixed on mine in swift surprise.
The lips were mute. A face divine
Flashed with the thought that answered mine.
From out a dim, vague sense of pain,
An olden romance bloomed again.
A hand touched mine. A ghostly crew
Of dear, dead memories rushed to view;
A boat went drifting with the tide;
Two in the boat sit side by side
In gay content; some songs were sung;
Much nonsense said; and both were young:
Two heads, one black and one of brown,
Above the self same book bent down
To read some love-tale of renown;
Some rare nooks in the woods they knew;
The stars named in the vaulted blue.
A long, long year estranged, ah, me!
Then finds—*more* to ever be.
Only a name! It thrilled me thro'
With a strong sense of something true,
Mine and *not* mine forever more!
Vainly I search, weep and implore.
I see my daily duty here;
No time for idle wish or tear.
Rise to the present. Live to-day,
Turn life's romances all away;
But chide myself as well I may,
I can not chase the charm away.
One wistful vision of the Past
Will Love's illusions o'er me cast.

Kate Carney hummed a little love-song softly to herself—and it was a happy little one—as she lit the night-lamp and arranged the table at the teacher's bedside that night. Then she stood a moment twisting a bit of fringe in her nervous fingers before she leaned down, half shy, half ashamed, and kissed Miss Chesterfield's thin and faded cheek.

If she wrote to Uncle Tom more frequently than usual the next few months, and if she took unusual interest in his bachelor *chums*—especially one silent specimen who before now had always bored her—"he seemed so superior to smiles"—if she did all this, *with malice prepense*, she deliberately plotted her mischief that very night. Uncle Tom didn't show *me* his letters; but when the holidays approached, the summer vacation. I happen to know that this little missive was flung triumphantly into the E—— letter-box by the careless little hand that in an agony of impatience neglected to date it or to add that usual cap-sheaf to a feminine letter—the post-script:

DEAR UNCLE TOM: Please come to commencement, and bring that dear, delightful Mr. Chapin with you. If some of the girls can't capture him perhaps some of the teachers can. And after I graduate next year I want to write a love-story, a real love-story. My plot is all laid, and now I want Mr. Chapin to come on here and marry somebody, so that I can perfect it by one study from real life. Mr. Chapin is just the one I want, for you say he is so indifferent to the ladies. It would be so delicious to see how he would act if somebody succeeded in charming him. Any of the boys can gush. My hero must not gush. Don't tell him I said it, now, Uncle Tom. I really don't want him myself—he's too old and grizzly. But he's awful nice—you said so yourself—nice enough for anybody. You will know best how to manage it. I've been good since January, and all the college boys, Will says, are inconsolable. I claim this as my reward. Yours, affectionatenately, KATE CARNEY.

Well, Uncle Tom managed it. How, I'm not going to tell; it is too long. But certainly not to help his ward's match-making proclivities.

It was the evening before graduation. The beautiful grove around the E—— Seminary was all a-flutter with the light draperies of the girls whose examinations were over, and who awaited the closing exercises before returning to their distant homes. Many guests were there besides, and the bright, clear northern skies looked down with propitious smiles upon the little city. As Miss Chesterfield, for the last time that summer, gave a well-thumbed copy of Virgil a little shove into its place on the book-shelf she saw, without interest, two strangers, tall and military, pace up the building, ring, and pass leisurely in.

Captain Carney was perfectly nonchalant under the artillery of the bright eyes that regarded them. But Mr. Chapin, looking slightly annoyed, turned neither to the right nor to the left, and, as they entered the parlors after sending up their cards, twisting his iron-gray mustache in an absent way, he remarked:

"Captain, there is something painfully suggestive of other days to me in all this flutter and bustle of commencement. They touch me sadly. The odor of the roses, the mignonette, the syringas, and the abundance of these 'bleeding-hearts' almost suffocate me. I always feel as if a funeral procession of dead hopes, with none left living to mourn them, were passing before me, and each broken heart had flung a flower on the coffins."

"Quite poetical, almost tragic——" began Captain Carney, but Kate sprang in all glowing with breathless anticipation, and, poising on tip-toe to kiss Uncle Tom, and decorously greeting that "awfully nice" Mr. Chapin, she said: "This is the public parlor. Won't you come into No. 7 where we can be quite alone? I want to bring down to you now, *right now*, my dearest teacher, who has made me behave so well. You go so soon to-morrow. She won't talk cats, Mr. Chapin, if she is an old maid." And she hurried them off into a quiet, obscure little nook in one corner of the building.

Miss Chesterfield stood at the book-shelf, her hand resting on the Virgil, and her face turned dreamily toward the window, when Kate rushed in and surprised her with a shower of caresses, mingled with frantic declarations of "Uncle Tom's here! Come, come! Down in No. 7!" and carried her off by force of arms, pausing long enough in the hall to catch up from a table a spray of "bleeding hearts" and fasten in Miss Chesterfield's breast-pin, in spite of that lady's faint protest.

"Not that, dear Kate; anything but that."

"O, yes! For I want Uncle Tom to know you have captured some hearts, if yours and theirs are bleeding."

"Tell it, tell it—tell it, why-y-y-y not tell it," chirped the canary at the window. The door of No. 7 was flung grandly open. Miss Chesterfield's name was announced to Mr. Chapin. Kate sprang to her uncle's side. The two faced each other, stunned, bewildered. He stood for an instant painfully erect and motionless. He did not speak her name, only: "My love!" and, as in a dream, and took both her trembling hands in his and pressed them hard against his bosom.

And she! After the first swift glance up to those lustrous eyes, upon that face so changed and still the same, she felt as if the film of lace about her throat began to choke her; then as if a great black chasm opened out between them, and, clinging to each other, the Fates had flung them headlong down the fathomless abyss. But at the open window he fanned her back from fainting into a wan and plaintive consciousness, while Kate danced wildly about Uncle Tom, rapturously exclaiming:

"My novel, Uncle Tom! My novel! O, don't you see? I've finished it, my novel!" And, after much explaining, he *did* see.—*Chicago Tribune.*

A Valuable Antidote.

Already an antidote has been discovered to the sting of scorpions, which although rarely fatal, are extremely painful, and the poison is closely allied to that of the venomous snakes. Mr. A. M. Markham, of the Indian Civil Service, has written to one of the Indian papers calling attention to the fact that the root of *Achyranthes aspera*, known popularly as *chirchirra*, affords almost instantaneous relief from the pain caused by the sting of a scorpion. The plant is very common everywhere in India, and is one of those whose clinging burrs are such a nuisance on one's legs when out shooting. The root, macerated in water, is applied to the part stung, and a small quantity is drank in water. If this be done quickly, there is absolutely no pain half an hour or so after the sting, instead of the twelve or twenty-four hours of intense suffering which follow an untreated sting. Three cases occurred recently in Mr. Markham's camp, in which the sufferers, thanks to *chirchirra*, and the presence of a khitmutgar who knew how to apply it, were going about their work within an hour in each case, feeling nothing more than numbness in the part stung. Whether this remedy would be equally efficacious against snake bites is doubtful; but after such striking proof of its efficacy against the venom of scorpions, the matter is assuredly worth investigation. It may be that the *Achyrenthes aspera* is the antidote used by snake charmers.—*London Standard.*

—A snake twenty-five feet long, four feet in circumference, and bearing eighty-nine rattles, was killed on Boston Common recently, after a desperate fight. When killed, it was placed on scales and found to weigh a trifle over twenty-two tons. [N. B. We are tired of a base dependence on Southern exchanges for snake stories.]—*Boston Transcript.*

IT WAS ONLY BLACK SAND.

Thrilling Experience of a Captain on the Erie Canal.

A New England skipper, a shipping clerk and the Captain of a canal-boat sat on the lee rail of a codfish schooner and discussed the decline of the American marine. The clerk was wise in fine points of law, the skipper was filled to overflowing with wrath against the land-sharks at Washington, and the Captain assented with cheerful readiness to the most conflicting of opinions. The clerk wanted to reform Congress by congressional legislation, the skipper was on the point of blowing up the Capitol with dynamite, and the Captain coincided with both opinions by remarking that either remedy, if successfully carried into effect, would produce astonishing results. Still, he ventured to suggest, it would be a measure of precaution to use gunpowder instead of dynamite, as gun-powder in even the shot-gun of the South was more deadly than all the dynamite in the British isles.

"But it's so dangerous to handle," said the skipper.

"How so?" inquired the clerk, who had handled uncounted tons of explosives.

"You never can tell it from black sand."

There was silence for several minutes. Then the Captain spoke.

"Is black sand particularly dangerous?" he asked.

"Mighty dangerous."

"How so?" asked the clerk, with a tinge of humiliation for his ignorance.

"When you're down on the Chinese coast, and you load up your guns with black sand in mistake for powder to repel an attack by pirates, you're always sure to be murdered, because the black sand will not go off.

"Won't it?" asked the Captain, in a tone that implied that it would.

"I never heard," said the skipper. The clerk was dumb through newly-found ignorance.

"You see that scar," said the Captain, pointing to a red ridge across his cheek.

"Well, give us the story," urged the skipper.

"It was years ago," began the Captain; I was running a fast packet line on the Erie canal from Albany to Buffalo. I had a beautiful boat and four fast horses every few miles. We carried the mail and always had a big load of passengers. One trip we took on board a lot of small barrels labeled 'black sand.' One of the barrels was accidentally broken open, the cover lost, and a quart or so of the 'black sand' scattered about the hold. The barrel was set out of the way near the wine cask, and apparently was forgotten. At dinner time some more wine was wanted by some of the passengers, and I went down to draw it from the cask. As the hold was dark I took a broken piece of candle for a light. Scarcely knowing what I did I stuck the candle upright in the 'black sand,' and sat down on the floor to draw the wine. I had been up all night and was very tired, and some how or other I fell asleep. I must have shut off the faucet while asleep, for when I awoke the wine pitcher was filled and the faucet closed. As I reached out my hand to take up the candle I saw a sight that froze my blood with horror. While I had slept the candle had burned low and was on the point of flickering out. In another instant the flame would reach the powder—for of course it was powder, and no black sand—and blow boat, crew, and passengers to atoms. I died a thousand deaths in an instant. I was paralyzed with fear, and could only wait with staring eyes for the end. Death was already at my throat. The sound of laughter in the cabin came strangely to my ears. They were feasting in the face of a terrible death. At last the end came; the light flickered for a moment, flared up for the last time, and then——"

"And then?" whispered the skipper and the clerk with breathless interest.

"And then went out. As it was nothing but black sand for molders' use, nothing occurred beyond the upsetting of the pitcher of wine as I fell forward in a faint."

"But the scar?" asked the clerk.

"Kicked by a mule; usual way with canal men."—*N. Y. Times.*

POOR PAUL.

The Sea and the Grave Have Made Him Friendless.

You may see just such a group any day as you pass a building in course of erection—six or eight stolid-faced Polacks sitting or lying on the grass, after their frugal noonday lunch, sometimes chatting together, sometimes glum and taciturn, as if brooding over their personal wrongs.

Such a group was observed about a new building up Woodward avenue the other day. There was seemingly no companionship. Each man ate his lunch by himself, as if he begrudged his company to his fellow workman, and one would have said that the workmen were strangers and men of suspicious natures.

By and by, as one stretched out on the grass under a shade tree to doze his remaining half hour away, a parcel fell from his pocket. One of the others carefully reached over and secured it, and for the first time the group exhibited companionship and geniality. Here was an opportunity to play a joke. The parcel was softly unwrapped, the men gathered closer, and in a minute a poor, faded and battered tin-type was exposed to view. It was that of a boy about four years old. The smile died from every face in a moment, and one of the men raised a finger and whispered:

"Hush! It is the picture of his child! His wife died on the voyage across the sea, and he landed with this child in his arms. Poor thing! It sickened and died a year ago, and he is now alone."

"Put it back!" whispered another. "It would make him sorrowful to know that we had handled it."

The picture was tenderly wrapped up and carefully inserted into the half-unconscious man's pocket, and the man who did it sadly shook his head and said:

"This is why he never laughs nor whistles. Poor Paul!"—*Detroit Free Press.*

SCHOOL AND CHURCH.

—Out of 358 teachers employed last year in Chester County, Pennsylvania, 327 were females.

—More than three millions of children have been gathered into schools for the study of the Scriptures, through the missionaries of the American Sunday-school Union.

—The average Sunday plate collections of Rev. Newman Hall's church in Westminster Bridge Road, London, is $175, and of Rev. C. H. Spurgeon's congregation, in the great Tabernacle, $345.

—The *Christian Intelligencer* dislikes the substitution of "signs" for "miracles" in the Revised New Testament. "Miracles," it says, "is a more pleasant word than signs, both to the tongue and the ear.

—A Mohammedan university nine hundred years older than Oxford is still flourishing at Cairo as in the days of Arabian conquests. It contains but one room, the floor is paved and the roof is supported by 400 columns.

—There are 397 institutions in the world for the education of deaf-mutes. Germany has ninety of these, France sixty-seven, Great Britain forty-six, and the United States thirty-eight. Recent careful estimates place the number of these unfortunates in existence at 800,000.—*Chicago Current.*

—According to their *Year Book* there has been rapid growth in the Reformed Episcopal Church during the past eight years. It has ten Bishops, 103 Presbyters and deacons, 7,943 communicants, prosperous Sunday-schools, and church property valued at $1,021,569.

—In the village of Slate Hill, Orange County, N. Y., is a Baptist Church which was built in 1783. It is very primitive in style, and in the gallery has a pew which was made exclusively for slaves belonging to members of the congregation, which once numbered five hundred. The church is a great curiosity now, and is visited by many strangers.—*N. Y. Tribune.*

—A curious incident occurred in the Parade Church, Shorncliffe, England, on a recent Sunday. It was found that the church was besieged by various kinds of birds, principally swallows. Every effort was made to dislodge them, but without effect, and at last some soldiers were obliged to fire a volley of blank cartridges, which completely routed them, and the church being soon vacated, the service was held.

—At Cambridge, says the London *Truth*, the girl undergraduates have been decidedly "coming on." In last year's Mathematical Tripos they had no wranglers at all, and their best "man" was only equal to the forty-fourth on the list. This year they have two wranglers, one coming between the twenty-fourth and the twenty-fifth on the list, the other being equal to the thirty-fourth.

—The people of Trinity Parish, Buffalo, N. Y., moved into their new church the other day, and Bishop Coxe held a "service of secularization" in the old church, declaring it "secular and unconsecrated, and no longer within our jurisdiction, but given back solely to the protection of the laws of the land, and to none other than such common uses and control as by said laws are recognized and allowed."—*Buffalo Express.*

PUNGENT PARAGRAPHS.

—You must not expect to catch a big fish by simply dropping your tackle into the water and pulling it up again. You have to offer genuine inducements that will impress the fish as to your good faith—sort of worm yourself into his confidence, as it were, so to speak.—*Lowell (Mass.) Citizen.*

—Woman, God bless her bright eyes can make roses bloom in the desert, and when so minded she can give to the most commonplace affairs of life rather much of a rainbow look; but to save her eyebrows she can't use a pen without getting ink on her fingers any more than she can remember the day of the month.—*Yonkers Statesman.*

—A dispatch from Keene, N. H., in speaking of the killing of an elephant at that place, says: "The huge beast fell with a dull thud, without a noise or a struggle." We are glad we understand what a dull thud really is. We have heretofore been led to suppose it sounded like a fat man sitting down on a banana peel.—*N. Y. Graphic.*

—When the young man, after four years' of hard training, graduates from college with tremendous biceps and a phenomenal chest, and enters a single scull race on the Harlem River, and is wiped out by a horny-handed son of toil, who never heard of Cicero or Tiberius, or Horace's "Ars Rowetica," then is the time he wants to know why he has labored all these weary, weary years.—*N. Y. Sun.*

—The disposition of children not to allow other children to get ahead of them is once more illustrated in two families as follows: "I've got a silver dollar." "I've got two." "You haven't got a baby in your house." "Yes we have; we've got twins." "Well, you haven't got a crazy grandfather; I have."—*Boston Herald.*

—"I never did take much stock in that story about fish being such fine brain food," inadvertently remarked Smith, "and I take less stock in it than ever now that I've lived off little else for some time past. I think I'll quit them." "I wouldn't if I were you, old boy," feelingly remarked Smithers; "you see the fish in order to improve the brain must have something to work upon. They can't create the thing." And then Smith said that Smithers talked for all the world like his wife.—*Oil City (Pa.) Blizzard.*

—"Cud ye' help me er little dis mawnin', boss?" inquired a limping old darky. "I'se de erigernal Uncle Tom in Mistah Hennery Wa'd Beechah's story, entitled 'Dat Dittle Ole Log Cabin in de Lane.' My name is Harris, sah, Geo'ge Harris. I's tryin' to raise money enough to git obber to Brooklyn." "No," smiled the gentleman importuned, "I don't believe I can do anything for you to-day, Uncle Tom." "Has yo' nebber read dat book menshuned, sah?" "No, I never did." "Den yer eddicashun hab ben sadly neglected, boss. I tuks yer fo' er gemmen of eddicashun, 'deed I did."—*Chicago Tribune.*

FOR OUR YOUNG FOLKS.

GETTING THE VICTORY.

How the Persistent "I Will" Overcame the Giant "Can't."

Sammie Gay was bright, generous, but very quick tempered. His father and mother had tried faithfully to point out the foolishness and danger of yielding constantly to so dangerous a foe. Frequent punishment had followed paternal counsel, but still Sammie yielded far too often to the tyrant temper, which proved after all a hard master to the kind-hearted boy.

When there was to be a festival at the Broad Street Church, and Sammie begged leave to go, his mother said, yes, he could go, and have fifteen cents to spend if in the intervening two days he would not yield once to any improper show of temper, not that it was any part of her plan to hire Sammie to do right, but the wise mother knew that once in awhile some tempting incentive would go a great ways towards stimulating a boy to real effort in the right direction. But the mother was made both glad and sorry, when, on the afternoon of the festive day, poor Sammie declared with a burst of tears that he couldn't go, because he got "awful mad" that morning and called Tommy Ting "a hateful, dirty spider," because he crawled softly up behind him and scared him half out of his wits.

Mrs. Gay was glad that if Sammie was quick-tempered he was not a coward, but dared to tell the truth, although it cost him considerable in the way of fun and pleasure. And she did not forget nor neglect to commend the boy for his truthfulness, for the affair happened in the school-yard and could easily have been concealed had Sammie had less courage and conscience than distinguished him. So that evening, when the time for the festival came, Mrs. Gay invited Sammie to take a little walk with her, and during the pleasant stroll she showed how a hasty temper betrayed any one into all kinds of sin and folly.

Then she spoke in her calm, kind way of the improper language he had used in calling Tommy Ting the names he did, language no little gentleman would soil his lips by using. "Now, my child," she added, cheerily, "I've heard of an excellent plan for preventing one's self from saying hasty words and making improper speeches; whenever you feel the least angry, stop and count ten before allowing yourself to speak one word."

Sammie thought this a splendid idea, and declared his belief that he could kill his unfortunate temper in that way without doubt. He would try it the very next day.

And so he did, poor child, for when Nick Neal, the bad boy of the school, taunted him with having failed in spelling, he answered never a word, but just began counting ten with all his might; but when Nick called out in his most provoking tone: "Ah, so the little parson hasn't the courage to say a word!" up went Sammie's hand in quick revenge, and he had to remain in from recess in the afternoon for striking another boy.

No wonder poor Sammie cried that night, and told his sympathizing mother it was no use, he could not conquer his temper, it was bound to overcome him every time.

After Sammie was in bed and settling himself "to think over things," his mother came into his room with a book in her hand; and with ready delight he knew that meant a story before going to sleep. And it was a wonderful story, all about a boy who won an astonishing victory in making "I can't" yield to "I will."

The hero was not a very strong child, and every difficult task of duty made him shrink back and say: "I can't;" but one night he dreamed a great giant by the name of "I will" came and conquered the feeble, but persistent, "I can't," until it was driven away forever. But the great Captain, under whose leadership the victory was accomplished, was named "Perseverance;" for "I will" did not come off conqueror at once. There were several long battles, first; but the boy dreamed that "I will" was not to be put down, and when finally "I can't" was really driven away he never came back again.

Sammie thought this a splendid story, as indeed it was; and his mother noticed how his eyes flashed, and what a look of strong purpose and resolve came over his face as he listened to the well-told truthful story.

The next night, when bed-time came, Sammie looked so happy his mother said she knew he had something good to tell her; and he laughed, and said 'twas a long story; but he thought for all that she would like to hear it; and as his mother certainly did want to hear all about it, he began:

"Well, all the way to school this morning I kept thinking of 'I can't' and 'I will,' and I says to myself: I *will* make this old temper of mine give in; yesterday I thought: Oh! I can't, I can't; but now I will, and, first thing while I was thinking these thoughts, some one jumped at me and screached 'boo!' as loud as he could, and there was that bothersome Nick Neal again, and my first thought was: I can't keep my temper, but quick as a flash I says: I will! so I just laughed and says: 'Well, that was pretty well done, Nick, 'spose you try it again.' Well, he plagued me all the way to school, and that 'can't' and 'will' kept up a battle all the whole way, but 'will' came out victorious."

"Well done," says mother, "I'm glad to hear that."

"But the best of it," continued Sammie, "was when recess came, Nick wanted to borrow a knife and none of the fellows would lend him one, his hands were dirty and he looked so mean. I had another battle with 'can't' and 'will,' but up I marched and handed Nick my knife. And if you'll believe it, Mother Gay, Nick used it as careful as could be, and when he brought it back says very like a gentleman: 'Thank you, Sam. I won't bother you no more, nor won't let any the other fellows neither.'"

"But after recess I failed in geography after I'd spent an hour studying and thought I knew my lesson perfectly. Oh, how I wanted to scuff my feet; but then came another battle with 'can't' and 'will,' and I got the better of my temper again.

"This afternoon while we were playing ball, Tommy Ting let the ball fly right at my face, and give me the biggest blow; my, how it hurt! I ached to hit Tom back, and 'twas the worst battle I've had to-day; temper kept saying: 'I can't restrain myself,' then the good giant would say: 'I will;' and so I said: 'Please try not do that again, Tommy,' and he actually wanted me to take a cent his father gave him to spend, but course I wouldn't."

"I had one battle more when cook wouldn't give me a biscuit after school; but it came easy that time, and I kinder imagine if I keep right on fighting, by and by I won't have so much trouble with this temper of mine."

The tears were in his mother's eyes when Sammie finished his story, and that night she read the story of "I can't" and "I will" to him again, to impress it on his mind: and now Sammie says he is an out and out warrior, for he has to fight battles every day. But he also says it is constantly becoming easier to conquer his temper, because "I can't" is getting tired of having to give up to "I will;" then others see what an effort he is making to keep down his hot temper and help him all they can.

Sammie will conquer at last, and so will every dear child who makes up his mind in earnest to listen to the good voice of valiant "I will," and crush out the foolish voice of "I can't." One is small but persistent, the other a giant, but the boys must never forget that many a giant ever since the days of Goliath of old has been slain by what after all is no stronger than a sling and a stone, so he must make a strong fight on the part of the good giant "I will!"
—*Harriet A. Cheever, in Golden Rule.*

SUSIE'S BRAVERY.

How She Saved Her Brother's Life by Her Presence of Mind.

One day Mrs. White was obliged to leave home in the morning and did not expect to return until the evening. She felt anxious about leaving her three children alone, but it really could not be helped. So she asked a kind old lady who lived next door to look in at the children two or three times through the day to see that no harm came to them.

The first time the old lady came in, Susie, who was twelve years old, was trying to put her two-year-old brother to sleep; while eight-year-old Jennie was amusing herself by tying short pieces of string to her kitten's tail and then watching her run round and round trying to catch it. "Well," said the lady, "I am glad to see that you are such good children, and I hope that you will avoid getting into mischief, at least till your mamma returns."

But no sooner had the lady left when Willie suddenly changed his mind about going to sleep. He sat up in Susie's lap and struggled to get on the floor.

Susie let him do as he wished, and he soon joined in Jennie's sport with the kitten.

Susie, thinking this the best time to do the sweeping, took up the broom, expecting to sweep the yard and pavement.

But suddenly she heard a loud scream, and upon reaching the room where she had left Jennie and Willie she almost fainted. For there upon the floor lay Willie, perfectly quiet, pale as death, and the blood flowing freely from a cut in the head.

Willie had only fallen from a chair, but in his fall had struck his head against some broken glass which was lying on the floor, which caused a severe cut in his head.

To say that Susie was alarmed would hardly express what she felt, and at first she did not know what to do. Her first thought was to call out one of the neighbors; her second was to run for the doctor. But, had Susie acted upon either of these thoughts, Willie would have been left alone with Jennie, who was so frightened that she could do nothing but cry and give an occasional scream.

Susie felt very much like doing the same, but she knew this would be worse than useless; so she ran quickly for a large piece of cloth, lifted Willie's head from the floor and bound up the cut tightly in order to stop the flow of blood.

She then laid him upon the bed, sent for the doctor, and began to bathe his hands and face with cold water, until Willie opened his eyes; but he seemed very weak.

When the doctor came he told Susie there was no danger, but that Willie was very weak from the loss of blood.

When Susie heard that Willie would not die, as she had feared, she felt so relieved and happy that she burst into tears. And when she told the doctor how it had all happened, he was amazed. "You are a brave little woman, Susie!" he exclaimed, "and you have saved your brother's life by your presence of mind. Had you left your brother on the floor bleeding and ran about wildly for assistance, as most girls of your age would have done, he might have died from the loss of blood. Few girls would have kept their usual common sense about them as you did. Even grown people do some very foolish things when they become frightened. I once knew a lady whose house took fire one day, and, being anxious to save some of her bed clothing, she began throwing it out of the window. In a few moments, however, she felt that it was time to leave the burning house, so she took up the baby in one arm and a few pillows in the other, expecting to throw the pillows out of the window and carry the baby down the stairs; but she had become so frightened and had lost her presence of mind completely, so when she reached the window she threw the baby out of it and carried the pillows down the stairs."

"O," cried Susie, when the doctor had finished, "was the baby killed?"

"No," said he; "it had fallen upon some of the bedding and was unhurt. But it taught the mother a lesson which she never forgot, nor did she ever lose her presence of mind again.

"But I must leave you now, Susie. Don't be anxious about your brother. I have bound his head properly, and all he needs now is perfect quiet. I will call again this evening and give your mother further directions." So he took up his hat and cane and left Susie to ponder over the importance of cultivating presence of mind.—*School and Home.*

FARM AND FIRESIDE.

—A little soda water will relieve sick headache caused by indigestion.—*Boston Budget.*

—Every good pasture must contain a luxuriant growth of tender and nutritive grasses, cool shade, and a permanent supply of pure water.

—If you wish to keep a sharp knife don't put it in hot grease; stir your potatoes or turn meat with a fork or an old case knife kept on purpose.

—Doughnuts: One cup sugar, one egg, one cup sweet milk, butter size of an egg, one teaspoon soda, two teaspoons cream tartar; flour to roll well.—*The Household.*

—Dried cherries and plums are very nice for pies or as sauce in winter. Stone them and half dry them, then pack them in jars with sugar strewn between the layers.—*N. Y. Examiner.*

—The transformations of nature are wonderful. Put a herring in a tin box with some cotton-seed oil and it immediately turns into a sardine.—*Philadelphia Call.*

—Cookies: One cup sugar, one-half cup butter, one-half cup sweet milk, one-half teaspoon soda dissolved in the milk, flour to roll well. Cut in squares quite thin. Brisk oven.—*Chicago Journal.*

—One ounce oil of lavender mixed with one quart of water or alcohol and sprinkled about a room will rid it of flies. One who knows, says that four applications at intervals will be sufficient to drive away a host.—*Indianapolis Journal.*

—To make orange "float" take one quart of water, the juice and pulp of two lemons, one coffee-cup of sugar. When boiling hot add four tablespoonfuls of corn-starch. Let it boil fifteen minutes, stirring all the time. When cold pour it over four or five oranges that have been sliced into a glass dish, and over the whole spread the beaten whites of three eggs, sweetened and flavored with vanilla.—*The Caterer.*

—*Hall's Journal of Health* says that half a teaspoonful of common table salt dissolved in a little cold water and drank will instantly relieve heart-burn or dyspepsia. If taken every morning before breakfast, increasing the quantity gradually to a teaspoonful of salt and a tumbler of water, it will, in a few days, cure any ordinary case of dyspepsia, if at the same time due attention is paid to the diet.

—A new way to make an apple pudding is to make a batter of flour, sweet milk and one egg, with baking powder, in proper proportion; pare and core six tart apples, stew them in a very little water until they are quite soft, then beat the apples into the batter. This is to be baked in a buttered earthen pie plate; it should be a deep plate; this is to be eaten with cream and sugar, or if is an impossibility use butter instead.—*Boston Globe.*

—Buttermilk Bread: Put two pounds best flour into a bowl, one teaspoonful of salt, two of baking powder, two of cream of tartar, mix well; then put one and a half teaspoonfuls baking soda into a cup, break all lumps, add a little buttermilk, blend; then fill up the cup, pour this on the flour, mix very well; add more buttermilk till it is moist enough; work it well, put it on the pasteboard and knead it, form into a ball, lay the hand flat on it, and press it into a round cake one inch thick, cut into four, bake in a rather quick oven; it will rise very much. About one pint of milk will be enough for above quantity of flour.—*Detroit Post.*

ORCHARDS.

Efforts That Should be Made to Remove Insect Pests.

It is important that arrangements should be made by the owners of orchards for the free run of sheep, swine, and poultry, for devouring the infested fruit which drops from the trees. There are three insects which need special attention, the codling moth, curculio, and apple maggot. Sheep will pick up and devour the infested and dropping specimens of apples, plums and pears, and swine will do the same, but they are not so vigilant. Hens pick up fallen plums early in the season while the fruit is small. Some persons erroneously assert that hens devour the insects alone, but these persons do not seem to reflect that hens can not reach up the tree-tops and get at the curculios while they are depositing their eggs, nor seize the larvæ as they are leaving the young fruit to enter the ground. The useful work of the poultry is, in devouring both the infested fruit and contained larvæ at one stroke. In addition to the jarring process, there is some reason to believe that Paris green may be successfully used for the curculio, either by acting on the young larvæ or in some other way. There is therefore no difficulty in meeting the curculio if proper means are used. With the codling moth there are two well proved remedies—spraying with Paris green, and devouring by sheep and swine. For the apple maggot, which comes later in the season, there appears as yet to be no remedy devised but beating off the infested fruit, for sheep and swine to gather.

These insects do not always confine themselves to the fruits which they are commonly supposed to specially attack. The apple and the pear are often ruined by the curculio. Prof. Maynard collected a large number of the young apples, which dropped from a tree with an abundant crop, when they were half an inch or more in diameter. Out of 200, it was found that all but three were punctured with the plum curculio, and not infested with the codling moth. It is well therefore to make provision to meet these destroyers with ample appliances; and the orchardist who raises fruit for market, or for home use, should have enough animals to take care of the depredators, as well as to aid in manuring the soil. Sheep sometimes attack the bark of young trees, and we have known swine to strip the stems; but the use of a repelling wash has held sheep in check, and a few twigs of sweet briar or osage orange bound around the trunk have kept swine at a respectful distance. If in addition to the above mentioned modes of protecting the crop, the use of poisons is added, there will be a reasonable certainty of having fair and handsome specimens.—*Country Gentleman.*

What Sporting Men Rely On.

When Lewis R. Redmond, the South Carolina moonshiner, cornered, after for eight years eluding the Government officials, was asked to surrender, he exclaimed:

"Never, to men who fire at my back!"

Before he was taken, five bullets had gone clear through him, but strange to relate, he got well, in the hands of a rude "backwoods nurse."

By the way, if Garfield had been in the hands of a backwoods nurse, he might have lived. A heap of volunteer testimony against the infallibility of the physicians has been accumulating of late, and people are encouraged to do their own doctoring more and more. It is cheaper and quite as certain.

Before Detective Curtin, of Buffalo, caught Tom Ballard he "covered" him with his revolver. Tom saw the point and tumbled!

Joe Goss was "covered" a few weeks ago and he tumbled, and so did Dan Mace. Death "fetched 'em" with that dreaded weapon—kidney disease. But they should have been lively and drawn first. They could easily have disarmed the monster had they covered him with that dead shot—Warner's safe cure, which, drawn promptly, always takes the prey. It is doubtless true that sporting men dread this enemy more than any mishap of their profession, and presumably this explains why they as a rule are so partial to that celebrated "dead shot."

Redmond was right. No man should surrender when attacked in the back. He should "draw," face about and proceed to the defence, for such attacks, so common among all classes, will fetch a man every time unless "covered" by that wonderfully successful "dead shot."—*Sportsman's News.*

"BEWARE of imitations," as the monkey said to the dude.—*Burlington Free Press.*

"Is there no balm in Gilead?
Is there no physician there?"

Thanks to Dr. Pierce, there is a *balm* in his "Golden Medical Discovery"—a "balm for every wound" to health, from colds, coughs, consumption, bronchitis, and all chronic, blood, lung and liver affections. Of druggists.

AMBITION is a vacuum that will never be filled.—*Washington Hatchet.*

"Fools Rush In, Where Angels Fear to Tread."

So impetuous youth is often given to folly and indiscretions; and, as a result, nervous, mental and organic debility follow, memory is impaired, self-confidence is lacking; at night bad dreams occur, premature old age seems setting in, ruin is in the track. In confidence, you can, and should write to Dr. R. V. Pierce, of Buffalo, N. Y., the author of a treatise for the benefit of that class of patients, and describe your symptoms and sufferings. He can cure you at your home, and will send you full particulars by mail.

BOSTON maidens love flowers. It is haughty-culture, you know.—*N. Y. Independent.*

Young Men, Read This.

THE VOLTAIC BELT CO., of Marshall, Mich., offer to send their celebrated ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES on trial for 30 days, to men (young or old) afflicted with nervous debility, loss of vitality and all kindred troubles. Also for rheumatism, neuralgia, paralysis, and many other diseases. Complete restoration to health, vigor, and manhood guaranteed. No risk incurred, as 30 days' trial is allowed. Write them at once for illustrated pamphlet, free.

A POETESS sighs: "I sit all alone, I sit by myself, I sit all alone." If she would stop writing she might have more company.

BEST French Brandy, Smart-Weed, Jamaica Ginger and Camphor Water, as combined in Dr. Pierce's Extract of Smart-Weed, is the best remedy for colic, diarrhœa, cholera morbus, dysentery or bloody-flux; also, to break up colds fevers and inflammatory attacks if used early.

HAY-FEVER.

I have been a Hay-Fever sufferer three years; have often heard Ely's Cream Balm spoken of in the highest terms, did not take much stock in it because of the many quack medicines. A friend persuaded me to try the Balm, and with the most wonderful success.—T. S. GEER, Syracuse, N. Y.

CATARRH

CREAM BALM has gained an enviable reputation wherever known, displacing all other preparations. A particle is applied into each nostril; no pain; agreeable to use. Price 50c. by mail or at druggists. Send for circular. ELY BROTHERS, Druggists, Owego, N. Y.

HAY-FEVER

ECZEMA!

My wife has been sorely afflicted with Eczema or Salt Rheum from infancy. We tried every known remedy, but to no avail. She was also afflicted with a periodical nervous headache, sometimes followed by an intermittent fever, so that her life became a burden to her. Finally I continued to try S. S. S. She commenced seven weeks ago. After the third bottle the inflammation disappeared, and sore spots dried up and turned white and scaly, and finally she brushed them off in an impalpable white powder resembling pure salt. She is now taking the sixth bottle; every appearance of the disease is gone and her flesh is soft and white as a child's. Her headaches have disappeared and she enjoys the only good health she has known in 40 years. No wonder she deems every bottle of S. S. S. is worth a thousand times its weight in gold. JOHN F. BRADLEY,
Detroit, Mich., May 16, 1885. 41 Griswold St.

COUNTERFEITERS BEWARE.

A Michigan Concern Enjoined.

[From the Rochester Morning Herald.]

The following injunction has been obtained by the Hop Bitters Company, of Rochester, N. Y., against Collatinus D. Warner, of Reading, Michigan, prohibiting him from manufacturing or selling "*German Hop Bitters.*"

The President of the United States of America to Collatinus D. Warner, of Reading, Mich., his servants, workmen, salesmen and agents, and each and every of them:

Whereas, it has been represented unto the Justices of our Circuit Court, the Hon. Stanley Matthews, and the Hon. Henry B. Brown, at Detroit, within and for said District, sitting as a Court of Chancery, that you, Collatinus D. Warner, are manufacturing and selling a medicine named German Hop Bitters, in *fraudulent imitation* of the *Hop Bitters* made and sold by complainant; your said medicine being *devised, calculated and intended to mislead the* public into purchasing such *counterfeit* goods as the manufacture of the complainant.

We therefore, in consideration of the premises, do strictly *enjoin* you, the said Collatinus D. Warner, and all and every the persons before named, *from using the words "Hop Bitters"* on any fluids contained in bottles so as to induce the belief that such fluids are made by complainant; and further, from manufacturing, selling or offering for sale any bitters or other fluids in the bottles and with the labels, and in the general form in which you were manufacturing and selling the bitters called by you German Hop Bitters, on the filing of the bill; or in any other bottles, or with any other labels contrived or designed to represent or induce the belief that the bitters or fluids sold by you are the goods of the complainant, until the further order of the Court. * * *

Witness,
THE HONORABLE MORRISON R. WAITE,
Chief Justice of the United States,
At Detroit, this fifteenth day of July, A. D., 1885.
[L. S.] Walter S. Harsha, Clerk.

Prosecute the Swindlers !!!

If when you call for Hop Bitters the druggist hands out anything but "*Hop Bitters*" with a green cluster of Hops on white label, shun that druggist as you would a viper; and if he has taken your money for a bogus stuff, indict him for the fraud and sue him for damages for the swindle, and we will reward you liberally for the conviction.

See U. S. Court injunction against C. D. Warner, Reading, Mich., and all his salesmen and agents. Druggists, and other imitators, take warning.

A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Callatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialities of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

A Model Wife.

Jones was well aware that his wife was in the habit of rifling his pockets when he was asleep, but, like a wise man he kept silent on the subject. One night, however, he woke up and caught her in the act.

"Ha!" he exclaimed, "what are you doing, my dear?"

The lady started, her cheeks flushed, the pantaloons drooped from her grasp, and she was about to make a full confession when a bright idea entered her head. Recovering her composure, she said:

"I was looking to see whether your pantaloons needed any buttons."

"They do, they do, my dear," he exclaimed, springing from bed, needed 'em for weeks, months, and I wondered why you didn't sew 'em on, but I waited, for I was sure you would get to it some time. And how kind of you to get out of bed at this time of night to attend to 'em. Say what you will, there's nothing in the world like a good wife. Let me turn up the gas a little so's you'll have all the light you want in sewing 'em on. Get your needle and thread and the buttons? No. Well, tell me where they are and I'll get 'em for you."

Mrs. Jones proceeded to sew on the buttons while her husband sat on the side of the bed and encouraged her with words of praise for her wifely care and thought for his comfort, occasionally remarking that to go where he would he would always say there was nothing in the world like a good wife.

The he went to the wardrobe and brought out several pairs of pants, a coat, two or three vests, and a number of shirts, from all of which buttons were missing, and cheerfully observed:

"While we are at it we'll make a night of it."

Two hours later, when Mrs. Jones with a weary sigh, removed her thimble from her finger, Jones patted her on the cheek and said:

"I say it again, my dear, say it again, that wherever I go I will make it known, proclaim it from the housetops, shout it in the highways and the byways that a wife who gets up in the middle of the night to sew buttons on her husband's clothes is a priceless treasure, a crown to her husband, and an ornament to her sex."

Then Mr. Jones chuckled to himself, lay calmly down and slept the sleep of the just.—*Boston Courier.*

How they Vote in Germany.

A striking feature of the German municipal system is its entire independence of national politics. No issue but those rising out of municipal questions are allowed to influence the city elections. Every male inhabitant twenty-four years of age has a right to vote on municipal questions provided he has his own household and is not dependent upon father or mother; that he has not received alms from the public funds within twelve years; that he has paid all munical dues; that he occupies a house or pursues a trade with two employees; that he pays an income tax or a class tax. Under one or another of these five conditions all industrious persons are included. That all votes should count equally is regarded as unbusiness like. The arrangement adopted to meet this point of view is this: Voters are divided into three classes, each of which elect one-third of the city council. To the first class are assigned so many of the largest taxpayers as pay one-third of the taxes assessed; to the second so many as in aggregate pay the second third of the taxes; to the third class belong all not included in the first and second. Each of the three classes elects forty-two members of council, its influence upon questions of finance being kept in strict equality with its tax payments. The city council of Berlin has long been conspicuous for the educational and financial standing of its members. Election to it is accounted an honor to which the ablest men of the city aspire.

A Lawyers's Ruse.

They tell a good story of a lawyer of Wooster, Ohio. A client charged with stealing a hog admitted his guilt to his counsel. The latter was noted for his honesty in private life. After thinking the matter over, he said: "John, cut that hog exactly in half, and bring one half to me." John obeyed. The evidence for the prosecution was weak, and when the counsel for the defense arose he won the case by saying to the jury: "Gentlemen, I can hold up my hand to Heaven and say that the defendant has no more of that hog than I have."—*Courier-Journal.*

For all scrofulous disorders, for syphilitic and mercurial diseases, the best remedy is Ayer's Sarsaparilla.

One hand cannot expiate the wrong of the other.

"Second Wind."

Every one who has run a mile knows what it is to gain a "second wind," though he may not be able to explain why one minute he is out of breath, and then feels as if he could run several miles. A writer in Longman's *Magazine* gives this clear explanation of the fact:

The reader may not be aware that in ordinary breathing we use only a portion of our lungs, the cells at the extremity not being brought into play.

This is the reason why those who are not "in training," and who try to run for any distance, soon begin to gasp, and unless they are courageous enough to persevere in spite of the choking sensation, are forced to stop, but if they persevere, the choking goes off, and the result is what is technically known as "second wind." When the second wind is fully established the runner does not become out of breath, but goes on running as long as his legs will carry him. I know this by experience, having been accustomed for some years to run three miles every morning over a very hilly road. The fact is, that on starting, the furthest portion of the lungs are choked with air, and the remainder do not supply air enough to meet the increased circulation caused by exercise.

Now let the reader repeat his experiment of holding his breath against time, but first let him force out of his lungs every particle of air that he can expel, and then draw as deep a breath as his lungs will hold. If this be repeated seventy or eighty times by way of imitation of the whale, the experimenter will find that he can hold his breath for a minute and a half without inconvenience.

Should he be a swimmer, he should always take this precaution before "taking a header," and he will find that he can swim for a considerable distance before he needs to rise for breath.

Told by the Pilot.

"Yes, the artificial banks along this river made capital breastworks for the Confederates," said the pilot as we steamed down the mighty Mississippi. "Safely sheltered by the heavy walls of earth, I've had mor'n one crack at a Yankee gunboat myself."

"Then you were in the service?"

"Must have bin. I belonged to a sort o' independent troop, and most of our fighting was from these 'ere banks. Do you see that grove away off up there?"

"Yes."

"Well, in war times a big house stood there. Fifty of us were eating dinner there one day when somebody saw a Yankee gunboat along about here. We all rushed for the bank, and when she came along we opened with our muskets. By and by she replied with a shell from a big gun. It struck the bank near the top and jist lifted about ten wagon loads of dirt up in a heap and let it fall on our captain."

"Kill him?"

"No. I reckon not, but it buried him clear out of sight."

"How did he feel when you got him out?"

"We didn't git him out."

"You didn't! Why not?"

"Too busy holding an election for some one to take his place. We couldn't think of everything at once, you know, and then it was such a cheap and easy way of burying a man. They might have dug him out since the war, but I reckon he was no good. Been there too long."—*Detroit Free Press.*

A Smart Scheme.

Two darkies had to carry a large desk to the house of Dr. Blister, who had bought it at a furniture store. When they arrived with the desk he was in and directed them where to put it. The darkies expected to get a quarter apiece at least for their extra trouble, but alas! the doctor did not give them anything at all. He forgot all about their sufferings in carrying the heavy desk up two flights of stairs.

They consulted together for a moment in the hall, and then they began to fight and pound each other, calling each other all manner of vile names. No such uproar had been heard since the adjournment of the Legislature.

Dr. Blister hearing the noise, came out and wanted to know what was the cause of the disturbance.

"Dis heah nigga kep' for hisself de money what you guv him for us bofe for totin' de desk up de stars," said Sam.

"You is a liar. De doctor didn't gib me de money. You got de money and kep' it," retorted Jim.

"You are both wrong, boys," said Dr. Blister, "I didn't give either of you anything, but I'll make it all right. Don't fight any more," and taking his pocket-book out he gave them a quarter each.

Those who assert the colored man has no executive ability should ponder over this item.—*Texas Siftings.*

NEW ADVERTISEMENTS.

From the Bloody Ground.

TOLLESBORO, KY.

DR. S. B. HARTMAN & Co., Columbus, Ohio.—I keep the largest stock of medicines of any store in Lewis county, with the exception of a drug store at Vanceburg, our county seat, and am selling a great deal of your PERUNA and MANALIN. It is giving the best satisfaction of any medicine that I ever handled. In one case the constable for the precinct, has been very sick and low spirited for a long time. For several years he has tried all the doctors here, and we have some good ones, and they did him no good. After much persuasion I sold him two bottles of PERUNA and MANALIN. He took half of the medicine. I could see a great change in him, and now he is as sound a man apparently as there is in this vicinity, and he says he is entirely well. He is a number one man and is highly respected. He is satisfied that your medicine saved his life, after all the doctors and all medicines had failed. Being unacquainted with you, I refer you to John Shillito & Co., Alter, Pinckard & Co., and other business houses of Cincinnati.

R. L. GILLESPIE, P. M.

Messrs. Adamson & Shipley, of Waynesburg, Pa., write: "Please send us some "Ills of Life" immediately. We are having a big run on your medicine, PERUNA. Instead of dying out, like most medicines, in course of time, it seems to be growing in favor. We sell lots of it. Please send the books soon."

Messrs. Wirthorn & Urban, of Allegheny City, Pa., write: "Having a large sale for your PERUNA and MANALIN, we have also many calls for your book, "Ills of Life." Please send us a supply of them, German and English, and oblige."

S. Wolf & Son, Wilmot, O., write: "Gentlemen: We handle your goods, and they give good satisfaction."

A. G. Sellards, Greenup, Ky., says: "Gentlemen: I am handling your medicines, and having a good trade on them."

J. C. Saunders, Martinsburg, W. Va., writes: "Gentlemen: Your PERUNA sells fast and gives good satisfaction here. We sell more PERUNA than any other preparation we handle."

W. Bauer, St. Mary's, Pa., writes: "My son is still improving in health. Your PERUNA is just the thing for him."

H. L. Day & Co., New Vienna, Ohio, write: "S. B. HARTMAN & Co., Columbus, Ohio.—Gentlemen: Your PERUNA sells as well as any medicine with us. Quite a number have told us that PERUNA is the best thing they ever used."

HALL'S VEGETABLE SICILIAN Hair Renewer.

Seldom does a popular remedy win such a strong hold upon the public confidence as has HALL'S HAIR RENEWER. The cases in which it has accomplished a complete restoration of color to the hair, and vigorous health to the scalp, are innumerable.

Old people like it for its wonderful power to restore to their whitening locks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beautiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply because it disappoints no one.

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

1f24 DAVID LITTLE.

AYER'S Ague Cure

contains an antidote for all malarial disorders which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTS.

A HOME DRUGGIST TESTIFIES.

Popularity at home is not always the best test of merit, but we point proudly to the fact that no other medicine has won for itself such universal approbation in its own city, state, and country, and among all people, as

Ayer's Sarsaparilla.

The following letter from one of our best known Massachusetts Druggists should be of interest to every sufferer:—

RHEUMATISM. "Eight years ago I had an attack of Rheumatism, so severe that I could not move from the bed, or dress, without help. I tried several remedies without much if any relief, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. Have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public. E. F. HARRIS."

River St., Buckland, Mass., May 13, 1882.

SALT RHEUM. GEORGE ANDREWS, overseer in the Lowell Carpet Corporation, was for over twenty years before his removal to Lowell afflicted with Salt Rheum in its worst form. Its ulcerations actually covered more than half the surface of his body and limbs. He was entirely cured by AYER'S SARSAPARILLA. See certificate in Ayer's Almanac for 1883.

PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists; $1, six bottles for $5.

JEWELRY STORE,

—BY—

F. G. HYDE,

WATCHMAKER AND JEWELER,

Furniture repaired. Will also take orders for new furniture. Rustic work on hand and manufactured to order. Give him a call

Social Forms.

Good Housekeeping.

The use of formality and ceremony is to compel the performance of social duties that would not be performed were it not for the authority of the custom. In the course of time the appropriate feelings accompany these acts and in the form of spontaneous motives displace the enforcement of organized habits. There is much in formality that is cold, false and deceitful, and "civilized" people ought to be above it. On the other hand, spontaneousness in conduct, when a good result is intended, is what it pretends to be, and promotes friendly feelings and associations. It may be well that some people are formal; they would be nothing if not ceremonious. It would be better, however, if they were quick to act without the compulsion of custom, obedient to the promptings of many social feelings. No doubt many people, through the inertia of habit, are following lines of custom, while their natures are fully competent to indulge in independent spontaneity. An illustration of one struggling for emancipation came to hand not long ago. The writer had been entertained for the first time at the house of a certain hospitable old gentleman and both were sitting with half an hour to wait for the arrival of the carriage in which the host proposed to take the guest to the railway station, when the former said: "I want to have you be sure to come and see me again and if you don't have any business calls this way come without them." He then added, apologetically: "I suppose I ought to have said this when bidding you good-bye at the station, but I like to say things when I think of them." There was a charming naturalness in the old gentleman's invitation, and a wholesouled hospitality that were not to be misunderstood. They would have been almost totally lost if the invitation had been reserved for the last act of formality, as many are in the habit of doing. One may be justified in taking very little stock in "come and see me again" when accompanied with a "good bye." Though suitable feeling may stand behind the invitation in such case, yet it is not to be compared to the certainty that exists in the less formal mode. If one is staying at a friend's house for a portion of the day and is about to leave just before meal time, he must not think of accepting an invitation to remain for the meal when it is made at the time of departure, the guest, perhaps, with hat and cane in hand. The host could not say in plainer language: "Stay and dine with me; I do not expect that you will and rather hope that you will not, though you have a license to force yourself upon me." Yet how many people there are who issue their invitations in just this formal way, as if to get the credit for hospitality without conferring it upon anyone.

All admire a frank, natural person, who has no offensive traits, and it is to such persons that we most freely give our confidence. The foundation of social integration is the trust that people have in each other; it is for this reason that a lie is wrong. A falsehood is a social offense, because it tends to weaken the ties that hold society together. Hence formality may be wrong, for it may tread upon the borders of deception when practiced by people who have feelings well enough developed to enable them to do without it.

People of this description are "glad to see you" long before leaving their house, or they will not say that they are glad at all; they invite you to remain to dinner or to supper before you have gone so far in preparing for departure that it would be awkward to turn back; they don't wait until they have to shout to you as you ride off to say, "come again;" nor will it be a mere "come again," either, but a hearty request to repeat the visit, or the invitation will hardly be made. So it will be found by those who have the feeling to prompt them to commendable social acts, that formality and ceremony dwarf their import, while the natural conduct creates a stronger fellowship, a new sympathy and unmistakable attitude of regard.

Headaches and biliousness are promptly cured by the use of Ayer's Cathartic, sugar-coated Pills.

It is with narrow souled people as with narrow necked bottles; the less they have in them, the more noise they make pouring it put.

A Profitable Industry.

[Detroit Post and Tribune.]

There is an enterprise carried on in Detroit which is not generally known and never appears in the statement of the city's varied prosperous industries. Its novelty is such that it has never as yet attained the dignity of a name. It is carried on when a majority of citizens are asleep. Those engaged in it prosper upon the carelessness and misfortunes of others. Their income defies definite prediction, but can be depended on for a handsome return on the capital invested. The few engaged in this industry might be termed "fighters." The pioneers in the business were gas-lighters. Scarcely one of their number, who has been engaged with the craft for any considerable length of time, has failed to find one or more articles which afforded a handsome addition to his regular income. Almost every night there was a valuable find or two, and as a knowledge of the fact came to a few who were waiting for something to turn up, they saw in it a golden opportunity, and are now laying up treasures from what they can find.

One of these individuals lives in Close's alley and is a negro. At the very peep of day he may be seen abroad, traveling at a good round space, scanning the sidewalk and doorways, and swooping down on anything of sufficient value to repay the loss of a minute or so. There are also three men who travel together, their rounds generally beginning about midnight and continuing until daylight. They walk a breast, taking in the sidewalk, scanning it as they go, the center man carrying a bull's-eye lantern attached to the front of his coat. They go as rapidly as is consistent with their business, and nothing of value escapes their notice. A basket is the receptacle for many articles, money goes into their pockets, and heavier finds sometimes necessitate the sending of a detail of one or two for assistance or a wagon. What they pick up comprises almost every movable commodity worn or carried upon the streets. They secure hats, handkerchiefs without number, coats, money, umbrellas, feathers of value, occasionally a valuable watch dropped by some night marauder, purses, rings, breastpins, canes, chains bracelets, keys, letters, gloves, furs, skirts, and even hoes, dropped by some luckless adventuress. An invoice of these findings would show an immense annual aggregate. A plume picked up not long since netted eight dollars to the finder. A watch was quietly disposed of for fifty dollars, and the purchaser had a bargain. Much of the jewelry is sent to a distant market. Ready money is tucked away and tells no tales.

Curious finds are also made. An old lamp-lighter said to a reporter: "I have picked up two bushels of potatoes when they were worth a dollar and a half per bushel, and no one even called for the bags."

Another had found a new suit of clothes, neatly done up, and found them a good fit without the change of a button. Some disciple of Bacchus tucked a twenty-dollar bill outside his vest pocket and the eagle-eyed finder gathered it in. Purses containing several times that amount have been picked up, and the business is said by those informed to be a lucrative one.

A peculiar case is that of an aged negro who is found around the market building at an early hour during the hot weather. He gathers up the heads and feet of chickens, declaring when questioned: "Boss, dem am de quintessence ob de fowel. De possum am de only bird dat obberrates dese foh regalah ole-time soup." He never misses a squash, bunch of vegetables, or some other bit of diet.

Weighing and Guessing.

A correspondent of the Germantown *Telegraph*, upon the advantage of using scales on the farm to decide weights of products and animals sold, relates the following:

There are many farmers who do not properly estimate the value of being able to weigh upon the farm whatever may be produced thereon, especially that portion to be sold. The dealer in stock who comes to your farm to buy is estimating and weighing daily, and becomes so expert that he can guess the weight of an animal within a few pounds. The majority of farmers cannot do this. The dealer is going to buy as cheap as he can. He asks the farmer his price. The reply is often made that he does not know what it is really worth; what will he pay for it. The reply is, he cannot buy and sell; you must set the price. If the farmer is really ignorant of its value the dealer soon discovers it and acts accordingly.

Last fall I bought a flock of sheep to raise early lambs. Not having kept sheep for years, I was not posted; but I raised some fine lambs. Some buyers were looking at them, and I priced them for the whole lot; this was claimed to be too high. A few days later the sheep were yarded to be shorn, when a number of the lambs were weighed. The next day one of the village butchers met me and said he was just coming to see me about those lambs. I told him to go and look them over; he spent an hour among them. I said to him: "You found some fine lambs?" "O, fair," he replied. "The first lamb dropped was March 20, the majority after the 1st of April. Now, in view of their age, are they not more than fair?" He admitted that for their age they were very good. I asked him what some of the best of them would weigh. "O, about forty-five pounds," he replied. I smiled, and asked him if he did not know any better, remarking that it was useless to beat around the bush, as I was posted on their weight, and that seventy was nearer the mark than forty-five. I set my price and he bought them. The next day I met another of the village butchers and told him I had a wether, and that as I only wanted to keep ewes I would sell.

I told him $5 was the price, in answer to his inquiry. He said he would give $3 50 if a good one, but $5 was out of the question. He said he would give 4 cents per pound (4½ is the present market price). At this figures the sheep was worth $4 80, at the market price $5 40.

This spring, in selling some grain, I weighed the last load. The weight at the warehouse and my weight did not agree. I showed my figures; they looked again and found a mistake. It paid me well for weighing.

Stimulating Old Trees.

Country Gentleman.

When apple and other fruit trees lose their vigor from age, or from neglect or want of fertilizing, there are different modes of restoring them to vigor, which may be used to the best advantage during autumn. One of the easiest of application is to spread barn manure broadcast for twenty-five or thirty feet distant from the trunk of the tree on each side. This treatment will frequently be sufficient of itself, in addition to pruning out any dead branch, or thinning in the head from the outside, or both. Cultivating the surface while the tree is dormant is an additional aid. For smaller trees which are required to stand in grass, or where they cannot be cultivated, a strong impetus may be given by cutting radiating trenches from within a few feet of the tree a rod or so in length on all sides, and filling these with compost. The large roots which lie on each side of these trenches, will send their side roots into the compost, and the trees will be pushed rapidly in growth. The trenches may be from one to two feet in depth and the width that of the blade of the spade. Another mode, instead of cutting these radiating trenches, is to cut a circular ditch around the tree at some distance from the trunk and to fill this with compost. The severed roots will soon send new fibres into the compost, while the pruning which the roots receive will promote fruitfulness. Some judgement must be used to cut the ditch at the right distance; if too near it will temporarily check the growth too severely, before new roots are formed; and if too far away, the labor will be too great, and the result less striking. In most cases, however, and with orchards of some size, cultivating and top dressing will be sufficient. All cutting of the roots or branches must be done while the trees are not growing.

An Enterprising, Reliable House.

W. D. Nydegger can always be relied upon, not only to carry in stock the best of everything, but to secure the Agency for such articles as have well-known merit, and are popular with people, thereby sustaining the reputation of being always enterprising, and ever reliable. Having secured the Agency for the celebrated Dr. King's New Discovery for Consumption, will sell it on a positive guarantee. It will surely cure any and every affection of Throat, Lungs, and Chest, and to show our confidence, we invite you to call and get a Trial Bottle Free.

The Republican.

OAKLAND, GARRETT CO., MD.

GIRLS, AS YOU GO ALONG.

Come, all you fair young housewives and listen unto me,
(I mean those lucky ones, who are from servant-bondage free,)
And some advice I'll give you in a simple little song,
With the simple little chorus of—Girls, as you go along.
O, as you go along,
Leave everything where it should be, girls, as you go along.

You take a fancy for a cake, late in the afternoon,
And flour, butter, sugar, eggs, and milk, and bowl, and spoon,
And other necessary aids, the kitchen table throng;
Don't let them stay, clear them away, girls, as you go along.
O, as you go along,
Put each one back in its right place, girls, as you go along.

And then you'll find how easily a great deal can be done
Without your being "tired to death" at setting of the sun,
And though, sometimes, in spite of care, things seem to turn out wrong,
'Twill always pay to smooth the way, girls, as you go along.
O, as you go along,
Then never leave your work behind, girls, as you go along.

—*Margaret Eytinge, in Good Housekeeping.*

OUR DEAD PRESIDENTS.

How They Died and Where They Were Buried.

A Short Account of the Last Days and Hours of the Country's Chief Magistrates—The Remarkable Fortitude Exhibited by the Illustrious Sufferers.

General Washington, the first President, took cold during a five hours' ride over his plantation on the 12th of December, 1799, during the last hours of which he was exposed to a severe storm of snow, hail, and rain. The cold developed on the 13th, and he died of pneumonia on the 14th. A few minutes before his death he asked his Secretray to have his body kept three days before burial. The Secretary bowed. "Do you understand me?" the dying man asked. "Yes," was the reply. "'Tis well," Washington said. They were his last words. The body was buried on the 18th, a schooner being stationed off Alexandria to fire minute guns while the procession moved from the house to the vault. The troops, horse and foot, led the way; then came four of the clergy, then Washington's horse, with his saddle, holsters, and pistols, led by two grooms in black; then the body, borne by the Masonic order (of which he was member), and officers, followed by the family and several old friends, and the corporation of Alexandria. At the tomb the Rev. Mr. Davis read the service and delivered a brief address, after which the body was deposited in the vault with Masonic ceremonies. Washington's remains were deposited in their present receptacle in Mount Vernon in 1837.

John Adams, the second President, died on July 4, 1826, the semi-centennial of American independence. Adams at ninety-one possessed a remarkable activity of mind, though his sight was so impaired that he could neither read nor write. By April, 1826, it was evident that he was failing, though his neighbors in Quincy, Mass., hoped fondly that he would be able to attend the local Fourth of July celebration. When, however, it became apparent that he could not attend in person, a delegate was appointed to visit him and beg a last word or cheerful message. On June 30 the delegate called on Mr. Adams and "spent some few minutes with him in conversation, and took from him a toast to be presented on the Fourth of July as coming from him." "I will give you," said he, "Independence Forever!" He was asked if he would not add anything to it, and he replied, "Not a word." At this time Mr. Adams experienced no suffering, but respiration became more and more difficult till on the morning of the 4th. He passed away calmly and without suffering at sunset. "Thomas Jefferson still survives," were the last words he uttered, so far as could be gathered from his failing articulation. He was buried in the family vault in the cemetery, but upon the completion of the Unitarian Church of Quincy, just across the street, in 1828, the body was removed from the vault into the room beneath the church.

Thomas Jefferson, the third President, died only a few hours before John Adams. On the 3d of July he dozed hour after hour under the influence of opiates. Rousing occasionally, he fervently expressed a desire to live until the day he had assisted to consecrate fifty years before. At eleven o'clock at night he whispered to Mr. N. P. Trist, his grandchild's husband, who sat by the bed: "This is the Fourth?" Mr. Trist remained silent, being unable to say "Not yet!" "This is the Fourth?" again whispered Jefferson, and when the watcher nodded, "Ah!" he sighed, and sunk into sleep with an expression of satisfaction upon his countenance. His watchers thought him dying, but he lingered until 12:40 in the afternoon, occasionally indicating a desire by words or looks. "I resign my soul to God and my daughter to my country" is a popular version of his last utterances. His remains lie in a little inclosure to the right of a road leading from Charlottesville, Va., to Monticello. An obelisk nine feet high marks the spot.

James Madison, the fourth President, and the last survivor of the signers of the United States Constitution, died on June 28, 1836. During his last illness, when the family and doctor were at dinner, his voice was heard feebly from the adjoining chamber: "Doctor, are you pushing about the bottles? Do your duty, doctor, or I must cashier you." He is buried at Montpelier, four miles from Orange Court House, Va. The grave is in the center of a large field, in a lot about one hundred feet square, surrounded by a brick wall. On the gate is a sign: "Madison, 1820."

James Monroe, the fifth President and the third to die on Independence Day, died July 4, 1831, in New York City, at the residence of his son-in-law, Samuel L. Governeur. His remains were deposited with public honors in the Marble Cemetery on Second Street, in New York, where they reposed until 1858, when they were removed under the escort of the Seventh Regiment, then commanded by Colonel Abram Duryea, to Hollywood Cemetery at Richmond, Va. The remains rest on a beautiful site overlooking the James River Falls above Richmond, in a vault of brick and granite.

John Quincy Adams, the sixth President, was found by death where he could have wished its approach—in the halls of Congress. On February 21, 1848, he ascended the steps of the Capitol with his accustomed alacrity, and took his place in the House. While petitions were being presented, suddenly there was a cry of "Mr. Adams!" and a rush of members toward his seat. He was rising with a number of petitions in his hand, when he was struck with apoplexy and sank down, catching at his desk and falling into the arms of the member who sprang across the aisle to his assistance. He was carried into the rotunda, then into the Speaker's room. He attempted to speak, but his voice was a mere murmur, low and indistinct, though Mr. Ashmun, who was placing him on the sofa, heard him say: "This is the last of earth; I am content." He became insensible at once, and lingered, faintly breathing, till ten o'clock on the morning of the 23d, when he expired. Mr. Adams' body was removed on the car drawn by six white horses that had served for Harrison's funeral, and after lying in state in Faneuil Hall, Boston, was buried under the Unitarian church at Quincy, Mass., where his father, John Adams was buried.

Andrew Jackson, the seventh President, died on Sunday, June 8, 1845, at the Hermitage, his famous home. For months he had been suffering from disease of the lungs, dropsy and diarrhoea. On the Friday previous to his death he gave directions concerning his funeral, and dictated a letter, his last, to the President, bidding him act promptly and resolutely in the affairs of Texas and Oregon. On the morning of his death, a brilliant, hot day, he bade farewell to his family, friends and servants, whom he addressed with calmness, strength, and even admiration on the subject of religion, concluding: "I hope and trust to meet you all in Heaven, both white and black," words he repeated again in the afternoon as the end was coming on. Hearing the servants on the piazza weeping, he spoke again: "What is the matter with my dear children? Have I alarmed you? O, do not cry. Be good children and we will meet in Heaven. At six he died, without a struggle or a pang. His funeral was attended by 3,000 people on the Tuesday following. He is buried at the Hermitage, on the Lebanon pike, eleven miles from Nashville, Tenn. A massive monument of Tennessee granite marks his grave.

Martin Van Buren, the eighth President, died at Kinderhook, Columbia County, N. Y., on July 24, 1862, of asthma, that developed into a painful catarrhal affection of the throat and lungs. One of his last distinct utterances was to his clergyman: "There is but one reliance." He is buried in the little village cemetery at Kinderhook, in the family lot. A granite shaft fifteen feet high marks his grave.

William Henry Harrison, the ninth President, died in Washington City, April 4, 1841. He rode on horseback to his inauguration and stood bareheaded and without an overcoat to deliver his inaugural, contracting pneumonia, which was aggraved by subsequent imprudences. His last words heard by Dr. Washington were: "Sir, I wish you to understand the true principles of the Government. I wish them carried out. I ask nothing more." A procession two miles in length escorted the body, which was conveyed on a funeral car drawn by six white horses, to its temporary resting place in the Congressional burying ground, where the Episcopal service was read by Mr. Hawley. His present resting place is at North Bend, Ohio, a few yards from the track of the Illinois Central Railroad, where it enters the tunnel. The grave is a simple mound, unfenced, on a little knoll, and is shaded by beeches and other trees. There is no monument and no inscription any where to tell the story of the departed hero of Tippecanoe.

John Tyler, the tenth President, was taken ill on Sunday, January 12, 1862, while at breakfast at the Ballard House, Richmond, Va., and died at midnight on the 17th. "Let me give you some stimulant," said the doctor. "I will not have it," replied the dying man; and closing his eyes he passed away. His body lay in state at the Capitol. He was a member of the Confederate Congress, and was interred at Hollywood Cemetery on the 21st, by Bishop Johns. His grave is a little mound covered with bushes, about ten yards from the grave of Monroe.

James K. Polk, the eleventh President, died at Nashville, Tenn., June 15, 1849, three months after his retirement from the Presidency. He had suffered from diarrhœa on the journey home, and a recurring attack proved fatal. On his death bed he received the rite of baptism at the hands of a Methodist clergyman. He is buried at the old family homestead at Nashville, Tenn. The monument is a block twelve feet square by twelve in height.

General Zachary Taylor, the twelfth President, attended the Fourth of July ceremonial in Washington City in 1850, when the dust from Kosciusko's tomb was deposited in the Washington monument, and endured for several hours the heat of the day, which he declared was worse than any he had experienced in Mexico or Florida. Going home, he insisted on eating freely of unripe cherries and drinking cold water and iced milk, despite the remonstrances of his servant. This brought on an attack of cholera morbus, followed by typhoid, of which he died on the 9th. An imposing procession accompanied his remains to the Congressional Cemetery. His remains have been removed three times, and now repose in a public spot at Frankfort, Ky.

Millard Fillmore, the thirteenth President, died at Buffalo, N. Y., N. Y., on March 8, 1874, and after lying in state at St. Paul's Cath[illegible], the remains were buried at Forest[illegible] Cemetery, three miles from Buffalo. A tall monument bears the inscription: "Millard Fillmore. Born Jan. 7, 1800; died March 8, 1874."

Franklin Pierce, the fourteenth President, died on Friday, October 8, 1869, at the residence of Mr. Willard Williams, Concord, N. H., of dropsy and inflammation of the stomach. For the last three days of his life he was nearly unconscious, and died without pain. His body lay in state at Doric Hall and was buried in the Minot Cemetery, on Main Street, on the 11th. The Pierce lot is at the northwest corner of the old cemetery, and contains about an acre of ground. It is surmounted by a neat iron fence six feet high. The monument is of italian marble, surmounted by a draped cross, and its total height is fourteen feet eight inches.

James Buchanan, the fifteenth President, died at Wheatland, near Lancaster, Pa., on June 1, 1868, after an illness of one month. On the night before his death he gave detailed directions for his funeral and the erection of his monument, dictating the inscription, a a blank to be left for the date of death, "which cannot be distant," he said. His last authentic words, as he sank into the sleep in which he died, were: "O, Lord God Almighty, as Thou wi[illegible]." His funeral took place on the 4th [illegible] he exercises being conducted by Dr. N[illegible]n, President of Franklin and Ma[illegible]all College, an immense concourse [illegible] present. He is buried at Woodward Hill cemetery, Lancaster, on the banks of the Conestoga. The lot is enclosed by a neat iron fence. All around the fence is a hedge of blooming rose, and rose bushes are planted in the enclosure. A fine sarcophagus of Italian marble marks the grave.

Abraham Lincoln, the sixteenth President, died by the hand of John Wilkes Booth, in Washington, April 15, 1865. Nine of the persons supposed to be implicated suffered condign punishment. The funeral honors paid to the deceased Chief Magistrate, were of the most elaborate character. His remains are buried at Oak Ridge Cemetery, Springfield, Ill. A fine pile of marble, granite and bronze marks the spot. It bears the single word, "Lincoln."

Andrew Johnson, the seventeenth President, died suddenly at Greenville, Tenn., on Saturday, July 31, 1875, and was buried with Masonic ceremonies on the 3d of August. His grave is at Greenville, Tenn., on a spot selected by himself. The monument is of marble, upon a base of granite, nine and a half by seven feet. The tomb was erected by the President's three surviving sons.

James A. Garfield, the twentieth President, was assassinated in the Baltimore and Potomac railroad depot in Washington city, on July 2, 1881, by Charles Guiteau, and died of his wound September 19, at Elberon, near Long Branch, N. J. Funeral services took place in Washington on Friday, September 23, and the remains were then transferred to Cleveland, Ohio, where they were entombed September 26. A handsome mausoleum for their reception is now in course of erection at Cleveland.

General Grant, the eighteenth President, died at Mt. McGregor, N. Y., July 23, 1885. The details of the death and magnificent funeral of the great soldier are still fresh in the minds of all.—*Baltimore Sun.*

CHINESE EXPORT TRADE.

How It is Controlled by Mongolian Merchants.

The export trade of the Pacific coast with China, which a few years ago was controlled by white merchants, is now practically in the hands of the Chinese, whose facilities have increased with their growing knowledge of trade in this country. White men who now figure in our commercial relations with the Flowery Kingdom are in many cases acting only as agents of Chinese firms or individuals. The manifests of all the shipments from this port to China for the quarter ended June 30, 1885, furnish a fair picture of the present condition of the export trade. The total merchandise shipments to China by white houses for the quarter appear to have been $281,273.49. This includes all shipments from the east, as embraced in the exports, nominally, by the two China steamship lines or their agents, which together exported merchandise valued at $163,901.57. The great part, in fact, nearly all of the shipments nominally by the steamship lines are outside of Californian production, the bulk being sheetings, ginseng, and arms and ammunition. The remainder of the $281,273.49, or $117,371.92, must be reduced by deducting shipments by white persons who nominally ship for themselves, but who are known to other shippers as agents for Chinese, to the amount of $43,357.81. This leaves the statement for merchandise exports for the quarter named as follows: Direct by Chinese: $541,915.74; by white agents of Chinese, $43,357.81; total, $585,273.57. The merchandise exports by whites are as follows: By transportation companies, $163,901.57; by local business houses, $74,014.11; total: $237,915.68. This shows the Chinese to have had control of about three-fourths of the business for the quarter. During the quarter Chinese business houses sent out of the country treasure amounting to $913,507.55 to Hong Kong. The banks of California, Anglo-Californian Bank, and Hong Kong and Shanghai banking corporation also sent to Hong Kong over $2,000,000. The largest item of export is flour, and the flour trade between this port and China is generally known to be controlled by the Chinese. Some authorities state that ninety per cent. of the export trade hence to Chinese ports is controlled by the Chinese merchants. This condition of affairs tends to show that the local curse of Chinatown is only a small part of the Chinese question, and the ease with which the Chinese absorb business has made them masters of the situation, so far as the export trade with their country is concerned.—*San Francisco Chronicle.*

—It sometimes happens that a man ransacks the whole house for a pin, and unable to find one drops into a chair in disgust, and is immediately and unexpectedly rewarded for his search.—*N. Y. Independent.*

TO TROT IN TWO MINUTES.

An Expert on Trotting Horses Thinks This Time Will Be Made.

Professor William H. Brewer, of Yale College, has made the evolution of the American trotting horse the subject of much careful research and study. Professor Brewer owns the most complete collection of ancient and modern books relating to horseflesh in all its forms to be found in New England. Yesterday the Professor gave an interesting review of the progress of trotting in America.

"It is not known exactly," he said, when horses began to trot against time. Englishmen had always run their horses, and had trained them for that. So the English horse is seldom, if ever, put to the trot on trials of speed. It was in the year 1806 that the New York *Spectator* made mention of a horse which had trotted a mile in two minutes and fifty-nine seconds, which at that time was without a precedent. Laws against horse races, that is to say running horses, were in colonial times extremely stringent. In the early part of this century they got around the laws against horse races by trotting their horses alone and timing their speed by a watch. This was a purely American discovery. After a while the horse laws were so modified as to allow "trials of speed," as they were termed, to be given at certain periods of the year with impunity. It was not until 1818 that the first trot for money was given, when Colonel Boyd, of Maryland, bet Major Jones, of Long Island $1,000 that 'no horse could be produced that could trot a mile in less than three minutes.' Boston Blue was produced and covered the mile in just three minutes. This was held to be a wonderful feat in those times, and Boston Blue was taken to England and exhibited there. In 1825 the New York trotting club was organized and built a course at Jamaica, L. I., which was probably the fastest trotting track in the world. From that time trotting became a general sport and was adopted by the mass of the people who owned horses, and that very thing guaranteed its progress. The record in 1818 of Boston Blue, of three minutes, was broken in 1824 by Top Gallant in 2:40, in the same year by the Treadwell mare in 2:34, in 1830 by Curster in 2:32, and in 1834 by Edwin Forrest in 2:31½. It took nine years to lower the last record, which was done in 1843 by Lady Suffolk in 2:28, and the next year by the same horse in 2:26½. But it was left to Flora Temple to astonish the country when she made her celebrated time, 2:19¾, in 1859. Flora Temple from that time became a household word. Ladies wore Flora Temple bonnets, boys smoked Flora Temple cigars, politicians drank Flora Temple whisky. It is not probable that any one trotter will ever again create such enthusiasm. Her winnings were very large indeed. Then came Dexter, lowering the record twice before retiring from the turf. Then Goldsmith Maid, whose speed and fame are said to have brought her owners a quarter of a million dollars. Then Rarus, St. Julien, and Maud S., whose recent performance of 2:08¾, stands before the world without an equal.

"Thus, you perceive the great lowerings of records since trotting was inaugurated in 1818. During the past decade records have steadily been lowered, and Mr. Bonner is authority for the statement that he expects Maud S. will surpass her time of a day or two ago before the summer closes. It is my firm opinion, based on many years of deep study of the evolution of the trotting horse, that before another generation passes we shall hear of trotting horses who can make a mile under two minutes. Horses are bred nowadays for the single purpose of bringing out their trotting qualities, just as in England they are bred solely with reference to running. Now, if a lot of thoroughbred horses are bred within themselves, without admitting any mongrel blood, and if they are trained solely for trotting, there is no question that man can bring the record down to two minutes and under.

"Mr. Robert Bonner, who owns Maud S., ridicules such an idea, and he may think this an impossible result. I am aware, as he says, that trotting is an acquired gait for a horse and that running is his natural gait. But still my theory holds, and if the thoroughbred trotter is carried through one generation after another, we shall one day see a horse which can trot in two minutes.—*New Haven News.*

How to Eat a Watermelon.

To be properly enjoyed the perfect watermelon should be pounced on in the patch just after sun up. It should be carefully selected. In response to an eager thump there should follow a dead and meaty sound and the melon should weigh not less than twenty-five pounds. After it is pulled it should be split from end to end with a short-bladed pocket knife, so that in tearing it open the glowing and juicy heart, bursting loose from its continement, should find a lodgement on one side only. At this point the knife is to be flung away. For a moment the eye should be allowed to feast itself on the vision thus suddenly brought to view, then the heart should be scooped out with the hand and its nectarious meat thrust upon the hot and thirsty palate. There ought to be something savage in the enjoyment of a watermelon; it ought to be crushed and swallowed with avidity. The man who knows how to enjoy one will come away from the fray with the sweets in his beard, in his hair and on his clothes.—*Atlanta Constitution.*

—Which is the diamond wedding? The twenty-fifth is the silver anniversary and the fiftieth the golden, as all agree. But, while in America we add twenty-five years to the fifty to find the time of the diamond anniversary, they act in England as though it comes with the completion of the seventieth year of married life. Richard Wortley and Elizabeth, his wife, wedded at the very time the guns were booming at Waterloo, recently celebrated their seventieth marriage anniversary at Sheepshead, England, and the papers there allude to it as a diamond wedding.—*Philadelphia Press.*

FASHION NOTES.

Interesting Information Embodied in Small Compass.

Tinsel will again be worn.
Polonaises are to be revived.
Red veils are as popular as ever.
The days of flounces are no more
Redingotes are the rage in Paris.
Sashes are a feature in fall toilets.
All gray greens will be much worn.
Plomb, or lead, is a leading fall color.
Belts to be fashionable must be very wide.
White frocks are worn to excess in England.
Huge bridal bouquets are no longer in vogue.
The V shaped corsage is very popular in Paris.
Short and long waists are equally fashionable.
Olive and reseda shades of green are very popular.
Black silk will be more worn than black satin next season.
The tailor-made cloth suit will be more worn than ever this fall.
Stripes must be horizontal, not vertical, in a fashionable frock.
Borders in lieu of flounces and tucks will be all the rage next season..
Short jackets and long redingotes of velveteen will be much worn this fall.
Tailor-made jackets and frocks are considered indispensable at the seaside.
Mantles and short visites are worn by young girls as well as by older women.
White woolen frocks are dressy and pretty for seaside and mountain wear.
Bustles have probably reached their maximum in size for at least six months to come.
The small capote, with a high crown dressily trimmed, is the favorite headgear for visiting.
Green in various subdued shades will be a leading color in fall and early winter fashions.
Curled mohair and Astrachan borders appear on wool novelties for fall and early winter wear.
The coiffure grows higher, but the bangs on the forehead are fuller and more curled.
Braid and fine fancy galloons are in high favor, and will probably continue so for another season.
Lace and moire are admirably combined in dressy frocks for visiting and ceremonious occasions.
Late summer and early fall hats have very high crowns and more pyramidal front trimmings than ever.
The dry goods importers say we are to have another season of velvet and velveteen, plain and broche.
Lead, jet, metal, and iridescent glass beads are all used to excess on fanciful frocks, jackets and mantelets.
Very wide collars of lace or embroidery, worn over ribbon arranged high in the neck, are among the features in fall styles.
Velveteen is correctly made up for street wear, but velvet is relegated for ceremonious visiting and indoor toilets of ceremony.
Handsome silk, satin, crepe, or wide ribbon sashes painted in water colors and signed by well-known artists, are the latest extravagance of fashionable Parisians.
Even table linens, cloths, doylies, napkins, table, sideboard and cupboard scarfs, towels and mats are damasse with Byzantine designs and colors this fall.
Border patterns, in Byzantine colors and designs running horizontally around the skirt, are the feature in the first importations of wool novelties.
Silk and satin are no more correctly worn on the street, the tailor-made cloth or novelty wool frock having completely superceded everything else for walking.
Black tulle dresses are popular for both young and older ladies' wear. The accessories may be flowers or ribbons, bright or pale tinted, or pure white or jet or gold ornaments.
The bridal bouquet of the passing moment must be a dainty flat pyramidal nosegay of white flowers on a green ground, or ornamented with a handsome bow and flowing ends of white satin ribbon.
The latest craze in fancy work is the making of artificial flowers of tissue paper. In the hands of an expert with artistic feeling very fine results from this inexpensive material are accomplished in the way of decorative pieces for interior decorations, as well as for personal adornment.—*N. Y. Sun.*

The Belle Who Turned Black.

A celebrated Parisian belle, who had acquired the habit of whitewashing herself, so to speak, from the soles of her feet to the roots of her hair with chemically prepared cosmetics, one day took a medicated bath, and on emerging from it she was horrified to find herself as black as an Ethiopian. The transformation was complete; not a vestige of the "supreme Caucasian race" was left. Her physician was sent for in alarm and haste. On his arrival he laughed immoderately, and said: "Madam, you are not ill; you are a chemical product. You are no longer a woman, but a sulphide. It is not now a question of medical treatment but of simple chemical reaction. I shall subject you to a bath of sulphuric acid diluted with water. The acid will have the honor of combining with you; it will take up the sulphur, the metal will produce a sulphate, and we shall find as a precipitate a very pretty woman." The good-natured physician went through with his reaction, and the belle was restored to her membership with the white race. Young ladies who are ambitious of snowy complexions should remember this, and be careful what powders and cosmetics they use—if they use any at all.—*Boston Journal of Chemistry.*

—Save the tea leaves for a few days, then steep them in a tin pail or pan for half an hour; strain through a sieve and use the tea for all varnished paints. It requires very little elbow polish as the tea acts as a strong detergent, cleansing the paint from all impurities and making it equal to new. It cleans windows and sashes and oil cloths. Indeed, any varnished surface is improved by its application; it washes window panes and mirrors much better than water, and is excellent for cleaning black walnut and looking-glass frames; it will not do to wash unvarnished paints with.—*Boston Globe.*

SCHOOL AND CHURCH.

—There are in England 187 ragged schools which are attended by 50,000 children.

—The Presbytery of San Francisco has organized a Presbyterian Church whose members consist entirely of Japanese Christians, resident in the city.

—There is said to be not a single evangelical missionary in the whole valley of the Amazon, and that a gospel sermon has never been preached in all that territory.—*N. Y. Post.*

—Rev. Dr. W. R. Davis, pastor of the Zion Baptist (colored) Church, of Louisville, Ky., has resigned at the request of his congregation, who alleged that he did not preach loud enough nor with sufficient fervor to make them happy.—*Louisville Courier-Journal.*

—Among those who have joined the Roman Catholic Church since the beginning of the Oxford movement are enumerated 36 lords, 25 baronets, 302 graduates of Oxford, 149 graduates of Cambridge, 142 army officers, 92 lawyers, 48 doctors and 1,010 ladies of aristocratic stations.

—Rev. N. J. Cushing, D.D., of Burmah, arrived at San Francisco a few days since. It is about twenty years since he left this country for the missionary field, and nine years since his first return. He has done a great work in the translation for the Shan people of the entire Word of God.—*N. Y. Independent.*

—Irreverent jokers put a gallon of whisky into the baptistry of an Indiana church, after the water had been fixed for the immersion of a reformed drunkard. But their trick was turned to serious account by the victim, who, standing on the edge of the tank in his dripping robe, described the outrage to the congregation and delivered a ringing speech for total abstinence.—*Indianapolis Journal.*

—The great defect even of our best teachers, and clergy as well, is this living in a rut. No man or woman is great or good enough to dispense with the broadening and beneficent influence of everyday physical nature and the mighty university of human life. So be wise, and use the golden hours for thorough ventilation of mind—imagination, sympathies, sense and soul.—*Journal of Education.*

—In England a parent can be prosecuted for the non-attendance of his child at school, and children must bring the penny school fee every Monday. The father of a child who did not bring his penny on two successive Mondays was summoned for "non-attendance," and the Lord Chief Justice held that the attendance of a child without the fee constituted no attendance under the by-laws of the School Board.

—The system carried out in Vienna for educating girls is certainly worthy of notice. They are kept at their studies until they are fifteen years of age. They then go through a course of teaching in the pantry and the kitchen under some member of the family, or sometimes under trained cooks for a year or two years. Thus they learn to do everything themselves, and to know the value of things long before they commence house-keeping on their own account; and though they may never be required to cook a dinner, they become independent of cooks and servants.—*N. Y. Sun.*

PUNGENT PARAGRAPHS.

—A new wax of value has been found in the bark of the ocotillia, a thorny plant of Mexico.

—A Nevada court held that a man who had five dollars in his pocket and his board paid for a week ahead is "a capitalist" within the meaning of the law.

—For truly deep feeling let me call your attention to a negro waiter who has to stand by while the hotel guest whom he is serving eats watermelon.—*Utica Observer.*

—One cause of the throat and lung trouble in this country is the fact that all of us sing so much and so sweetly. Neither the throat nor the lungs were intended to stand such strains.—*Detroit Free Press.*

—Sweet nuisance—"No; the scene of 'The Mikado' is not laid in Ireland. It isn't pronounced that way, anyhow. See here! Ain't you the girl that asked us if ragout was the French for putting on your best clothes?"—*Boston Post.*

—Enraptured young woman, gazing upward (to young newspaper man)—What a wonderful thing is space! Do you ever contemplate its immensity? Young newspaper man—Indeed, I do. I have a column of it to fill every day.—*N. Y. Sun.*

—It is reported that the maple, heretofore a healthy tree, is dying of a mysterious disease. This is nature's way of removing what is no longer of use, since dealers in "maple sugar" now sell a compound composed largely of the settling of molasses casks.—*Boston Traveller.*

—Verasopht—You are looking charming to-night, Estelle. Estelle—Charming is too cold a word. Verasopht—Then I'll call you "lemons." Estelle—Lemons, sir! Do you mean to insult me? Verasopht—My darling, you do not read the papers or you would know that lemons are very, very dear.—*Philadelphia Call.*

—A California chap has caused the arrest of two young ladies, who, he alleges, waylaid and robbed him. As he is a dude who has neither money nor brains, it is difficult to decide what they could steal from him. Perhaps they wanted to measure his head so they could get a pattern for a pincushion.—*Newman Independent.*

—"What fine evenings these are for studying natural history." "Yes." "Last night about sunset I was struck by the similarity between my six-year-old and the house-flies. I was trying to drive the flies out of the house and coax the boy in. They all moved at precisely the same rate of speed and with just the same amount of dodging.—*Chicago Tribune.*

—"My dear Mr. Fitzsniffle, Miss Jones and I have had quite a discussion and we have agreed to let you decide. Which is entitled to the palm of excellence, Keats or Shelley?"

"Well, weally, Miss Brown, I would rather not undertake to decide that question. My acquaintance with both the gentlemen is very limited. The fact is, they don't belong to my set, you know.—*Milwaukee Sentinel.*

THE JONES FAMILY.

Sally Ann's Account of One Day's Tribulations.

What Came of Jeremiah's Leaving the Gate Open—Why the Members of Two Households Are Not on Speaking Terms.

One morning in July I had to bake bread and churn, besides doing all the other housework, so I put the bread into the stove oven, and took the churn and set it down under a big oak tree that stands in the back yard.

I had just commenced working the churn when I saw Jeremiah pass through the gate into the barnyard.

"Jeremiah," says I, "you have left the gate open."

"Never mind," says he, "I'm coming back in a minute."

I didn't think any more about the gate then, but just as I was ready to take out the butter, I happened to look over into the potato patch, and there was a hog rooting up the potatoes.

I called "Jer—e—mi—ah!" as loud as I could scream, but all I heard in reply to this patriotic appeal was the word: "Jer—e—mi—ah!" echoed back from the barn.

My eyes wandered around over the landscape in search of my absent husband, and finally beheld him about a quarter of a mile away, seated on the top rail of a fence in the shade of a large cottonwood, talking to Bill Jinkins, who was in the lane on the

other side of the fence, burdening the back of an old horse that I always called Bonaparte, not because he was an uncommonly ambitious animal, but because the greater part of him was composed of bones.

I am well acquainted with both men, and I knew that there was little likelihood of Jeremiah returning to the house for the next two hours, so I reluctantly left the churn and went to the rescue of the potatoes. As I started I called the dog. Tige had followed Jeremiah, and knowing that he had plenty of time had gone to sleep in the shade of the cottonwood, but as soon as he heard me call him he started on the run. Jeremiah heard me at the same time, and slid down off the fence, and sauntered leisurely toward the house.

A hog can always see if a gate is left open when he wants to get into mischief, but never when you want to drive him out. Five times that four-footed quadruped and myself revolved around that potato patch at a speed that would have started the perspiration on a living skeleton in January, but when we passed the gate the sixth time, the brute struck up toward the house, and he and Tige met and had a wrestling match in the butter and buttermilk where I had left the churn. The milk-house door was standing wide open and I made a rush for it, but before I could reach it I saw the hog dart through it, followed by Tige. I heard a tremendous squealing and tear-around in the milk-house, and pretty soon Tige came leading the hog out by the ear. I looked within, and if I ever saw destruction I saw it there. For a moment I forgot everything but the sad spectacle before me, but—

> "Sunk in self-consuming anguish
> Can the poor heart always ache?
> No, the tortured nerve will languish,
> Or the strings of life must break."

And fortunately I was aroused from my sorrowful meditations by the voice of Jeremiah exclaiming as he came around the corner of the house:

"What's all this row about, Sally Ann?"

I replied to Jeremiah's question by giving him a very forcible lecture concerning his carelessness, then I turned around and went into the kitchen where I found my bread burnt as black as a coal. I had just taken the bread out of the stove, when I heard some one knock at the door.

I wiped the perspiration from my face, and, obeying the summons, found myself face to face with Mrs. Gumbrel, the worst gossip in the county. I felt like shutting the door in her face, for I was sure that she had heard the close, if not the whole, of my lecture to Jeremiah. I tried, however, to act as if nothing unusual had occurred.

"Good morning, Mrs. Jones," said she.

"Good morning, Mrs. Gumbrel," says I.

"Won't you come in?" says I.

"Yes, I'll come in for a minute or two," says she.

"Will you take off your bonnet?" says I.

"Yes," says she, "I'll take it off while I stay, for I can cool better with it off."

She took off her bonnet, and I knew then she had something to communicate before she left, and I resigned myself to endure her company until she was ready to leave. I didn't have to wait long, for she was anxious to unburden her mind.

"Did you hear about the picnic?" says she.

"What picnic?" says I.

"Why," says she, "Mrs. Brown is going to have the young folks over in their wood lot, next Thursday afternoon, to a picnic."

"Well," says I, "if there's anything on earth that I hate and detest and abominate and despise it's a picnic; but, of course, the young folks won't feel that way about it, so I must do some cooking for Jacob and David."

"O," says she, "your boys are not to be invited."

"How do you know that?" says I.

"Why," says she, "I heard Mrs. Jinkins tell Mrs. Green, that she heard Mrs. Brown tell Mrs. Sikes that she wasn't going to invite anybody but the most respectable families, and she named several families that she intended to leave out, and your family was one of them."

I was pretty well stirred up, anyway, and I didn't stop to think what I was saying, so says I: "I'd like to know what has made the Browns so mighty respectable all at once. May be my boys are not as respectable as Brown's boys, but I know that Jeremiah's father was never put in jail for hog-stealing, and my mother wasn't a washerwoman."

"La, Mrs. Jones!" says she, "was Brown's father put in jail for horse-stealing, and was Mrs. Brown's mother a washerwoman? Well, I declare! I have never heard of that before, but I always did think they was a kind of a low set, for all they put on such big airs."

I took a thought then about what I was saying; so, says I: "I didn't say whether they were or not. I said that mine and Jeremiah's wasn't."

She started soon afterwards, and struck a bee line for Brown's.

A few days afterward Jeremiah came home in a terrible state of anxiety. He said that Brown was threatening to prose-

cute me for slander, because I had told Mrs. Gumbrel that he used to steal hogs for a living, while his wife took in washing.

"That all comes of leaving gates open, Jeremiah," says I.

"I don't see what leaving gates open has to do with your letting your tongue run about business that don't concern you," says he.

"Well," says I, "I was so worried by the trouble that I wasn't responsible."

Jeremiah put on his hat and went out to the barn, and, for a wonder, shut the gate after him. I sent the following note to Brown through the post-office:

"Mr. Brown: I'm not afraid of your prosecution, but remember that you are a candidate for Sheriff, and if I hear any more of your gab I'll tell all I know about you."

I never received any reply to that note, and I suppose Brown must have been guilty of some meanness that he thought I knew about, for I heard nothing more of a slander suit.

The families of Brown and Jones, however, have not been on speaking terms since.—*Toledo Blade.*

NEEDED A CHANGE.

A Brief Equestrian Experience—He Spent His Vacation in the Country.

My doctor said I needed a change. He told me that I was sitting around too much; that in my burning desire to impart my stores of wisdom to my fellow-beings I was sticking too close to my desk. He said I needed a vacation: that I ought to go to the country and rough it.

I asked him if he didn't think I would find it rough enough down at Coney Island, but he said the beer that wasteth at noontide and the dance that slayeth at midnight were altogether too frequent down there.

So I went right out into the wilds of New Jersey, where there are more wilds to be had for the money than anywhere else I know of.

And when I had been there two days the farmer's son grasped the fact that I wanted to rough it. I told him I didn't care to go

as far as running myself through a hornet's nest or a thrashing machine at first; a little mild excitement would do to begin with. So he suggested a bareback ride.

I told him that was just what I wanted. I didn't know what it was, but I was not going to give in to a mere boy like him.

So he went into the barn and brought out a tall, narrow horse, and told me to get on. I didn't say anything, but I expected a great deal.

I got on and he mounted in front of me to keep the horse going. You may think it strange, but I became prejudiced against bareback riding as soon as I got on that horse; he was so tall and so exceedingly narrow.

Well, the farmer's boy started him, and then I thought the earthquake had come. The way in which the summit of that horse endeavored to penetrate through my spinal column to my soul was something remarkable.

I told the boy there was no hurry. I did not know where we were going, but I said we would get there soon enough if we let the horse walk. But the boy was game and kept the animal on the jump.

Then I said: "My son, my bareback riding terminates right here!" And I rolled myself off the starboard side of that horse and struck on my head in a wild blackberry bush. I went home with a nose full of briars and an accumulation of raw experience that would have been worth its weight in gold to me—if I could have realized on it.—*Philadelphia News.*

The Englishman as He Is.

"Adam? What's his other name?" asked Mark Twain in reply to a railway carriage bore who had been pestering him for his opinion of Washington, Lincoln and other heroes of the Republic, and in despair at his ignorance wound up with: "Stranger, have you heard of Adam?" So a New York clergyman tells this story as being part of a conversation held by him within three years with an Englishman to whom he pointed out General Grant's residence in New York. The Englishman asking; "What name?" and seeming to obtain no further light when it was repeated to him, the clergyman said: "Of course you know of General Grant. He was our President for eight years, ending in 1877." "Ah," remarked the Englishman, still with no evidence of recalling a fact previously known. "Then, too," pursued the clergyman, "he was a great General, and was in command of a million of men at the close of our war. You remember our late war, of course." "Well, no," was the answer; "beg pardon, but I have just arrived in this country, and was so long at sea that I have not heard the latest news. I was at sea sixteen days, really!"—*N. Y. Sun.*

Far Fetched But Good.

A Tennessee young man recently sent a fervent note to his girl, asking her to elope. The old man, however, guarded her so carefully that she was unable to do so. But she managed to send him a nice muskmelon. The "cantelope" told him just how matters stood.—*N. Y. Tribune.*

FOR OUR YOUNG FOLKS.

THE ANT.

The Wonderful Intelligence and Skill of This Remarkable Insect.

If you have ever had your head examined the phrenologist would tell you that it was a very nice thing to have a good big head. But somebody else might repeat to you the well-known couplet:

> "Little head, little wit—
> Great head, not a bit!"

But how is it with the ants, who have such small heads and great wits?

There is nothing on earth, except man, that can surpass the wonderful devices of those heads, no bigger than if they belonged to so many pins.

Watch how they build their tunnels and cover them in like so many railroad engineers! See how they stop every now and then to study out their plans; how they consider all obstacles and avoid them; how they use every leaf and stick and straw to make a wall or roof to their galleries! But who is the foreman, or "boss," as men sometimes say? A new plan is thought of, he goes to work upon it, the others soon adopt the improvement and help the skilful inventor. They are all as busy as possible, and yet they work always on one common plan.

The Queen lays her eggs, the workers at once take care of them, running with them from place to place, and always with some end in view; and when the baby ants come, if you could look inside any busy little ant-hill, with the rising of the sun, you might see these careful little nurses (for they have real nurses for their children just as we do), who live in the upper stories of that wonderful house, very early astir and on their way to call their young masters from down below.

And then you would see them tapping them with their antennæ, which look like horns, as much as to say: "Come, children, time to get up; don't you know the sun is up?" and thus waking them they carry them through the long galleries that lead to the top of the ant-hill, and lay them outside very carefully that the bright rays of the sun may warm them and help them to grow. And they are very careful, too, not to leave them in the heat of the sun after the early morning. As soon as the air gets too warm they carry them into the rooms near the top where the rays have penetrated, and where the warmth can still reach them, and again further below if they think it best.

But the older ants can bear the sun, and like to feel its rays; and though they are very industrious, yet as they begin to work with the dawn they take a little rest, as people do sometimes in the heat of the day, and often lie heaped together in the sunshine.

Just as long as the baby ants can not run alone they are dressed like the young children in the East, or like the babies which the Indian squaw hangs behind her back, or on a peg in her tent. They have natural swaddling clothes, for they are wrapped up so tightly in their larval covering that no legs can be seen, only a head and wings, traced through the transparent skin in which they are folded. Of course you know the baby ant begins life in an egg, which, in a couple of weeks, is hatched, and then the nurses take them in charge, as we have said, to keep them clean, to brush and comb and shampoo them, and very soon they are ready to begin the next change.

If you could only look at these tiny insects (the nurses) through a microscope, you would see on their legs some very fine soft hairs, which they use as brushes, and a spur close by, which, if needful, we may imagine can do the work of a comb. And the shampooing is done by working about, kneading and distending the thin skin which covers their limbs until it is ready to open and let them go free. Then these baby ants wind a curtain of silk around their own little bodies and go to sleep, to wake up full-grown ants, without "guide, overseer and ruler," except the tender services of the nurse. Isn't it wonderful that these little ants can do so much for themselves? so exactly right, and in such order, too, each one knowing its business and doing it just as if they had a commander to order their every movement.

No one ant seems to have any personal property, neither house, stores, nor eggs. Everything belongs to all, and yet, while the whole world is wrapped in a lazy content in the summer weather they are always laboring very hard for the whole community. And if, perchance, their little citadel is impaired, as is often the case, they repair the ruin with the utmost neatness and dispatch.

Did you ever see an ant seize a pellet, or a stone, and drag it backwards up a steep incline, using its hind legs to cling on to rough places, often tugging away at a weight far greater than that of its own body? Some hoist aloft in their front arms, as it were, a stick or piece of grass, two or three times its own length, moving it forward as if in the air. And when they build, each addition is put in what each considers the best place, but the general form of the dome grows into a curiously regular diminishing curve, as if every one bore the architect's elevation in his pocket.

Some of these wonderful workers make desperate attempts to move heavy beams of wood, but after superhuman exertions give up the attempt when clearly beyond their strength. If a thing, however, is within the bounds of possibility, it is surprising with what obstinate pertinacity they will return to a pellet which has rolled away from them, even to the bottom of the hillock, again and again, and begin once more to haul it up, tugging, lifting it over stones and under sticks, tumbling over with their burden on the other side of an obstacle which they had scaled, and lying for a few seconds quite exhausted, yet never leaving hold of their burden, and setting off undauntedly as soon as they recovered breath. Occasionally two or more will lend a helping hand, but as a general thing they prefer to work alone. The hand of man is considered a miracle of art, but what of the ant's six prehensile feet, indifferent organs as they seem comparatively, to hold or pull or lift or even to cling with!

But what will you say, apart from their building ability and tender care over each other, the almost moral elevation which is their most extraordinary quality, whereby the good of the individual is given up to that of the community, if I should tell you of one with still more remarkable powers, and this is the agricultural ant of Texas? You will hardly believe the story, and yet it is vouched for by eminent naturalists and others who have made them their study. This ant is one of the brown species living in families, occupying mounds or cities, as they are called, set upon artificial hills three or four feet in diameter. Around these mounds the ants smooth away the surface for three or four feet further in all directions, and make a sort of farm of this cleared region. Here they are said to actually plant the seeds of a certain grass of which they are very fond, keeping the crop clear of all weeds and grasses meanwhile. Then they harvest the seeds, clearing the chaff away, and store the rest for winter use. They tend these seeds as carefully in winter as they tend their eggs and grubs, drying it when damp, and actually throwing it away when spoiled. Their harvest-time is in November, and after harvest they clear away the stubble and leave the surface bare for the next year.

How incredible this seems! and yet we are not surprised at anything we hear about these wonderfully knowing little creatures.

No wonder that the ant has been held up as a model of wisdom and industry. Solomon declares the ant to be "a people not strong, but exceeding wise, who prepare their meat in the summer." But the highest praise it has received is from Mr. Darwin, who says that "the size of the brain is closely connected with higher mental powers, and the cerebral ganglia of ants is of extraordinary comparative dimensions." The fineness of the quality seems to make up for absence of quantity. "The brain of an ant," another naturalist has said, too, "is one of the most marvelous atoms of matter in the world, far more wonderful than the brain of man."—*Mrs. G. Hall, in N. Y. Observer.*

BEING A CAT.

Lucy May's Wish, and How It Was Granted—Not So Nice as She Thought It Would Be.

"Yes, mamma, I do; I just wish I was a cat, and then I would not have to get up in the morning, but would sleep just as late as I wanted to. These hot days, it is so hard to get up so early and wash and dress, and then have to help do the work, too. Now, if I was a cat I would sleep till I got hungry, and then when I had had something to eat I would find a good place and go to sleep again," said Lucy May to her mother. Lucy's mother had told her she must take care of her little sister while she made the bread, and Lucy was cross about it, as you can see from what she said to her mother.

"Well, Lucy, put Bess down on the bed, and go away and be a cat, if you wish to; but you must go out of this room: you know I do not let kitty be near Bess for fear she will hurt her; go out in the shed where the old cat is, and have a nice time."

Lucy looked at her mother and saw she had to go, and she took her bonnet and was just going out of the door when her mother said: "What are you going to do with that clean bonnet? That is my little Lucy's bonnet; a cat does not want a bonnet."

Lucy did not know what to say, but hung up the bonnet and left the room.

She went out and found old kit, but she was sound asleep under the shed, and would not play with her.

She then thought she would like to take a walk in the garden, and get up in one of the large apple-trees, as she had seen kitty do. Lucy got away up in the top of the tree and found it hard work to hold on, but she had no fear—cats did not fall. She got a big red apple and thought how nice it is to be a cat. But just then she saw a little young bird not far from her. She tried to catch it, lost her hold on the tree and fell to the ground.

Her arm was much hurt and her pretty dress was torn. She sat there on the ground and had a good cry; what would her mamma say about her new dress? But she was in so much pain from her arm, she did not care so much about the dress.

When her arm felt better, she said: "I have been a cat as long as I want to, it is not so nice as I thought it was. I guess I will go and play with Bess for awhile."

When she got to the house she found her mamma and Bess just going out for a ride.

"Oh, mamma," said she, "can't I go with you?"

"Do you think I would take a cat out riding with me? no, indeed, I would not. Here is your pan of milk, I will set it on the ground so you can drink it. Come, Bess, let us go for our ride now; we are not cats, are we, dear? So we can take a ride, and then bring papa home with us," said Lucy's mamma, and off she went, and left Lucy at home.

How she did cry! Poor child, by this time her arm hurt her so much, she thought it must be broken.

She went into the house and up to her own little room that her mother always kept so nice for her, and cried and cried till she fell fast asleep. How long she had been asleep she did not know, but at last she heard her mother call her; she got up, went to her and said: "Oh, mamma, can't I be your little girl again? I don't want to be a cat; I just want to be your little Lucy once more; and oh, mamma, I fell and hurt my arm; it does hurt me so much."

Her mamma took her in her arms and said: "I thought my little girl did not really want to be a cat, but I thought I would let her try it and see how she liked it. Let me look at your arm. Why, to be sure your arm is hurt, but not very much, I hope. I will tie it up and put some water on it, and it will be all right in a day or two. I hope, Lucy, you will be a better child after this."

"Oh, yes, mamma, I will," said she, and she was a much better girl after that, and tried to help her mother always, and tried never to be cross about it, ever again.—*School and Home.*

—Mexico has over thirteen thousand miles of telegraph line.

AN UNDESIGNING WIDOW.

Beguiled by the Machinations of Her Thirteen-Year-Old Daughter.

The "evidences of design" in the human widow have been so much dwelt upon, in fiction and satire, that it is a relief to turn to a tale in which her essentially simple and trustful nature is set forth. Such a tale was told touching a widow in Easton, Penn., who was beguiled, by the machinations, not of man, but of her own female child, aged thirteen.

The child, as our readers have noted, was in the habit of visiting a widower's large brick house, presumably to play with the widower's children, when it occurred to her to extract money from her own mother, under pretense of making love to her in the ostensible behalf of the widower, in letters "written with a lead pencil" by herself. The inventions she employed for this purpose were such as would naturally occur to a person of her years and inexperience. She wrote, in the name of the widower, for fifteen dollars to help pay the men in the widower's employ, for money to buy the widower a turkey, to pay the widower's gas bill, and to pay for the keep of the widower's horse. These crude demands for money were accompanied by professions of attachment not less crude, such as the child-like device of addressing the widow as "My Dear Wife."

These are the devices which a child of thirteen would naturally adopt. The wonder is not that the child adopted them, but that the mother was taken in by them. Her first husband must have been a prosaic and literal soul whose speech was the transparent vesture of his thought, and she must have rashly generalized from him to his sex. But what a fund of simple faith in mankind must this undesigning widow have accumulated when it could be drawn upon with success and without limit by such artifices as these.

Her daughter did not take after the widow. She was the confidence child of a confiding mother. We should not even criticise the crudity of her applications for money since they were successful. Like authors whose productions are sneered at by the critics and devoured by readers, it must be admitted in her favor that she knew her public and adjusted her means to her ends. Of the principle of fraudulent finance she had a precocious mastery. It is the same principle employed by Ferdinand Ward and Mrs. Howe, of Boston, and is involved in the familiar process of "priming a pump" or administering a driblet in order that a copious stream may flow. She acknowledged in the name of the widower in the form of casual clocks and occasional vases the widow's bounty, and upon one occasion, as an unimpeachable guarantee of good faith, produced a plain gold ring, which, it may be assumed, was the ultimate object of the widow's investment. In this manner she gradually extracted from her mother $300, and without doubt rejoices in a larger collection of pink ribbons and cheap jewelry than any other child in Easton. The simple faith of the mother's character shines the more by contrast with the guile of her daughter. So free is she from the subtle and scheming character falsely ascribed by literary persons to the estate of widowhood that she is plainly an easier prey for male deceivers than her precociously accomplished child.—*N. Y. Times.*

THE HORNET.

Description of an Interesting Insect—A Creature Whose Advent Is Marked by Stern Reality.

The hornet is an abridged edition of bloody murder strained through a rag.

He bears the same relation to John L. Sullivan that condensed milk does to a cow.

In constructing the mule-end of the hornet, Jove sharpened a streak of lightning on the cheek of a Chicago drummer and dipped it in the gall of a campaign lie.

It will not do to confound the hornet with the bee. The hornet is clad in the mantle of a more mysterious individuality, and on his brow rests a diadem of baleful gloom. He has a oneness of character that is unknown to the bee.

The bee is not without a touch of sweetness and light, but the sweetness of the hornet seems to have been spoiled in the making.

The coming and the going of the bee are mellowed by poetic associations. She is proverbial for industry. The victim of the bee can salve his hurt by quoting Watts.

It is not thus with the hornet. His coming is a stern reality, and his going is lost in the murky atmosphere of profanity, if not more so.

The hornet is the cowboy of the insect world:

The offensive partisan of entomological wingedness;

The winged essence of volcanic energy;

The breach-loading paper wad of viewless fire.

On dainty wings of lightning he reels off an infinitesimal coil of gigantic pain, and in his pistol-pocket he carries a red-hot stove.

A political discussion is the supreme aggregation of explosive enthusiasm;

The ten-strike of an angry mule is a supermundane earthquake;

The yowl of a tom-cat is tangled confusion of wall-eyed sound;

But the caress of a hornet is brimstone fire with a stick in it.—*Chicago Ledger.*

—The Pike's Peak Railway, which is expected to be in operation this year, will be the most notable piece of track in the world. It will mount 2,000 feet higher than the Lima and Oroya Railway in Peru. It is now in operation to a point over 12,000 feet above the sea level. The entire thirty miles of its length will be a succession of complicated curves and grades, with no piece of straight track longer than 300 feet.—*Chicago Mail.*

—An eminent physician thinks that men should not run after they reach forty.—*Chicago Herald.*

MISCELLANEOUS.

—Nearly 6,000,000 shad have been hatched at the Connecticut State hatchery this season.

—Two full-grown robins were seen feeding a third bird at Monticello, N. Y., not long ago. The bird so fed was caught and was found to be a blind robin, probably of the same brood.—*N. Y. Post.*

—Some of the English newspapers printed on machines that fold and cut the sheets, report losses of subscribers, who insist on the privilege of cutting their own newspapers.

—Five old gentlemen of Manchester and the neighboring towns on Cape Ann came together the other day and found that their "united ages" made up the goodly total of 428 years.

—Bald Mountain, near Stafford Springs, Conn., 1,750 feet high, is decided to be the highest point in the State of Connecticut, after much dispute. It commands a view of all eastern Connecticut and a part of Massachusetts.

—A compositor who died in the City of Mexico a few days since was one-armed but very expert, and held his stick in the stump of his left arm. Years ago he had a trial of speed with another printer, and losing in the race became enraged and had his left arm cut off.

—General Gordon had many medals for which he cared nothing. A gold one was given him by the Empress of China, but it suddenly disappeared, no one knew where or how. Years afterward it was found out by a curious incident that Gordon had erased the inscription, sold the medal for £10 and sent the sum anonymously to Canon Miller for the relief of the sufferers from the cotton famine at Manchester.

—Railway travel in India has many curious features. The Brahmins, who objected to the innovation on the ground that pilgrims would travel by rail instead of on foot, are now using the new mode of travel themselves. They even occupy the same cars with ordinary mortals, and thus a leveling blow has been struck at caste assumptions. In this way the railroad is of great social as well as commercial importance.

—A Maine paper says: There is preaching in a certain rural town in Maine a gentleman of fine culture, of rare literary attainments, of great general information, of profound religious experience, of original powers of thought and expression. He receives a salary of eight dollars a week. He has a voluminous library, is a walking encyclopedia—is the village factotum. He is college bred and is the best definition of a Christian—a perfect gentleman."

—From a Michigan Supreme Court decision in the case of sharpers who had swindled a countryman by a familiar card trick: "We do not think it profitable to draw overnice metaphysical distinction to save thieves from punishment. If rogues conspire to get away a man's money by such tricks as those which were played here, it is not going beyond the settled rules of law to hold that the fraud amounts to stealing."

—The two were walking together in the early evening, and as they passed the illuminate soda fountain and listened to the tinkling of the water there was a longing glance on her part and a decided inclination to go straight ahead on his. At last she said: "Algy, dear, you do not like soda water." "I never drink," said he. "I signed the pledge at mother's knee." "Then we shall have to make it ice cream." "Never, my dear. Ice cream is composed of acids, glucose, gelatine, poisonous flavors and frigidity. It is sure death to our family." "And you wouldn't sacrifice yourself for my sake?" The effect was instantaneous. She had the cream.—*Hartford Post.*

RARE COINS.

Articles Which are Sure Sometimes to be Worth More Than Their Nominal Value.

A Bolivian dollar or an Indian rupee, or a half-sovereign after very hard usage, may possibly deteriorate in value. But save under exceptional circumstances, there is no getting more for a crown, or a mark, or a Napoleon, or a gold eagle than the sum inscribed on its face. Even the Mexican dollar has ceased to be held at a premium, and gold is still plentiful enough for the time to be far distant when, as used to be the case so far as guineas went, it will take thirty shillings to purchase a sovereign. But when the tyro in numismatics reads the prices which some old English coins brought, he may be pardoned if his ancient faith in the determinate worth of the currency is seriously shaken. We hear on every side of hard times and the depression of trade. Yet the merchant whose balance is on the wrong side of the ledger must experience a searching of heart when he is told that there are plenty of people ready to give £40 for a penny a thousand years old, £30 for a half-crown of Queen Elizabeth, and £255 for a half George noble of Henry VIII., which some years before had been bought for the sum of three and sixpence. A milled three-farthing piece brought over twenty guineas, and even a bad shilling of Edward VI., instead of getting the "utterer" or anybody else into trouble, was eagerly purchased for over £11. It is clear, therefore, that whatever may be the case in other branches of commerce, the traffic in this costly kinds of goods is much brisker than the humble collector might desire. Of late the holders of pictures, enamels, pottery, and similar kinds of brittle ware, have become rather alarmed over the diminished prices which such articles have brought in auction rooms. Not unnaturally the scarcity of money among those who were a few years ago the rich people of England has been set down as the cause of this "shrinkage in value." No doubt this is to a limited extent true. But when the collector can afford to gratify his taste in the expensive fashion above shown, the optimist is justified in clinging to his fancy. It must be consoling to him to note that £20, £30 and £50 were eagerly bid for objects which are in themselves of only a modest intrinsic value, and which entail in their safe-keeping an amount of anxiety that is dearly repaid by the pleasure of possession.—*London Standard.*

THE REPUBLICAN.

OAKLAND, MARYLAND.

SATURDAY, SEPT. 19, 1885.

ATTENTION, REPUBLICANS.

The Republican voters of Garrett county are requested to assemble in primary meetings in their respective districts, on

Saturday, September 19th.

to select five delegates from each district to attend the county nominating convention at Oakland, on

Tuesday, September 22.

to nominate a candidate for State Senator; two candidates for members of the General Assembly; one candidate for Clerk of the Circuit Court; one candidate for Regisfer of Wills; oee candidate for Sheriff; three candidates for County Commissioners; one candidate for County Surveyer, and to select three delegates to the State Convention to meet in Baltimore on the 24th instant, three alternates to said delegates, and three members of the State Central Committee for Garrett county.

The delegates are requested to come prepared to select three persons to act as a district committee for their respective districts.

JAS. A. HAYDEN,
Chairman County Committee.

Only a short time ago Hon. A. P. Gorman and Mr. M. Bannon were very bitter enemies. They passed each other by without even speaking. Mr. Bannon searched his vocabulary in vain for an epithet mean enough to apply to Mr. Gorman. There are other Democratic bosses who have been at the outs also. It seems, however, that these wily gentlemen have at last discovered the fact that a house divided against itself cannot stand, not even if it be a clipper-rigged and iron-clad Democracy.

The same gentlemen discovered further that, whilst they were making faces and calling each other names, the grandmothers' fund was gradually diminishing; and, worse still, many of those who had been only privates in the grand old party aspired to leaderships and were disposed to set up house-keeping on their own account. At this juncture Hon. A. P. Gorman, notwithstanding the unfavorable circumstance to which we have refered, desires to be re-elected to the U. S. Senate. He, shrewd politician that he is, sees it is necessary to harmonize the various elements in his party. So the bosses kiss and make friends and for a time all is as calm and serene as a May morning. The bosses then decide to boom Postmaster Veazy for the mayorality of Baltimore, but that failed and Gorman is likely to be beaten in his stronghold. Latrobe has discovered that the bosses don't want him, and he is on the war-path.

Then, down in Anne Arundel, where Bannon was supposed to be monarch of all he surveyed, disaster has overtaken the bosses. Dr. George Wells has buckled on his armor and carried the county against Bannon and Gorman combined. There is war in Anne Arundel. Not satisfied with this, the anti-ring men turn their eyes to the mountains of Allegany, and at one blast of the anti-canal bugle the followers of Walsh come pouring into the primaries from the highways and the byways until the county is carried against Gorman. And there is war in Allegany.

We might go on in this strain, but enough. What does it all mean? It means that a part of the Democracy is tired of ring rule and bossism. It means also that that party is torn by internal dissensions and strifes. It means that a large number of voters in that party are ripe for revolt and mean to throw off the yoke at all hazards. What is true of the party in other counties and in other parts of the State is true of the party in this county, and if the Republican party will nominate a good ticket in Garrett county we can lick the Democracy out of its boots, and don't you forget it.

The bosses cry harmony, harmony, but there is no harmony. Haman will never be happy while Mordical, the Jew, sets on the King's gate.

Politics in Allegany.

CUMBERLAND, Sept. 13.—Since the Republican Convention met, which nominated a full county ticket, on Thursday last, there has been considerable canvassing among the Democrats as to whom they will place at the head of their ticket for the offices of clerk of the Circuit Court, state senator and sheriff. As the friends of Hon. William Walsh succeeded in electing thirty-nine delegates out of the seventy-five to the county convention on Tuesday last, it is almost certain that they will be able to control the county primaries on Saturday next, when they will be aided by each prominent candidate for the positions of clerk, senator, sheriff, House of Delegates, county commissioners and county surveyor. The only name that will probably go before the convention (in case the anti-canal wing of the party carry the primaries) for the office of clerk of the Circuit Court, will be that of Colonel Horace Resley, who is now serving his second term as clerk of the City Council. For the office of state senator the Walsh party will unite upon Richard T. Semmes, who has for many years been a most active leader against the canal party, and who was considered by many the strongest candidate who could have been nominated against Hon. Henry W. Hoffman two years ago for the office of associate judge. After the committee on credentials had admitted the delegation holding credentials from Lonaconing district on Tuesday last, and had refused to admit the contestants, who were canal delegates, it was Mr. Semmes who offered the motion to refuse to accept the report and to allow each delegate a vote. Dr. Carr refused to put the motion, so as to allow each delegate to vote, when the thirty-nine immediately withdrew while a delegate from Old Town was about to appeal from the decision of the chair. If Walsh controls the convention on Tuesday week next, Mr. Semmes will certainly be nominated for the State Senate. If the canal party controls the convention they will probably nominate either Daniel Annan or Thomas G. McCulloh.

For the House of Delegates there are a host of candidates on both sides of the factions. Among the number are John T. Gannon and George W. Shutz, of Westernport; John McLaughlin, of Orleans; John O Hanley and John Ryan, of Lonaconing; Albert Holle, of Frostburg; Dr. T.B. Robesson, of Flintstone, and Messrs. J. Semmes Devecmon, John K. White, J. W. S. Cochrane, A. Beall McKaig and a host of others from the four Cumberland districts. For county commissioners there are also a host of candidates, among the number being James Willison, John Patterson, John Riehl, Will H. Shepherd, A. H. Daughtrey, John Kirby, Robert Christie, George Winters, Michael Naughton, Peter Phillips, Thornton McKenzie and others, representing every section in the county.

The Walsh delegates will demand to be heard before the committee of credentials in the state convention. Hon. Wm. Walsh will be their spokesman, and heads the delegation. A number of Democrats not delegates will also attend the convention, when there will no doubt be an earnest effort made to turn down the contesting delegation. There are various speculations in regard to the action of the convention, many being of the opinion that both delegations will be admitted to seats, allowing each delegate a half vote.

Hard Lines for the Bosses.

From Towson Journal (Straightout Dem.)

"Come, let us reason together!" Prudent politicians never take anything for granted in a partisan battle. Hard facts, bottom-rock certainties are sought for by all leaders who propose to win victory at the November election. And it is entirely proper to inquire if the counties of Maryland do just now proffer any assurance that there will be a Democratic majority in the next legislature.

On the Eastern Shore it isn't safe to bet on any counties except Worcester and Wicomico. Somerset seems to be at the mercy of the Prohibition fanatics. Dorchester is of strong Republican proclivities, and Talbot and Caroline are in the same boat. Kent never was to be depended upon for a Democratic victory. Queen Anne is senseless distracted over the "jury" or "lottery" method of making nominations, but may bob up all right. And Cecil county is quite likely to elect a Republican ticket if the Constable and Groome factions keep up their useless fight.

On the Western Shore there will be needed strong hands to secure in the legislature a Democratic delegation from Allegany, Garrett, Washington and Montgomery counties. Harford, Howard and Carroll are reasonably safe; but he is over sanguine who bets largely on Anne Arundel, Prince George, Calvert, Charles or St. Mary. Frederick county is firmly bound to her ebony idols. And the Gibralter of Democracy seems to be in Baltimore city and Baltimore county. In the city there is a possibility that the Third legislatiye district may be carried by Republicans. It gave the Cleveland ticket but 47 majority.

The Scramble for Nominations.

Hagerstown Mail, Dem.

It is with no boding of good to the party that we observe in so many of the counties and especially in the city such an unseemly scramble for nominations. The whole thing seems to be reduced to a "wild hunt" for office without any regard to politics, measures, fitness or availability. Nominations for the Legislature are being made, not with reference to measures or economies, but as to who shall be Governor, Treasurer or Senator; and so in local nominations in Baltimore—they are all swallowed up in one single thought whether they shall be Raisin, Slater or Morrison, or who among the bosses or managers shall have control in the councils. * * * In all the scramblings for nomination we have not seen a single reference to measures of government; to the economies to be practiced; to the abuses still to be removed; to the retrenchments that still can be made; to the payment of our debts; to the reduction of the onerous and oppressive taxes we are paying—but only as to whether this one or that one shall have this or that office, reducing, as we have before said, the whole political machinery to personal aims and object.

Slightly Disfigurd.

WASHINGTON, September 15.—Some days ago John Pope Hodnett, a professional labor man—that is, one who does the talking while others work—held a meeting by himself of the United Labor League and personally resolved that this alleged organization was opposed to the Civil Service law. To-day he obtained admission to the President's room and as Mr. Cleveland was passing around the line and reached him he said in a voice for all present to hear, "Mr. President, our labor league has adopted a resolution in favor of testing the constitutionality of the Civil Service law. Now, we want you to help us." Here John Pope stopped and smiled till he noticed that the President looked as if he suspected him of being a crank, when he grew red in the face and gave up smiling. The President said, "Well, what do you want me to do?"

"We want you," said Hodnett, "to give directions that the salary of one of the Civil Service Commissioners be withhheld until he has applied for a mandamus so that the constitutionality of the law can thus be tested."

"No, sir," said Mr. Cleveland; "no, sir, you don't get any help from me. I wish you to know that I am in favor of the civil service law. I want to see it succeed. I think you had better give that scheme up."

But Mr. Hodnett, who had long afflicted Washington with his vagaries, went out, and later was seen on Pennsylvania avenue distributing circulars calling a public meeting to denounce "the civil service humbug.'

A Furious Cyclone.

SPRINGFIELD, O., Sept. 8.—A terrible cyclone struck Washington Court House, a city of 4,000 inhabitants fifty-seven miles west of here, at 8 o'clock this evening and almost literly swept it from the earth. It came from the northwest and broke upon the town very suddenly carrying everything before it. The tornado whirled up Court street, the main business thoroughfare and ruined almost every business block on it. Hardly a priytae residence in the town escaped, fully 1,400 buildings going down. The Baptist, Presbyterian and Catholic churches all suffered the common fate. The Ohio Southern, Panhandle Narrow-Gauge and Midland railroad depots were blown to smithereens and every building in the vicinity was carried away, making ingress and egress almost impossible, as every wire within a circle of two miles is down.

CINCINNATI, O., Sept. 8.—To-day this prosperous town is a mass of ruins. A heavy rainfall began about 8 o'clock last night. Shortly after the rain began the wind came with a terrifying sound. Its work was almost instantaneous. People say it was over in two minutes. The fierce roaring of the terrible tornado, the crashing of broken and falling buildings, the sharp flashes of lightning, the rolling thunder and the pitiless rain, combined to produce sensations of the most horrifying character.

With daylight came a most disheartening spectacle. The fair town of yesterday was torn and wrecked in disordered heaps; the streets well nigh impassible from trees and parts of houses. Worst of all was the sight of the poor, who had lost all and who had no place to lay their heads, and who wandered hopelessly about. The people whose houses were not ruined began at once to care for their unfortunate fellow-sufferers, but the farmers soon began to pour into town, drawn by curiosity, but at the same time bringing with them substantial aid for the destitute.

The loss on buildings alone is about $175,000. Among the incidents of the disaster was the blowing of the house of W. Thorp entirely to pieces or out of sight. The three occupants were dropped across the street, with only Mrs. Thorp severely bruised. The others had but slight hurts. The house cannot be found.

The killed are Mrs. Mollie Jones, Edith Floyd, Ella Forsha, Jennie Forsha and Flora Carr. Herbert Taggert, James Jackson and John C. Van Pelt are thought to be fatally injured. Among the seriously injured are Mrs. W. P. Irving, B. Hess, Milton Hyer, Jas. Snapp, struck by a falling telegraph pole; Mrs. W. Thorp, blown across the street and badly injured; Miss Lulu Chafton, lower portion of body crushed; Chas. Mercer, badly injured; Mrs. James Bench and Miss Shots.

State of Trade.

NEW YORK, Sept 12.—The condition of general trade, as reported to *Bradstreet's* by special telegrams, is quite as favorable as that mentioned at any previous date within seven weeks past. The steadiness and strength manifested by the demand for dry goods and for woolen fabrics have encouraged many dealers at eastern distributing centers to look for steadiness in the movement. It may be added that the gain in the demand for pig iron tends in some degree to inspire the confidence manifested in various quarters that the turn in the tide has at last taken place, and that the increase in the consumption of staple commodities may preserve a steady growth. It is a welcome sign that no boom is discernible in any direction. The increased distribution of goods is formed of a larger number of moderate-sized orders and in many instances of unexpected duplicate demands.

Eastern agents and jobbers of dry goods continue to do a fair business, but as retailers are fairly well stocked up sales are not as large as they have been. Additional brands of brown and bleached cottons have been advanced in price. Boots and shoes are in much better request, but prices are low. The features of the general situation are, however, not uniform. Anthracite coal and wheat and Indian corn and flour are all suffering from extremely depressed prices and a slack demand. These must be supplemented by reference to quite severe railway competition and wars of rates south, northwest and east from Chicago. With wheat coming to sea-board at 9c per 100 pounds to New York, and 6c to Baltimore, there can be little that is favorable inferred as to prospective railway earnings. The prices of the leading cereals continue low from causes now well known. Provisions and hog products are dull and steady. The farmers at the Northwest are refusing to market their grain at existing rates, and in many instances are preparing to hold it until quotations offered are much higher. Petroleum is only moderately active and is depressed to some extent by reports of renewed activity in the oil regions. Grocery staples continue to move slowly, sugar alone being active and higher. Dairy products are in slow demand.

Mexican Grasshopper Plague.

PASO DEL NORTE, MEX., Sept. 14.—To add to the distress of the fever-infected district of the State of Vera Cruz, it is learned from wealthy residents of Vera Cruz, who have fled from that fever stricken city, that the State of Vera Cruz is swarming with myriads of grasshoppers which are devouring the crops and everything green. They are similar to the Kansas grasshoppers, but smaller, and sweep the country of every vestige of verdure, even to the tender shoots of the trees. The bean crop, the sole reliance of the poor population, is completely destroyed, which will entail great suffering upon that class. The grasshoppers appeared August 1st, and are rapidly spreading. They have appeared in other Southern States of Mexico, and the ravages are reported as equalling those reported in the State of Vera Cruz,

The Ohio Corn Crop.

CLEVELAND, O., Sept. 15.—The corn crop in Northern Ohio will be heavier than was hoped for. Early in the season the bad weather delayed planting and the cold rains retarded growth in May. The crop, while not up to the average, will, however, be quite satisfactory for these reasons. The weather at present is splendid for the developing process, and farmers say that the crop is now so far matured that the frost will not injure it. As yet there has been no damage.

Reform Outrage.

WASHINGTON, Sept. 24.—Among the clerks discharged from the Treasury last week was Mrs. Mary E. Kail, of Ohio. Mrs. Kail is a well-known lady of literary ability and author of several poems of merit. She is poor, and with her children depending on her salary for her living. The went to Auditor John S. Williams to see if her case was hopeless and asked him why she was discharged.

"Bacause you are an offensive partisan," was the reply, with the roughness and impoliteness characteristic of Mr. Williams.

"Was I not efficient and faithful, and was not my work satisfactory?" asked Mrs. Kail.

"Certainly. No complaints to make. You are simply put out because, as I tell you, you have been an offensive partisan."

"In what did my offenssve partisanship consist?" was Mrs. Kail's next question.

"You wrote a campaign song for the Republicans in Ohio," was the reply. "Good day."

Hon. A. B. Cornell, chairman of the subscription committee, has responded to a request that he give the public his idea of the form the New York Grant memorial should take. He proposes a library and a museum, all connected and embracing within one grand edifire and enclosure the following subjects:

First—A majestic column of appropriate design, containing a memorial chapel, within which shall be deposited the mortal remains of the illustrious dead.

Second—A library containing especially the writings of General Grant and of others concerning his military and civil administration and his travels; also a complete collection of publications concerning the late war; also upon American history.

Third—A museum for the deposit of relics and mementoes of the late civil war as well as our earlier conflicts, including specimens of implements of war of interest historically. The interior of the edifice might contain tablets bearing the names of the military and naval heroes of the country of recent and early periods.

The "Big Woods" of Minnesota well deserve the name, for they cover 5000 square miles, or 3,200,000 acres of surface. These woods contain only hard-wood growths, including white and black oak, maple, hickory, basswood, elm, cottonwood, tamarack, and enough other varieties to make an aggregate of over fifty different kinds. The hard-wood tract extends in a belt across the middle of the state, and surrounding its northeastern corner is an immense pine region covering 21,000 square miles, or 13,440,000 acres.

Fortune gives too much to many, but to none enough.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, Sept., 14, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 5@5¾ c. that generally rated first quality 4@5 cts; medium or good fair quality 3@3½ cts; ordinary thin steers, oxen and cows 2½@2¾ cts; extreme range of prices 2¾@5¾ cts; most of the sales were from 3¾@5⅜.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,103 head, against 3,551 last week and 3,215 head the corresponding week of last year, and the sales were 1,794 head, against 1,718 last week, and 2,189 head the corresponding week of last year.

The market has been exceedingly dull to-day, and continued for a longer time than for several weeks past. Prices averaged a full ¼c., decline as compared with last week. Tops showed less difference than any; but there were comparatively few of them, as there were also of the very commonest cattle. Medium and common grades were off ¼c., in most of the sales, and in a few, towards the last, the decline was greater. There were numbers left over unsold. Prices 2¼@5¾, with few at the latter price, and a fair number at and near the former; most sales 2¾@5¼.

THE SWINE MARKET.

Trade is moderately fair this week, with a small increase in the number of offerings. There is some improvement in the quality of the offerings, generally, but the hogs are rather too large for the wants of the butchers. Prices are a fraction off from last week, ranging now ot 5½@6¼c., for common rough hogs, and 6½@7⅜ for the better grades, with a few extra a shade higher. Prices same time last year. Grassers sold at 6@7c., and the better grades 8@8½, and extra 8¾c.

THE SHEEP MARKET.

Trade is dull, with less than half the number of receipts as compared with last week. There is some little improvement in the quality of the offerings, and prices are a shade better. There is no outside demand, and butchers are buying very slowly. Prices for sheep range from 2 to 3¼c., and for lambs 2½@5, few selling at the latter price; stock sheep $1.50@2.50 per head. Same time last year sheep sold at 3½@4¼c., and lambs at 3½@5½.

NEW ADVERTISEMENTS.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. Reference given when required.

ANDREW J. HARNE.

Oakland, May 19th, 1885.—1 y.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1885, and recorded in Liber W. H. T. No. 10, folio 271, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

WEDNESDAY, SEPT. 30, 1885,

at 11 o'clock, A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O. Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
9 5 4t Attorney for Mortgagee.

Order of Publication

Joel Wiland vs. Florissa Biddinger, Simeon Biddinger and James Bowser.

In the Circuit Court for Garrett county. No. 160 Equity.

The object for which the bill of complaint was filed in the above cause, was to have certain deeds therein mentioned set aside as fraudulent, and to procure a decree for a sale of the real estate conveyed by Florissa Biddinger and Simeon Biddinger to James Bowser, and to subject the same to the payment of the plaintiff's claim.

The bill states that in the year 1875 Simeon Biddinger was largely indebted to the plaintiff for work done and materials provided for him, the said Biddinger, and for board and clothes for the children of the said Biddinger, and that the plaintiff continued to furnish board for the children of said Biddinger up to the time of the filing of said bill.

The Bill further states that on the 25th day of June, A. D. 1878, he instituted suit in the Circuit Court for Garrett county, to recover from said Biddinger the amount due him, and that on the 9th of September, A. D. 1879, a judgment was rendered by said Court against the said Biddinger in favor of said plaintiff for the sum of $393.45, and $75.75 costs.

The Bill further charges that after the institution of said suit at law, and until the filing of the bill in this cause, the plaintiff continued to furnish board and clothing for the child of the said Biddinger, and that the said Biddinger is indebted to the plaintiff in the further sum of $142.50, making an entire indebtedness on the 15th of September, A. D. 1879, of $611.70.

The Bill further charges that prior to the month of May, A. D. 1876, the said Biddinger purchased from Jacob Hare and wife, a tract of land in Garrett county, called "Mount Airy," containing fifty acres of land; that the said Biddinger paid the entire purchase money for said land, amounting to $750.00 or more. That after said Biddinger had purchased said land and paid for it, he intending to cheat, defraud, hinder and delay the plaintiff in the collection of his said claim, and with a view to cheat and delay his other creditors in the collection of their claims, fraudulently procured and induced said Hare and wife to convey said land to Florissa Biddinger, his infant daughter, by deed dated May 22nd, 1876.

The Bill further states that at the time said deed was made and at the time of filing said bill, the said Florissa was an Infant, under the age of twenty-one years, and that she had no money of her own, and that she was wholly incapable of earning any money, that she had not inherited anything, and that she paid no part of the purchase money for said land.

The Bill states that the said Biddinger further intending to cheat the plaintiff and hinder him in the collection of his said claim, did on the 14th day of January, A. D. 1879, procure, induce, and require his said infant daughter to join with him in executing a deed for said land to James Bowser, and that the said James Bowser knew all the circumstances surrounding the whole matter, and that his object was to cheat the plaintiff.

The Bill further charges that the said Biddinger was indebted and had not means apart from said property to pay his debts, and that the said conveyances were fraudulent and void and contrary to Equity and good conscience.

The Bill then prays that said deeds be set aside and that said land be sold for the purpose of paying the plaintiff's claim, and for general relief and for process.

It is thereupon ordered by the Court this Second day of September, A. D. 1885, that the plaintiff cause a copy of the order together with the object and substance of the bill to be inserted in some newspaper published in Oakland once a week for four successive weeks before the fifth day of October, A. D. 1885, giving notice to the said Florissa Biddinger, the non-resident defendant in said Bill, and warning her to appear in person or by Solicitor on or before the 5th day of October, A. D. 1885, to show cause, if any she has, why a decree should not pass as prayed.

W. H. TOWER,
Clerk Circuit Court for Garrett county.

True copy—Test.
9 5 4t W. H. TOWER, Clerk.

BUY YOUR GROCERIES AT HARNE & LAWTON'S GROCERY, OAKLAND, MARYLAND.

FOR SHERIFF.

At the solicitation of many friends I hereby announce myself as a candidate for Sheriff of Garrett county, subject to the action of the Republican County Convention.

JOHN H. RILEY.

July 7, 1885.

FOR COMMISSIONER.

At the earnest solicitation of many friends I have consented to announce myself as a candidate for County Commissioner, subject to the action of the Republican County Convention.

WM. W. FRAZEE.

—500 Pheasant and Woodcock wanted at Harne & Lawton's Grocery.

—Mr. Geo. W. Griffith, of near Johnstown, this county, left at our office a fine specimen of the Bartlett pear, raised on his farm.

—FOUND—A pocket book. The owner can have the same by calling at the Baltimore Store, Oakland, Md.

—A few evenings ago James Tuhill fell in the Oakland Hotel Grounds and broke his leg. The same leg had been broken a few months since.

—All persons knowing themselves indebted to John Shartzer are hereby notified to call and settle on or before Oct. 1st, 1885. 9 4 4t

—Miss Annie Marville, of Deer Park, is visiting relatives and friends in Whetzell county, W. Va. She expects to teach school in West Virginia this fall and winter.

—Married, in Oakland, Thursday evening, Sept. 10th, 1885, by Rev. E. J. Wilson, of Harrisville, W. Va., Mr. William Newman and Miss Lizzie Mason, both of Oakland.

—Mr. D. R. Smith, of Johnstown, stopped in Oakland Monday, on his way to Hardy county, W. Va., where he goes to make sale of property belonging to his father's estate.

—Mrs. M. L. Scott has now open Fall and Winter Bonnets and Hats, a complete line of Trimmings, Fancy Feathers, Birds, Tips, Flowers, Velvets, Laces, Neck Wear and many new and desirable goods.

—We have now in our office a tomato, raised by Mr. C. J. Otto, of New Germany, this county, which weighs 33 ounces, and measures 18 inches in circumference. "Christ" says if it can be beaten in this county he will give us a new subscriber.

—Mr. P. T. Garthright, at his store at Mountain Lake Park, has now on hand a very large stock of Clothing for men, boys and children, which he will sell within the next ninety days at a small advance on cost. Also boots and shoes, stocking yarns and many other lines of goods. Call and examine goods and prices.

Aug. 22, 13t.

—H. P. Tasker, several years ago editor of the Garrett county *Herald*, is favorably spoken of in connection with a nomination for the House of Delegates on the Democratic ticket of that county. An active party man over thirty years, perhaps his most effective work was done within the time his pen was dedicated to editorial labor. It was during this period also that he championed "home rule," involved in a local issue which interested a large territory of Garrett county. In the discussion of the questions concerned he aroused some antagonisms, but there were many more who "loved him for the enemies he made." With no interest at stake, our personal friendship for Mr. Tasker inclines us to hope that the people whom he has already served will be able to promote him as he desires. —*Frostburg Journal.*

Church Services--Sunday.

M. E. Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. M. W. Rider.

Lutheran Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. C. W. Sechrist.

Preaching at Deer Park, by Rev. C. W. Sechrist, at 2½ P. M.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Wraps.

Will be sold on favorable terms—30-horse power steam saw mill complete, with cut-off saw.

Apply to

D. E. OFFUTT, Admst.,
Oakland, Md.

Public Sale.

There will be a sale of all kinds of furniture, carpets, &c., &c., at John Shartzer's Furniture Store, Saturday, September 26th. As there is a large lot of second handed furniture there will be bargains for all. Furniture at cost up to day of sale.

Primary Meeting.

The Republican voters of District No. 7 will meet at the Court House, SATURDAY, Sept. 19, 1885, at 3:30 P. M., for the purpose of selecting five delegates to represent said district in the Republican nominating Convention, to be held in Oakland, Sept. 22, 1885.

DISTRICT COMMITTEE.

Democratic State Convention.

The Democratic State Convention met in Baltimore Wednesday. Ex-Gov. Groome was chairman. The Gordon delegation from Allegany county was admitted. A motion to admit both delegations with a half vote each was voted down. Comptroller Turner and Clerk of Court of Appeals Jones were both renominated unanimously. A resolution appreciatory of Senator Gorman's sesvices was adopted.

Public Sale.

Having resolved to make my future home in the state of Florida, I will offer at public sale, at the parsonage, Accident, on Tuesday, September 29th, 1885, all my personal effects, consisting in part of 2 horses, 1 colt, 1 cow, 2 shoats, buggy, harness, saddle, 3000 feet inch boards, cabinet organ, stoves, tables, bedsteads, chairs, kitchen and tableware, &c., &c. Small purchases cash; $10 and over a credit of six months.

J. B. SHOUP.

Sept. 12, 3t.

Attention, Garrett Guard!

In accordance with general order from Battalion Headquarters, this command will resume its drills. The second enlistment of three years of a number of members will expire Sept. 30th, and will cause some changes. A business meeting for this purpose will be held Friday evening, Sept. 18, at 7:30 P. M. All members interested will please attend.

By order,
CAPTAIN.

JOHN F. WHITE,
Orderly Sergt.

Concert and Festival.

The ladies of Swanton and vicinity assisted by talented singers from a distance, will give a grand concert and festival on Wednesday, the 30th inst. The concert will consist of tableaux, music, vocal and instrumental, select readings, recitations, &c. After the concert the festival will be held. A grand time is expected. The proceeds will go for the benefit of West's Chapel (U. B. Church). It is for a good cause and the public are cordially invited to come and enjoy a pleasant evening.

How to Keep Cider Sweet.

Pure sweet cider that is arrested in the process of fermentation before it becomes acetic acid or even alcohol, and with carbonic acid gas worked out, is one of the most delightful beverages. The *Farm, Field and Fireside* recommends the following scientific method of treating cider to preserve its sweetness. When the saccharine matters by fermentation are converted to alcohol, if a bent tube be inserted air tight into the bung, with the other end into a pail of water, to allow the carbonic acid gas evolved to pass off without admitting any air into the barrels a beverage will be obtained that is a fit nectar for the gods. A handy way is to fill your cask nearly up to the faucet when the cask is rolled so that the bung is down. Get a common rubber tube and slip it over the end of the plug in the faucet, with the other end in the pail. After the water ceases to bubble, bottle or store away.

Court Proceedings.

The September Term of the Garrett county Circuit Court convened Monday morning, with Judges Alvey and Hoffman on the Bench. Wm. Hinebaugh, Esq., was appointed Foreman of the Grand Jury.

The term will extend into next week.

Following are the proceedings up to Wednesday evening:

APPEALS.

No. 1. Albert Combs vs. William Hoover, use of Josiah Bittinger. Peddicord & Thayer for appellant. Veitch & Townshend for appellee. Jury trial. Verdict for the defendant.

2. John E. Wood vs. John R. Kerfoot. Veitch & Townshend for appellant. Peddicord & Thayer for appellee. Continued.

3. Richard Selby vs Jonas Frazee. Veitch & Townshend for appellant. Hamill for appellee. Judgment affirmed by agreement with stay for one year.

4. Andrew Nelson vs L. H. Phleger. Peddicord & Thayer for appellant. Hamill for appellee. Settled.

5 Judgment affirmed by agreement; stay of execution till March next.

TRIALS.

No. 1. George Schley and Buchanan Schley vs David V. Junkins. Hamill for plaintiff. Veitch & Townshend for defendant. Judgement in favor of plaintiff for land claimed in the declaration.

2. William Hoover vs Anna J. Redgely and others. Veitch & Townshend for plaintiff. Boyd for defendant. Continued.

3. Louis Nydegger vs John Shillenburg. Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Verdict for plaintiff for $50.

6. James Parker by his next friend, John Shillenburg, vs Louis Nydegger. Veitch & Townshend for plaintiff. Peddicord & Thayer for defendant. Dismissed.

7. Alfree P. Ritzell vs Daniel O'Connell. Hamill for plaintiff. Veitch & Townshend for defendant. Continued.

8. John H. Gregg vs Lochiel Lumber Company. Veitch & Townshend and Semmes for plaintiff. Boyd for defendant. Continued.

9. Peddicord and Combs vs John L. Browning and others. Veitch & Townshend for plaintiffs. Hamill & Semmes for defendants. Continued.

10. Peddicord and Combs vs John L. Browning and others. Veitch & Townshend for plaintiffs. Hamill & Semmes for defendants. Continued.

13. Isarel M. Frankhauser vs Joseph P. Lewis. Hamill & Semmes for plaintiff. Veitch & Townshend for defendant. Settled; each party taking half of land in dispute.

14. Elbenezer Kitzmiller vs Norman B. Bray. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Dismissed.

15. Gilmor S. Hamill, use of Niel J. Fortney, vs M. J. Miller. Hamill for plaintiff. No counsel for defendant. Continued.

17. William Broderick vs W. F. Ryan. Hamill for plaintiff. Veitch & Townshend for defendant. Dismissed.

21. George Pirmer vs The Mayor and City Council of Cumberland. McKaig for plaintiff. Read & Thomas for defendant. Abated by death of plaintiff.

22. Daniel O'Connell vs Lochiel Lumber Co. Williams for plaintiff. Boyd, Veitch & Townshend for defendant. Settled; each party to pay his own costs.

27. Henry M. Broadwater vs Lochiel Lumber Co. Sloan for plaintiff. Boyd, Veitch & Townshend for defendant. Continued.

28. Jemima Boyer vs B. F. Friend. Hamill for plaintiff. Gonder for defendant. Dismissed.

29. Eagle Mill Co. vs E. W. Staples & Co. Hamill for plaintiff. Veitch & Townshend for defendant. Judgment for plaintiff with stay till March 1st, 1886.

31 Norman R. Smoot vs John E. Wood. Hamill for plaintiff. Veitch & Townshend for defendant. Removed to Allegany county.

32 Chambers E. Glenn vs W. McCulloch Brown. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Judgment in favor of plaintiff for $150.

34 Martha S. Williams vs Peter W. Connell. Veitch & Townshend for plaintiff. Hamill for defendant. Dismissed; want of security for costs.

35 George W. Wilt vs Lochiel Lumber Co. Peddicord & Thayer for plaintiff. Boyd, Veitch & Townshend for defendant. Settled in favor of plaintiff.

36 Emily S. White vs Benjamin F. Friend and others. Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Settled in favor of plaintiff.

37 Lochiel Lumber Co. vs Daniel O'Connell, Boyd, Veitch & Townshend for plaintiff. Williams for defendant. Dismissed.

38 W. C. White & Co. vs John E. Wood and others. Hamill, Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Removed to Allegany county.

39 Richard S. McCulloch vs W. Scott Cormany. Peddicord & Thayer for plaintiff. No counsel for defendant. Settled in favor of plaintiff.

41 David H. Loar vs John A. Connell. Hamill for plaintiff. Daily, Veitch & Townshend for defendant. Refered so counsel.

43 Daniel O'Connell vs Lochiel Lumber Co. Williams for plaintiff. Boyd, Veitch & Townshend for defendant. Dismissed.

45 William Soelter vs Louis Soelter. Hamill for plaintiff. Peddicord & Thayer for defendant. Dismissed.

46. Peter W. Bosley vs James R. Bishop. Peddicord & Thayer for plaintiff. Hamill for defendant. Dismissed.

48 Peter W. Bosley vs John C. Dunham. Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Continued.

53 F. A. Thayer, trustee, vs E. Jamison. Peddicord for plaintiff. No counsel for defendant. Judgment for plaintiff.

54 Jesse J. Robeson vs Daniel O'Connell. Hamill for plaintiff. Boyd for defendant. Judgment for plaintiff.

56 F. A. Thayer, trustee vs Wm. A. Browning. Peddicord for plaintiff. No counsel for defendant. Judgment for plaintiff.

57. F. A. Thayer, trustee, vs Wm. Browning, of Wm. Pdddicord for plaintiff. No counsel for defendant. Judgment for plaintiff.

58 Roche & Co. vs Thomas Coddington. Veitch & Townshend for plaintiff. Peddicord for defendant. Judgment for plaintiff.

59 Ambach, Burgunder & Co. vs William Ryland. Veitch & Townshend for plaintiff. Peddicord & Thayer for defendant. Judgment for plaintiff.

60 A. W. Poulson & Co. vs William Ryland. Hamill for plaintiff. Peddicord & Thayer for defendant. Judgment for plaintiff.

61 John A. Connell vs D. H. Loar. Daily, Veitch & Townshend for plaintiff. Hamill for defendant. Refered to counsel.

63 Richard S. McCulloch vs Francis M. Bray. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff.

65 Bessie N. Lusson vs Lewis Hanft. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Dismissed.

66 Bessie N. Lusson vs J. D. Brenneman. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Dismissed.

67 Bessie N. Lusson vs Unas Leichty. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Dismissed.

68 Daniel Ducker vs Lewis Horckler. Hamill for plaintiff No counsel for defendant. Judgment for plaintiff.

69 William H. Hay and Norman D. Hay vs Lewis Horchler. Hamill for plaintiff. No counsel for defendant. Judgment for plaintiff.

71 Richard S. McCulloch vs Jesse Lee. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff for land claimed.

72 Richard S. McCulloch vs James Moreland. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff for land claimed.

73 Richard S. McCulloch vs Lewis Lish. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff for land claimed.

74 J. H. Jordon vs B. & O. Co. Gordon for plaintiff. Boyd for defendant. Settled on terms to be filed.

75 Patrick Hamill vs Wm. Loraw and J. Moon. Hamill for plaintiff. Peddicord & Thayer for defendant. Warrant resurvey issued.

76 Richard S. McCulloch vs J. W. Boker. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff.

77 Andrew Nelson vs E. H. Wardwell. Peddicord & Thayer for plaintiff. No counsel for defendant. Judgment for plaintiff.

78 William Soelter vs Michael Maroney, Garneshee, &c. Hamill for plaintiff. Peddicord & Thayer for defendant. Dismissed.

79 William Soelter vs James B. Gauer, Garneshee, &c. Hamill for plaintiff. Peddicord & Thayer for defendant. Dismissed.

80. William Soelter vs Jacob P. Gauer, Garneshee, &c. Hamill for plaintiff. Peddicord & Thayer for defendant. Dismissed.

Buckien's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Political Blindness.

There are times when professional politicians, who are usually so astute, become affected with a strange bluntness of perception. They fail to see a revolution impending. They fix their attention upon the details of party management and ignore the vast silent changes that have taken place in the public mind.

There have been eras of strong party feeling in this state when party nominations, however bad, were equivalent to elections. Such is the era when bossism flourishes. The boss takes no thought of party disaffection, of independents or of reform movements. He relies on cracking the party whip at the last moment and terrifying the voters with the threat of a party defeat. Their whole attention is given to fixing the slates and putting in nomination such men as bosism can use. This era has, during the past ten years, been fading away. Reform movements and indepenlent movements have greatly weakened the hold which party once held upon the allegiance of the individual voters. The scandals and corruptions inseparably connected with boss rule disgust and alienate the voters. Quarrels between rival bosses exhaust their corruption funds and weaken their forces by dissension and revolt. And still bossism must go on working with what material it has. It must be able to pay its workers in some way, for they do not work for nothing. It must go on dickering and bartering its patronage, making promises and winning over "kickers" by wheedling or bullying. And while its whole attention is fastened on these things the public mind may be preparing to wipe the whole slate out of existence.

Such seems to be the state of affairs now. If one goes among the professional politicians—those who have, directly, or indirectly, through salaries or perquisites, an interest in the elections now coming on—it will be found that their thoughts are on the primaries, and that they very dimly perceive that the nominations are not equivalent to elections. But if one goes among the business men—the voters—it will be found that there is very little interest in the primaries. There is a feeling that the conventions may nominate whom they please, but the voters will vote for whom they please. There are, doubtless, larger numbers of independents this year than ever before. The revolt against bossism is felt even among the "regulars." There are "bolts" of regulars more or less formidable in various parts of the city, and quarrels among spoilsmen that no negotiations will be able to patch up. Some bosses are bent on humbling or crushing rivals. Old disappointments, broken promises and ancient grudges are to be requited.

And yet on its face the machine looks as strong as ever. It does not seem to see that a cyclone is brewing. *Baltimore American.*

Grim Cholera Facts from Spain.

From Galignani's Messenger.

The civil and military authorities of Madrid are making strenuous preparations against the eventuality of the cholera spreading throughout the city in the autumn, as medical men generally seem to fear will be the case. In each arrondissement of the local juntas a small hospital for fifty cases is being organized, in addition to district hospitals capable in case of need of accommodating 600 to 1,000. Special isolated cholera wards, moreover, have been established in all the civil and military hospitals of the city. So far Madrid itself has suffered but lightly, and no case has yet occurred among the troops of the garrison, numbering nigh on 15,000 men. The houses wherein the disease has passed are thoroughly fumigated and disinfected, the inhabitants being turned out and sent to the refuges of the *assistance publique*. The poor quarters of the old town, with their narrow streets, unhealthy courts, dark staircases, obscure and badly ventilated apartments, wherein whole families are crowded together pellmell, and support existence God knows how—such quarters are the veriest hotbeds for propagating the foul disease. Unfortunately their inhabitants are invariably refractory to the cleansing measures essayed by the authorities, and will frequently conceal their sick for the purpose of preventing their being sent to the hospital and the rooms disinfected.

As it is impossible to convert this population to hygienic principles, the authorities are attempting to surround us with the old and exploded safeguards of quarantine. Fumigation of passengers, baggage, etc., takes place at no le-s than ten stations of the three railway lines running into the city. One is subjected to the same operation in the Madrid stations, where pessengers and their luggage are again closely inspected, while a close watch is kept on the fruit and vegetable market. Under the influence, partly of fear, partly of custom, thousands of the richer inhabitants have fled for refuge to the sixteen provinces of the north and northwest, not yet attacked; many even having pushed on into France, notwithstanding the rigorous sanitary precautions that have been enforced on the Pyrenean frontier since the cholera has declared itself in Saragossa, Barcelona, Pampeluna and the valley of the Ebro.

The accounts received from the provinces are heartrending. The epidemic appears to be extending, especially in the east of the peninsula. In the province of Loria its ravages are terrible. In a single town in that district 150 corpses have been lying exposed for three days, all the physicians, all the municipal councilors except one and all the grave diggers having perished. Advices from Murcia announce that 70 corpses remain unburied in the town of Ajecia, whence almost all the survivors have fled. In Andalusia also the pestiledce is spreading. At Monteguado a fourth of the inhabitants have been carried off in ten days; the town is without any physician, and the single surviving gendarme is occupied in interring the dead bodies. The credits voted for combating the epidemic are exhausted, and the government will be obliged to convoke the council of state to obtain resources.

The disease is beginning seriously to affect the treasury receipts. During May there was a further decrease of several millions in the amount of imports, with a consequent loss of 600,000f. to the customs. The figures for June and July have been forced to pledge 4 per cent amortissable bonds and drafts on the bonds and drafts on the army re-enlistment fund as security for an immediate advance of 30,000,000f. to meet current expenses, and the bank will pay itself later if it be found possible to get in the taxes, which are now levied with the greatest difficulty in the afflicted districts. The floating debt has thus again made its appearance, and should the epidemic last on till the autumn, as there seems every probability of its doing, this debt must rapidly increase.

A Remarkable Story.

The *Presbyterian Monthly* is responsible for this story: During an illness of Mrs. Spurgeon, before Mr. Spurgeon left her room for the journey he was contemplating, she remarked that she hoped he would not be annoyed with her for telling him what had been passing through her mind. She made him, however, promise that he would not try to procure the objects for which she had been longing. She then told him that she had been wishing for a piping bullfinch and an onyx ring. Of course Mr. Spurgeon expressed his willingness to get both, but she held him to his promise. He had to make a sick call on his way to the station, as well as call at the Tabernacle. Shortly after reaching the sick person's house the mother and the patient, to his amazement asked Mr. Spurgeon if Mrs. S., would like a piping bullfinch: that they had one, but that its music was trying on the invalid and they would gladly part with it to one who would give it the requisite care. He then made his call at the Tabernacle, and, after reading a voluminous correspondence, came at last to a letter and a parcel underlying the other letters. The letter was from a lady unknown to him, who had received benefit from his services in the Tabernacle, and she, as a slight token of her appreciation of these services, asked his acceptance of the inclosed onyx ring, necklet and bracelets, for which she had no further use. This intensified his surprise, and he hastened home with what had been so strangely sent, went up to his wife's sick room, and placed the object she had longed for before her. She met him with a look of pained reproach, as if he had allowed his regard to override his promise, but when he detailed the true circumstances of the case, she was filled with surprise, and asked Mr. Spurgeon what he thought of it. His reply was characteristic: "I think you are one of your heavenly Father's spoiled children, and he just gives you whatever you ask for."

Words of Wisdom.

Weary not in well-doing.

Do right and fear no one.

Always be faithful to duty.

Be patient under difficulties.

Be a friend to the friendless.

Harmony is the keynote of household comforts.

A man's own good breeding is the best security against other people's ill manners.

Imprisonment for debt is still possible in New York. In the New York *World* of Monday there is a description of some of the inmates of Ludlow Street Jail, detained there for debt. From the accounts it seems that the prisoners are detained upon orders of the court, and not upon mere judgments for money. Yet they are none the less imprisoned in default of payment of money, not in the nature of a fine. One old man of sixty-four has been in jail for thirteen months on a judgment for $240. Another was there for a year, and was at last released by a fellow prisoner, who paid for him the $25 on which he was held. This seems very strange in free and happy America. The vivid accounts which Dickens gave of the Fleet Street Prison and the Marshalsea in the England of forty years ago produced a profound impression on the English-speaking world, and in America the evils of imprisonment for debt were swept away by remedial statutes, or at least were greatly mitigated. But they appear to linger in New York. In Maryland imprisonment for debt is forbidden by the Constitution of the state. Section 38 declares curtly: "No person shall be imprisoned for debt." A vast amount of human suffering has been saved by the enactment of those seven words.

Getting into debt in Mexico is a serious business. If a debtor is unable to pay on the day his debt is due he is arrested and chained to a post for five days. Then an officer looks at him to see if his punishment has enabled him to pay his debt. Of course it hasn't, and so the debtor's labor is sold to the government for forty cents a day until the obligation is discharged. The government sends him with a gang of felons to a silver mine, and he does not see the light again until the debt is discharged.

NEW ADVERTISEMENTS.

NOTICE TO TRESPASSERS.

STRENGTH OF THE HILLS.

My thoughts go home to that old brown house,
With its low roof sloping down to the east,
And its garden fragrant with roses and thyme,
That blossom no longer, except in rhyme,
Where the honey-bees used to feast.

Afar in the west the great hills rose,
Silent and steadfast and gloomy and gray;
I thought they were giants, and doomed to keep
Their watch, while the world should wake or sleep,
Till the trumpet should sound on the judgment day.

I used to wonder of what they dreamed
As they brooded there in their silent might,
While March winds smote them, or June rains fell,
Or the snows of winter their ghostly spell
Wrought in the long and lonesome night.

They remembered a younger world than ours,
Before the trees on their top were born,
When the old brown house was itself a tree,
And waste were the fields where now you see
The winds astir in the tasselled corn.

And I was as young as the hills were old,
And the world was warm with the breath of spring,
And the roses red and the lillies white
Budded and bloomed for my heart's delight,
And the birds in my heart began to sing.

But calm in the distance the great hills rose,
Deaf unto raptures and dumb unto pain,
Since they knew that Joy is the mother of Grief,
And remembered a butterfly's life is brief,
And the sun sets only to rise again.

They will brood, and dream, and be silent, as now,
When the youngest children alive to-day
Have grown to be women and men, grown old,
And gone from the world like a tale that is told,
And even those echo forgets to stay.

—*Louise Chandler Moulton, in Harper's Magazine.*

SCRIMSON & TULLY.

The Dissolution of an Old, and Formation of a New, Firm.

"It's no use, Mark. He won't listen to reason."

"I don't want to use logic with him, Fanny. It isn't a matter for argument."

"But you don't know papa as well as I do."

"And I don't think I prize his acquaintance as much as that of his daughter."

"You don't know him, and"—giving just a little squeeze to the coat sleeve on which her gloved hand rested—"you must let me say all the unpleasant things about him. You don't know how set he is in his way, and now he is very angry."

"I never saw a decent man kicked out of doors except on the stage, and he won't begin the practice in real life on me. Don't you believe it, Fanny."

"He didn't say anything about kicking," replied Fanny, with disdain; "but when you come to the house this evening he will send word that I am not at home. It's no use, Mark. You must be patient a little while. We must be patient," emphasizing the pronoun with another little squeeze of the coat sleeve.

"What has set the old curmudgeon"—Fanny withdrew her hand—"what has turned the favor of your respected parent"—the hand was replaced—"so suddenly against me? What is he angry about?" asked Mark.

"That is just what I came out to meet you for, and I would have told you long ago if you hadn't been so unreasonable. You must know, sir, that I am doing a very improper thing in running after you in this way, and walking home with you from your office, when papa has forbidden me to receive you at the house; and I think, perhaps, I ought to leave you at once, right here."

"What were you going to say, Fanny, when I interrupted you with my unreasonableness?" meekly responded Mark.

"I had begun to tell you that it is all about your uncle, and not about you at all."

"What has my uncle done? He has been in partnership with your father for ten years past, and that is how we came to know each other, Fanny. They can't have quarreled after all this time."

"Yes, they have. I never saw papa so angry before. He has been cross for a week, and to-day he came home crosser than ever, and told me he never wanted to see any one by the name of Tully again. He said you must stop coming to the house, and that if I didn't want to refuse to see you, he would take care of it; and when I said I couldn't, he called in the housekeeper, and told her to give orders to the servants to say that I was not at home to you."

"And made you cry—confound him!" interjected Mark, as, looking down at the brown eyes on a level with his shoulder, he saw the lashes set in diamonds.

"I didn't cry much," replied Fanny, with a little sniff, and winking hard. "But he talked horribly. They are going to wind up the business, and we shall go off somewhere; for he hates the whole town, he says, and all he wants is to come back to your uncle's funeral. Isn't it awful, Mark? All I want of old Tully is legal proofs of his death', he said."

"H'm!" was Mark's inarticulate comment, as if the glimmer of an idea had struck him.

"Why, he talks just as if your uncle had cheated him," continued Fanny. "He says that he must get out of the business to save what he has left, and that 'old Tully' will have to die to pay him what he has got from him."

"They must have had a lively time of it," said Mark. "But it is all nonsense. Each of them is rich enough to retire if he wants to; and as for that life-insurance, it was only a little piece of business for me. Neither of them needs it."

"What life-insurance?" asked Fanny.

"About three years ago," explained Mark, "when I was getting business for the Monadnock Mutual Profit and Benevolent Association, I induced them to take out policies in favor of each other. So your father holds a policy of ten thousand on my uncle's life, and my uncle the same on the life of your father. If either of them dies, the other gets the money. That's what he meant when he said old Tully would have to die to pay him."

"How horrible!" ejaculated Fanny. "Do you think your uncle feels the same way about my father?"

"I don't doubt he feels a great deal worse, to judge from what I know of the old gentleman's sentiments when he once gets an antipathy. But don't you worry, Fanny," continued Mark, in a reassuring tone. "Neither of them will realize on his policy for a long time yet, and there'll be another partnership of Scrimson and Tully before that."

"O, Mark!" and the brown eyes were quickly raised and cast down.

"I won't come to see you to-night," said Mark, after they had walked on a way; "and perhaps not to-morrow night. I have some regard for the sudden prejudices of your respected father, and I want to see how my uncle takes it. When I find that out, I shall know what to do. Trust it to me, Fanny. I will write you at the house. They can't say 'not at home' to the United States mail."

Mark bought an evening paper as he went on to his uncle's house after parting from Fanny. An advertisement caught his eye:

"DISSOLUTION OF PARTNERSHIP.—The co-partnership heretofore existing between the undersigned, under the style of Scrimson & Tully, is this day dissolved by mutual consent. All outstanding accounts will be settled on presentation at the office, 45 Doane street, to James Collins, who is authorized to receipt for the firm.

ANDREW J. SCRIMSON,
MARCELLUS F. TULLY."

Mr. Tully senior was indeed in quite as violent a state of mind as his nephew had pictured him. The latter, with a prudence most becoming to his years, refrained from communicating to his uncle the original source of his information of the breach between the partners, presenting the newspaper announcement as his excuse for inquiry as to particulars. These were soon given in emphatic phrase. A year of fairly good business, as compared with the depression all about them, had been changed into a year of actual loss by several apparently good accounts proving worthless when collection was attempted. For some of these losses, which wiped out the year's work, one partner was responsible; for some, the other. A chance word inspired by worry provoked recrimination, and the two somewhat peppery temperaments had warmed into an an angry separation.

"When it came to that old dotard's throwing Foster's mortgage in my face," said Mr. Tully, in narrating the final scene, "I told him I'd buy the confounded claim for the face of the debt, and he could go to thunder."

"Who is Foster, and what is his mortgage?" asked Mark.

"Foster is a customer I picked up from Philadelphia, and six months ago I took a mortgage on some land of his in Pennsylvania, as security for what he owed us and couldn't pay. We had to foreclose on him: and then, as near as we could find out, nothing but stones grew on his farm, and the land was worth about six cents an acre."

"Did Scrimson buy up any of the bad debts that he took in?"

"No; he isn't quite such a fool as I a m. The business will be wound up square, except this one claim that I took. Thank the Lord! I don't need to work any more unless I feel like it, and that policy will be falling in one of these days when Scrimson goes off with apoplexy in one of his rages."

"You mean the Monadnock Mutual on his life?"

"Yes; that's the only way we can balance accounts. He has cost me more than ten thousand the past year; and if he goes on losing for himself as he lost on joint account, it will be money in his daughter's pocket to get his estate into executor's hands. By the way, Mark, are you fooling around there as much as you were?"

"I don't go to the house much now," answered Mark, calmly disingenuous.

"Well, I wouldn't if I were you. Nothing good can come of it. I am done with him and all his belongings, and you'd better be."

What a ludicrous similarity in the turn and habit of mind of these two men! thought Mark. After ten years of close relations, a quarrel which involves mutual reflections upon their business capacity changes their frieneship into detestation, drives them apart and sets each watching for the death of the other, on whose life a price has been put. It seemed to him a despotism of the business instinct, asserting its supreme rule over all sentiment and passion; and as he listened to his uncle talking in the way that had seemed so horribly grotesque to Fanny when she heard it from her father, the glimmer of an idea became a sudden light to him and he saw his way to an experiment with the same abnormally developed business instinct which had something of promise in it. At least, nothing could make the situation worse as far as it concerned himself and Fanny, and it might be made better.

To this end he called on his own business faculties.

"Have you got that Pennsylvania mortgage with you?" he asked.

"No; it's with some other papers in the safe. What do you want of it?"

"I am going to Philadelphia in a day or two, and might run down and look up the property. Now that you own it, you ought to know something more about it. It may not be such a bad piece as you have been told."

"O, it's as bad as it can be. We leased a dozen acres of it a month ago for twenty-five dollars a year and taxes, with option of purchase. But you may look at it if you want to. I put the whole matter in your hands. Collins will give you the papers if you drop in at the office to-morrow. By-the-way, ask him for that policy on Scrimson's life, and see if it is all straight and safe; and if you happen to run across Scrimson, let me know how he is looking."

Mark did not run across Scrimson, and consequently could not report upon the prospect of his sudden demise; but he mailed a letter to Scrimson's pretty daughter before starting on his Pennsylvania trip the next day. His business in Philadelphia was soon finished, and as he took his seat in the westward-bound train his mind was free to work on the audacious scheme, which had come to him like an inspiration, for the simultaneous punishment and reformation of the two unreasonable men whose prejudices stood between him and his Fanny. His conclusion was that while it was a desperate experiment, it was worth trying; and his resolution was not shaken by an incident which occurred the next day.

He had stepped off the train to catch a breath of undiluted mountain air at Altoona, and walking along the station platform he had a glimpse of a face at the window of a Pullman car that sent an electric shock from the region of his heart up and down his frame to brain and feet simultaneously.

"Fanny!"

"Mark!"

"How did you get here? Where are you going?"

"How did you dare to follow us?"

"It was 'a spirit in my feet.' My good angel sent me without my knowing it."

"Why! didn't you get my letter?"

"No; but I wrote you one."

"And I didn't get that, either. Father hurried me off without even giving me time to pack. We got news that his cousin in Pittsburgh had a stroke of apoplexy and wasn't expected to live—his own cousin, born the same day he was, and named after grandfather, just like papa."

"Was the old gentleman a good deal cut up?" inquired Mark. "Is his heart just a little softened?"

"Poor papa feels very bad," answered Fanny; "but it is awful to hear him talk just as unkindly as ever about you and your uncle. Why, the first thing he said was: 'If it had only been Tully, now.' He is as hard as ever. There! he is coming back to his seat. Do go away, Mark!"

"Wait just a minute. This is important, Fanny, and you mustn't forget it. I'm not going to Pittsburgh; but if that cousin should die, you send me a newspaper with the notice of his death just as quickly as you can, and write me the minute you get home. I shall be back in five days. You'll remember? That's a dear girl."

"He's coming, Mark! Go away before he sees you!"

Mark, in farewell, pressed the fingers that rested on the sill of the car window, and strolled toward the rear of the train, which was about starting. When at length he got off at the junction with the southern branch, a flutter of white at the window of the Pullman told him that he was not forgotten or unobserved.

The tract of land which had come into his uncle's possession through the unfortunate mortgage he found without difficulty, and after half a day's examination he concluded that its value had been stated with tolerable accuracy. It showed a stubborn soil in the open, alternating with sparse woodland, and on one eminence the foundation and cellar of an intended mansion-house, grown over with weeds and brush, and known in the region as Foster's Folly.

This was on the leased portion of the estate; and as Mark rode his horse slowly around the base of the hill, wondering what in the name of agriculture or land speculation could have induced any one to hire a piece of this unprofitable country, he became conscious of a sound as of regular gasping or panting. Continuing his course, there mingled with this the noise of a creak and a thud alternating; and on finally rounding the hill he saw, rising before him, just at the foot of the declivity, one of those skeleton towers with which certain districts in Pennsylvania are so thickly planted, but which seemed an exotic indeed in this region. It was an oil derrick, down whose center the drill was patiently plunging, while near by a little steam engine was panting and wheezing as the working-beam tilted and creaked. He had come upon a "wild cat" location, for this was far outside the accepted limits of the oil belt, and no prospector had before risked his money on the drill in this unpromising region. It was, moreover, an exceptional incident in the history of "wild-catting" that the operator should lease his land, or, indeed, pay any attention to the claims of ownership. Could it be that at this distance from all known oil-fields, in a section which experts had condemned as barren by all the tests of geology, there had been found "indications" of sufficient value to warrant such protection as a formal lease affords?

This startling suggestion took on more force when Mark observed that the base of the derrick was inclosed by a stout and tight shed, at whose single entrance there appeared to welcome his approach a dog of blood-thirsty aspect, who greeted him vociferously. Whoever the operator might be, he must certainly have something more encouraging than dry sand beneath his drill to require such unusual precautions against observation, as well as removal. He appeared behind the dog in the open doorway as Mark approached.

"Is this Mr. Peters?" inquired Mark.

"That's my name."

"I come from Mr. Tully, owner of this property, who has put its management in my hands," said Mark. "My name is Tully. You are going for oil, I see. Rather outside the belt, aren't you?"

"Mebbe it's oil I'm after, and mebbe it's water."

"How far down are you?"

"Mebbe I'm down to the sand, and mebbe I ain't to the first rock. You're too curious, young man. Anything wrong with the lease?"

"Nothing at all. You are safe in possession the rest of the year, and can lay the place within that time at the price agreed on."

"Well, there ain't nothing in the lease, fur's I know, about the landlord entering upon the premises when he may see fit, and I ain't fixed up for company yet. Glad to see you and your friends some other time. Good-day."

"Good-day," replied Mark, handing him a card. "If you want to buy, drop me a line."

Mark had seen and heard enough to cause him to employ the services of the one lawyer in the country town near by as in some sort a confidential agent to maintain a discreet watch upon the boring operations at Foster's Folly, and report to him by telegraph if any strike was made. It seemed impossible, but if it happened, that unlucky mortgage would become the most valuable of his uncle's possessions.

He arrived home in due course of time and railroading, with the determination to push his scheme to a test as quickly as circumstances offered opportunity. And opportunity came treading swiftly on the heels of circumstance; for on going to his office on the morning following his arrival, he found among the accumulated mail not only Fanny's tender little letter announcing her sudden departure, which he had missed the week before, but a Pittsburgh paper with a marked notice of the death of Andrew Jackson Scrimson, and another letter from Fanny telling that they would leave immediately after the funeral, and reach the city the very day on which Mark was now reading the announcement.

Mark lost no more time in reporting at his uncle's residence than was necessary for a short interview with Collins, the confidential clerk and bookkeeper of the late firm, the purport of which was also confidential.

"I have news for you, uncle," was his introductory remark, somewhat sombre in utterance.

"I hope it's good news, my boy."

"You will probably think so, sir," responded Mark. "I have received this paper from Pittsburgh." And he handed it to his uncle, indicating the spot where to read.

"SCRIMSON.—In this city, 16th inst., suddenly, Andrew Jackson Scrimson, aged fifty-seven years."

"What—what's this?" exclaimed Mr. Tully, flushing a deep red, and then paling so quickly that his nephew stepped hastily forward to catch him as he sank into a chair. "Is this true, Mark? How did it happen? Great heavens! To think of his going off in that way!"

"I ran across him on the Pennsylvania Central last week," replied Mark. "He was on his way to Pittsburgh, and I thought he wasn't looking as well as usual. I can't believe now that he is dead," he continued, with heartless hypocrisy, "but when I got this news I brought it straight to you, as I knew you had a considerable interest in the fact."

"Dead—dead—," Mr. Tully spoke as if to himself. Then to Mark: "You might have broken it to me more gently, my boy."

"I understood you were anxious to realize on your policy——"

"What do you take me for?" cried Mr. Tully, an angry red displacing the pallor of his face.

"And that perhaps you would like to secure the proofs of death without unnecessary delay," continued the young man, mercilessly.

"May God forgive me!" ejaculated the elder. "It is too late to ask it of my old friend. But if his spirit can take note of things of the earth it has left, he will some time know that never in my heart did I wish him ill. Mark," he continued, after a pause in which he seemed to be pulling himself together after the shock, "we must go at once to the office and see if Collins can tell us anything of this terrible affair."

Mark was as silent as his uncle during the short walk down-town, but for a different reason; and when they entered the corridor leading from Doane Street to the office on the corner, his soul quaked within him. But hardly had they entered the counting-room, and put the first anxious question to Collins, when from the entrance opening on the other side there appeared, not with his daughter upon his arm, but himself leaning on that frail support, Mr. Scrimson.

The two partners stood speechless an instant, while conflicting purposes seemed battling within them.

"Andrew!"—Tully was the first to speak.

"Marcellus!"—and their hands were clasped.

"God bless us both! It wasn't you, then. But who put this lying thing in the paper?" demanded Tully, pulling from his pocket the Pittsburgh daily.

"That is my cousin—my twin, they used to call him," replied Scrimson. "And now I want to know what this means." And he took from his pocket a letter with the firm's heading, and shook it savagely before the face of Collins, whose name appeared at the foot. It read:

"DEAR SIR: Referring to your late expressions of concern regarding the policy which you hold on the life of your late partner, Mr. Tully, I would say that a recent event renders it advisable to take steps at once in order to realize upon it."

"What does that mean," vociferated Scrimson, "except that you have news of Tully's death, and are breaking it to me as gently as you can?"

"I certainly did not wish to disturb you unnecessarily, sir," replied Collins, inspired by an excruciating wink which Mark delivered him over his uncle's shoulder. "I simply wished to confer with you on the matter of re-insurance, as I learn this morning that the Monadnock Mutual has defaulted its payments, and will be wound up at once by the insurance commissioners."

"That means that our policies are worthless," said Tully. "Well, I'm glad of it."

"So am I," responded Scrimson. "I never felt so much like a hound as when I got Collins' letter this morning, and thought you were gone."

"Nor I so like a brute as when I read your death in the papers."

For some minutes a small and rather dirty boy in telegraph messenger's uniform had been inquiring of deaf ears if Mr. Mark Tully kept there. Mark now took from him the yellow envelope, tore it open, and glanced at the message.

"This concerns you, uncle," he said, handing it to the elder man, who read:

"Peters struck oil. Thousand barrels yesterday. Well plugged until tanks arrive. Am offered big money for land next Foster's Folly. Wire price and authority to sell."

"What does this mean?" he asked.

"It means," answered Mark, "that Foster's mortgage which you bought is worth no one knows how many millions. All the oil men in Pennsylvania will want a piece of that land to-morrow, when this new strike becomes known, and you can sell it for any price you want to name by the square foot. I have been kicking myself ever since I came back to think that you ever gave Peters the option of purchase on twelve acres."

"Let me congratulate you, Marcellus," said Scrimson. "You deserve your luck."

"But I don't, and I sh'n't," replied Tully. "Half of this belongs to you, old friend."

"Not a bit of it. I crowded the thing on you, and it belongs to you," reiterated Scrimson.

"Now, let's talk sense and business," said Tully. "When trade is dull the usual thing is to give the young men a share in the business, and save salaries, isn't it? Well I propose we take in my nephew and Collins here as junior partners, and throw this oil property in as extra capital. We two are old enough to take our ease and let the youngsters do the work for us, and keep the name of the old house alive. What do you say?"

Scrimson said yes. And as the reunited partners walked from the counting-room side by side, Mark drew Fanny's hand under his arm, and followed, with the whisper:

"That other firm of Scrimson and Tully—when shall we sign the articles of copartnership?"—*Harper's Weekly.*

STANLEY HUNTLEY.

True Version of the Severing of His Connection with the New York Tribune.

Stanley Huntley, the dead humorist, as has already been stated in these columns, began his professional life as a lawyer. When he was a young man he took service upon the *Tribune* local staff. There is an old story concerning the manner in which he terminated his this connection, which is more or less untrue. From Mr. Huntley the writer obtained the following true version of the affair: One day, finding the legal profession unremunerative, he applied to Mr. Moore, of the *Rural New Yorker*, who was then the city editor of the *Tribune*, for a situation. He was given a trial. When he brought in his copy at the end of the first day he noticed that Mr. Moore sent it upstairs into the composing room by an elevator in the wall. The second day he was sent to report a meeting of the Farmer's Club, which then as now met in the Cooper Institute Building. This particular meeting happened to be singularly prolific in stirring incidents. Contrary to their general rule, the members became mixed up in a quarrel over a new breed of potatoes and used strong and picturesque language in pursuing their arguments. With a quick perception of the ludicrous Huntley seized upon the salient features of the meeting with avidity, and when he appeared at the *Tribune* office early that evening he had a column and a half of brilliant descriptive writing, in which he gave the humorous points of the affair in their strongest light. Not finding Mr. Moore in, he walked over to the elevator, as he had seen him do, and sent the copy upstairs to the printers. When the night editor came to make up the forms he saw the matter in type, and taking it for granted that it had come up stairs in the regular way, gave it a prominent place in the morning paper.

When Mr. Huntley picked up a copy of the *Tribune* that morning and saw his article on the first page exactly as he had written it, his bosom swelled with pride. At noon he sauntered down to the office with the feelings of a hero.

"I shall be," said he to himself, "the managing editor of this paper in a fortnight. I have struck the right vocation at last."

When he entered the city room he noticed a smile spread over the other reporters' faces, but attributing it to jealousy he calmly seated himself at his desk. In a few minutes Mr. Moore called him and said that Mr. Greeley wanted to see him.

Swelling with pride and casting a look of triumph around the room the young reporter walked out of the office into Mr. Greeley's room. The door was closed. He rapped gently.

"Come in," responded a shrill falsetto voice.

Mr. Huntley did so. Mr. Greeley was seated at his desk. He waited patiently until he finished. Then the old gentleman wheeled around in his chair and said:

"Well, sir, what can I do for you?"

"You sent for me, sir?"

"For you? What is your name?"

"Stanley Huntley."

"Oh! So you are the blamed fool who wrote up that Farmers' Club?"

The hopes of the future humorist experienced a sudden decline. He would now be satisfied with the city editorship.

"Why did you do it?"

"They acted disgracefully, sir."

"Yes, I know it; but what did you do with your copy?"

"I didn't copy it, sir," returned Mr. Huntley, with dignity, "I wrote it all myself."

"What did you do with your manuscript?"

"I shoved it in a hole in the wall and whistled twice."

"Young man, how long have been on the press?"

"Twenty-four hours, sir."

"Well, sir," said the editor, a twinkle coming into his eyes, "you didn't know, of course, what the rules of our office are. But you oughtn't to have written that report, indeed you oughtn't to. Of course they are a pack of fools. They always have been, but you shouldn't have have said so in the *Tribune*. Young man, I'm the President of that club."—*N. Y. Graphic.*

—Clams to the number of a dozen or so fell recently from a clear sky at Mamscato, Minn., the velocity of their descent shattering the shells. The clams were alive and about four inches in length. The phenomenon, it is said, was witnessed by several trustworthy men.—*Denver Tribune.*

TEMPERANCE READING.

"ONLY THIS ONCE."

"'Only this once'—the wine-cup glowed
All sparkling with its ruby ray,
The bacchanalian welcome flowed,
And folly made the revel gay.

"Then he, so long, so deeply warned,
The sway of conscience rashly spurned,
His promise of repentance scorned,
And, coward-like, to vice returned.

"'Only this once'—the tale is told,
He wildly quaffed the poisonous tide;
With more than Esau's madness sold
The birthright of his soul, and died.

"I do not say that breath forsook
The clay, and left its pulses dead,
But reason in her empire shook,
And all the life of life was fled.

"Again his eyes the landscape viewed,
His limbs again their burden bore,
And years their wonted course renewed,
But hope and peace returned no more.

"Yes angel-hearts with pity wept,
When he whom virtue fain would save,
His vow to her so falsely kept,
And madly sought a drunkard's grave.

"'Only this once'—beware! beware!
Gaze not upon the blushing wine;
Oh! fly temptation's syren snare,
And, prayerful, seek for strength divine."

—*Mrs. L. H. Sigourney.*

INEBRIETY AND INSANITY.!

Some of the Many Evil Effects of Alcoholic Drinks—What the Children of the Intemperate Inherit.

The following extracts are taken from one of the series of articles on "The Temperance Teachings of Science," by Prof. A. B. Palmer, M. D., LL. D., published in *Wide Awake:*

Insanity is another morbid condition of the brain caused by chronic alcoholic indulgence. The statistics of all insane asylums bear evidence of this fact. In the list of causes of this most terrible of calamities, intemperance occupies a prominent place; but those who have given most attention to the subject express the opinion that this disease is more likely to attack the offspring of drunkards than the drunkards themselves. These latter cases are not usually charged, in the statistics, to intemperance, though they are the remote consequences of it.

The first attack of insanity in the drunkard is usually recovered from, under asylum treatment and where further indulgence is prevented; but the patient too often returns to his drink when released, and subsequent attacks are very liable to occur, from which the patient is far less likely to recover. Occurring in the children of drunkards, the first attack is more liable to be permanent. Idiocy, blindness, deafness and other defects of the nervous system are painfully common in the children of the intemperate.

In what is called chronic alcoholism, paralysis from brain and nerve impairments is a not infrequent occurrence. It takes different forms as it affects different parts, and usally indicates such an advanced and extreme state of alcoholic poisoning as renders recovery very rare. Fits of apoplexy, often speedily fatal in the first paroxysm, and almost inevitably so when repeated, are another result of intemperance; and when partial recovery takes place, brain impairment remains, frequently accompanied by palsy. Epilepsy is another disease of the brain and nervous system some times produced by alcoholism.

The term inebriety, or dipsomania, is applied to a condition in which the subject of it is supposed to be incapable of self-control, and is given up to periodical or constant drunkenness.

* * * But whether it should be called a disease or a vice, it is the effect of alcohol upon the nervous system; the tendency to the condition often being hereditary—generally from alcoholic indulgence in parents—but developed into the actual morbid state by the indulgence of the individual.

Whether a disease or a vice, it is very difficult of cure, and if temporarily relieved, either by physical or moral means, it is exceedingly liable to return, and result in moral and physical death.

Space fails, and the object of this work does not require that all the diseases which alcohol is capable of inflicting should be even mentioned, much less dwelt upon. But, after all, it should be understood that by far the most frequent evil effects of alcohol do not consist in the production of special diseases peculiar to itself, but in a general perversion and lowering of vitality which renders one more subject to diseases of various kinds, and causes diseases and accidents to be more fatal. In all reports of the causes of deaths, the different diseases and accidents are named, but the alcoholism which rendered them fatal is not mentioned; and even when the disease and death are caused by the alcoholism alone, the truth and the warning example are sacrificed to what are regarded as the properties of the occasion—a sentiment of respect for the dead and the feelings of friends. In public reports alcohol and alcoholism do not receive a tithe of credit or responsibility for the evils they accomplish.

In some of these cases of habitual tippling, as distinguished from drunkenness, only functions or actions are perceptibly changed, while in others the structure of the brain and nerves is more or less profoundly affected.

Often among the first symptoms will be observed a perversion of moral sentiment. There will at least be an indifference to the dangers of drink and a general recklessness of conduct. This is a natural result of the narcotic, benumbing influence of the poison. There are apt to be improvidence, sensuality, an absence of restraint of the lower passions, malfeasance in office, unfaithfulness to trusts, indifference to the feelings and claims of parents, wife and children, and disregard of the advice of friends. There will generally be noticed unsteadiness of the hands, and often of the movements of the lower extremities, inquietude, especially if the doses be not regularly increased, want of refreshing sleep, at first fitful, but often more constant, particularly when the accustomed amount is diminished or withdrawn; and now the general appearance and expression of an habitual drinker appear. The irregular motions can, for a time, be restrained by a decided effort of the will. They are worst in the morning, especially when the sleep has been broken, but are steadied by food and the usual dram. Headache, buzzing in the ears, irritability of temper, cloudiness before the eyes, and, in more severe cases, flashes of light and various hallucinations may follow. There are uncertainty of purpose, mental instability, though sometimes dogged obstinacy, feelings of dread, but without the purpose to avoid evil or danger.

Partial paralysis of the nerves which cause contraction of the blood-vessels of the face, consequent enlargement of these vessels, and redness and eruptions of the face are common. There is foulness of the breath, not so much from the simple smell of the alcohol passing off, as from its vapor changed in character and mingled with effete and decomposing matter from the system; and if a strong odor of tobacco be added to these, the effect upon the senses and feelings of others, especially upon a wife with delicate nerves, I shall not attempt to describe.

All this may happen to a steady drinker who would warmly resent being called a drunkard, and whose friends would feel greatly scandalized by such a charge. He may never have been so much under the influence of liquor as to be deprived of self-control or to become incapable of doing routine business. A temporary abstinence may for the time diminish his capacity or disqualify him for business, and he may readily persuade himself that the indulgence is a good, if not a necessity; thus he floats on into a whirlpool of more degraded drunkenness, or is prematurely arrested by some disease rendered fatal by his condition, or his powers fall early into general decay.

That this is the true account of the average tippler, few will attempt to deny.

WHOLESALE RUIN.

How, Women and Children Are Destroyed, Body and Soul.

L. M. Hall, Superintendent of the Women's Reformatory Prison, Sherborn, Mass., has recently issued some startling statistics gathered from many years' experience among the criminal classes. We give the following extracts:

Out of an examination of 204 inebriate women, I have found that 128 began their drinking by the use of beer; 37 by drinking whisky (as punch at first, usually); 20 began with wine; 8 with gin, and 11 could not remember what beverage was first used. These young girls, mill and shop girls, largely began by going to some so-called refreshment saloon with their friends, and the *debutante* usually began by sipping a little *tonic* (made of hops, sugar and water, charged with carbonic-acid gas and colored with burnt sugar); beer soon followed, and soon rioting, other kinds of intoxicants, recklessness and crime; and what was an innocent, foolish girl yesterday, is to-day a branded criminal, and all for *a glass of beer.*

Beer is the trap which the drunkard-maker sets for the feet of the unwary. And he usually makes sure of his prey, because of it. A glass of raw whisky would have presented but slight attraction to these over-worked, half-fed girls, had it been offered them at first. After that sleeping devil, the appetite for intoxicants, had been aroused by beer, it became altogether a different matter, and at last, in many cases, chloroform or peppermint oil was added to the drink of these maddened creatures, so furious had the appetite become for something stronger.

It may be of interest to note that of the 204 inebriate women, 126 had been guilty of other crimes, and yet in but 16 instances did the first commitment of a crime ante-date the habit of drinking.

Several hopeless drunkards, far gone toward insanity, had never drank any other intoxicant than beer.

One hundred and thirty-two were committed to the prison for drunkenness; 56 for offenses against chastity and public order, and 16 for crimes against property. Their ages when last committed averaged 30½. Sixty-five were between 30 and 41 years of age, 49 between 25 and 31 years of age, 34 between 20 and 26 years of age, 30 between 15 and 21. The remainder were over 41 years of age.

Many of the older ones could not tell how many sentences they have received, showing the absolute uselessness of punishing these poor creatures while the temptations are left in their way.

To show the effect upon the children of inebriate parentage, I collected the following:

Of 111 inebriate mothers, 33 of whom had inebriate husbands, 408 children were born. Of these 227 perished in infancy and early childhood, and of the survivors many are doomed evidently to an early death. In many cases the death of these children was indirectly due to the inebriety of the parents, as cold, deprivation, etc. Ages:—27 of the 204 women began to drink intoxicants before they were 10 years of age, 11 between the ages of 9 and 15, 74 between 14 and 21, 37 between 20 and 26, 33 between 25 and 31, 19 between 30 and 41, 3 between 40 and 51.

Average age 18½ years. More than one-half had formed habits of intemperance before they were 21 years of age, and more than one-third at the giddy age of from 15 to 20 inclusive.

One hundred and thirty-two began to drink socially and with female friends.

SPEAKING of Temperance in the Sunday-school the Chicago *Standard* says: "When you come to a lesson, and they are many, by which the duty of Temperance can be enforced, show that it is the revealed will of God that we should abstain from whatever makes us less clean, less wise and less useful to His service. At home and at school the boys should be taught the natural effect of alcohol upon the processes of human life. They should be taught that it can add nothing whatever to the vital forces or to the vital tissues—that it never enters into the elements of structure."

A TEMPERANCE revival in Passaic, N. J., last autumn, has brought about many favorable changes in the town, which formerly had the reputation of being a very wicked place. The Reform Club, then formed, has two hundred members, has paid for $700 worth of books, furniture, etc., and has raised nearly $600 to support a reading room.

FARM AND FIRESIDE.

—A hot, strong lemonade taken at bedtime will break up a bad cold.—*N. Y. Post.*

—Potato vines have considerable manurial value, and should be added to the compost heap or buried.

—Diseases of the liver and kidneys are very common in hogs. The difficulty in this case, and in most cases, comes largely from improper feed.

—It will pay to store the hay, straw and fodder under shelter, as such materials are often injured by the exposure to winter storms and spring rains.

—Grass is Nature's remedy for sick animals, especially those whose digestive organs have been impaired by overfeeding, fast driving and badly ventilated stables.

—Dainty sandwiches are prepared as follows: Cut some bread in triangular or round pieces very thin; butter evenly and cover with layers of cucumber, chicken and ham, seasoning to taste. Anchovies or sardines may be used instead of the ham and chicken.—*Boston Budget.*

—Buns for breakfast or tea: Two cups of flour, three-quarters cup of corn meal, three-quarters cup of butter, one-half cup of sugar, two eggs well beaten, one cup of milk, three teaspoonfuls of baking powder. Use more milk if necessary to make it a thin batter. Bake in hot oven twenty minutes in gem pans.—*Toledo Blade.*

—Long rye or wheat straw is considered preferable to oats or barley straw for bedding for animals for warmth, cleanliness and its durability or capability of being used a number of times. Its length and crispness prevent it from matting or packing; consequently by laying loose the absorbed moisture is soon evaporated.—*Albany Journal.*

—Try this recipe: Half a pound of butter, six well beaten eggs, six dessertspoonfuls of cream cheese, two tablespoonfuls of good cream and some bread crumbs; mix well together until a thin paste is formed. Divide into balls and cook in salted water, then drain the balls thoroughly and brown them in butter. Serve hot.—*The Household.*

—An experienced swine breeder states that he avoids hog cholera, even when it rages in his neighbors' herds, by feeding apples. He does not claim that apples alone are preventive, but they act in a dietary manner. He is of the opinion that when hogs are fed on a variety of vegetables and waste fruit they will keep in a healthy condition.—*Indianapolis Journal.*

—Breakfast Coffee Cake: Take a piece of bread dough and add one-half cup of sugar and a tablespoonful of melted butter, then roll out an inch thick and put on a greased pie pan, brush the top with melted butter and cover thick with cinnamon and sugar; let it rise and bake quick. Cut in long, narrow strips to serve. Eat hot or cold. It is nice made Saturday with the other baking to use Sunday morning for breakfast.—*N. E. Farmer.*

THE FARMER.

The Qualities Which Make the True Agriculturist.

Does the owning and cultivating of land make a man a farmer? Certainly not, unless the cultivation is done in a systematic and workmanlike manner. Many men own farms of many acres, and yet hardly make a living. The man who thinks of his farm work only when he sees others doing their work, and then commences to do what ought to have been done perhaps a week or a month previous, is not a farmer in the true meaning of the word.

A farmer looks after the interests of the farm at all seasons, and at all hours of the day, and thinks at night of what should be done the next day or the next month. Some farmers plow early, no matter what the condition of the land, let it be wet or dry, while others plow when the land is in good condition. The latter raises the best crops, and does not injure the land. He has studied the nature of the soil, and he does not intend to injure his best friend. The farm to him is a bank from which to draw the ready cash, and in order to make the bank safe, it must have a good set of directors, viz., forethought, judgment, method.

There are few real farmers, and they are the kings of the land—independent beings. They sow and plant in time and condition, and reap and gather a bountiful harvest.

The farmer has his fields well tiled, fenced, and clear of weeds. Many who own farms have poor fences, poor buildings, and poor stock. Their crops are not abundant; their stock suffers for feed and shelter; they are not farmers; they only stay on the farm, and think of something else. Many loads of good manure go to waste in barnyards while they are visiting and talking in the country towns. It is a subject of comment that one farmer near this place is never seen in a store after dark, nor on rainy days. He takes time to go and buy his goods, and is right off again, and generally does this in the early morning. He is the most successful business man in the whole community. His farm is in good shape, his barns and cribs well filled, his stock in fine condition, and he and his family cheerful, contented and happy. The owner of many acres, he was once a poor boy; his accumulations have been made honestly.

Young farmers, remember that the farm requires more thought and deep study than any other occupation.—*Cor. Country Gentleman.*

Lemons.

A German physician, Dr. Wilhelm Schmoele, recently set forth at great length the doctrine that he who eats lemons in sufficient abundance need never die. About the same time a certain Count Weldeck gave up the ghost at the advanced age of one hundred and twenty, having discovered the true elixir vitæ in horse-radish soaked in lemon juice. An English surgeon has more recently still published a book designed to show that eternity on a reduced scale is within the reach, here upon earth, of almost any one who will take the proper precautions to secure it; and many persons seem nowadays to be possessed by the idea that it is their duty to spin out existence to the term of Methusaleh.—*N. Y. Post.*

LADIES' PETS.

The Costly Jewels Worn by Dogs Which Don't Appreciate the Honor.

She sailed like a saucy yacht before a half gale into a well-known uptown jewelry store. She carried under her arm a bunch of hair, which, being placed upon the glass counter in front of a shrinking, timid youth, showed signs of life, and let out a spiteful yelp that could only come from the throat of a disgusted dog. After adjusting the wrinkles in her face so that a fair-sized scowl appeared, she turned right about and looked the light-haired clerk square in the face, while a gleam of spite and anger shot from her steel-gray eyes. "Did not I tell you, sir, to be extremely careful about the size of the ring that you measured for my little Zip? Look at that, you double-dyed villain," as she pointed to a small inflamed spot upon the dog's left leg. "That's all your work, and woe unto you, sir, if my poor little treasure is kept awake any more at night by your horrible stupidity. You are sure the ring was all right and that my darling has probably got the mange? Well, sir, that settles your case. I was not going to make any further complaint. Now I'm off for headquarters," and she doubled up her skirts, seized her "darling" and started double-quick for the main office. In a few moments she came out of the office with the manager, and he walked with her to her carriage. The wrinkles were pushed aside, an ancient smile faintly glimmered through her drug-store complexion and the oil of contentment had been poured upon her outraged feelings.

"What was the trouble with your customer?" the manager was asked, as he walked into the store. "Was she one of the crank species?" "Well," said the manager, "if you call a person a crank who thinks more of a dog than a child, then she is one, and the class of which she is a fair specimen is by no means small. The whole trouble arose from a mistake made in measuring her dog's leg for a bracelet. After the animal had worn it a few times it became tight, and in removing it the skin was slightly abraded. Why do I say that she thought more of her dog than her child? Well, my judgment is based upon a commercial transaction. She came in here about two weeks ago with one of the prettiest children I ever saw and bought a ring for the little one. It cost $2.75, while she paid $28 for a bracelet for that yelping cur."

"Is there much of a trade in animal ornaments?"

"Well, yes, though at present there is not much doing, because the people who buy these things are out of the city. Just before the opening of the summer resorts our trade had a wonderful boom, and it would have surprised one who had not been initiated to see the valuable ornaments that were ordered for pets. The trade, however, has not been as good this year as it was last, probably because the line of jewelry worn by each animal was full. This business began six or seven years ago and jumped into full swing when, at one of the animal dog shows, a pug was exhibited with a beautiful pair of bracelets upon its fore legs. The ladies were overcome by the gnawings of envy, and hastened to adorn their pugs in the same way. Some ever went so far as to have the ears of their dogs pierced, and dainty little ear-drops suspended therefrom. A philanthropic spirit started the story that this practice interfered with the dog's hearing and was a mild method of torture, and it has now fallen into disuse.

"However much the owners may admire the appearance of their be-spangled pets, I have yet to find the dog that feels elated when jewelry is put on him. Dogs usually try to tear these things off with their paws or gnaw them off. These ornaments are not confined to bracelets, but include collars—plain, jewelled, or with artistically engraved monograms—expensive blankets and embroidered wraps. They are ordered for dogs of every size and species, but more frequently for dogs that might be termed pets. The prices paid are various, but are always high, because nearly every order provides for a special design, and the patterns and settings, if jewels are used, have to be specially prepared. I know of one lady who owned a fine pug and terrier. She had a fancy that they would look well in double harness, and ordered a set to be made after a pattern that she had drawn on paper. It was an elaborate affair, studded with gems, and a model of beauty when complete. She counted out $250 for it without a murmur!"—*N. Y. Tribune.*

Papier Mache Plaques.

Papier mache plaques for advertising purposes are becoming common. It is the latest instance of how art has been subserved to business purposes. The work can be given the appearance of a number of substances, such as stone, metal or wood, and some of it is of a high grade of excellence. The materials are few in number, exclusive of those used in finishing, being clay, plaster of paris and rough brown paper, such as is used in hardware stores for wrapping purposes. The clay is employed in the first or artistic stage of the work, in modeling of the figures or designs to be reproduced in papier mache. The plaster of paris is used to make the molds and the paper is the basis of the finished product. The design being made in clay, the plaster is poured over it, and what might be called a negative produced. Upon each of the negatives or molds the paper is built up until a proper thickness has been secured. Then the pulp is allowed to dry in the sun or is dried by means of artificial heat, when it is removed from the mold. At this stage it appears like rough, stamped leather. After the edges have been trimmed and the surface smoothed, paints and bronze powders are applied until the desired effects are produced. The work throughout requires great skill and in the first and last stages artistic talent of no small order.—*N. Y. Mail and Express.*

—The New Jersey census has been completed and shows that the total population of the State is 1,276,825. The net increase since 1880 is 142,709.

AN IMMORAL HABIT.

The Ethics of Good Sleep a Part of Household Morality.

Profanity and lying are regarded by all as immoral, but did anyone ever think it immoral not to sleep enough?

It is hardly an extravagant assertion that comparatively few people, after childhood has passed, know by experience what perfect sleep is, and satisfy themselves with a poor apology for this best of all refreshments. Rising tired and weary from a disturbed, imperfect sleep, they proceed to summon up lost energies by taking strong tea or coffee, or alcohol, which, in their turn, again interfere with perfect rest, and this, more than any mental or physical labors, wears women out, and makes them prematurely old. "I have been reading myself to sleep after retiring," said a Boston woman the other day, "and when I have done this for two or three nights I can see that I look five years older." It is an experience that any woman can verify, and, conversely, she can see that sleeping in a perfectly dark and well-ventilated room helps to maintain the contour and the rose of early youth

The most perfect sleep is obtained by carefully closing the blinds, raising and lowering the windows to admit plenty of pure air, and drawing down the heavy shades, thus making the room perfectly dark. Then, on going to bed, go there to sleep, not to write or read, or to think or plan, but for the most valuable of all things, the foundation of all activity and energy for the coming day. "Nature's sweet restorer" is of all things the most invigorating.

A friend who is laboring in a noble cause—that of public morality—writes: "Yes, I have plenty of worry and not much fun in my crusade against frauds, and I am rarely able to obtain sleep without a mild opiate." We commend to this friend th thought that the cause of morality will suffer if he does not preserve his health and manage his work so as to sleep soundly without a "mild opiate."—*Herald of Health.*

British Decline.

The St. Petersburg *Vedomosti* has published a leading article entitled, "The Economical Decline of the Mistress of the Seas," in which a number of statistics in support of this assertion are extracted from the *Deutsche Rundschau*, tending to show that England's share in the world's business since the rise of so many competitors bears no longer the same proportion to the whole as formerly. It is stated that whereas in 1867 and 1868 England's part in the trade of the world was 25 per cent., in 1882 it had fallen to 19½, and that in the latter year her share in the export trade of Europe was 6 per cent. less than it had been eighteen years before. It is also shown that in 1883 England furnished only 40 per cent. of the coal used in the world, while in 1868 she supplied 53 per cent. of it. In cotton goods and iron produce a similar decline of over 6 per cent. is shown to have occurred during the last fifteen years. The pulse of English trade and enterprise, it is asserted, beats more feebly every year, and Berlin is becoming the most dangerous commercial and financial competitor of London.

—The most recent volcanic eruption in the United States was that which half filled Feather Lake, Northern California, in or about the year 1850. This locality has lately been visited by the eminent plutonist, C. E. Dutton, who says that the lava sheet poured out was over 100 feet thick, and covers a space about one by three and a half miles in extent, in the center of which a cinder cone 600 feet high covers the rent. The lava sheet is rough and jagged in the extreme, he says, but shows as yet no trace of weathering. For a space of 400 to 500 yards from the cone the trees were all killed.—*San Francisco Chronicle.*

"That Miss Jones is a nice-looking girl, isn't she?"

"Yes, and she'd be the belle of the town if it wasn't for one thing."

"What's that?"

"She has catarrh so bad it is unpleasant to be near her. She has tried a dozen things and nothing helps her. I am sorry, for I like her, but that doesn't make it any less disagreeable for one to be around her."

Now if she had used Dr. Sage's Catarrh Remedy, there would have been nothing of the kind said, for it will cure catarrh every time.

"Why is it that nearly all men's heads are round?" Because so few of them are square.—*Evansville Argus.*

"How's Your Liver?"

In the comic opera of "The Mikado" his imperial highness says:

"To make, to some extent,
Each evil Liver
A running river
Of harmless merriment."

A nobler task than making evil livers, rivers of harmless merriment no person, king or layman, could take upon himself. The liver among the ancients was considered the source of all a man's evil impulses, and the chances are ten to one to-day that if one's liver is in an ugly condition of discontent, someone's head will be mashed before night!

"How's your liver?" is equivalent to the inquiry: Are you a bear or an angel today?

Nine-tenths of the "pure-cussedness," the actions for divorce, the curtain lectures, the family rows, not to speak of murders, crimes and other calamities are prompted by the irritating effect of the inactivity of the liver upon the brain. Fothergill, the great specialist, says this, and he knows. He also knows that to prevent such catastrophies nothing equals Warner's safe cure renowned throughout the world, as a maker of

"Each evil Liver
A running river
Of harmless merriment."

You can not call a sailor a slugger because he boxes the compass.—*Oil City Derrick.*

A Wonderful Offer.

Every Farmer and Stock-breeder should send One Dollar to the Rural Home Co., of Rochester, N. Y., for a year's subscription to The American Rural Home, and receive *Free* a copy of The Farmers' and Stockbreeders' Guide, a new and reliable work just issued. The book contains over four hundred pages, is printed on nice paper, fully illustrated and bound in cloth. It is by no means a cheap-John affair, but a valuable compilation of the writings of Youatt, Mills, Skinner and Clater, and is the most reliable and comprehensive work ever issued on the subject. The diseases of oxen, sheep, swine and horses, with the causes, symptoms and treatment are given with such simple directions that every farmer may become his own cattle doctor. It treats of the anatomy of all domestic animals and practically deals with the use of Oxen, breed of Sheep and Stable management. Any one after consulting its pages can select a carriage, wagon or saddle horse and be a good judge of cattle. It is invaluable to every one who has to do with the Farm or Stable and will give hundreds of dollars to its fortunate possessor. As to The American Rural Home, it is generally considered to be the best paper of its class published. We are acquainted with the publishers and proprietors and can vouch for the genuineness of their offer. Paper one year, with book postpaid, One Dollar. Send for sample copy with list of more than one hundred bound books which are given away. Address Rural Home Co., limited, Rochester, N. Y.

A man who gets the mitten is apt to be guilty of contempt of court.—*Burlington Hawkeye.*

Bartholdi's Statue of "Liberty Enlightening the World"

will be a reminder of personal liberty for ages to come. On just as sure a foundation has Dr. Pierce's "Golden Medical Discovery" been placed, and it will stand through the cycles of time as a monument to the physical emancipation of thousands, who by its use have been relieved from consumption, consumptive night-sweats, bronchitis, coughs, spitting of blood, weak lungs, and other throat and lung affections.

A MAN

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

Narrow Escape.

* * * Rochester, June 1, 1882. "Ten Years ago I was attacked with the most Intense and deathly pains in my back and —*Kidneys.*

"Extending to the end of my toes and to my brain!

"Which made me delirious!

"From agony!!!!

"It took three men to hold me on my bed at times!

"The Doctors tried in vain to relieve me, but to no purpose.

Morphine and other opiates!

"Had no effect!

"After two months I was given up to die!!!!

"When my wife heard a neighbor tell what Hop Bitters had done for her, she at once got and gave me some. The first dose eased my brain and seemed to go hunting through my system for the pain.

The second dose eased me so much that I slept two hours, something I had not done for two months. Before I had used five bottles, I was well and at work as hard as any man could, for over three weeks; but I worked too hard for my strength, and taking a hard cold, I was taken with the most acute and painful rheumatism all through my system that ever was known. I called the doctors again, and after several weeks they left me a cripple on crutches for life, as they said. I met a friend and told him my case, and he said Hop Bitters had cured him and would cure me. I poohed at him, but he was so earnest I was induced to use them again. In less than four weeks I threw away my crutches and went to work lightly and kept on using the bitters for five weeks, until I became as well as any man living, and have been so for six years since.

It has also cured my wife, who had been sick for years, and has kept her and my children well and healthy with from two to three bottles per year. There is no need to be sick at all if these bitters are used.

See U. S. Court injunction against C. D. Warner, Reading, Mich., and all his salesmen and agents, druggists, and other Imitators, take warning.
HOP BITTERS MF'G CO.

Bound to Celebrate.

"I've got that mor'gage off'n my farm at last, Bill," said one farmer to another, as they met in the road.

"Well, I'm downright glad to hear it, Sam. You've had som'at of a hard time a doin' it. An' so you've wiped it out, have you?"

"Yes; I paid the last note this mornin', an' now I'm goin' home to have a bonfire; but you're right, Bill, I have had a tarnal hard time of it. You know as well as anybody what tough scratchin' I've had to git that farm paid for."

"Yes, you have had a hard time Sam, I know that."

"Well, I should say so. Why, durn it all, Bill, I've wore out two wives—as good workers, too, as you could find anywhere—to say nothin' of havin' right smart o' sickness myself, brought on by hard work in the field, an' slim pickin' in the house; but, owin' to that last woman o' mine bein' as though as a pennyrile steer, an' not breakin' down an' throwin' her funeral expenses, an' the time I'd lost in courtin' an' marryin' agin in a bad crop year—for, I tell you, Bill, times ain't like they was then when I fust come into this country; for, to git a widder now, that's got any sight of hard work left in her yit, you've got to fool away more or less money on good clothes and do right smart o' taffying to git her. But, as I was sayin' Peggy stuck in her corks an' keep' a goin' with her end of the double tree till I got on the top of the hill with the load, an' now, that I'm thar at last, with signs of an easy grade ahead, I tell you what I'm goin' to do Bill."

"What's that, Sam?"

"I'm a goin' to have a time of it, an' kill a suckin' pig."

"You don't say so?"

"Yes, I do. I'm goin' to have a celebration an' a regular rip-snortin' time."

"Hurrah for you."

"That's what I'm goin' to do, Bill. I ain't been on a spree for thirty years, but I'm goin' to cut loose to-night, if I have to chaw dogwood bark the rest of my days, an' I want you to come over an' help me make the woods howl this evenin' after you git your milkin' done. What d'ye say?"

"All right, I'm agreeable. What's the programme?"

"We'll git on a high, an' beat the bass drum till midnight, if it springs the rafters, Bill. I've got six bottles o' pop an' two cigars in the wagon here, and that'll be a whole bottle apiece for us all around, not countin' your wife—for I don't s'pose she'd care to drink nothin' now,—an' we'll go the whole dose, if it makes us desperate. This here pop is somethin' they've got up since I've been stranglin' with that mortgage, an' I've been famishin' for twenty-five years, Bill, every time I've seen it zip an' sizzle in a tumbler at a pic-nic, to know what it tastes like, an' I'm goin' to know this very night. Come over a.iddlin' airly, Bill, an' you may let every last one of them corks loose, an' we'll make the Scratch Gravel people b'lieve thar's a tiger loose along the Wabash."—*Chicago Ledger.*

How they Came Together.

Mr. C. E. Mandeville in a letter to the Chicago *News* gave the following account of a reunion of a mother and her son, who, twenty years before, was sold as a slave. He says: When traveling with Bishop Foster in the South, in 1880, we stopped at Covington, Ga., where the bishop held the Savannah conference, and where the writer first met the Rev. George Standing, who was a member of this conference, and who gave me these facts that came under his own observation.

When he was a presiding elder, a year or two previous to this interview, a colored tramp came to his house and asked for work. He was a forlorn-looking customer, dirty, hungry and half-naked. Mr. Standing told him he had no work for him, whereupon the poor colored man begged him to take him as his body servant, offering to remain for board and clothes. As it was about camp meeting time, Mr. Standing thought he could use him on the camp ground, and so retained him. The camp meeting came, and there was one "Aunt Lucy"—black as night—who had a little booth by herself, and who was employed to look after the preachers' lodge, etc. One day the elder's colored servant was seen posing before Aunt Lucy's headquarters, and was heard to say: "Aunt Lucy, does y'r kno, what I'se thinkin'?" "No," replied Aunt Lucy, rather crustly, "an' I doesn't care, either." "Well," continued the man, "I jus' think you's my modder." Whereupon Aunt Lucy grabs her broom, and, using it vigorously over his head, vociferated in angry tones: "Git out here, you black nigger, you's not my son; you's jus' 'round here to git sonthin' to eat."

Brother Standing's servant retreated before the vigorous broom attack, but only to be more convinced than ever than Aunt Lucy was his mother. The next day he went around to her booth again, and, cauticusly approaching the object of his search, exclaims: "Now, Aunt Lucy, I jus' knows you's my modder!" No sooner said than Aunt Lucy makes for her offensive weapon and begins to apply it, but he protecting himself as best he could, stepping back protests, saying: "Don't hit me, Aunt Lucy, for you's my modder."

The old woman thought this had gone far enough, and, putting down her broom, says: "Well, if I'se your modder, I can find dat out mighty quick, for if you's my boy you has a big mark on de right foot. Now let's see de foot."

Gladly and quickly did the poor man pull off his apology for a shoe, and sticking up his big foot exclaimed: "Dar it is, Aunt Lucy! dar it is, suah!" And sure enough there was the parental mark that never could be effaced and could not be mistaken. The mother sprang to the boy, and the boy fell on the neck of the mother, and if ever there was a hallelujah shout in the camp, it came from Aunt Lucy's tent that morning. Over twenty-five years before, the boy had been sold from his mother and carried into the state of Alabama; and now in this mysterious way they are brought together in each other's embrace.

The Size of Noah's Ark.

Various people have objected to the size of the ark; have asserted that it is absurd to suppose that ever there could be a vessel constructed large enough to hold all the creatures which must have been placed in it, with sufficient food, it may be for six or twelve months—water for the fish, corn for the four-footed animals, seed for the birds, and so on. Now we will take the dimensions of the ark from the records of Moses, and calculate them on the lowest possible scale. There are two definitions given to a cubit, one that is 18 inches, or a foot and a half, and the other that is 20 inches. We will take it only at the lowest. Moses states that the ark was 300 cubits long; this would make it 450 feet long, or about the length of St. Paul's Cathedral, London. The breadth he states to be 50 cubits; we then have it 75 in breadth. He states it to be 30 cubits high; so that was 45 feet high. In other words, it was as long as St. Paul's Cathedral, nearly as broad, and half as high. The tonnage of the ark, according to computation of modern carpenters, must have been 32,000 tons. The largest English ship (of a size altogether unimaginable to those who have never seen it) is 3,500 tons burden; so that the ark must have been equal to 26 first-rate ships of war, and if armed as such ships are, it would have contained beyond 18,000 men, and provisions for them 18 months. Buffon has asserted that all four-footed animals may be reduced to 250 pairs, and the birds to a still smaller number. On calculating, therefore, we shall find that the ark would have held more than five times the necessary number of creatures, and more than five times the required quantity of feed to maintain them twelve months —*Exchange.*

A Toothless Future.

The American tooth, the dentists tell us, is something fast disappearing. What is to take its place they leave to conjecture. Whether a toothless race is on its way, or whether a new animal is to be evolved from the present human creature on this continent, is perhaps an open question. Whatever it is that may come to pass, the fancy recoils before the prospect. Children of twelve years often have $100 dollars worth of gold in their mouths, others needing as much quite as badly, but unable to afford the outlay. Children of sixteen often wear complete sets of false teeth that are decayed before they penetrate the gum, and that have to be filled as soon as they are in sight, the crumbling material and thin enamel even then giving but little to work upon.

At first it was thought all this resulted from ignorance, from candy eating, from want of care and cleniness. But it is understood now that in most cases the fault is inherent in the quality of the tooth, and the only remedy so far suggested is a diet calculated with a special reference to the making of sound bone. This is supposed to be found in the coarse grains and food of similar character, and the most confirmed beef-eater alive yields to the superiority at this point of the little kernel of grain that feeds his beef itself.—*Harper's Bazar.*

Our homes are like instruments of music. The strings that give melody or discord, are the members. If each is rightly attuned they will all vibrate in harmony; not a single discordant string destroys the sweetness.

Ayer's Sarsaparilla is highly concentrated, and the most economical blood purifier that can be used.

NEW ADVERTISEMENTS.

America Ahead.—Peculiar Characteristics of Americans—The Evils and How Restored.

In this age of bustle and hurry, an age devoted to great projects and enterprises, the American people are taking the lead in the furtherance of noble works, and in the advancement of the sciences and arts. In these they deserve to take a high rank, and through the united works of millions, the American continent is fast being transformed from its untamed state and being placed on an equality with the older continents beyond the ocean. The American people are fast, under these influences developing into a nervous, energetic race, remarkable for its vim and business qualifications; yet there is danger that in the course of years these very elements may combine to the ruination of the physical character of the people, and leave them feeble and altogether different from their forefathers. General debility is now much more common than formerly, and seems to be on the increase among the masses. Many remedies have been extensively advertised for this wide-spread complaint, but none of these have been so successful or met with such general favor as the remedy manufactured by Dr. S. B. Hartman, and named by him PERUNA.

Mr. S. S. Goudy, of Massillon, Stark county, Ohio, writes: That he has been troubled with general debility and dyspensia for several years; that he was induced to try PERUNA for his complaints, and that after using three bottles of the medicine he was greatly relieved. It braced him right up and gave him energy, and restored him to his youthful vigor. He ascribes his cure to PERUNA, and says it is a wonderful remedy.

Adolph Bakhaus & Co., Springfield, O., writes: "We are having a good sale for PERUNA. It sells as well as any medicine we have, and gives the very best satisfaction."

Mrs. G. W. Needham, Newtonville, Clermont County, Ohio, says: "I have been a great sufferer for the last six or seven years, with general debility and change of life. I was very much reduced. I have taken four bottles of PERUNA, which has restored me to perfect health and strength. We think PERUNA a safe and grand medicine."

FROM THE PRESIDENT
OF BAYLOR UNIVERSITY.
"Independence, Texas, Sept. 26, 1882.
Gentlemen:
Ayer's Hair Vigor
Has been used in my household for three reasons:—
1st. To prevent falling out of the hair.
2d. To prevent too rapid change of color.
3d. As a dressing.
It has given entire satisfaction in every instance. Yours respectfully,
WM. CAREY CRANE."
AYER'S HAIR VIGOR is entirely free from uncleanly, dangerous, or injurious substances. It prevents the hair from turning gray, restores gray hair to its original color, prevents baldness, preserves the hair and promotes its growth, cures dandruff and all diseases of the hair and scalp, and is, at the same time, a very superior and desirable dressing.
PREPARED BY
Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

1f24 DAVID LITTLE.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE

to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to **refund the money.**

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

NEW ADVERTISEMENTS.

To Dyspeptics.

The most common signs of **Dyspepsia, or Indigestion,** are an oppression at the stomach, nausea, flatuleney, water-brash, heart-burn, vomiting, loss of appetite, and constipation. Dyspeptic patients suffer untold miseries, bodily and mental. They should stimulate the digestion, and secure regular daily action of the bowels, by the use of moderate doses of

Ayer's Pills.

After the bowels are regulated, one of these Pills, taken each day after dinner, is usually all that is required to complete the cure. AYER'S PILLS are sugar coated and purely vegetable—a pleasant, entirely safe, and reliable medicine for the cure of **all disorders of the stomach and bowels.** They are the best of all purgatives for family use.

FOR RENT.

The building formerly occupied by Mr. Thomas White will probably be for rent May 1st. There are six available rooms up stairs; a room on the first floor, that has been used for a Barber shop. Would make a desirable stand for a grocery, flour and feed store, with room enough for a family above. Would also make a convenient and desirable place for Post Office, having an unobstructed entrance on Liberty street.

For further information apply at this office or to

The Original Judge Lynch.

[Lynchburg (Va.) Letter.]

While chatting with an old antiquarian in his cool library this afternoon I casually inquired how this town came by its peculiarly suggestive name. "Did the original judge of dreadful fame ever live here?" I asked.

"Yes, he did," replied the old Virginia gentleman, with brightening eyes that revealed delight in the topic. "Judge Lynch might fairly be called the founder of the city, and it makes me angry to see all these newspaper stories, not only locating him in other states, but condemning his mode of procedure as infamous and brutal.

"Not long before the revolutionary period at that time there were quite a number of that splendid race, the Scotch-Irish, settled here. Shrewd and brave, cautious, yet daring, dashing, but prudent, honest and energetic. The Lynches were of the same stalwart stock. They settled in Prince William county. There were four boys in the family, and one of them, John Lynch was a bright, quick young fellow, and remarkably courageous. One day in rambling about the head of the James river he found a gap in the mountains on either side of the water which it struck him would make a capital crossing point for travelers, and forthwith he drove his proprietary stake, and shortly after, with a few logs and an old scow, established a primitive ferry. The horse thieves were among the first to take advantage of the new convenience, and young Lynch, himself scrupulously honest, was disgusted and humiliated at having to take them across. At this time the country was sparsely settled, courts were few, and far apart. The evil continued to increase; finally the ferry became the favorite means of escape for the stock stealers, and John Lynch, thoroughly aroused, proposed to put an end to it."

"What could he do single handed?"

"Well, I will tell you what he actually did. He applied to the governor of Virginia for a commission to act as a justice of the peace. His reputation for honesty and good judgment was beyond a doubt, and his commission was granted. He was qualified, and became a judge. The first use he made of his power was to appoint some special constables and engage a few sharp detectives. They at once began work, with such success that gang after gang were captured."

"Did they have no trial?"

"Yes. They were brought before Judge Lynch, and he never acted until he was positive of their guilt, and his knowledge of the men and the country was an immense advantage to him."

"If he found them guilty he would, according to law, require a good bond, which, of course, in those days, a thief could never get, and when that form was complied with, would start them off well guarded to some far-away jail. The constables knew what the order to march meant, and as soon as they found themselves in a thick wood, chose a stout tree, and, with a good rope, which they carried created a temporary scaffold from which the horse thieves quickly dangled. Hanging was the legal punishment for horse stealing in those days, but the promptness and dispatch with which Judge Lynch meted out justice at the very door terrorized the evil-doers of the country and between those he hung and those who fled, in two years there was not a horse thief in Virginia.

"And what became of Judge Lynch?"

"He continued to live near the ferry, round which a large village grew up under the name of Lynch's ferry, and not until long after his death did it become Lynchburg. During his life lynch law was honored and upheld, but since then it has altogether lost its original character and meaning. Now, as I understand it, it is merely the infuriated impulse of a rough mob, who, without waiting for the law at hand to prove innocence or guilt, decide on it according to their own inclination and take a life perhaps more unblemished than their own. No," concluded the old gentleman," John Lynch, did his state a service in ridding it of a lot of miscreants, who, but for him, were out of the reach of the law, but were he living no one would be quicker than he to resent this barbarous mob fashion of putting a man to sudden death, when the law, the courts, the prison and scaffold are close at hand to mete out justice and punishment."

Some Wonderful Automata.

Leisure Hours.

In mechanical curiosities there have been many wonderful exhibits in the present day. The dancing bullfinch in the great exhibition of 1862 drew crowds to it; but we remember during the sale of Weeg's mechanical collection, half a century ago, a graceful little warbler, and we saw two other mechanical songsters which the French troops brought back as part of the spoils from the emperor's summer palace at Pekin. We regret that we missed the machine for making Latin verses, which was exhibited in our day at the Egyptian hall—a real blessing to school boys; nor have we seen the squalling baby which a modern man of science constructed—surely a bringing of coals to Newcastle—and we remember well, about the year 1833, seeing a very wonderful collection of automata which had been originally designed as presents to the emperor of China.

There was a young lady, life-size, that played tunes upon a spinet; another that wrote lines with the beauty of copper plate; while surpassing all in ingenuity was the figure of a magician with a tiny wand in his hand. It was mounted upon a small moyable frame, which could be wheeled about at the pleasure of a spectator, so that there was no place for a confederate to conceal himself. On putting into an orifice in the frame any one of the numerous metalic cards which lay about with questions inscribed on them, the figure, after making you a bow, struck with his rod a little door, which opened, and there was the answer printed on another card. The reply given was always strictly appropriate to the question, and was not of a mere general character, like the answers on conversational cards. Then, when we asked, "Mr. Conjuror, are you not troubled with the inquires of your numerous visitors?" the answer was: "I should be ungrateful to say so." Our next question was of an entirely different kind. It was, we being young: "What is the sweetest passion of nature?" The conjuror bowed, knocked on the gate, and lo! appeared Cupid with his bow and arrow.

Sir David Brewster who noticed this toy in his volume on Natural Magic, conjectures that the cards, though seemingly alike to the eye, differed in weight, and passed through the orifice we have named until they fell into the proper groove, and touched a spring which moved forward the answer. The machinery employed must have, at all events, been of the most delicate order. Still these things were but the trifles of mechanical skill. What wonders have we since seen of pieces of machinery which, you might almost say, thought. With much interest we looked in the great exhibition of 1852 on the jacquard loom, and, ten years later, on the marvel of marvels Babbage's calculating machine.

Government of Children.

Good Housekeeping.

Probably no one more than parents feel how much the domestic comforts depends upon the proper management of the children, and yet comparatively few really understand the principle of govering them. A child cannot, after it begins to comprehend that it has a will, be taught too early the law of obedience to those who have charge of the training. A careful selection of teachers, and of nursery maid, if the last seem indispensible, is important. The correction of the child being left almost entirely to the parents, the little one should be taught that mother's wishes are paramount to its own desires; that being accomplished, by judicious training, it follows that father, elder brothers and sisters, and others who may assist in its training, will also be treated by them with respect. I once visited with a family consisting of parents and five children, and one could hear, constantly, rising above the mother's voice, and drowning her gentle admonition, "Mabel, you shut that door;" "Beaulah, you leave that drawer;" "Ray, don't you touch that;" and the rejoinder, "No, I won't;" "Yes, I will;" "I'll tell papa." "Mama, Maggie slapped me," and the little ones learned to be unruly, while the poor mother, distracted between the dread of appearing to array herself against the eldest members of her loved circle, and thus encouraging rebellion and the annoyance of seeing and hearing her little ones constantly corrected when often, in her judgment, they might have been gently reproved. And she felt, at times, completely disheartened and unnerved for the duties which devolved upon her, because of this unwarranted interference on the part of well meaning, but inconsiderate friends. Let the parents firmly, but gently, command the obedience of their children, teaching them and those about them that the punishment of their naughtiness must be kindly and gently deferred to the parents and their own Christian and parental instincts; at the same time knowing that in their life their dear ones must bear some crosses, and let them not be quick to resent if others fail to see in their lovely swans more than a resemblance to the common duckling. A mother's love will make for them happiness not to be found outside of her loving ministrations.

How to Shorten Life.

Life is short enough, one would think, without our taking the trouble to learn the means by which it may be further curtailed. To him, however, who looks forward with trepidation to the frightful possibility of living to a ripe old age, the following remarks of Dr. Stephen Smith may be of assistance. He says: "The most important of the general conditions which shorten life in our day is excessive expenditure of vital force. This may occur in various ways. In the young, if food is improper or clothing insufficient, renewal does not take place at an age when the expenditure for growth is greatest; and exhaustion rapidly follows. At maturity the passions ripen into activity, and have their full play, and if not suitably controlled afford large and exhaustive expenditure of vital power. Among the poor, life force is often exhausted in the struggle for food, and among the rich in the struggle for the luxuries, wealth, position and power. Here, owing to wear and tear from anxiety loss of sleep and the concomitants, defective digestion and assimulation, waste exceeds supply and exhaustion exceeds renewal. To the general causes of waste we would add impure air of dwellings, improperly prepared food, inebriety, gluttonly, social dissipation and ten thousand nameless sources of constant impairment of the vital fu- crowned o out power of suitable renewal, which fill up the measure of man's daily life in modern society. Over nearly all of these conditions man may, if he will, exert most arbitrary control. He can feed and clothe the young, old and helpless; he can so regulate his habits as to secure a proportionate expenditure and renewal of vital energy; in his food, in his drink, in his home and at business he can well-nigh master everything that affects well-being. With all this power, why such failure? We answer, ignorance. The people at large do not know, much less realize, the extent to which they may control their longevity. Even the high circles of society are ignorant of the nature, whether for good or evil, of the air they breathe, the food they eat, the water they drink, the clothes they wear; nay, more, the medical profession is so devoted to the care of the sick that it does not study, as it ought, the methods of preventing sickness."—*Chicago Tribune.*

A Wonderful Discovery.

Consumptives and all, who suffer from any affection of the throat and lungs, can find certain cure in Dr. King's New Discovery for Consumption. Thousands of permanent cures verify the truth of this statement. No medicine can show such a record of wonderful cures. Thousands of once hopeless sufferers now gratefully proclaim they owe their lives to this New Discovery. It will cost you nothing to give it a trial. Free trial bottles at Nydegger's Drug Store. Large size, 50c. and $1.

Words of Wisdom.

An open mind, an open hand, and an open heart will find everywhere an open door.

A deal of what passes for the milk of human kindness would not bear skimming.

It is no part of wisdom to be miserable to-day because we fear we may be to-morrow.

Great minds lower, instead of elevating, those who do not know how to support them.

Opportunities to do good are never so scarce that any one need do that for the doing of which an excuse must be offered.

Ayer's Ague Cure stimulates the action of the liver, cleanses the blood of malarial poison, and rouses the system to renewed vigor. Warranted to cure Fever and Ague.

The Republican.

OAKLAND, GARRETT CO., MD.

MY SWEETHEART.

I'm in love with a fair little maiden—
With her eyes, with her lips, with her hands,
With her dozens of dear little dimples—
And although she's petite
On her sweet little feet,
'Tis a wonder to me how she stands.

And she loves me, this dear little maiden;
And her hands, and her eyes, and her lips,
And her dimples, all giving me welcome—
In a sweet, artless way
Have their say, every day,
As to meet me she lovingly trips.

Will she wed me, this sweet little maiden?
—Bless you, no! That she never will do.
But, when I have told you the reason,
I haven t a fear
'Twill appear to you queer;
For I'm thirty—while she's only two!

—*Allen G. Bigelow, in St. Nicholas.*

A STRANGE STORY.

The Remarkable Resurrection of a Common Sailor.

How a Dead Man Returned to Life to Admonish Commodore Rodgers and His Former Comrades —An Incident of the War of 1813.

Archibald Forbes contributes to *Belgravia* the curious story found below. He says: Concerning the history of the subjoined curious narrative, the original manuscript of which, written in now faded ink on the rough dingy paper of sixty years ago, was placed in my hands in the course of a recent visit to America, only a few words are necessary. The narrative is addressed to "Mrs. Rodgers and sister," and appears to have been written at the request of the former lady, after the author's return from the sea on the termination of his service as surgeon of the frigate President, the famous fighting cruiser of the American republic in the war with England of 1812-14. Commodore Rodgers, who commanded the President during the war, and who was the husband of the lady for whom the account was written, gave to Dr. Turk's narrative his indorsement of its perfect accuracy. Of the authenticity of the document there can be no possibility of a doubt.

"Some time in the latter part of December, 1813, a man by the name of William Kemble, aged twenty-three (a seaman on board of the United States frigate President, commanded by Commodore John Rodgers, on a cruise, then near the Western Islands), was brought to me from one of the tops, in which he was stationed, having burst a vessel in his lungs, the blood gushing with great violence from his mouth and nostrils. With much difficulty I succeeded in stopping the discharge, and he was put upon remedies suited to his case. I visited him often, and had thereby opportunity of becoming acquainted with the proper, habits and intellectual attainments; and under all circumstances, during his illness, found his language and behavior such as stamped him the rough, profane and illiterate sailor It is my belief, although I can not positively assert it, that he could not either read or write. It is certain that his conversation never differed in the least from that of the most ignorant and abandoned of his associates, constantly mixed with oaths and the lowest vulgarity. Had he possessed talents or learning, he must have betrayed it to me during his long confinement.

"In the early part of January, 1814, a vessel bore down upon us with every appearance of an English frigate. All hands were called to quarters, and after a short and animated address by the Commodore to the crew, all prepared to do their duty. Before I descended to the cockpit, well knowing Kemble's spirit and how anxious he would be to partake of the glorious victory (defeat never entered our thoughts), I thought it best to visit him. After stating to him the peculiar situation he was in, and the great danger he would be exposed to by the least emotion, I entreated and ordered him not to stir during the action, which he promised to observe. We were soon obliged to fire. At the sound of the first gun he could restrain himself no longer, but regardless of my admonitions and of his own danger, he rushed upon deck and flew to his gun, laying hold to help run her out. A fresh and tremendous discharge from his lungs was the consequence, and he was brought down to me again in a most deplorable state. I apprehended immediate death, but by the application of the proper remedies I succeeded once more in stopping the hemorrhage, by which he was reduced to a state of the most extreme debility. Being near the equator and suffering much from heat, his hammock was slung on the gun-deck between the ports, affording the best circulation of air. He continued for some time free from hemorrhage, but was under the constant use of medicine, and was confined to a particular diet. This made him fretful, and he would frequently charge my mates with starving him, at the same time damning them in the true sailor fashion. After some time, being again called to quarters at night, he was necessarily removed below to the sick berth (commonly called bay.) This was followed by another discharge of blood from his lungs, which was renewed at intervals until his death.

"On January 17, in the afternoon, Dr. Birchmore, my first mate, came to me on deck, and reported Kemble to be dead. I directed him to see that his messmates did what was usual on such occasions preparatory to committing his remains to the deep. About two hours after this Dr. Birchmore again called on me. He said that Kemble had come to life, and was holding forth to the sailors in a strange way. I directly went down, where I witnessed one of the most remarkable and unaccountable transactions that, perhaps, had ever fallen to the lot of man to behold. Kemble had awakened as it were from sleep, raised himself up and called for his messmates in particular, and those men who were not on duty to attend to his words. He told them he had experienced death, but was allowed a short space of time to return and give them, as well as the officers, some direction for their future conduct in life. In this situation I found him, surrounded by the crew, all mute with astonishment, and paying the most serious attention to every word that escaped from his lips. The oldest men were in tears, not a dry eye was to be seen, or a whisper heard; all was as solemn as the grave. His whole body was cold as death could make it. There was no pulsation in the wrists, the temples or the chest perceptible. His voice was clear and powerful, his eyes uncommonly brilliant and animated. After a short and pertinent address to the medical gentlemen, he told me in a peremptory manner to bring Commodore Rodgers to him, as he had something to say to him before he finally left us. The Commodore consented to go with me, when a scene was presented truly novel and indescribable, and calculated to fill with awe the stoutest heart. The sick bay (or berth) in which he lay is entirely set apart to the use of those who are confined to their beds by illness. Supported by the surgeons, surrounded by his weeping and astonished comrades, a crowd of spectators looking through the lattice-work which inclosed the room, a common japanned lamp throwing out a sickly light, and a candle held opposite his face by an attendant, was the situation of things when our worthy commander made his appearance; and well does he remember the effect produced by so uncommon a spectacle, especially when followed by the utterance of these words from the mouth of one long supposed to have been dead: 'Commodore Rodgers, I have sent for you, sir, being commissioned by a higher power to address you for a short time, and to deliver the message intrusted to me when I was permitted to revisit the earth. Once I trembled in your presence, and was eager to obey your commands; but now I am your superior, being no longer an inhabitant of the earth. I have seen the glories of the world of spirits. I am not permitted to make known what I have beheld; indeed, were I not forbidden, language would be inadequate to the task; 'tis enough for you and the crew to know that I have been sent back to earth to reanimate for a few hours my lifeless body, commissioned by God to perform the work I am now engaged in. He then, in language so chaste and appropriate that it would not have disgraced the lips or the pen of a divine, took a hasty view of the moral and religious duties incumbent on the commander of a ship of war. He reviewed the vices prevalent on shipboard, pointed out the relative duties of officers and men, and concluded by urging the necessity of reformation and repentance. He did not, as was feared by our brave commander, attempt to prove the sinfulness of fighting and wars; but, on the contrary, warmly recommended to the men the performance of their duty to their country with courage and fidelity. His speeches occupied about three-quarters of an hour, and if the whole could have been taken down at the time, they would have made a considerable pamphlet, which would no doubt have been in great demand. Dr. Birchmore, now at Boston, heard all the addresses, I only the last.

"When he finished with the Commodore, his head dropped upon his breast, his eyes closed, and he appeared to have passed through a second death. No pulsation nor the least degree of warmth could be perceived during the time that he was speaking. I ordered him to be laid aside, and left him. * *

"I retired to bed, deeply reflecting upon the past, unable to sleep, when about nine o'clock p m., many hours after Kemble had been laid by, I was called out of bed to visit a man taken suddenly ill in his hammock, hanging near Kemble's apartment. It was an hour when all but the watch on deck had turned in; general silence reigned, and all the lights below were out, with the exception of a single lamp in the sick apartment, where lay the remains of Kemble. I had bled the sick man—he was relieved. I entered the sick-room before I retired to replace something, and was turning round to leave it, being alone, when suddenly I was almost petrified upon beholding Kemble sitting up in his berth with his eyes (which had regained their former brilliancy and intelligence) fixed intently upon mine I became, for a moment, speechless and motionless. Thinks I to myself, what have I done, or left undone, in this man's case that would cause him thus to stare at me at this late hour, and alone? I waited a long time in painful suspense, dreading some horrid disclosure, when I was relieved by his commanding me to fetch him some water. With what alacrity I obeyed can easily be imagined. I gave him a tin mug containing water, which he put to his mouth, drank off the contents, and returned to me; then laid himself quietly down for the last time. His situation was precisely the same in every respect as before described. The time was now expired which, he had said, was given him to remain in the body. The next day by noon, all hands attended as usual to hear the funeral service read, and see his remains consigned to a watery grave. It was an unusually solemn period. Seamen are naturally superstitious, and on this occasion their minds had been wrought upon in a singular manner. Decorum is always observed by sailors at such times; but now they were all affected to tears, and when the body was slid from the plank into the sea, every one rushed instinctively to the ship's side to take a last look. The usual weights had been attached to the feet, yet, as if in compliment to their anxiety to see more of him, the body rose perpendicularly from the water breast-high two or three times. This incident added greatly to the astonishment already created in the minds of the men. I beg leave to remark that it was not proper to keep the body longer in the warm latitude we were in.

"I have now given a short and very imperfect sketch of the important events attending the last illness and death of William Kemble. It is submitted to the ladies in this State, begging they will excuse haste and inaccuracy. The change procured upon the crew was for a time remarkable. It appeared as if they would never smile or swear again. The effect wore off by degrees, except when the subject was renewed. "W. TURK."

THE EYES.

What the Different Kind of Eyes Indicate—Their Character.

Black eyes are indicative of passionate ardor and love.

Hasty, irritable persons have frequently eyes of a brownish tint, inclined to a greenish hue.

Green eyes, although their praises are often sung in Spanish ballads, show deceit and coquetry.

Very dark blue eyes, with something of the tint of the violet, show great power of affection and purity of mind, but not much intellectuality.

Brown eyes, when not of the yellowish tint, but pure russet brown, show an affectionate disposition; the darker the brown the more ardent and passionate is the power of affection.

The brown eyes which do not appear black are the eyes of sweet, gentle and unselfish natures, without the inconsistancy of the light brown or yellow eyes—"golden eyes," as they were called by a lady novelist, and which are very little more to be trusted than the green eyes.

Clear, light blue eyes, with a calm steadfastness in their glance, are indicative of cheerfulness of disposition, of a serene temper and a constant nature. These eyes are peculiar to the Northern nations; one meets them among Swedes, and also sometimes among Scotch.

The blue eyes among the rare blondes of the South—that is, in Italy and Spain, have among them eyes in which are some greenish tints; and such eyes, though often called light blue, have none of the qualities of serenity and constancy which belong to the light blue eyes of the North.

Although the purely green eye indicates deceit and coquetry, the propensity to greenish tints in the eye is a sign of wisdom and courage. Very choleric persons, if they have blue eyes, have also certain tints of green in them, and when under the influence of anger a sudden red light appears in them.

In England, where there are more varieties of tints than in any other country, the poets have almost always gray eyes, A biographer of Byron speaks of his "beautiful, changeful gray eyes." Shakespeare also had, we are told, gray eyes; Coleridge, eyes of a greenish gray. Among the artists, too, eyes of this color abound.

The pleasant light blue eye with the honest glance must not be confounded with another sort of eye of a pale blue, almost steel colored hue, which has a continually shifting sort of motion, both of the eyelids and the pupils of the eye. People with such eyes as these are to be avoided, as they are indicative of a deceitful and selfish nature.

Gray eyes, of a somewhat greenish gray, with orange as well as blue in them, and which are of ever varying tints like the sea, are those which denote most intellectuality. They are especially indicative of the impulsive, impressionable temperament—a mixture of the sanguine and the bilious—which produces the poetic and artistic natures.—*N. Y. Herald.*

BETTING WOMEN.

Impulsive, Illogical and Whimsical, She Is Sure to be Unsuccessful.

A bet made she usually regrets it. Posted as to performances of horses and jockeys they are, but the knowledge is of little use, as it is not taken advantage of when they come to place their money. A favorite among the jockeys, no matter what his mount may be, often decides the way in which their money is to be placed. Oftener still the money is placed upon the representative of a favorite stable. There is hardly one betting woman in ten who will not place her money on a horse owned by one of the Lorillards. When both have entries for the same event a prejudice in favor of the one or the other decides the placing of their money. The second factor in leading them to a decision in such a case as that named is the jockey; the third, the positions of the horses in the bookmaker's estimation. Women, as a rule, have no use for short horses. They prefer to back the favorite on the theory that the favorite usually wins, and though the returns for their investment may be less, that it's better to make a little than to lose all. Risk they don't want to think of. Certainties are what they are after.

With the novices among betting women their entrance into the fascinating game is attended by many queer notions. They are ignorant as to the merits of horses and riders. The novitiate then looks over a list of horses, and finds a name that pleases her and places her first five dollars in the mutual pool-box to back a horse whose name she fancies. Old betting men say that Caramel has probably been more favored in this way than any horse on the turf, and hundreds of women have lost their first five dollars because that is "such a sweet, pretty name." The women learn better after a while. Another stumbling-block for the novices are the colors sported by the jockeys. A favorite color on a spruce jockey often draws out from the pocket-book of some fair one the first five dollars she has ever bet on the uncertain chances of a dash around the track. If she wins the color ever remains her favorite. If she loses, that color also loses forever for her all attractiveness it may have before had. Once a woman is "in the swim" of the running track, however, she will remain there just as long as her money holds out, and even then the fascination of the track clings to her and she is ever its slave.—*N. Y. Times.*

—General S. had some shirts made at a fashionable hosier's, and the cutter, a few weeks later, met the General with a friend walking in Broadway. The General remembered the face, but could not place him, and the cutter greeted him with: "Good-morning, General. How are you to-day?" The General stopped, shook hands, and the cutter, perceiving that the General's mind needed refreshing, said, quietly: "Made your shirts." "O, I beg pardon," said the General, quickly, and, turning to the gentleman with whom he was walking, he said: "Colonel, allow me to introduce you to my friend, Major Schurz."—*N. Y. Ledger.*

SCHOOL AND CHURCH.

—Emperor William, of Germany, always has a chapter of the Bible read to him immediately after dinner.

—The compulsory education law is a failure in New York, according to Commissioner Peck, of the State Labor Bureau.—*N. Y. Tribune.*

—Edinburgh is probably the most thoroughly Presbyterian city in the world. Out of a total of 181 churches 124 are Presbyterian.

—No fewer than 157 professors at German universities are between the ages of seventy and ninety, of whom the greater part still lecture. Banke, at ninety, is the oldest.

—A clergyman has been making calculations, and announces as the startling result that all the salaries of religious teachers in the country do not amount to so much as the sum spent annually in supporting dogs.—*Christian at Work.*

—New York has 64 Catholic churches, Chicago 55, Brooklyn 46, Philadelphia 45, St. Louis 43, Boston 38, Cincinnati 36, New Orleans 29, Baltimore 28, Cleveland 25, San Francisco and Louisville 21 each, Detroit 18, Buffalo and Albany 13 each.

—The masters of the great English public schools complain of the imperfect religious training which boys bring with them from home. Even those who come from conspicuously religious families are found ignorant of the commonest facts in Scripture.

—Two women have been elected to the vestry of an Episcopal church in Delaware, and Bishop Stevens has decided that they are eligible under the law. This is the first instance in which women have been elected to such a position either in this country or in England.—*Zion's Advocate.*

—The *Christian Advocate*, being asked by a correspondent: "What is the object intended by the Apostle James in ordering that the sick, when the elders of the church go to pray with them, shall be anointed with oil in the name of the Lord?" replies that "the passage plainly means 'Is any sick among you? Let him call for the elders of the church, and let them pray over him, using the best medical skill in the name of the Lord.'"

—The commencement exercises at the various colleges of the country show that the disposition on the part of alumni to rally about their respective "benign mothers" on these occasions, increases with each year, and the colleges are not backward in doing those of their children who have done well in the world due honor. The consideration shown a successful man by the faculty and students of his old college is one of the sweetest things he ever finds in life.—*Chicago Current.*

—A uniform has been assigned to the students of the Russian universities, the wearing of which will be obligatory. It will consist of a cap, single-breasted frock-coat and dark green trousers. The cap, collar and cuffs of the coat are to be of dark blue, the cuffs to have a broad band of gold lace. It is supposed that, as the bulk of Russian university students come from poor classes, the object of prescribing a uniform and adding to their expenses must be to throw a fresh difficulty in the way of very poor people taking to an academical career.

PUNGENT PARAGRAPHS.

—Love and burglars have some things in common. The both laugh at locksmiths, and they both have a good deal of Cupidity about them.

—Some one wants to know what is more disagreeable than a woman with a crying baby. The answer to this is "the baby."—*Hartford Sunday Journal.*

—Scientists say that all the water on the earth will dry up in 10,000,000 years. Most of our milkmen will be able to accumulate a fortune during the interval.—*Philadelphia Call.*

—"The best way of sobering up is to bathe the head and wrists in cold water and take a potion of bromide of potassium and aromatic ammonia or valerian." Only one better; don't get drunk.—*Buffalo Express.*

—Mrs. Montague—Do you sing, Mr. De Lyle? Mr. De Lyle (with a superior smile)—I belong to the college glee club. Mrs. Montague (disappointed)—O, I'm so sorry, I hoped that you sung.—*N. Y. Times.*

—"I pay my hired man sixteen dollars a month and found," said old Blodget. "And found," interrupted his niece. "What do you mean by that? How do you find him?" "Why," replied the old man, "if he doesn't know I'm comin' I generally find him either asleep or with his arms around the hired girl."—*The Judge.*

—"Is your pa at home, little girl?" "Yes sir; do you wish to see him?" "Yes." "But you won't know him if you do see him?" "Why, what's the matter?" "Well, you see, out in the country, on our farm, a man and his wife got to fighting, and pa he tried to stop them." "O, indeed!" "Yes, you'd better call again. You wouldn't know pa now.—*Chicago Journal.*

—"Why did you sell your oxen?" said Dobyn to a colored farmer. "Well, boss. I took er notion dat I wanted to jine de church." "What difference did that make?" "What difference dat make! Boss, did yer eber dribe steers?" "I never did." "Den yer can't un'erstan' de sitwation; but I'll tell yer, boss, steers hab mighty little 'spect for 'ligion. Dey don't know nothin' but cuss words."—*Boston Post.*

—A running moral.—

A man may go spinning along,
Like a bicyclist singing a song,
And though he looks stately and tall
May be just on the edge of a fall.
And this moral the cycle conveys,
Be modest and sweet in your ways,
Because if you happen to get a sad pitch
You'll find friends to help you right out of the ditch.

—*Boston Budget.*

—An editor lay in an unconscious condition, and for some time it was feared that he was dead. "Can't you rouse him, doctor?" was anxiously asked. "No," the physician replied. "I fear that life is extinct." Then the editor's assistant bent over and whispered in his ear: "A gentleman wants to put an advertisement in the paper." Immediately the unconscious man's face showed signs of returning life, and struggling to a sitting posture, he said feebly: "How many lines?"—*N. Y. Journal.*

TEMPERANCE READING.

DR. RUSH.

Extracts from His Celebrated Essay on the "Effects of Ardent Spirits on the Human Mind and Body."

Dr. Benjamin Rush was by nature a pioneer. Thus we find him, says a writer in the *Union Signal*, in the forefront of many historic movements. In 1774 as a member of the Provincial Assembly of Pennsylvania, he moved the first resolution in favor of American independence. Two years later, June 23, 1776, he was appointed Chairman of the Committee on Independence, and on the Fourth of July following, as a member of the Continental Congress, he appended his name to the immortal Declaration. He was one of the originators of the Bible Society and drafted its first constitution. * * *

Such a man could not witness unmoved the ravages of intemperance. "He saw all of its evils and never tired of raising his voice against it." He viewed it from every standpoint, as a physician, a patriot and a Christian, and his whole soul was stirred within him. Thus stirred he wrote the famous essay, early in 1785. This was followed by a series on the same general topic: the effect of ardent spirits on the human system. These were widely copied, one authority says, into all the newspapers in America. They attracted great attention and exerted such an influence for good that, according to Hildreth, the historian, at the Philadelphia celebration of the Fourth of July, 1787, which had the added dignity of also celebrating the adoption of the Federal Constitution, ardent spirits were excluded from the entertainment. * * * He died April 19, 1813, but the good he did was not "interred with his bones." His essays were scattered everywhere, the seed thus sown sprang and bore fruit abundantly. Some of this seed germinated in Litchfield, Conn., and fruited in the first Temperance Society known in America. In 1789, nineteen years earlier than the formation of a similar society in Saratoga County, New York, over two hundred most respectable farmers of Litchfield formed themselves into "an association to discourage the use of spirituous liquors."

From other seed, sown by the same hand, grew the Massachusetts "Society for the Suppression of the Liquor Traffic."

The following extracts are taken from his celebrated essay, first published in 1785:

It belongs to the history of drunkenness to remark that its paroxysms occur, like the paroxysms of many diseases, at certain periods, and after longer or shorter intervals. They often begin with annual, and gradually increase in their frequency until they appear in quarterly, monthly, weekly, and quotidian or daily periods. Finally, they afford scarcely any marks of remission either during the day or night. There was a citizen of Philadelphia many years ago in whom drunkenness appeared in this protracted form. In speaking of him to one of his neighbors, I said: "Does he not *sometimes* get drunk?" "You mean" said his neighbor, "is he not *sometimes* sober."

It is further remarkable that drunkenness resembles certain hereditary, family and contagious disease. I have once known it to descend from a father to four or five of his children. I have seen three, and once four brothers, who were born of sober ancestors, affected by it, and I have heard of its spreading through a whole family composed of members not originally related to each other.

Let us next attend to the chronic effects of ardent spirits upon the body and mind. In the body they dispose to every form of acute disease; they moreover excite fevers in persons predisposed to them, from other causes. This has been remarked in all the yellow fevers which have visited the cities of the United States. Hard drinkers seldom escape and rarely recover from them. The following diseases are the usual consequences of the habitual use of ardent spirits viz.:

1. A decay of appetite, sickness at stomach.
2. Obstructions of the liver. The fable of Prometheus, on whose liver a vulture was said to prey constantly as a punishment for his stealing fire from heaven, was intended to illustrate the painful effects of ardent spirits upon that organ of the body.
3. Jaundice and dropsy of the various cavities of the body.
4. Hoarseness and a husky cough, often terminating in consumption.
5. Diabetes.
6. Redness and eruptions on various parts of the body. They generally begin on the nose, and after extending all over the face, sometimes descend to the limbs in the form of leprosy.
7. A fetid breath.
8. Epilepsy.
9. Gout in all its various forms.

Lastly, madness. Dr. Waters, while acting as the apothecary of the Pennsylvania Hospital, assured me that in one-third of the patients confined by this terrible disease, it had been induced by ardent spirits.

Most of the diseases which have been enumerated are of a mortal nature. They are more certainly induced, and terminate more speedily in death, when spirits are taken in such quantities, and at such times, as to produce frequent intoxication; but it may serve to remove an error with which some intemperate people console themselves to remark that ardent spirits often bring on fatal diseases without producing drunkenness. I have known many persons destroyed by them who were never completely intoxicated during the whole course of their lives. The solitary instances of longevity which are now and then met with in hard drinkers no more disprove the deadly effects of ardent spirits than the solitary instances of recoveries from apparent death by drowning prove that there is no danger to life from a human body lying an hour or two under water.

The body, after its death from the use of distilled spirits, exhibits by dissect on certain appearances which are of a peculiar nature. The fibers of the stomach and bowels are contracted; abcesses, gangrene and scirrhi are found in the viscera. The bronchial vessels are contracted—the blood vessels and tendons in many parts of the body are more or less ossified, and even the hair of the head possesses a crispness which renders it less valuable to wigmakers than the hair of sober people.

Not less destructive are the effects of ardent spirits upon the human mind. They impair the memory, debilitate the understanding and pervert the moral faculties. It was probably from observing these effects of intemperance in drinking upon the mind, that a law was formerly passed in Spain which excluded drunkards from being witnesses in a court of justice. But the demoralizing effects of distilled spirits do not stop here. They produce not only falsehood, but fraud, theft, uncleanliness and murder. Like the demoniac mentioned in the New Testament, their name is "Legion," for they convey into the soul a host of vices and crimes.

Thus we see poverty and misery, crimes and infamy, diseases and death, are all the natural and usual consequences of the intemperate use of ardent spirits.

I have classed death among the consequences of hard drinking. But it is not death from the immediate hand of the Deity, nor from any of the instruments of it which were created by Him. It is death from suicide. Yes, thou poor degraded creature, who art daily lifting the poisoned bowl to thy lips, cease to avoid the unhallowed ground in which the self-murderer is interred and wonder no longer that the sun should shine, and the rain fall, and the grass look green upon his grave. Thou art perpetrating gradually, by the use of ardent spirits, what he has effected suddenly by opium or a halter.

* * * * *

No man ever became suddenly a drunkard. It is by gradually accustoming the taste and stomach to ardent spirits, in the forms of grog and toddy, that men have been led to love them in their more destructive mixtures and in their simple state. Under the impression of this truth, were it possible for me to speak, with a voice so loud as to be heard from the River St. Croix to the remotest shores of the Mississippi, I would say: Friends and fellow-citizens! avoid the habitual use of those two seducing liquors, whether they be made with brandy, rum, gin, Jamaica spirits, whisky, or what is called cherry-bounce. It is true some men, by limiting the strength of those drinks, by measuring the spirit and water, have drunken them for many years, and even during a long life, without acquiring habits of intemperance or intoxication; but many more have been insensibly led, by drinking weak toddy and grog, first at their meals, to take them for their constant drink in the intervals of their meals; afterwards to take them, of an increased strength, before breakfast in the morning, and finally to destroy themselves by drinking undiluted spirits during every hour of the day and night. I am not singular in this remark. "The consequences of drinking rum and water, or grog, as it is called (says Dr. Mosely), is, that habit increases the desire of more spirit, and decreases its effects; and there are few grog-drinkers who long survive the practice of debauching with it without acquiring the odius nuisance of dram-drinker's breath and downright stupidity and impotence."

Ministers of the Gospel, of every denomination in the United States, add me with all the weight you possess in society, from the dignity and usefulness of your sacred office, to save our fellow-men from being destroyed by the great destroyer of their lives and souls. In order more successfully to effect this purpose permit me to suggest to you to employ the same wise modes of instruction which you use in your attempts to prevent their destruction by other vices. You expose the evils of covetousness in order to prevent theft; you point out the sinfulness of impure desires in order to prevent adultery; and you dissuade from anger and malice in order to prevent murder. In like manner denounce, by your preaching, conversation and examples, the seducing influence of toddy and grog, when you aim to prevent all the crimes and miseries which are the offspring of strong drink.

DRUNKEN BABIES.

How Intemperate Habits Are Formed in Childhood—Dangerous and Pernicious Practices of Parents and Nurses.

It often happens that when a child is normal and wholesome at its birth habits of intemperance are induced in it by its nurse. We all know that in adult people of most healthful constitutions the alcoholic habit, the opium habit, the quinine habit, the tea and coffee habit, the tobacco habit, may be induced, and easily induced. How much more in the susceptible body of an infant. It is so much easier to give a boy a few drops of paregoric or soothing syrup or a gin sling than to quiet it by a warm bath, by friction, by a cup of catnip or smellage tea. The paregoric, the gin, the whisky, needs no preparation and is always effective. The baby goes off to sleep—a drunken sleep—and the nurse can rest in peace. External applications of alcohol are almost as dangerous in the habits they beget as internal. The pores of the skin absorb the stimulus, and what difference does it make in the end whether the child depends for quiet on alcohol imbibed through the skin or by the mouth. A baby accustomed to be rubbed with brandy or whisky will not be quiet without it. It may be thought necessary in cases of extreme debility resulting from sickness to give alcoholic stimulus or some form of opium to a baby, but even then it should be done under protest. Fresh air, nutritious food, judicious and skillful nursing will in innumerable cases do the work alcohol and opium are made to do without including vicious habits.

A great many mothers are made to believe that in order to nourish their infants sufficiently they must drink ale, beer, gin or some other form of malt or spirituous liquor. We all know what wretched milk cows give that are fed on grains that have been first used in making beer. We call it "swill milk." What other name is suitable for the nourishment beer-drinking mothers give their infants? How is it possible for a baby reared on such food to have a normal stomach? Why should not craving for something more and other than wholesome food be induced and cultivated in it by such a course? The baby that partakes of alcoholized milk is made drunk and has its constitutional vigor so impaired that "it has not over three or four chances out of ten for its life. There is an enormous percentage of mortality among infants nursed by persons who use alcoholic or malt liquors."—*N. Y. Tribune.*

Egotism Better Than Drunkenness.

"My greatest weakness has proved a tower of strength to me," said a Prohibitionist yesterday.

"Explain."

"It was in this way: I used to drink like a fish. People began to say that I couldn't quit—that I was ruined. That made me mad. I had a good deal of vanity, and I cultivated it—gave it a regular hot-house forcing. I worked myself up to a point where I imagined myself the greatest man in Atlanta, struggling with a crowd of malignant rivals who were hoping and praying for my downfall through the whisky habit. I began to feel an exquisite pleasure in disappointing my imaginary enemies. The voluntary delusion of mine grew into an apparent reality. It dominates me yet. It has made me an offensive egotist, but it saved me from whisky, and that is something."—*Atlanta Constitution.*

TEMPERANCE ITEMS.

FOR every man killed in war ten have been sent over the gulf by the aid of the corkscrew.—*Chicago Ledger.*

IN Great Britain there are 15,000 Temperance organizations, and it is estimated that 5,000,000 persons are total abstainers.

AN exchange thinks that whisky will soon be made of old rags. Hardly. Old rags don't make whisky; it's whisky that makes old rags.—*Burlington Free Press.*

IF intemperance should break out among horses and cattle, there would be an extra session of Congress called in less than three weeks to stay the evil. But, pshaw! its only men that get drunk.—*Golden Era.*

JOHN B. GOUGH being asked the other day if he noted any improvement in mankind in the matter of intemperance, replied: "Why, yes; every way; things are nothing like so bad as they were when I was a boy, and they are going to be better yet."

IN a recent Winthrop Temperance meeting a gentleman made the following significant statement: "In a neighboring town twenty-seven men banded together to oppose in every possible way the Washingtonian movement. Of these eleven filled a drunkard's grave; seven were lost at sea; four, while intoxicated, drove into an arm of one of the lakes in this vicinity one night and were drowned; two committed suicide; two were hanged in the South, and one went to sea and never was heard from."—*Lewiston (Me.) Journal.*

THE LANDLADY'S STORY.

How a Matrimonial Event Came Near Being Postponed.

A Mysterious Disappearance—Grandson Tommy's Little Practical Joke, and the Misery It Caused—Happy at Last.

I believe in fun. Oh, yes, I do believe in fun. But practical jokes may go too far—indeed they may. Now, there was the case of Mrs. and Mr. Ratchett. At least, then they weren't Mr. and Mrs. Ratchett, but Mrs. Pouncer and Mr. Ratchett; and she was a widow; and when she came to me in a carriage—hired, but still with a man in livery driving it—and said to me:

"Oh, Mrs. Kimberly, ma'am, it's not the expense I'm thinking of, for terms don't affect me much—poor, dear Mr. Pouncer was so very thoughtful of me in his will; but should you be able to promise me the comforts of a home?"

And her dress was the richest of silk, and all covered with English crape, and her veil with a hem a yard deep; and, really, I was so touched that I promised her my best front room with the aleove, whether any one else wanted it or not. And she lived in retirement, and had her meals in her own room for two weeks, for a reason that she confided to me. She was going to the dentist's, and they were a full set, and of the beautifulest whiteness, like snow; but at first, you know, you can't talk in 'em, much lesse at, and that makes it inconvenient.

At the self-same moment, so to speak, Mr. Ratchett he came to the house; and it was the most remarkable coincidence, he confided in me, too. He was going to the dentist, likewise, and his was a full set; and he said he'd like to be spoke of, and charged as an invalid for a month, which was done. And all would have been private and unknown but for my grandson,

Tommy, that I have the bringing up of; and how he found it out, I don't know, but he did, and told it to all the boarders in the parlor one evening, and was corrected with my slipper and sent to bed in consequence.

But Mr. Ratchett he never knew, and Mrs. Pouncer she never guessed—and we must all come to it some time; and some of us had, I've no doubt. And it didn't matter much, after all. And what do you believe those two did—widow and widower—but fall in love with each other, at least as much as at their age and their size could be expected! He waited on her to church, and she knitted him worsted mufflers, and he used to read something that he called poetry, and that was solemner than the prayer-book, of mornings in the parlor—keeping [illegible] dusted and making her gape dreadful, poor thing! But men are inconsiderate, whether married or single, and women will put up with a great deal before the wedding-ring is on. Likewise, he took her to lectures, where I am told she went to sleep, poor dear!

She liked fun, and good eating, and dancing, even at her size; and he liked horrid, solemn things, and had a way of talking as if you didn't have ideas nobody else could understand you hadn't any at all. But widows mostly will get married, if they can, poor dears, though you can't help wondering sometimes that they haven't had sufficient warning. Well, he proposed, of course, and she accepted; and she was to be married in lavender, with white lace flounces and fichu; and he gave her another diamond ring, though there wasn't any room, to speak of, for it on her fat finger, she had so many already; and they were to be married quietly in my parlors of a Tuesday morning; and Monday night all was right; but Tuesday morning the dreadful things began to happen. Sally, the chambermaid, comes to me, and says she: "Oh, Mrs. Kimberly, there is something the matter with Mrs. Pouncer. She's a moaning and groaning fit in her own room, and wants to see you."

So I ran up-stairs as fast as I could, though the store-closet was unlocked; and if the cook helped herself to a lump she took a pound of sugar—as I knew she would. And there I found the poor dear a-crying in bed, and she says: "Lock the door, Mrs. Kimberly," in a queer kind of voice, and then she showed me what had happened. She always took her teeth out of nights and put 'em in a bowl of water, and some one had come in—how, she couldn't think, for though the window was open, who could climb up the wisteria vine

but a monkey? and they were gone. "And under my door this cruel letter, Mrs. Kimberly," said she: and she pointed to one lying on the bed. "Read it," says she. So I opened the letter and read:

DEAREST CAROLINE: Circumstances that I can not possibly explain force me to fly from this roof. How long I shall be gone I do not know. It depends on another. Believe me true, and trust me if you can. I have no hope but in your complete faith in me. Yours,
EDWARD.

"Two such blows in one morning!" says she, "and the clergymen coming, and all! Of course, under any circumstances, I couldn't be a bride until I had a new set; but I could have said I was ill. But what is it? Is it a first wife? Can it be?"

"He doesn't look it," says I.

"There's no judging by looks," said she. "May be he's found out about my teeth, and gone."

"That ain't likely," says I; "he'd have more sympathy." But I didn't think to say why.

"He's a man," says the widow. "That's enough. But it's an awful mystery?"

"Perhaps your teeth were never put in the water," said I. "May be they're on the floor."

And I peeped around, and pretty soon I saw on the side of the bowl five little black marks, and on the window-sill were five more, and then five more yet.

Then I began to guess. I went out into Mr. Ratchett's room, and on the window from the black piazza there were five more black marks, and on the bureau was a goblet of water, and on that five black marks more.

I knew all now. My grandson, Tommy, was a fine child, but he had one peculiarity. The more I washed his hands, the blacker they got. And whatever he touched he printed off his hands on.

He was capable of climbing that wisteria vine, and he liked to tease. He had a lively disposition, poor, dear Tommy, and he had taken the teeth—both double sets—just as he had my spectacles before church-time, and once put his poor Uncle Pinner's wooden leg up the chimney, when he was telegraphed for in a hurry somewhere.

"I like a lively disposition, but boarders have their rights, and weddings aren't to be trifled with; and says I:

"Mrs. Pouncer, be calm." I'd gone back to her room, you know. "Don't cry any more. The wedding may come off, after all. I'll try to help you." And then, first of all, I hunted up the mush-stick, and then I hunted up Tommy.

Says I: "My child, I've taken my slipper to you before; but this I've never corrected you with. Now own up, and you shall have a whole half pie before dinner. But deny, and I'll attend to you."

Then says he: "You'll give me a real half pie? Not a caty-corner half?"

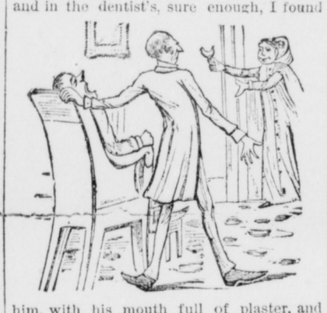
Says I: "I will." Though I had pangs of conscience.

And he says: "They're in the plum-jam you're going to have for lunch, grandma."

"In the plum-jam," says I. "Oh, you dreadful boy."

Says he: "Can't I have that, too? I don't mind."

So I got the plum-jam, and I spooned out the two double sets, which I should have helped some of the boarders to if I hadn't, and then I carried Mrs. Pouncer hers, and washed the others off and considered; and it dawned upon me like a vision. Where should Mr. Ratchett be but at his dentist's, and his name I knew. So in my wrapper and a waterproof, not looking in the glass for my bonnet, off I started, and in the dentist's, sure enough, I found



him, with his mouth full of plaster, and such a happy man as he was I never saw, when I said, says I: "Mr. Ratchett, they are found."

So they were married that day after all, and they board with me yet. I've kept their secrets, though perhaps they ain't secrets any more; and they've rewarded me with their gratitude. But one thing dreadful did happen—beside the pie, Tommy swallowed all the plum-jam. I expected that he'd die, but he didn't.—*Tid-Bits.*

MARRIAGE A LA MODE.

A hat! A cane!
A nobby beau!
A narrow lane!
A whisper low!

A smile! A bow!
A little flirt!
An ardent vow
That's cheap as dirt!

A hand to squeeze,
A girl to kiss,
Quite at one's ease,
Must needs be bliss!

A ring! A date!
A honeymoon!
To find too late
It was too soon!

—*Ellery Berg, in Puck.*

The Oracle in the Art Gallery.

A local oracle was walking through a gallery with one of those large-eyed, artless, simple, modest girls the other day. He was enlarging on the different schools of painting. He appreciated everything; he knew everything. They came to a picture. He saw without looking a name in the corner.

"Now, there," he said, "I can tell the Dutch school at a glance. That is by Edboker. Edboker is a favorite of mine. There is something so genuine in his painting, something so natural and strong in his handling of a subject. I think nothing is more marked or curious than the distinctions between painters in the way they treat the same theme. The strong Dutch individuality of Edboker—"

"I beg your pardon, but it appears to me this picture is painted by E. A. Baker."

"Baker! Ah, dear me, so it is. How very Dutch he is."—*San Francisco Chronicle.*

Source of the Trouble.

Mike—Oi say, Bridget, wot sames to be the mather wid the young missus? She goes about all day looking thot sorrowful and droopin' her oyes red wid tears. Is she disappointed in luve, d'ye think?

Bridget—Shure, Moike, oi'm at a loss to know entoirely. It was only this mornin' that she was talkin' wid de ole missus an' I heard her say that her fate was more than she could bear.

Mike—Poor sowle! Oi'm thinkin', Bridget, it must be bunyuns she has on them.—*N. Y. Times.*

Too Near to Be Neighborly.

Hostess (at an evening party)—Mrs. Hendricks, will you step with me a moment; I want to make you acquainted with Mrs. Tomlinson? You will like her, I'm sure.

Mrs. Hendricks—Excuse me, if you please, Mrs. Jones, but I would rather not. You see, we—er—both live in the same flat.—*N. Y. Times.*

"THE GOOD OLD TIMES."

Good Undoubtedly, But Behind the Times of the Present in Some Respects.

Yes, "the good old times" undoubtedly had much to boast of, but in one regard they were wofully behind the present times, be the latter good, bad or indifferent. We refer to mendacity. Not that there is any less lying now than there was in ages gone, but rather that the practice is looked upon with a larger spirit of charitableness than formerly, and that mankind is more willing to condone his brother's excursions from veracity than he was in those good old times aforesaid.

We read in sacred writ of the quick and terrible visitation upon Ananias and Sapphira, not because they lied, but simply because they kept back part of the truth. If the precedent established in their case were strictly followed today, what an epidemic of sudden deaths the newspapers would be called upon to record! The Asiatic cholera and his twin destroyer, Yellow Jack, together with all their cousins and their sisters, and their aunts, would be forced to shut up shop and go out of business, inasmuch as there wouldn't be enough of humanity left for them to work upon and pay running expenses, while consumption, fever and diseases of the kidney, heart, brain *et al.*, would long ago have gone into hopeless bankruptcy. Possibly even the medical fraternity might ere this have become discouraged and become reputable members of society.

Why, look about you, and you will not fail to discover an Ananias or a Sapphira in every other man or woman whom you meet in your daily walk.

Here is the real-estate dealer, for example. He takes you to look at the piece of property he wishes to sell. He points out the beautiful prospect, but says nothing of the raw winds which roar about the place from November to June; he speaks of the fine elevation, but is silent in regard to the ice-covered, slippery hill you must climb, if you can, next winter; he explores with you the commodious cellarage and comments upon its roominess in eloquent terms, but he strangely forgets to mention that it is afloat two-thirds of the year; he shows you the fine well of water and asks you, with assurance born of personal knowledge, if you ever tasted better, but it does not occur to him to remind you that in summer, when the well isn't as dry as a Sunday-school discourse, the water tastes almost as bad as it smells and smells almost as bad as it tastes; he takes you into the chamber—not a syllable about the leaky roof; he points out the external beauties of the house—the fact that there is nothing but faith between the clapboards without and the plastering within entirely escapes him; he dilates upon the splendid neighbors, but fails to refer to the neighbors' hens. And so on, to the end of the chapter. What he tells you is true. He does not lie. He only keeps back part of the truth. Should he die suddenly, nobody would be so uncharitable as to intimate that his taking-off was a punishment for constructive mendacity, especially if he be rich. It would be apoplexy or heart disease, or some other respectable malady, and the stain which still hangs about the memory of Ananias and Sapphira would never cause his heirs, administrators and assigns to hang their heads and blush.

The landlord of the summer hotel advertises his finely appointed house, its extensive views and its well-appointed table; but advertising costs money, and he can not afford to pay for space in which to tell of the malaria which rises from the swamps down there in the hollow, or of the mosquitoes which throng the air and bleed the guests with a persistency almost equal to his own, or of the fact that his "fresh" vegetables are fresh only in the sense that they are fresh from the can in which they have been imprisoned a twelvemonth, or of the diphtheretic condition of the outbuildings, or of any one of the many "offs" and "outs" with which he is only too familiar. He keeps back part of the truth. He does nothing more, nothing worse. And he reads the story of the Biblical libbers with complacency, if not with contempt.

The doctor feels of your pulse and gives you a dose. He does not tell you you are better off without medicine. Perhaps he goes so far as to not tell you candidly that he doesn't know what's the matter with you. At all events, he keeps back part of the truth. The fate of his Scriptural prototypes has no terrors for him.

But why waste words over a matter that is apparent to all? In every profession, art, craft, trade and occupation you will find the same thing. Everybody, everywhere, no matter what he be doing, or whether he be doing nothing at all, is engaged, more or less constantly, in keeping back part of the truth. And whoever hears of "death by lying?" You will search the mortuary reports in vain for it among the causes of deaths.

To be sure, there is one exception, namely, the newspaper writer; but he is the exception which proves the rule. —*Boston Transcript.*

Careless Letter Writers.

Some facts and figures showing how careless many persons are appear in a Washington budget concerning the Dead Letter Office. The whole number of letters received during last year was 4,834,099, or an average of 15,675 for each working day. Of these 3,719,380 were sent to the Central Office because they were not called for at the postoffice to which they were directed, and 112,648 were returned to the postoffices by hotel-keepers and thence sent to the Dead Letter Office because the departed guests for whom they were intended failed to leave a new address. Of the domestic letters opened, 18,387 contained money amounting to $33,770.17; 20,204 contained drafts, checks, money orders, etc., to the amount of $1,576,948.13; 84,088 contained postage stamps; 34,390 contained receipts, paid notes, and canceled obligations of all sorts; 38,348 contained photographs, and 25,554 contained articles of merchandise.—*Chicago Herald.*

—By a provision in the laws of the republic of Mexico it is said that all persons not Mexicans are prohibited from owning an estate within twenty leagues of the boundary line.

SEASON.

In Me[illegible]ade for Traveling [illegible]g Purposes.

Dresse[illegible]emi-so[illegible]ll dresses for traveling. F[illegible] J[illegible]paca is being made up in imsho[illegible] of the graceful gowns worn bl[illegible]ring the summer by the Princess of ita[illegible]ales and her daughters. For very d[illegible]ng ladies silver braid or white mo[illegible]r has formed the trimmings, the mo[illegible]your being used as a narrow vest, high ha[illegible]lar and straight cuffs, with rows of [illegible]aid along the edges, and also on the [illegible]sh draperies that are worn with a [illegible]t skirt. For autumn dresses black s[illegible]aid, or else dark blue Hercules braid, k[illegible]d take the place of metal braids, and br[illegible]her velvet or plush will be used for wi[illegible] vest, cuffs and collar. Long overskirts that are made like the housemaid skirts, and looped up on one side or both, will be used with these dresses, and there may be rows of braid or of velvet ribbon for the trimming. A side panel of velvet will be chosen by those who prefer pleated skirts with Greek draperies. The new shade of brown, called lynx brown, is also being made up in mohair and alpaca dresses for the three autumn months, when canvas dresses will be too thin and cloth too heavy for comfort. Gilt braid will be strikingly used on such dresses, rather than a piping or edging for brown velvet spun in many showy rows or in the very [illegible] patterns lately used. Wide wool th[illegible]face, [illegible] wool laces that are em[illegible]ghtly with gilt are rich [illegible]gallons and for lynx brown mohairs, broidered [illegible]threads are wrought in simtrimmings [illegible]s for gray dresses. while silver [illegible]ed and blue laces are also ilar trimmings to trim blue alpacas, and The mixed [illegible] sometimes seen velvets being used [illegible], in stripes or in very with these are [illegible] the small accessories of the two co[illegible]. The correct idea, how small figures, for[illegible]es is to have them exof the corsage [illegible]pending on their fine ever, in such dres[illegible]. When lace is used exceedingly plain, most stylish when contit for their beauty skirts a single deep on mohair, it is [illegible]y slightly gathered, fined to the lowe[illegible]and side gores, or else fall of lace, [illegible]ree narrower ruffles crosses the fro[illegible]the front, and several there are two o[illegible]up the left side in the of lace across[illegible]ered by the drapery. rows are placed is that of edging side space left unco[illegible]w wool lace, and form-Still another pl[illegible] sides of the skirt of pleats with na[illegible]hen braid is chosen for ing the front a[illegible]ew fancy is to form the these pleats. [illegible] two very wide box trimming, the [illegible] these with clusters of front breadth [illegible]he braid, lengthening pleats, coverin[illegible]luster, and curling up cross rows of [illegible]he sides. A pointed each row in the [illegible]a the same way then the ends toward [illegible]and smaller points plastron made[illegible]. To complete such a trims the corsa[illegible]there should be a long are on the sleeve[illegible]th ulster, and a bonsuit for tra[illegible]veling straw with the brim blue c[illegible]brown clo[illegible] velvet, as is [illegible] of rough blue [illegible]eam Lake[illegible]. A covered with blue or brown [illegible] of the the most becoming to the wearer. rosette of braid or of wool lace, or some[illegible]k, many "donkey's-ear loops" of wool or of crape, should trim the close round hat of felt or straw that many young ladies prefer to bonnets.—*Harper's Bazar.*

UNDERTAKERS.

How and Why the Term Came to Be Applied to "Funeral Directors."

The earliest known use of this word as applied to conductors of funerals is by Young, who has the couplet:

While rival undertakers hover round,
And with his spaid the sexton marks the ground.

The present use of the word is no doubt derived from its primary meaning, one who stipulates to do anything, or undertakes the management of any affair. Two hundred years ago a class of people known as upholders were usually called upon to take charge of the funerals. Thus the poet Gay says:

The upholder, rueful harbinger of death,
Waits with impatience for the dying breath.

Now, upholders were dealers in second-hand furniture, old clothes and the like, and perhaps were so called because they were so often resorted to as the last resource of failing credit. As these persons were able from their stock of cheaply purchased material to supply what was needed at funerals at less expense than the regular merchant or haberdasher, they came to be thus employed, and also to furnish houses. In time the more ambitious of this class confined their business to the furnishing of houses only, and dealt in goods both new and old, and to avoid the confounding of their business with that of the funeral managers styled themselves upholsters, a name changed latter to upholsterers. Subsequently the more pretentious members of the clan of upholsterers assumed the name of undertakers, deriving the cognomen logically enough from the signification of its parts in the Saxon tongue. An undertaker, one who takes in hand a business or task, or renders himself responsible for its performance. Or perhaps the idea of the word was taken from the French name for the same office, entrepreneur, though the primary idea of the French word is rather that of one who bids for a particular task. Clarendon, in his "History," gives the word with a general meaning in the line, "Antrim was naturally a great undertaker." Honeywood, in "The Good-Natured Man" of Goldsmith, speaks thus of Croaker: "His very mirth is an antidote to all gayety, and his appearance has a stronger effect on my spirits than an undertaker's shop.—*St. Louis Globe Democrat.*

—A noted statistician, Edward Atkinson, insists that there is an abundance of room yet in this world. The 1,400,000,000 persons supposed to be on the globe could all find easy standing room within the limits of a field ten miles square, and by the aid of a telephone could be addressed at one time by a single speaker. In a field twenty miles square they could all be comfortably seated.—*N. Y. Tribune.*

—Dr. C. C. Abbott, the naturalist, recently found upon his farm at Trenton, N. J., a box tortoise, upon the under shell of which was cut his grandfather's name, J. Abbott, with the date 1821. The appearance of the tortoise denoted great age, and there is no reason to doubt the fact that the name was really engraved upon it sixty-four years ago.

HOW NECKTIES ARE MADE.

A Growing Interest of Considerable Importance—The Materials Used.

"There are special grades and designs of silks and satins made exclusively for the necktie trade," said a manufacturer to a reporter. "These materials are made from patterns designed by men who do nothing but study up new things in neckties. There are from fifty to seventy-five factories in this country and ten or twelve first-class makers. The latter usually secure exclusive right to use certain styles of goods from the makers by buying either the entire stock offered to the American market or a large portion of it. But the success of making up the goods is just like a lottery ticket. Perhaps one year I may hit on some design and it will become so popular that all other makers will be forced to adopt it, but the next year some one in Boston or Philadelphia may make a hit and I will have to follow him. There's never any telling how a necktie is going to take with the public until it's on the market. There its success depends on who adopts it first. If he happens to be a howling swell and on the right side of popular favor that particular kind of necktie will sell well."

"Are the styles of making up neckties originated abroad?"

"Not now. They were until less than three years ago, but now our styles are superior to the European and they are coming over here for patterns. However, there is a tendency for English fashions for the fall."

"Are men or women employed in making neckties?"

"Women. There are more than 1,200 girls thus employed in this city alone. They work by the piece and make more or less money according to their expertness. A good finisher can make eight dollars or nine dollars a week. She takes a necktie after it is put together and finishes each detail perfectly so that it is ready to box. Three different colors of the same design and style are boxed together to give the dealer an assortment in the one make. The finisher must see that all of this one kind are exactly alike in point of finish and make-up. We have one girl who does nothing but turn the bands of neckties, and she makes fifteen dollars a week. She turns twenty-five or thirty dozen bands a day.

"The cheap wear now flooding the market is composed of old styles made of poor goods. As a rule, men show no discrimination in purchasing neckties. They look into a window, see a tie that takes their fancy and then rush in to buy it, never stopping to ask the price. Thus they are just as likely to buy one of the cheap kind, that will not last a week, as a good one."—*N. Y. Mail and Express.*

THE LONDON MINT.

The Number of Coins Struck During the Past Year.

The recently issued report of the [illegible]ney-master of the Mint, giving an Depa[illegible]number [illegible]erations of that Deaccount of the o[illegible]n [illegible]drop[illegible]more [illegible]yment for the year 1884, is a [illegible] than usually interesting document. From it we learn that the amount of gold coined during the year exceeded by more than a million the amount coined in 1883, while the silver coinage was but little in excess of the average. The coinage of bronze, however, was larger than in any year since 1875.

The total weight of metal melted down during the twelve months was 470 tons, made up as follows—a certain proportion of alloy being of course included—gold, 67 tons; silver, 198 tons; and bronze, 205 tons. The total number of coins struck out of this metal was 65,295,382, giving an average of more than 1,200,000 pieces per week throughout the year. Out of these, however, 8,942,081 pieces did not come within the limits of the standard legal weight, so that the number of pieces available for issue was reduced to 56,363,301, the value of these good pieces being, real or nominal, £3,157,966 10s. 1d. Of this amount, £3,070,292 10s. 5d. (41,093,301 pieces) consisted of imperial coinage, the remaining £87,673 19s. 8d. (15,270,000 pieces) being colonial coinage for Canada, Jamaica, Hong Kong, etc. All this coinage, both imperial and colonial, has been executed at the mint, its increased coining power rendering it unnecessary that any portion of the work of coinage should be intrusted to private firms.

The greatest number of coins struck of any denomination was about 11,700,000, consisting, as will readily be supposed, of pence. Halfpence came next in point of numbers, nearly 7,000,000 of this coin being struck. The number of farthings struck was over 5,700,000, a seemingly large number, considering the present small general circulation of this coin. Of shillings, nearly 4,000,000 were coined; sixpences, over 3,400,000; threepences, over 3,300,000. Sovereigns and half-sovereigns were coined to the number of over 1,700,000 and 1,100,000 respectively. Of colonial coinages, that of bronze half-cents for the Straits Settlements was numerically largest, 4,000,000 of this coin being struck during the year.—*Chambers' Journal.*

Words of Advice.

An Eastern paper, the *Academy News*, having asked a number of distinguished persons to write for its columns a few words of advice to boys received, among other answers, the following: Dr. Lyman Abbott: "Whatsoever thy hand finds to do, do it with thy might." E. P. Roe: "Do one thing honorably and thoroughly and set about it at once." Ex-President Hayes: "Commit to memory and recite Brown's letter to a young friend." General Lyon: "No one will ever become a great scholar without constant study, close application, and without thoroughly understanding that which he may attempt before passing it by to take up something else." General Winfield S. Hancock, among other things: "Be truthful, never try to appear what you are not, honor your father and your mother." Rev. E. E. Hale: "Tell the truth. Keep the Commandments. Do not drink. If you have anything to say, say it; but if not, certainly not."

HATS AND BONNETS.

Eccentricities in Headgear That Distinguish the Autumnal Season.

Fall hats and bonnets are receiving early attention. The English walking hat, the turban, and peaked brimmed hats are to be shown by the fall trade, but large brimmed shapes such as the "Malborough" and "Gainsboro," are hurrying to favor again fast. A straw in both black and brown is shown, nameless, that is sure to win favor. It has a brim of medium width that can be rolled up at the side or front at pleasure, or worn down and over the forehead. The latter will be the fashionable tip, but after the recent long reign of hats that tipped back it may not take with every one at first. This hat has a medium high crown somewhat larger in circumference at the top and bottom than round the center of the wall. The hat needs facing, which will usually be of velvet. At the seashore large leghorn hats are worn in the morning without any outside trimming except a scarf of tulle or mull wound round the crown, crossed in the back, and brought round to the front and side and tied in a bow. In Paris very large Italian straws are worn turned or "roiled" up at the side a la Marie Antoinette. These are but pointers. It remains to be seen whether the reign of the odd, fanciful and quaint in shapes will not run into the fall styles as it has through those of spring and summer. In a half hat half bonnet shape there is shown a model with high, military, conical crown, deeply indented at the top. The brim is very wide and oval in front, very narrow behind and rolls up high from the face.

Eccentricities in trimming will surely continue if the first note of change struck is any key to the matter. London *Truth* says that the *bains de mer* (bathing season) always gives rise to eccentricities in head-gear and furnishes novel ideas for fall trade. The latest caprice from the seaboard vanity fairs is a cascade of moire ribbon loops placed on the top of the high crown, falling in a shower over the back of the hat, with only a few drops of the shower hanging in front. The latest novelty in Paris trimmed hats—and this on fall models—is the placing of a cluster of feathers at the back of the tall crown, a few of the tips shown lying from a front view. For instance, if the crown is high and straight, a scarf trimming may surround it, and the plume or ribbon trimming be massed at the back. Especially is this to be done where the front brim is wide and the back one narrow or open. Will this take? A good deal of the becomingness of a hat depends on its trimming. In fact, some can not wear a hat at all unless converted into an object totally unlike itself by its trimming. Now all can not and will not look well in a hat apparently turned with the back to the front, and there may be a little war among our milliners before the new order of things is adopted.

One thing seems pretty certain of fashionable sanction; the use of tips and plumes. The ascendancy of the wide-brimmed round hat necessitates this. We have heard of more than one maiden who has been sighing for [illegible] over her inability to make use of [illegible] millinery [illegible] the [illegible] (and perhaps [illegible] buying more,) while high-crowned narrow-brimmed hats have been in style. To such the opening vista given of probable fall millinery will be welcome. No woman, indeed, will quarrel with the feather feature, for all know there are few things more becoming on a hat than a wavy plume. Besides the ostrich plume and tips, fancy feathers of all kinds are already shown.

Wings are seen mounted with small palm breasts, a single or a double bird head at the foot. Small parrots in natural greens and in dyed colors are seen in every assortment. From these and other suggestions, it seems probable that oddities and eccentricities will not go out of style with summer millinery modes. Sashes and sash effects are seen in multiplied form and arrangement. No lady is too old or too young to wear one. They have been confined to thin toilettes mostly, but it is thought that they will enter into the makeup of heavier fabrics this fall, and appear in modified form on street toilettes. Plain white surah silk simply hemmed across the ends is very much liked for white dresses. The favorite way of arranging these is to drape the sash as a fall in front (lengthwise), higher at the hips, simulating the lower edge of a short apron front. From the hips it can hang in long loops like panels, or be carried further back and then fall in loops or loop and ends. Wide sash ribbons are also arranged the same way.—*Cleveland Leader.*

Royalty Hunting Bugs.

I was a visitor at a house in the country not many years ago at which among my host's guests was Lord Walter Campbell, a son of the Duke of Argyll and brother of the Marquis of Lorne. I shall never forget an amusing incident of that visit, and I think his Lordship must also recall it with a great deal of amusement. It was on a Saturday evening, after the ladies had retired for the night and the servants had gone to their quarters, that the gentlemen of the house suggested that they might find amusement in hunting for game. This overture was met with some astonishment by not only Lord Walter Campbell but with the other men in the party, and when they presumed to ask what kind of game he wanted them to hunt for at that hour of the night—it was then past one o'clock—he replied by saying: "Come and I'll show you." Forthwith they started for the lower regions of the house, and when they arrived in the kitchen the host brought from a closet some yellow insect powder and several pairs of bellows, with an arrangement on the point of them in which to place the powder so that it could be blown out in a spray. Each man took one of these bellows, filled with yellow powder, and following the example set by their host blew it into the crevices of the floor and rat holes. Much to their amazement, as they had not been told what all this preparation was for, after injecting the powder the first time out rushed hundreds of croton bugs, and the sport then began. It consisted in blowing the powder all over the floor and killing these unpopular but well-known insects.—*Cor. N. Y. Times.*

THE REPUBLICAN.

OAKLAND, MARYLAND.

JAS. A. HAYDEN,
Editor and Proprietor.

TERMS OF SUBSCRIPTION.

SATURDAY, SEPT. 26, 1885.

Republican County Ticket.

FOR STATE SENATOR:
DR. E. H. GLOTFELTY.

FOR HOUSE OF DELEGATES:
GEORGE L. MICHAELS,
SILAS WEIMER,

FOR CLERK OF CIRCUIT COURT:
W. H. TOWER.

FOR COUNTY COMMISSIONERS.
JACOB GNAGEY,
THOMAS K. HARVEY,
WILLIAM W. FRAZEE.

FOR SHERIFF:
JOHN H. RILEY.

REGISTER OF WILLS,
JOHN S. LAUGHLIN.

FOR COUNTY SURVEYOR:
DANIEL CHISHOLM.

Our Candidates.

Above we give the candidates nominated by the Republican convention on Tuesday last. We congratulate the party that so good a ticket has been placed before us for our support. When we take into consideration the fact that perfect harmony prevailed in the convention and that men who are exceptionally good men and well qualified for the various offices have been named, we assume that these candidates will command the strength of the Republican party. There certainly can be no valid reason why any Republican should refuse to support the ticket, and if the ticket gets the support of the Republican party there can be no doubt of its election. Whilst we welcome all Democrats who many choose to vote with us, we frankly admit we do expect [illegible] of sterling acquainted [illegible] per, habits and intellect[illegible] our candidates individually in these columns. Until we can do this we commend the ticket as a whole to our readers, and bespeak their earnest support.

Prohibition in Politics.

Bishop S. M. Merrill has been an active worker in the temperance cause for the past forty years. In a letter to the Chicago *Inter Ocean* he contributed, some interesting and practical views upon the relation of the temperance question in politics. He cites the anti slavery agitation, which, he justly claims, retarded rather than accelerated emancipation. He argues that organized prohibition is likewise more harmful than beneficial to the temperance cause. The temperance question is one that appeals not to the prejudices or the passions of people, but rather to their common sense. It should not and cannot rationally have a place in politics. There is no need of a separate party to vindicate its merits or to force it upon public attention. As Bishop Merrill well says:

"Constitutional provisions should never be made the basis of party organizations. The organic law of the State and the nation ought to have the support of the patriotic citizens in all parties. The only way to secure this end is to avoid thrusting platforms into the constitution. Prohibition of the liquor traffic cannot be permanent till it is in the constitution and it cannot go into the constitution as a party measure. It is too broad for party. Like the fundamental principles of the government, it must be the common ground of the better classes and parties; like the common school system, it touches interests too vital to the common weal to be made the football of politicians. Parties divide on interpretations of the constitution, not on the constitution itself. Interpretations form politics and party issues relate to politics. This is the legitimate battle-ground of politics. But there is a realism of principle beyond the conflicts of parties where the moral character of the government rests upon the foundation of right—where the enduring elements of Christian civilization crystallize in organic law—and to that broader realm of essential right this question of prohibition must come."

In other words, however desirable the bringing our people to the pursuit of temperance may be, it is not to be effected by statutory enactments. It is to be effected in the same way that other moral reforms are worked. The friends of temperance make the greatest mistake when they essay to make the question a political issue.

The Cumberland *News*, of Wednesday, speaking of the result of the Democratic nominating convention of Allegany county, says:

"After all the talk of what splendid things were to be done by the Democratic party of the county, their convention yesterday was about the biggest failure on record. Professing the belief that there was so much party dissatisfaction with the Republican ticket that a good Democratic county ticket would sweep the county went to work and after many hours of hard labor deliberately nominated a ticket probably never equalled for weakness in the history of the county, and which insures the election of ours."

Common Sense of the Thomas Case.

A sensation was created in Maryland when the news came some weeks ago that Mr. Morris A. Thomas had been appointed Indian inspector—a lucrative and responsible office, in which there are great possibilities. A very considerable portion of the Democratic party considered that appointment one that should not have been made. This dissatisfaction was not confined to the Civil Service Reformers and Independents but was felt even more angrily by the Democratic aspirants for office, who felt that all the rewards were to be given to the men of the Morris Thomas sort, while the faithful Democrats with cleaner records could expect nothing. The Democrats in general resent the selection of several men whose appointments were resisted by the Civil Service Reform Association. Their appointment to office offends the clean spoilsmen, as well as the Reformers. This is a fact that must be kept in mind by all who desire to understand the present situation. It is in part the feeling that supports Mr. Findlay in his attack upon Mr. Thomas.

As soon as the appointment was made this opposition showed itself. A set of charges, in the nature of an indictment, drawn by the Civil Service Reform Association, and presented by a committee of responsible gentlemen, who made these charges in the most public and most formal way. Whether the specific charges were properly proven or not, they at least, establish the fact of a general reputation not to be envied. Opportunity was given to the accused to meet the charges, and he filed a very lawyer-like answer, cleverly relying upon a counter-attack rather than upon defence. Mr. Findlay follow[illegible] ed up the attack, and [illegible] of an [illegible] dence is[illegible] could [illegible] additional evi[illegible] prepared by the civil service reformers to negative such points of the defence as may seem worth it. Thus the matter hangs before Secretary Lamar and President Cleveland.

Will the administration yield to this formidable pressure and remove Mr. Thomas? There are many reasons why it should, and perhaps stronger ones why it should not—at least, until after the elections. President Cleveland may have made up his mind not to send in the name of Mr. Thomas to the Senate—where it will meet a certain and humiliating rejection—and yet he may not desire to enter into the Democratic family quarrel or even to examine very closely the charges and the evidence against Mr. Thomas. The reasons for this are quite plain and simple; for, whether Democracy may like it or not, Morris A. Thomas is a representative man of Maryland Democracy. He comes to the departments at Washington fully endorsed by the leaders of the Democracy. When the Democracy selected Arthur P. Gorman for senator, they by that act sent him to Washington as the official adviser of the President in matters of this sort. The sort of man that Gorman is was as well known when the people of Maryland accredited him to Washington as the sort of man Thomas is. Nearly all the elected officials in Congress—except Mr. Findlay—united in telling the President and Secretary Lamar that Morris A. Thomas was a man of the sort that politics needs. They make light of attacks upon his honesty and defend his character. So the administration appoints him as a Maryland Democrat of the "most straitest sect."

And now, when the charges are brought against him, Senator Gorman goes to the administration and requests that Morris A. Thomas shall be retained, for this removal would injure the Senator's hope of re-election, the request is hard to deny. For it must be borne in mind that the people of Maryland have by electing Gorman accredited him to the President. If the Democracy want to tell the President that he is not to be credited, it must discredit him by defeating him. The true way—the only way—to get rid of being represented in office by such men as Morris A. Thomas is to defeat the men and the machine that make such appointments inevitable. The existence of the Democratic machine implies the existence of such machinists as Thomas and such engineers as Gorman; and if the people of Maryland want the machine, they must take it with all its appurtenances. It is not in derision, we say that Mo[illegible] strictly a represen[illegible] Democrat and the logical outc[illegible]as is its party management; and s[illegible] as Maryland Democrats mak[illegible]assi[illegible]of pride to vote the straight ticket, ju[illegible]g so long will men of his stamp get t[illegible]a offices.

This is said not in defence of M[illegible]e ris A. Thomas. We have from t[illegible] first regarded the appointment a[illegible]or- bad one—one that may cause the a[illegible] ministration bitter regrets. It is n[illegible] necessary for us to enter into t[illegible] questions of fact now before the [illegible] partments. It is enough for us to say that his appointment is regarded with dislike both by fair-minded regular[illegible]e Democrats and by all the independents and reformers; and we feel sure that his stay will be brief at best, for his rejection by the Senate is sure—for his name should be sent in, which we greatly doubt.—*Balto. American.*

Politics in Ohio.

CINCINNATI, September 20.—Cincinnati has been exempt from political gatherings in the fall fight except that of the Prohibitionists. Democratic candidate for governor has spoken once, and local [illegible] speakers have frequently addressed meetings in the open air in various parts of the city. One [illegible] peculiar to this campaign is the circumstance that the Prohibitionist meetings have been [illegible] than they have been [illegible] and another more significant circumstance is that they [illegible] in former years, from interruption from [illegible] In fact, the speakers have been free hearers. All the [illegible] by-standers to the growth of [illegible] have had attenvote, and in part to the [illegible] is due, in part, Democrats generally [illegible] Prohibition hibitionists as likely [illegible] sympathy of from the Republican [illegible] with the Pro- make a strong diversi[illegible] draw votes vor, if not give them [illegible]rty, and thus But if what the Pro[illegible] in their fa- is true, the Democrat[illegible] the victory. may be counting wi[illegible]ibitionists say What the Prohibitio[illegible] sympathizers that they will draw [illegible]out their host. votes than ever [illegible]ists do say is Democratic party, [illegible]ery many more will be, if at all, in [illegible]fore from the tricts. They base t[illegible] Of course, this facts which they sa[illegible] the country dis- their knowledge—[illegible] declaration on intention[illegible]ange as that is the avowed on[illegible] Democratic voters—and the ground, as they put it, that both parties have arrayed themselves against prohibition and in favor of the liquor traffic.

The Wyoming Massacre.

ROCK SPRINGS, WY., Sept. 18.—The Government directors of the Union Pacific, on a tour of inspection, arrived from the East yesterday, and have been looking into the cause of the late riot. They were met by a committee of citizens, who presented over thirty closely written pages of evidence, showing the anti-Chinese demonstration to have been the outgrowth of an accumulation of grievances under which the miners had suffered for several years. The directors will continue the investigation to-day, leaving for the West in the afternoon.

Three Chinese Consuls arrived yesterday to inquire into the causes and effects of the late riot, in behalf of the Chinese Government. They are General Bee, of San Francisco; Hy-Young-Foy, of Washington, and General Tsing, of New York, and are accompanied by an interpreter. They were closeted with their own people most of the day, and it is impossible to learn just now what they have accomplished. They will remain several days.

Assistant General Superintendent Dickinson and Governor Warren and Superintendent Warrel are also here presumably to assist the Chinese officials in their investigations. They began taking testimony to day.

CHEYENNE, WY., Sept. 18.—The Chinese are fast leaving Rock Springs being afraid to resume work, and it is confidently expected that the whites will soon be enabled to commence operations. The road west from Rock Springs is lined with Chinamen with their faces turned toward the setting sun. The white miners are greatly encouraged over the present prospects, and an amicable adjustment between the company and the Knights of Labor is expected immediately. Governor Warren and government directors are now in the camp.

Attorney General Campbell left Cheyenne for Rock Springs last evening to prosecute the participators in the recent massacre. Rumors are rife that further trouble at Rock Springs is expected, but no particulars can be ascertained.

State of Trade.

NEW YORK, Sept. 19.—No gain on the recently reported improvement in trade circles is recorded by the special telegrams to *Bradstreet's* received yesterday. In most directions the full measure of the movement is maintained, but that is all. From Chicago, St. Paul, St. Louis, Cincinnati and Detroit, at the west, comes the word that the interior purchases are as heavy as previously. At Detroit it is reported that losses sustained in the first half of the year's trade in dry goods have been made good already by the increased sales. It is noticeable, however, that at no important trade center, east or west have discount rates or call loan rates advanced. There has been a noteworthy gain in the employment of surpless funds, but bankers appear, thus far, to have been anxious to employ their idle capital at the lowest rates. This, together with the continued indisposition on the part of railway managers to cease rate cutting, with the somewhat squally railway tariff outlook among the granger lines and with the heaviness of wheat and of anthracite coal and the average of business failures from week to week, constitute the salient features of the trade situation.

Hog products and provisions are quiet and devoid of special features. The movement of dry goods from jobbers and agents continues quite as active as heretofore noted, and the firmness in prices of prints and of bleached and brown cottons is fully sustained.

Despite the holding back of new grain by farmers, the already towering visible supply grows larger and larger, and, as if to crown all, the quantity afloat for the United Kingdom and the continent shows an increase as well. The Indian corn crop has about passed out of the critical stage, that in which it was likely to be damaged by frosts, and the general opinion appears to be that very little damage has been done to it and that we are again to have "the largest crop on record." Demand for grocery supplies only moderate. Sugar supply increased. Dairy products are depressed.

The condition of the seaboard wool markets is hardly changed from a week ago. Manufacturers are buying freely, speculators are operating to some extent, holders are very firm in their views, and prices are easily sustained at the late advances. The general rise in values since July 1 is not far from 3c per pound. No signs of reaction appear. At Boston the market holds a strong tone, though prices are unchanged. Sales continue to be relatively liberal. There is a good deal of buying by dealers to sell again. Manufacturers, however, are taking both pretty well, apparently convinced that the lowest quotations have been left behind.

A Boy's Trick in Nutting.

The brown nuts are falling, and the boys are "hot-foot" for them, so we will tell them a trick which we learned last year, but too late to tell it to our young readers. We noticed, day after day, two boys going to the woods, carrying a bag and a clothes line, and saw them return in a short time with the bag well filled. We followed, to see whether their good luck was due to accident, activity, or their wits. They used the line in this way—selecting a tree in the open, on which the nuts were ripe and the shucks opened by frost; they shook the tree by climbing into it, and shaking and jarring the branches in the usual way, by stamping and clubbing. Still the finest nuts seem to stick to outermost branches. To get these, was a stroke of genius, and the clothes line and a little "mother-wit" were brought into play. The boy in the tree threw the line over a promising branch, so that both ends reached the ground. The boy on the ground made one end fast to a sapling at a suitable distance, and then drawing the other end as taut as possible, made it also fast around the trunk of a small tree. He tugged at the line after fastenfng it, and then took up the slack. The bough, of course, was swayed down. Then he tugged and tugged, and took up the slack again, until the line was almost as taut as a bow string. Then he beat the line with a club, as hard as he could strike, and with each clip, down came the nuts. Finally he unfastened one end, and drew it off with some difficulty, to be sure, over the end of the branch, sweeping off a lot of nuts that still held on. Thus the principal branches were stripped. They were lively boys and did very little loafing, but their energy was pretty well repaid.—*American Agriculturist for October.*

From Bill Nye.

Bill Nye, the famous humorist, will lecture during the coming season. That he will be the most successful of humorous lecturers, we have not a doubt. Vivid in imagination, terse in utterance and refined in style, he can not fail to win an intelligent audience. In a private letter, just received by the editor of this paper, Mr. Nye says:

"I had a good time in New York and Boston, and was surprised that I was not looked upon as a monstrosity or a freak of nature. There were a great many people in New York the day I was there, who were total strangers to me. New York is getting very thickly settled, and many people go there to do their trading. While I was there a steamboat got in from England and created very little excitement. People in New York are not easily startled. I stopped at a hotel where it cost me $5 a day for the bare necessities of life, and when I paid my bill it created no surprise whatever. You can go to the Fifth Avenue hotel and stay for days and not excite remark. There was a head-waiter there who spoke to me frequently and picked out a seat for me at the table, and seemed to take a great interest in me. Once he asked me if my dinner was all right. I told him it was bully and a good deal more than I generally had at home. Even if it hadn't just suited me I should not have told him so, for I could see that if I had been displeased, he would have shut up the house and made a good deal of trouble. So I told him it was all first rate, and he seemed to feel very much relieved. I have eaten at a great many hotels before, but he was the only head-waiter that ever tried to be friendly with me. Most of them are austere and dress so much better every day than I do on Sunday, that they make we feel ashamed of myself. I had a friend once though, who married the sister of a head-waiter at a hotel, and he said that the head-waiter at times threw aside his air of hauteur and reserve. He said once he heard him laugh a little."—*Arkansaw Traveler.*

ORDER NISI.

ORDERED, This Fifteenth day of September, 1885, by the Circuit Court for Garrett county, sitting in Equity, that the sale of the land of Alpha Hinebaugh and wife and John Hinebaugh and wife, mentioned and described in these proceedings made and reported by Henry A. Rasche, assignee of Matthew Cullen, mortgagee, be ratified and confirmed unless cause to the contrary thereof be shown on or before the 19th day of October next, provided a copy of this order be inserted in some newspaper printed in Garrett county, Maryland, once in each of three successive weeks before the 19th day of October next.

The report states the amount of sale to be $2,000.

W. H. TOWER,
Clerk Circuit Court.

True copy—Test:
9 26 3t. W. H. TOWER, Clerk.

COLLECTION OFFICE!

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents. Can be found at Harne & Lawton's store. Reference given when required.

ANDREW J. HARNE.
Oakland, May 19th, 1885.—1 y.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1885, and record'ed in Liber W. H. No. 10, folio 371, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

WEDNESDAY, SEPT. 30, 1885,

at 11 o'clock, A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
9 5 4t Attorney for Mortgagee.

Order of Publication

Joel Wiland vs. Florissa Biddinger, Simeon Biddinger and James Bowser.

In the Circuit Court for Garrett county. No. 160 Equity.

The object for which the bill of complaint was filed in the above cause, was to have certain deeds therein mentioned set aside as fraudulent, and to procure a decree for a sale of the real estate conveyed by Florissa Biddinger and Simeon Biddinger to James Bowser, and to subject the same to the payment of the plaintiff's claim.

The bill states that in the year 1875 Simeon Biddinger was largely indebted to the plaintiff for work done and materials provided for him, the said Biddinger, and for board and clothes for the children of the said Biddinger, and that the plaintiff continued to furnish board for the children of said Biddinger up to the time of the filing of said bill.

The Bill further states that on the 25th day of June, A. D. 1878, he instituted suit in the Circuit Court for Garrett county, to recover from said Biddinger the amount due him, and that on the 9th of September, A. D. 1879, a judgment was rendered by said Court against the said Biddinger in favor of said plaintiff for the sum of $83.15, and $75.75 costs.

The Bill further charges that after the institution of said suit at Law, and until the filing of the bill in this cause, the plaintiff continued to furnish board and clothing for the child of the said Biddinger, and that the said Biddinger is indebted to the plaintiff in the further sum of $142.50, making an entire indebtedness on the 15th of September, A. D. 1879, of $611.70.

The Bill further charges that prior to the month of May, A. D. 1876, the said Biddinger purchased from Jacob Hare and wife, a tract of land in Garrett county, called "Mount Airy," containing fifty acres of land; that the said Biddinger paid the entire purchase money for said land, amounting to $750.00 or more, that after said Biddinger had purchased said land and paid for it, he intending to cheat, defraud, hinder and delay the plaintiff in the collection of his said claim, and with a view to cheat and delay his other creditors in the collection of their claims, fraudulently procured and induced said Hare and wife to convey said land to Florissa Biddinger, his then daughter, by deed dated May 22nd, 1876.

The Bill further states that at the time said deed was made and at the time of filing said bill, the said Florissa was an infant, under the age of twenty-one years, and that she had no money of her own, and that she was wholly incapable of earning any money, that she had not inherited anything, and that she paid no part of the purchase money for said land.

The Bill states that the said Biddinger further intending to cheat the plaintiff, hinder him in the collection of his said claim did on the 11th day of January, A. D. 1881 procure, induce, and require his said infant daughter to join with him in executing a deed for said land to James Bowser, and that the said James Bowser knew all the circumstances surrounding the whole matter, and that his object was to cheat the plaintiff.

The Bill further charges that the said Biddinger was indebted and had not means apart from said property to pay his debts, and that the said conveyances were fraudulent and void and contrary to Equity and good conscience.

The Bill then prays that said deeds be set aside and that said land be sold for the purpose of paying the plaintiff's claim, and for general relief and for process.

It is thereupon ordered by the Court this Second day of September, A. D. 1885, that the plaintiff cause a copy of the order together with the object and substance of the bill to be inserted in some newspaper published in Oakland once a week for four successive weeks before the fifth day of October, A. D. 1885, giving notice to the said Florissa Biddinger, the non-resident defendant in said Bill, and warning her to appear in person or by Solicitor on or before the 5th day of October, A. D. 1885, to show cause, if any she has, why a decree should not pass as prayed.

W. H. TOWER,
Clerk Circuit Court for Garrett county.

Republican County Convention.

The Republican County Nominating Convention met at Offutt's Hall in Oakland, Tuesday at 2 o'clock P. M.

The convention was called to order by Capt. Jas. A. Hayden, Chairman of the County Central Committee. Col. E. C. Tillson was made temporary Chairman, with Thomas H. Bittinger as Secretary.

On motion one gentleman from each district represented was selected on permanent organization, rules, &c., as follows:

No. 1.—J. Z. Browning.
2.—Ira E. Friend.
3.—Jonas E. Gnagey.
4.—Daniel Collins.
5.—Eli McMillen.
6.—A. S. Sell.
7.—John Shartzer.
8.—H. G. Sanders.
9.—Michael Durst.
10.—J. S. Laughlin.
11.—Not represented.

The committee, after a brief absence, reported as follows:

The committee on Credentials, Permanent Organization and Rules, respectfully report, that they have examined the credential laid before them, and find the following persons entitled to seats in the Convention:

District No. 1.—J. Z. Browning, J. L. Fitzwater, W. M. Jenkins, A. C. Browning, D. J. Bevers.

No. 2.—George Dunham, Ira E. Friend, Edward Stuck, Ulysses Frazee, A. C. Friend.

No 3.—Chas. Wegman, E. J. Miller, J. E. Gnagey, F. Durst, Thos. H. Bittinger.

No. 4.—D. Collins, T. T. Michaels, Jas. Eagan, I. H. Kooken, O. B. Barnard.

No. 5.—Eli McMillen, Henry Kamp, H. E. Friend, Jacob Becket, Frederick Kolb.

No. 6.—A. S. Sell, J. T. Wilburn, Joseph F. Frantz, John Sines, I. M Frankhauser.

No. 7.—A. Nelson, T. W. Casteel, John Shartzer, John T. Bowers, Geo. P. White.

No. 8.—Geo. W. Wilson, J. W. White, J. W. Lee, H. G. Sanders, F. Griffith.

No. 9.—G. W. Blocher, Michael Durst, H. Blocher, Aaron Wilhelm, D. Holt.

No. 10.—E. C. Tillson, J. S. Loughlin, J. C. Rodeheaver, Frank McRobie, Daniel Wilson.

Your committee recommend that the temporary officers be made the permanent officers of the convention, and that the rules governing the last session of the Maryland Assembly be adopted for the government of this convention. They further recommend that the nominations shall be made in the following order: First, Senate; second, House of Delegates; third, Clerk of the Court; fourth, County Commissioners; fifth, Sheriff; Sixth, Register of Wills; seventh, Surveyor.

That all ballots for nominees shall be made by districts, and that the majority of the delegates of each district present shall cast the vote of the district.

J. Z. BROWNING, Chm.
ELI MCMILLEN, Sec't.

The report of the committee was adopted, whereupon the president announced that nominations were in order for Senator. The names of Col. E. C. Tillson and Dr. E. H. Gotfelty were presented for that office. The first ballot resulted as follows: Dr. Glotfelty, 7; Col. Tillson, 3.

For House of Delegates the names of E. C. Tillson, Geo. L. Michaels and Silas Weimer were placed in nomination, with the following result on the first ballot: Tillson, 6; Michaels, 7; Weimer, 7.

For Clerk of the Circuit Court W. H. Tower, the present incumbent, had no opposition, and was nominated by acclamation.

For County Commissioners the names of Jacob Gnagey, of No. 3; Wm. W. Frazee, of No. 2; and Thos. K. Harvey and John W. Lee, of No. 8, were presented. The first ballot showed the following result: Gnagey, 9; Harvey, 9; Frazee, 9; Lee 2.

John H. Riley, for Sheriff; J. S. Laughlin for Register of Wills, and Daniel Chisholm, for Surveyor, had no opposition, and were nominated by acclamation.

Delegates to the State Convention were chosen as follows: Edward H. Sincell, Eli McMillen and James A. Hayden.

Daniel Chisholm, Henry E. Friend and Thomas H. Bittinger were recommended for appointment as members of the State Central Committee for this county for the ensuing two years.

The convention then adjourned, after being in session less than two hours.

Wraps.

Ladies' and Childrens Cloaks, Newmarkets, Russian Circulars, Short Jackets and Jerseys now open at

47 William Umbel vs Jacob Maust. Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Continued at cost of defendant.

49 F. A. Thayer, Trustee, vs George A Speddon. Peddicord for plaintiff. Hamill for defendant. Non pros.

50. F. A. Thayer, Trustee, vs C. D. Atkenson. Peddicord for plaintiff. No counsel for defendant. Judgement on rule.

51 F. A. Thayer, Trustee, vs David Rush. Peddicord for plaintiff. No counsel for defendant. Judgement on rule.

52 Saran C Sanders vs John T. Ashby. Peddicord & Thayer for plaintiff. Veitch & Townshend for defendant. Judgement for plaintiff for $65.75.

55 Jesse J. Robeson vs Amos Broadwater Hamill for plaintiff. Brace & Richmond for defendant. Continued.

62 Thomas J. Peddicord, Receiver, &c., vs James L. Burley and Burley Bros. Peddicord & Thayer for plaintiff. Hamill for defendant. Judgement for plaintiff for $292.85.

64. Baker & McCool vs Alexander Ried and others. Hamill for plaintiff. Veitch & Townshend for defendant. Continued.

70 Harmon W. Hesen vs D. E. Offutt. Peddicord & Thayer for plaintiff. Hamill & Semmes for defendant. Removed to Allegany.

81 Continued.

82 Verdict for plaintiff for $175.

CRIMINAL APPEARANCES.

Nos. 1 to 12 continued.

No. 13. State vs. A. H. Williams. Selling liquor without license. Not guilty.

Nos. 14, 15 and 16, continued.

17. State vs. Charles Janosky. Larceny. Not guilty.

18. State vs. Wm. Broderick. Assault and battery. Guilty, and fine of $20 imposed.

19. State vs. M. J. Miller. Violating Local Option Act. Not guilty.

20. State vs. Mary Wiseman. Violating Local Option Act. Not guilty.

21. Same vs. same. Same charge. Guilty, and fined $50.00 and costs.

22. State vs. Mrs. Viola Groves. Assault and battery. Guilty, and fined $10 and costs.

Grand Jury Report.

To the Honorable, the Judges of the Circuit Court for Garrett County.

The Grand Jury for the September Term, 1885, beg leave to report to your Honors that it has carefully and conscientiously endeavored to discharge its duties in the strict examination of all matters coming before them involving a breach of the law, finding presentments whenever and wherever presentments seemed to be required for the vindication of the law and the preservation of public peace and order, ignoring all cases in which the evidence in our judgment was not sufficient to find a presentment. We acknowledge the efficient services rendered us by the State's Attorney, Mr. J. W. Veitch.

The Grand Jurors further report that they have visited and examined the County buildings in accordance the law, we found the Jail in good condition, except the back porch, where a floor is greatly needed. We also recommend that light be provided in the water closet on the upper story. We found the building clean and orderly, and no prisoners therein. The Court House is in apparently as good condition as it has been for some years past.

Having thus performed the duties and labors of the Grand Jury, we most respectfully ask to be discharged.

WM. H. HINEBAUGH,
Foreman.

Small purchases cash; $10 and over a credit of six months.

J. B. SHOUP.

Sept. 12, 3t.

In Memoriam.

Commemorating the death of Mary Florence, daughter of John E. and Jane Otto and wife of Jas. M. Wolfe.

Mary Florence Otto was born March 11th, 1866, and died September 7th, 1885, aged 19 years, 5 months and 26 days. She took sick on Friday evening, the 5th inst., and died the following Monday. She was a member of the Evangelical church from her youth to her death. The funeral discourse was delivered by our beloved pastor S. J. Caton. Our dear Florence, thou art gone the way of all this troublesome world to the land of infinite day. To the place where the weary are at rest. To the Golden City, the New Jerusalem. Pain and death may not enter there. On Sunday morning, being asked whether she was prepared to go, she replied, not quite, but I am trying. Her friends and relatives were immediately summoned to her bed-side and the great work of salvation was commenced. A Psalm was read and the whole crowd kneeled around her bed and sent up their mighty petitions to the throne of God for her deliverance. Even little Lessie, her young brother, as if filled with the burning light of the Son of Righteousness, like a man, sent his supplications to the Great Redeemer in behalf of his dying sister. Soon his satanic majesty gave way to the still small voice that whispers *peace* to the truly penitent. The Divine Love pervaded her soul which she expressed by *loud* hallelujahs and clapping of hands. Then with her own voice, and in a clear sweet tone, she struck the tune of "Praise the Lord, O my soul," of which she sang two or three verses till she was physically exhausted. Her friends joined her, sang it through and several others. The mingled expressions of joy and grief and thanksgiving presented a scene never surpassed in this world. Joy because a soul had been saved, grief because of the departure of a loved one, and gratitude to God for his great salvation. She soon expressed a willingness and a desire to die, so that she could go to see her dear little babe and others, and be in the arms of, in her own words, "her dear Jesus.

BROTHER ANDY.

[Kingwood Journal please copy.]

Mountain Lake Park.

As there was so much of the court proceedings to publish last week, my letter was crowded out, but hope to have at least a little corner this week.

As was so earnestly hoped the good weather continued until our excursion day was over. The people began to gather here early in the morning. By ten o'clock several thousands had gathered on the grounds. The excursion trains from Grafton and Cumberland had arrived about this time. The Oakland Lodge of Good Templars joined our Lodge and all marched to the Depot to meet and escort the other Lodges to the Auditorium. The procession was headed by the cornet band of Lonaconing, which furnished excellent music throughout the day. Mr. Carskadon, of Keyser, gave a brief address of welcome which was responded to very earnestly by Rev. Mr. Baker. Mrs. Mary Woodbridge, of Ohio, then gave a very interesting and telling address, which will not be soon forgotten by all who heard her. She stands second to none in this grand movement and I suppose stands number one in abundant and efficient labors. At two o'clock a meeting was held for the children, principally by the children, which was just splendid. Especially a performance gotten up by Mrs. Dr. McComas for this occasion. Mrs. Woodbridge gave a very pleasing address to the children, after which brief reports were given by different ones of the R. R. workers of the work done at different places among their own people, with earnest solicitations for help and sympathy in this direction. The crowd then gathered at the Depot and awaited the returning trains. All passed off very pleasantly and quietly, and everybody appeared to be pleased with their trip.

They had hardly gotten out of hearing until the deep-toned thunder was heard in the north-west, and just at nightfall the rain began to fall and the wind blew furiously all night.

Preaching here next Sabbath at 10:30.

Surveyor—George Robinet.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, Sept., 21, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 4¼@5¼ c. that generally rated first quality 3¾@4¼ cts; medium or good fair quality 2½@3¾ cts; ordinary thin steers, oxen and cows 2@2½ cts; extreme range of prices 2½@5¼ cts; most of the sales were from 3@4¼.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 2,833 head, against 2,103 last week and 4,959 the corresponding week of last year, and the sales were 2,165 head, against 1,794 last week, and 2,166 head the corresponding week of last year.

Trade was slow again to-day, some few dealers finding it more so with them than for several weeks past. Prices were off 15 to 25c. per 100 pounds, as compared with last week, good and medium cattle suffering more than the more common grades. Tops were not numerous or quite as good as last week, but were sufficient in numbers and quality for butchers' wants. Prices 2@5¾c., with most sales from 3 to 4¼.

THE SWINE MARKET.

There is but little increase in the number of the receipts over last week's offerings, but the quality is generally reported better than it was then. Trade is fair, the supply being generally reported as about equal to a moderate demand. We quote common hogs at 5¼@6c., and the better grades 6¼@6¾ net. Same time last year hogs sold at 6½@8¼c., fair selling under 7.

THE SHEEP MARKET.

There is a heavy increase in the number of the offerings over last week, with a proportionate large number of good sheep and lambs. Trade is only fair for good stock. Common sheep and lambs are very difficult of sale, the buyers buying rather sparingly, and there being but little or no outside demand. We quote sheep at 2@3¼c. for common to extra, and Lambs at 2½@4¾ gross. Stock sheep $1.25@2.75 per head. Same time last year sheep sold at 2½@4½c., and lambs at 3½@5c. and stock ewes $2@3.25 per head.

NEW ADVERTISEMENTS.

EDWARD H. SINCELL,
ATTORNEY-AT-LAW,

ALBERT COMBS.

SELLING OFF
AT COST!

Desiring to quit business, for the next thirty days we will offer our entire stock of

Groceries,
Notions, &c.,
AT COST
HARNE & LAWTON'S
GROCERY.
Under "Republican" Office, Oakland.

FOR SALE!
A 50 ACRE FARM.

The undersigned offers for sale a small farm, on the waters of Lead Mine Run, Tucker county, W. Va. This property is known as the "Hershlin Place," and adjoins lands of the widow Schrader and others. There are about 50 acres in the tract, which is well timbered.

For terms, &c., apply to or address

G. P. KING.
9 26 3t Austen Mines, W. Va.

Estate of John Airronhalt, deceased.

THIS IS TO GIVE NOTICE—That the subscriber, of Garrett county, hath obtained from the Orphans' Court of Garrett county, in Maryland, Letters Testamentory on the personal estate of

JOHN AIRRONHALT,

of Garrett county, Md., dec'd. All persons having claims against the deceased are hereby warned to exhibit the same, with the vouchers thereof legally authenticated, to the subscriber, on or before the 15th day of March next; they may otherwise by law be excluded from all benefit of said estate. Given under my hand this 22d day of September, 1885.

JOHN W. HARVEY,
9 26 3t. Executor.

TRUSTEE'S SALE!

The undersigned having been appointed trustee under and by virtue of a decree passed by the Circuit Court for Garrett county, in Equity in a cause wherein Henry A. Shaffer is plaintiff, and John M. B. Shaffer and others are defendants, I will on the

20th Day of October, A. D. 1885,

at 11 o'clock A. M., in front of the Glades Hotel in Oakland, offer at public sale, the real estate described in said decree, it being the farm of which Albert Beard, died, seized and possessed.

The said farm contains

163 ACRES OF LAND,

more or less. There are about 25 acres under fence and cultivation, the balance is in timber. It is well watered and is improved by a

DWELLING HOUSE,

barn, dairy and other out-buildings.

This property is situated in Election District No 8, about 12 miles from Oakland, and would make a comfortable home for a man of small means.

TERMS—as prescribed by the Decree are—One-third cash on the day of sale; one-third in one year, and one-third in two years, the purchaser to give his note with security to be approved by the trustee for the deferred payments.

HENRY A. SHAFFER,
9 26 4t. Trustee.

ELECTION NOTICE!

NOTICE IS HEREBY GIVEN TO THE Judges of Election and to the voters of Garrett county, that an election will be held in the several election districts of Garrett county at the usual places of holding elections,

TUESDAY, NOVEMBER 3, 1885,

for the purpose of electing

A State Senator,
Two members of the House of Delegates,
A Clerk of the Circuit Court,
A Sheriff,
Three County Commissioners,
A Register of Wills,
A County Surveyor.

The polls of said election will be open in each and every election district of said county at the usual places of holding the polls, at 8 o'clock A. M., and will be closed at 6 o'clock P. M., when the ballots shall be publicly counted.

Keepers of hotels, taverns, saloons or any place where liquors are sold, and all others will take notice that by Chap. 191, acts of 1885, no spirituous or fermented liquors, ale or beer or any intoxicating drinks can be sold or given away on election day.

M. R. HAMILL,
9 26 td. Sheriff.

FOR SALE CHEAP.

SIXTEEN ACRES OF LAND

at Altamont, Md., improved by a

GOOD DWELLING HOUSE

18 by 36 feet, two stories high. There are on this land two never failing springs of good water, and a running stream.

Situation Delightful!

Two miles from Deer Park, with excellent graded road.

Excellent Situation for Summer Residence.

For particulars and terms apply to or address

J. A. HAYDEN,
Oakland, Md.

OAKLAND, GARRETT CO., MD.

SHROUDED AND IN THE SEA.

We stood on the deck, a reverent group, in light of the setting sun,
With heads all bared and voices hushed, and listening every one,
To the deep, low tones of the skipper's voice, who the burial service read,
And the solemn words awed each rough heart as we gave to the sea its dead.

The unbidden tears all dimmed my eyes as I gazed on the quiet face;
A ray from the sun in the redd'ning west seemed to light it with life and grace.
And my heart was filled with pitying love for somebody far away,
Who was dreaming, perhaps, of her absent boy on the eve of that sad day.

The warm, soft breeze of the southern seas stirred the locks on his forehead fair,
And I thought of some mother whose fondling hand had caressed that golden hair;
I cut one curl from over his brow, and kissed those lips so white,
For somebody's sake, whose light of love would be changed to sudden night.

His only shroud was a rough, white sail, and a flag about his breast;
His grave in the calm, many fathoms deep, where "He gives His beloved rest."
With tender hands they lowered his bier over the tall ship's side,
His funeral hymn was the gentle plash of the ebbing and flowing tide.

* * * * * * *

That night the skipper, with tear-dimmed eyes, brought me a parcel small,
Saying: "Those are some things from the poor lad's kit, and a woman knows best of all
How to tell a story that's hard to tell, and to comfort a brother's heart.
Will you write to his mother and tell her all—well, you know how to start.

"And tell her that every man of us loved her boy, the life of our boat;
Hearty and busy and full of life, whether we were ashore or afloat.
We fain would have brought him safe back again, only the Captain above
Knew better than we, and guided him home to a haven of rest and love!"

So I opened the packet with trembling hands, it seemed such a sacred thing;
Letters and photos and little gifts and half of a broken ring.
Keepsakes gathered in foreign lands for the loving ones at home,
And a letter half finished, to catch the mails by a passenger bound for Rome.

He told of an elephant hunt in Ceylon, of a storm in Biscay's Bay,
Of their trip through the Suez Canal and how they all held the Christmas Day.
There was love to Harry and Dick and Ray, besides to Maggie and Susie,
Whose feet he hoped hadn't bigger grown for he'd bought them Chinese shoes.

And now he would soon be back, he said, to his Scottish home again,
After two long years of wandering life on the restless, stormy main;
Then he stopped, for he said his watch had come, but he'd finish it up to-morrow.
How could I send it? What could I say to break such a tale of sorrow?

One portrait was there of a worn, sweet face and beneath in a boyish hand
Was written "Mother." I saw her again in the midst of a smiling band
Of boys and girls of every size, but she laid a proud hand on one—
Her sailor lad with his bright, frank face, her eldest and ablest son.

Photos of school-boy friends there were, and one of a fair young face,
Smiling and tender-eyed, beneath he had written the one word "Grace."
A dainty housewife, all 'broidered gay, held buttons and pins and thread,
And worked on the ribbon which held the spools: "To my darling brother Ned."

I broke to his mother as well as I could, with many a falling tear,
The news so sad, and the curl I sent with all of his treasures dear.
Ah! that was the sorest, saddest task that ever I have known.
Christ! Thou who hast wept with weeping ones, comfort and keep Thine own.

Thou who in moments of sorrow and pain, thought of Thy mother's weal,
List to the cry of a heart's sore pain, listen and comfort and heal.
Give Thy peace, which is perfect peace, lead with Thine own right hand,
Till we join our beloved, to part no more, in Thy beautiful, happy land.

—*Hazel Gordon, in Detroit Free Press.*

A MODERN ARK.

How the Bunn Family Moved Into the Country.

The Bunn family lived in a small house, in a low and unhealthy quarter of New Lowell. In a small house, and the family was large, as poor families are apt to be. Mr. Bunn, who was wonderfully good-natured under all his trials, would facetiously call the roll every night to make sure that none of the children were missing, and sometimes he would purposely forget two-year-old Baby Bunn, who would shout indignantly from his mother's lap: *I's* here! *I's* here! why don't oo call Ditty Bunn?" And then Mr. Bunn would say in a puzzled voice: "Dicky Bunn—who is he? O, yes, to be sure! Dicky Bunn is the name of the last one, ain't it? Well, then—DICKY BUNN!" and the baby would answer with a pleased giggle—"Here!"

Although the bill of fare was plain, and the clothes well patched, the Bunn family managed to extract a good deal of happiness from life. When Mr. Bunn found a good job and they had, in consequence, a "hot supper"—which meant plenty of beefsteak and vegetables all around, and some red-cheeked apples, or a can of peaches for dessert—and the fire burned brightly, and the children were every one well, life seemed actually overflowing with blessings; and Mr. Bunn would whittle kindlings for the morning fire, and Mrs. Bunn would add another layer to the patches, and neither thought of envying the rich people in the grand houses of Upper New Lowell.

But often the children were not well. In fact there were so many of them that about half the time the old lounge was the resting place for some ailing one; and the doctor—whenever they could afford to call one—would always say more or less about the location being an unhealthy one. Their drainage was bad, and they didn't have enough sunlight, and they all ought to sleep up-stairs, for a ground floor as damp as theirs was a standing invitation to sickness to come and stay the year round.

In the early days Mrs. Bunn had lived in the country, and as her family increased, the little house, and the still smaller yard, formed a painful contrast to the roomy farm-house, the big, wide-doored barn, and the broad fields that she used to know, and she often expressed a desire to move into the country. But Mr. Bunn, born and brought up in the city, was like a Laplander in believing that no place could be better than that in which he lived. For forty years he had trotted up and down this unlovely quarter, and the more shanties that were built and the filthier the streets and alleys became, the more he seemed to enjoy his place of residence. "The Flats is growin' fast," he would proudly remark. "It's gettin' to be downright lively here." The poor man! With the exception of a rare glimpse of the grand Park, or some rich man's fine grounds, he knew of nothing better than his low rooms and the struggling, homesick lilacs and tiger-lilies which Mrs. Bunn tried to grow in the sloppy back yard.

To have a long, "fat" job of hod-carrying, and to know that the children were not very sick, was all the happiness Mr. Bunn could comprehend, and he always laughed at Mrs. Bunn's absurd wish to move into the country, where there could be no chance to shoulder brick and mortar up a fifty-foot ladder.

A desire for the country always smouldered, however, in Mrs. Bunn's heart, and she never gave up the hope that some time they might live on a whole acre of ground, and have three or four trees, and may be a glimpse of a brook, like the one she used to wade in when she was a girl. It was this hope that sustained her through all these years, and led her to toil bravely on, and make the best of the cramped and dismal home in "The Flats." They owned their house—that was one comfort—and had none of that wretched breaking-up and packing about from one rented place to another, which they observed in their less fortunate neighbors. I suspect that the Bunns had great affection for even the leaky kitchen roof, and the rickety pump, because of the dear fact that they owned them.

And yet, although these shabby premises were their own, it seemed as if in this spring of 1884 the house had never seemed quite so small and quite so sickly. Both Tom and Annie were down with low fevers. Baby Bunn was crossly cutting some double teeth, and a series of long, hard rains had interfered with hod-carrying to such an extent that Mr. Bunn, in a tattered rubber coat, had taken to looking for jobs of wood-sawing. Dismal, indeed, was the outlook, and it required all the Bunn fortitude to eat suppers of corn-meal cakes and black sirup contentedly, and to rise uncomplainingly to breakfasts of corn-meal mush and sky-blue milk.

"If we lived in the country," began Mrs. Bunn, and then checked herself. She was in no mood to be laughed at. She went on thinking, however, that if they lived in the country on an acre of land, they could at least have potatoes and turnips and fresh eggs, an occasional chicken, and, perhaps—oh! mercy of mercies—they might keep a cow, by letting the children lead her along the roads to crop the free pasturage there.

Probably Mrs. Bunn was getting a little feverish herself, for whenever she closed her eyes she seemed to see fair green fields and dancing brooks, and a white cow feeding upon the hillsides, and happy children gathering violets in the spring sunshine; and she could hear the thrifty cackle of ambitious hens, and the carol of robbins on the tip-top branches of the budding trees. She closed her eyes as often as her work would permit, through this last gloomy day in the Flats, and felt somewhat comforted and cheered by her strange fancies.

A river runs by the Flats, separating that locality very distinctly from the heights of Upper Lowell. Every spring it rises and runs away with its usual petty larcenies of woodsheds, chicken coops and the like; but in this spring of 1884 it meant more than petty larceny, it meant a bold and and defiant raid. Its gray, swirling waters almost reached the high-arched bridges, and its usual insinuating murmur was turned to a menacing roar. But the Flat people did not fear it; and even when it crept up to their back yards and lapped hungrily around their door-steps, it was still but a new and refreshing excitement—this big rise of the peaceful "Little Wolf." The men and women living along the banks looked after such small, loose articles as were likely to be carried away, and the children made rafts and paddled about in the pools of back-water in great glee. Some authorities rode over to the Flats, and suggested that the houses along the river had better be vacated, and the families living there only laughed and said they were not afraid; and every one went to bed that night feeling entirely safe, and thaakful that the weather had cleared and that there would be chances for going to work on the morrow.

But "at midnight there was a cry." Mr. and Mrs. Bunn did not hear it, for Annie and Tom were sleeping soundly for the first night in a week, and the father and mother, tired out with vigils, were also deep in slumber. They were all sleeping up stairs as the doctor had advised—Tom and Annie in their bunks near the window, where a breath of fresh air could touch their fevered faces, three small boys in the trundle-bed, Nelly, the eldest girl, on a lounge, and Baby Bunn with his father and mother.

The cry came from some of the houses along the river, and there was only time for the bewildered snatching of a little clothing and a frenzied escape to higher ground, every one, in those first wild moments, thinking but of himself and those belonging to him. The Flats had not yet achieved street lamps, and only the pale glimmer of the stars lighted the terrible scene.

The little Bunn house stood lowest of any in the Flats, and the river had been nosing about it for an hour or more before it took its final grip. When it really set its jaws together, Mr. and Mrs. Bunn were awakened by the queer, straining creak and jar, and they now heard the wild shouts outside, the lap and swirl of the waters about them, and knew, with freezing hearts what it all meant.

With the instinct that makes all womankind want to die decently, Mrs. Bunn dashed into her gown which hung over the foot of the bed, and even gave her hair a swift twist. Then she caught up Dicky Bunn, who gave a sleepy cry at such disturbance, and she breathed the name of Christ's mother, as she held him tightly to her breast. Mr. Bunn—steering with great presence of mind through the sea of sleepy children—looked from the window. Was there a torch-light procession? And had all the stars joined in it? For the lamps that were now flashing out from the windows, and the bright stars above were all moving in the same direction. No, it was his own house that was moving—they were afloat! Mr. Bunn staggered back to the bed and drew on his trousers, and felt about for his stockings, and said not a word. Nellie, the oldest child, who had awakened, sat up and called out: "O, mother!" even as her mother had called upon that other sacred name.

"Be brave, darlin', and don't wake the other children! We're all goin' together, anyhow."

"Maybe she'll hold together," said Mr. Bunn, who always found the hopeful side of things. "We'll light the lamp and see where we are." And soon all the people who were disinterested enough to be mere sightseers, noticed a glimmer out on the dark river—like the light of a will o' the wisp—except that it was a little steadier; a light that moved farther and farther away and was finally lost to sight.

She did "hold together." Through all those long hours of terror, the little house—reeling and staggering at times, and thumped and jammed by floating debris—held together and in the early dawn sailed along "all there," as Mr. Bunn expressed it; and all the children, except Nelly, slept peacefully, as if lulled into deeper slumber by the rocking of their one common cradle. They appeared to be in the middle of the river, for there was plenty of sea-room, as Mr. Bunn said, but the shore on either side, was shut out by a heavy fog.

"If we could only see the banks, it wouldn't be quite so awful," moaned poor Nellie, nervously shivering in spite of the thick shawl in which she was wrapped.

"Darlin' be thankful we're spared so far, and perhaps the dear Lord'll save us even yet," said her mother. But it was indeed "awful," moving on through this mist with unknown dangers sighing and murmuring all around.

As daylight advanced they seemed to have floated into stiller waters; and presently there came a gentle shock as if the house had touched bottom.

"Are we sinking, Dennie, dear?" asked Mrs. Bunn, of her husband.

"Not a bit of it, jewel! We're on land, that's where we are; and here's a tree beside us as big as a church-steeple—a tree right side up, too—and we've come to a stoppin' place, sure!" and Mr. Bunn, who had been so cheerful and plucky through all these hours, sat down on the bed and buried his face in his red cotton handkerchief.

"Ah, it will do you good, Dennie dear!" said his wife, patting him on the shoulder, and laughing and crying herself.

The Bunn family had indeed come to an anchorage. Not only one but several trees stood about them, and in between two of these staunch supports the house had drifted and was firmly held. The fog lifted slowly, and by and by the faithful blue of the sky smiled down upon them, and hilly shores came into view, with glimpses of cultivated fields and budding woodlands.

The Bunn family had moved into the country at last!

As the cradle stopped rocking, the children awoke, and clustered about the small gable windows quite stupefied with wonder at the strange scene around them.

Just at this moment there came ringing over the waters a wild scream. Mr. Bunn pushed the children aside and leaned out of the window. Just emerging from the lingering fog up river, floated a remnant of a small country bridge, and clinging to it was a little girl in a red cloak, who again screamed with terror as the tossing planks almost submerged her in the current. Mr. Bunn had not grown up beside a river without knowing how to swim. In fact, Little Wolf—in some of its sequestered nooks—had been his bath-room for many a summer. His shoes and coat being already off, he plunged down from the window and struck out for the red cloak like a hero. The current was bearing the fragment of bridge straight toward him, but the planks were separating and the child was about to sink as he reached her. She made a frantic clutch at his neck, but he held her off with one hand and swam as best he could back to the house, which seemed the nearest landing-point.

Mrs. Bunn had, with practical promptness, tied two sheets together and let them down from the window. Mr. Bunn, steadying himself upon a floating timber, fastened the sheet about the waist of the half drowned child, and any number of hands pulled her up and lifted her through the window.

"Now I'm in the water," shouted Mr. Bunn, "I may as well swim ashore and see where we are. Keep up your spirits, my jewels, there's the shore just a bit beyond the house."

Mrs. Bunn leaned from the window until she nearly fell overboard, then seeing that he had reached wading depth, she turned and gave all her attention to the little dripping mite who sat on the floor in the midst of the small Bunns, crying convulsively. Mrs. Bunn took off her wet clothes and wrapped her in blankets, warm from the trundle bed, and soothed her with many a pitying word. For awhile the child could only sob and gasp in her attempts to speak, but finally she made known the fact that her poor little lambs were down in the lower pasture, and she had been out to see if they were all safe, and her papa had told her not to go on the bridge, and she had been naughty and disobeyed him, and the bridge broke up all in a minute—and—and—and then the sobs burst forth afresh. She was hardly dried and warmed and comfortable, before voices were heard shoreward, and soon a brisk hammering began in that direction. Nelly also nearly went overboard, and reported some men making a raft. She failed to recognize her father among them, because he had changed his wet clothes for somebody's black trousers and an old army overcoat.

"O, I can hear papa!" exclaimed the blanketed girl, after she had listened a moment. "Papa, here I am!" she called at at the top of her lungs.

"Yes, I am coming," came an answering voice.

It was not long before the hastily built raft was pushed out and brought beneath the window. The man in the army coat was then recognized and received with a little shout. The father of the rescued child looked up with eyes that were overflowing. "Give me Kitty and I'll take her right home to her mother, who is nearly crazy. Drop her right down," and he held up his strong arms. "I've sent my man back for the double team, and we'll soon have you all up to our house."

"O, Papa, I'll never, never, never, *never* disobey you again!" exclaimed Kitty, as they bundled her through the window.

"No, I am sure you never will," said her father. Then Kitty was carefully dropped into the upreaching arms, and the raft pushed away.

"All be ready for the next boat!" called out Mr. Bunn, cheerfully.

"Ah! I am so thankful," said Mrs. Bunn, "to think that we're not only all safe, but Pa has saved somebody else."

Then there was a great dressing and brushing, and a great washing and polishing of faces and hands; for plenty of water could be dipped up with a pitcher and the knotted sheets, and the family were all in readiness when the raft arrived under the window again.

But such a large family could not be shipped all at once. Mrs. Bunn let Kitty and Baby Bunn, and two other small boys, go ashore first; then Annie and Tom, carefully wrapped in bed-blankets, were let down for the next load; and finally Mrs. Bunn, with the remaining small boy and a bundle of clothing, took leave of the house.

They filled the farm-wagon quite full; and the horses, impatient at the long waiting, started off at a pace that made Baby Bunn's cheeks shake like two bowls of jelly, and turned the children's faces into one broad smile. The sun now shone radiantly; there was a smell of young leaves and early violets in the air; from the hillsides came the plaintive bleat of little lambs; and, yes, there it was, the loud, clear "trillium-trillium-tree" of the robin from his topmost twig.

"How queer it is," thought Mrs. Bunn. "I seemed to see and hear all this yesterday."

At the farmhouse a great breakfast was in waiting for them; and Kitty, who had been kissed and cried over, and given some very hot drinks by her mother, was lying snugly tucked up in bed in a room opening off the kitchen, and the door had been left open, that she might enjoy the view of the big table and the big family that were to gather around it.

Such a breakfast! Even Annie and Tom were able to relish the fresh-boiled eggs and the delicious cream toast, while Mr. Bunn and the little boys accepted everything, from the broiled ham and cold baked beans to griddle-cakes and doughnuts.

As for Mrs. Bunn, the dear old associations of early days so crowded upon her she could hardly taste anything.

"This is the way people can live in the country," she whispered to Nelly, and shuddered when she thought of going back to the Flats.

But Mrs. Bunn never went back to the Flats. That afternoon she was seized with a chill, and before night was in a high fever, from which she lay ill in the best bedroom of the Thompson farmhouse for two weeks. Mr. Bunn and Nelly and Mrs. Thompson nursed her tenderly, and took good care of Dicky, while the other children lived at large in the fields, the big barn and the large kitchen-garret, and grew well and happy.

As soon as Mrs. Bunn became strong enough to "take the air," she was lifted into the easy single buggy, and Mr. Thompson himself drove, because he could not trust the horse to other hands than his own, he said. He drove slowly along the pleasant country way, now sweet and leafy in its fresh May robes, and at the end of a mile he stopped before a small house, neatly painted in two shades of gray, and shaded by two kingly elms. In the rear of the house some men were building a new, large kitchen, Mr. Thompson explained. Down at the foot of the grassy slope ran a sparkling, pebbled brook. The brook crossed the road on which they were driving, and was spanned by a very new bridge.

"It is a right pretty place," said Mrs. Bunn, looking at the shady little porch and up to the noble elms, and thinking how heavenly it must be to live in such a place.

"Well, I'm glad you like the location, because it's yours, you know," said Mr. Thompson.

"Mine?" said Mrs. Bunn, her eyes growing large with astonishment. Were the fever-dreams still buzzing in her head?

"Certainly, Mrs. Bunn! Don't you recognize your own house? All we did to it was to haul it up here from the river and give it a little paint and a little whitewash, and so forth. Your man said you was fond of trees, and so we set the house by these elms. Your man's around there a work on the kitchen now—it'll be finished in a day or two—and there's three acres of good grass-land and three of maple and beech; and we've picked out a nice, gentle cow for a present to your Nelly; and—well, it's a small enough return for what your man did for us when our Kitty was carried off on the old bridge that used to stand yonder," and Mr. Thompson drew on his handkerchief and wiped his nose with great vigor.

"All—the land—the cow—ours?" Poor Mrs. Bunn could not believe her senses.

"Yes, all yours, to have and to hold. And I forgot to say that there's a first-rate school just over the hill there, for your youngsters. But you mustn't talk much, Mrs. Bunn, and you mustn't get flustered—just after a fever, so. We'll drive 'round home now, and maybe you'll feel strong enough to go into the house tomorrow and look around."

Happiness is such a tonic that Mrs. Bunn was indeed able the next day to look the house over. And she discovered what Mr. Thompson's "and so forth" meant. It meant substantial new furniture for all the rooms, pretty shades for the windows, a big handsome new stove for the new kitchen, and a whole pantry full of grocery supplies and crockery.

"O, its all too much—too much!" cried Mrs. Bunn, sinking down into the new rocking chair.

"O, no, no, indeed!" chorused Mr. and Mrs. Thompson, who had been smilingly watching her surprised and happy face. "We value our Kitty's life at a great deal more than this. Indeed we do!"—*Emily H. Leland, in N. Y. Independent.*

THE ART OF EMBALMING.

The Modern Process Inferior to That Used in Ancient Egypt, but Gaining in Favor.

Two men sat silent in a handsomely furnished store on a leading New York thoroughfare. A small portion of the furniture and ornaments pertained to the living, the remainder to the dead. It was an undertaker's establishment, and the younger but more solemn person was a professional embalmer. In answer to the reporter's questions he said:

"General Grant's embalming was work of the finest kind—something to be proud of. It was done by the leader of our profession, and with the best materials in the market. There are many mortuary directors who profess to be embalmors, and who know a smattering of the art; but they are unworthy of the name. Real embalmers are few in number, there not being more than ten in the entire country. To be one an undertaker must have a sufficient knowledge of surgery, medicine and chemistry, and must also have considerable artistic sense. This makes a rare combination.

"The chief element in embalming consists in removing a large portion of blood from the body and substituting therefor some powerful antiseptic fluid. Many experiments have been made in respect to these liquids. I can hardly recall how many preparations have been tried. Brine, salicylic acid, diluted creosote, solutions of sulphate of zinc, and the iodide and chloride of that metal. You see, the fluid used must be nearly colorless, or else verging on blood color, and must not cause discoloration. This precludes the use of salts of copper, iron, manganese and chromium, and also compounds of sulphur.

"A solution of chloride of zinc was at one time in vogue, but in several instances it produced a ghastly bluish tinge, and so went entirely out of fashion. The so-called Egyptian fluid was a standard preparation for years. It was so named by its manufacturer, who claimed it was the same liquid as was used in preparing the mummies of Egypt. It was improved upon, however, by some American chemists, who now have a practical monopoly in supplying embalmers with the fluid. Their manufacture is styled the Oriental fluid, and is made in Boston.

"In embalming, a large vein and large artery are opened, and a small force-pump, connected with a vessel containing the antiseptic fluid, is applied. The process requires from two to four hours. The natural movement of the circulation is followed. As the fluid enters the vessels the blood is forced out. The longer the time the better the result. A short time enables the operator to remove the blood from only the larger vessels. In a longer period the fluid passes from the larger to the smaller vessels and into the capillaries. This distends the skin and produces a lifelike appearance.

"The cost of the process is from $15 upward. Embalming grows more common every year. In the past thirty months our establishment has embalmed about two hundred subjects. We are still behind the ancients in our work. In the main, a subject well treated lasts three years. This is a fair average. It would be larger if it were not for occasional cases in which the antiseptic liquids seem to lose their efficiency. There is, however, a distinguished chemist in Italy who claims to petrify a subject by using some silicate preparation. Though I have not seen the process employed, yet I have been shown specimens which resembled petrifications.

"A second duty of the embalmer is the same as that of an undertaker, to make the subject as life-like and natural as possible. There is a division in the profession at this point. Some endeavor by art to restore almost all the characteristics of life; others merely endeavor to remove the disagreeable insignia of death. As for myself I think it proper to conceal the marks of wounds, accidents, or disease. No art can take away the horror of death. Its excess makes death the more terrible by contrast.

"The embalmer runs the risk of disease and blood-poisoning. A subject once preserved and treated is innocuous, but in the process the germs of the disease from which he died are expelled in vast numbers in the blood. The operator in such cases always runs the risk of contagion and infection. Blood-poisoning is as apt to occur to the embalmer as to the surgeon. The danger in all these cases, however, can be guarded against. Those who are attacked are nine times out of ten ignorant funeral directors, who call themselves embalmers when they are not."—*N. Y. WAR TIME EXPEDIENTS.

Some Facts Illustrating the Proverb that "Necessity Is the Mother of Invention"—Life in the South During the War.

Perhaps, taking everything into consideration, no portion of the Confederacy "during our late unpleasantness" was so destitute of the necessaries of life as that portion lying on the Southern sea board and forming part of the States of Mississippi, Alabama and Florida. The great industries of these States, that is, that portion situated as explained above, was timber, lumber, resin, tar, pitch and turpentine. The soil is not favorable, except in favored spots, for cultivation. Consisting of vast level flats, the top soil of loam is very thin, while immediately beneath it is a heavy pipe clay, while the only vegetation that seems to thrive are the great forests of pine. These, skirting the Gulf of Mexico, following the coast-line for several hundred miles, and with a breadth ranging from one to two hundred miles, form the well-known pine meadows, destined in years to come to be a prolific source of wealth to the South. Perhaps with us, who resided in this portion of the Confederacy, the first necessity, after the small supply on hand was exhausted, was salt. This was a need soon felt, and it is unnecessary to add that a pound of it soon became very precious. Old brine that had done duty until it could be used no longer was boiled down until every particle of saline matter was extracted from it, and the salt thus obtained was again in its turn used in the same manner. As the supply became scarcer and scarcer, the next method, or rather recourse, was to dig up the smoke-house and to filter water through the earth thus obtained, this in turn being subjected to the usual process of boiling in order to obtain the precious condiment. So scarce did it become as the war wore on, that when a beeve was killed, instead of salting down in barrels as at first, it became more economical to cut the flesh into thin strips and dry it in the sun. It must be confessed that beef treated in this manner is more palatable than most persons would imagine. They who lived near the coast fared somewhat better, for taking the boilers from the various saw-mills, they separated the shells from the flues, and splitting them into equal halves, a strong head of wood was fitted into the ends and thus treated they were placed over a furnace and filled with the salt water from the Gulf. Of course the business had its reverses, for sometimes the blockading squadron, attracted by the smoke, would move up and with a few shells completely demolish the salt works. The salt kettles, being made of old boilers, were too heavy for the enemy to carry off, and as no damage beyond knocking out the wooden heads could be inflicted, the salt manufacturers would, with indefatigable energy when the hostile fleet removed to a safe distance, gather up the debris, make a few repairs and recommence boiling.

The ingenuity of the people was to replace the various articles of clothing and the different domestic luxuries. Old dressess, old coats were turned and made over, remodeled and cut down. The writer remembers well what a pang of envy was awakened within his bosom going to a ball one night to find that the attentions of the fair ones were all bestowed on an acquaintance who made his advent that evening in a bright, spick, span new pair of pantaloons, made of new ticking, with broad, blue stripes, cut bias.

Perhaps the easiest problem for us to solve amid our various troubles was that of making hats. Fortunately the supply of palmetto in our Southern swamps is in a manner speaking inexhaustible, and from this source we were soon compelled by the course of events to draw our supply of hats. We soon learned to improve upon the first rude models, and when the war was brought to a close some of the ladies, especially, had acquired taste and proficiency. The palmetto hats they made would not have reflected discredit upon a fashionable hatter. The heart of the palmetto is generally selected as being still held together, and not being sprouted out and unfolded into the fan-shaped leaf so familiar to travelers in the South. While in this condition the folds lie one upon another, and are perfectly white and pliable. After being severed from the main trunk it is opened out and hung in the shade to dry. About a week's drying suffices to prepare it for use. It is now separated, each fold from the other, and cut into convenient lengths, then divided into little strips about an eighth of an inch in width, and these in turn plaited or braided together into one continuous braid until of sufficient length to make the hat. The hat itself was always commenced from the center of the crown by sewing the braid together in slightly overlapping circles. The rim, as a finishing touch, was generally bound with a braid.

Keenly felt was the need of ammunition. Owing to the stringency of the blockade it soon became almost impossible to obtain either powder or lead. The latter was the first to give out, and in order to supply this need all the machinery was taken apart and all the old boxes, fillings, etc., were put to a new use—converted into shot. As there were no shot towers the favorite method was to climb the tallest tree one could find, melt the lead as well as we could in the top and let the liquid metal drop into a tub of cold water beneath. The result thus obtained would scarcely have awakened envy on the part of some of our modern shot manufacturers, but in the language of an old "moss-back" who was compelled to resort to this expedient, "it beat nothing all holler."—*Detroit Free Press.*

—An admirable potato pudding: First boil two pounds of white potatoes, then peel and beat them in a mortar, small as not to be discovered what they are; then take a pound of butter and mix it with the yolks of eight eggs and the whites of three; beat them very well and mix in a pint of cream and half a pint of milk, a pound of refined sugar with a little salt and spice; bake it.—*The Household.*

MISCELLANEOUS.

—The report of the South African Postmaster General for the year 1884 shows that the weight of diamonds which passed through the postoffice during that year was 1,811 pounds, eight ounces.

—It is said that no man ever made an impromptu speech with which he was entirely satisfied. The best way to make an impromptu speech, and not feel bad about it afterward, is to get somebody to do it for you.—*Chicago Ledger.*

—Some idea of the immigration to Texas from the older Southern States since the war, says the Laredo *Times*, may be had from the notices of reunions of Alabama brigades, Georgia regiments, Virginia "Black Horse," etc., in various portions of Texas.

—"Lenses of rock crystal taken from the ruins of Nineveh," said a member at the meeting of the microscopists, in Cleveland, the other day, "suggests that microscopes may have been used in those days." No one knows, indeed, who did invent the magnifying glass.

—Some of the soil in Manitoba, analyzed, showed that the only element of fertility threatening to become deficient was lime. The proportion of nitrogen was greater than in the best English pasture soils, and potash and phosphoric acid were abundant. Magnesia was in large quantity, which is important in the raising of wheat.—*Chicago Herald.*

—Why is it that the traveler will get in a common Austrian or Bavarian gasthaus a better cup of "morning coffee" than he will find in the best hotels of New York or Boston? Is it that the "congregated plan" will not apply to coffee making—that is, you can not make coffee by the gallon for hundreds? Whatever be the reason this is the one great defect of the American hotel.—*N. Y. Times.*

—For some days past a band of gypsies have been encamped near Portland, and several of them have paid us brief visits. They say they have wandered all over the United States, the head of the family having come here some twelve years ago. A dark-browed leader of the band is a fortune teller. She says she met Queen Victoria in the Highlands of Scotland and told her fortune. She was asked if they regarded it as a high honor, and replied, "No, my people were great when her people were unknown, and then she only gave me a shilling.—*Lewiston (Me.) Journal.*

—A boy was flying his kite on the commons near Cedar Avenue, east of the Cleveland & Pittsburgh Railroad, Saturday morning. Some one was driving a herd of cows, and the cow in the lead got entangled in the kite string. Away she went and in the right direction to catch the wind. The kite soared aloft about fifteen feet above the cow, and the whole herd took after her. The boy did not want to lose his kite, and he with some men joined in pursuit. The scene was ludicrous in the extreme to observers.—*Cleveland Plain Dealer.*

—It is a common mistake to regard the term negro as synonymous with Africa. The word negro does not denote a nation, but an ideal type constituted by the assemblage of certain physical characteristics exemplified in the natives of certain portions of Africa and their descendants in America and the West Indies. As a rule the prevalent color in Africa is that of the Arab, the Indian and the Australian. The true negro districts are the Senegal, the Gambia, the Niger and the intermediate rivers of the coast, parts of Sudania, Sennaar, Kardofan and Darfur.—*Philadelphia Press.*

—The area of Chatham, on Cape Cod, which is quite popular as a summer resort, grows smaller every year, the onslaught of the ocean, when storms prevail, breaking away the bluff and washing the sandy cliff into the ocean. Where the main street of the village was twenty years ago, the surf of the Atlantic rolls. Several cottages of fishermen and villagers, situated near the bluff, have been undermined in years past, and several buildings have recently been abandoned as unsafe. The original fishing hamlet is rapidly going out to sea, and the old village will be entirely obliterated before long.—*Boston Budget.*

ICEBERGS.

Suggestions Looking to Protection Against Them.

Never were there so many icebergs in the Atlantic as during last May and June. These were found as far south as 39 degrees, and were in the line of the steamships that ply between Europe and America. Navigation, therefore, has been extra perilous, for the vapor of icebergs is foggy, and in the night there is no means of gauging how near they are to a ship. The City of Berlin, with 1,400 passengers, struck an iceberg in the night, but she was saved from destruction by her long bowsprit and prow, an unusual appendage to a newly built steam-vessel. Inventors have recently been at work to find means of protecting steamships from these collisions. Prof. Bell suggests that an echo might tell of the proximity of an iceberg, and commended the plan proposed by Mr. F. Della Torre, of Baltimore, for effecting this object. This was tested on Chespeake Bay. The apparatus consisted of a speaking-trumpet attached to the muzzle of a musket, from which blank cartridges were fired at passing vessels. The experiment so far succeeded that at a mile off river steamboats and passing schooners returned echoes at intervals proportionate to their distance. Another apparatus employs a bell for producing the sound, and a large open vessel received the echo. The sound in this case was conveyed to the officer of the deck by telephone. These and other inventions are being tested, and, if successful, they will greatly reduce the danger of iceberg collisions. Intense fogs and a lower temperature are now the only means of suggesting that a large icefield is near. Steamships now plow through the ocean at so rapid a pace that a collision with an iceberg would be certain destruction. There are other ocean perils, such as abandoned vessels, of which there are thousands afloat on the ocean, a collision with any one of which might sink a noble ship freighted with human lives.—*Demorest's Monthly.*

FOR OUR YOUNG FOLKS.

A NEW WEATHER BUREAU.

A cyclone in the nursery
Sent Noah's ark a-flying;
It made the dolls turn pale with fear
And almost fall to crying.
It rent the house of jointed blocks
From turret to foundation,
And pulled poor Rover's tail until
He howled in desperation.

The cyclone in the corner stood
(Her other name is Florence);
Her face was overcast with clouds,
The tears rained down in torrents.
And looking in the door just then,
Her teasing brother Truro
Inquired, with feigned anxiety:
"Is this the weather bureau?"

"A weather bureau! What is that?"
She asked, and stopped to wonder.
"It tells about the storms," he said,
"Of wind and rain and thunder.
Hurrah! I'll get a flag and make
This room a signal station,
And you shall snow me every day
The weather indication."

"What's that?" inquired the puzzled child.
Again the tears had started.
"Hold on a minute; you shall see,"
Said True, and off he darted.
He waved a banner in his hand
A minute or two after;
It may have been enchanted, for
It turned her tears to laughter.

"This means no storms to-day," he said.
"Why, Flo, how did you know it?
Now, every time you smile like this,
The flag shall fly to show it.
I'll hang it by the picture here,
This one of the Madonna,
'Twill tell you're trying to be good,
Are trying upon honor.

Though out-of-doors 'tis cold and damp
From wind and rain together,
Sweet looks will change the dreariest day
To bright and pleasant weather.
But if you are a naughty girl
And fly into a passion,
The flag shall disappear at once
In a very hasty fashion."

A great improvement this has wrought
In temper and in manner,
For in the nursery still I see
A pretty blue silk banner.
And this I know, that earnestly
A little maid is trying
To be a sweet, good child and keep
Her signal flag a-flying.
—*Anna M. Pratt, in Golden Days.*

STORY OF A DOG.

How He Rescued a Child from Drowning and Kept at Bay Its Mother and Friends —Paul's Ingenious Plan.

On the margins of the beautiful winding streams and rivers of France washerwomen may often be seen at their work, presenting, under the leafy shade of the grand old trees, a very picturesque effect. No doubt you have seen pictures of these watering-places. They are furnished with a row of shallow, three-sided boxes, open toward the shore, and with the back resting on posts set in the water. Just below the surface of the water a smooth board slants downward, and the washerwoman, kneeling in the box, holds her piece of washing upon this slanting board with her left hand, while in her right she grasps a kind of paddle, with which she beats the linen, turning it again and again, until with the beating and the force of the running water it becomes entirely clean and white.

One summer day, many years ago, a washerwoman who was too fond a mother to leave her baby in any one else's care, brought it with her, and while at work, placed the child in the box where she was half kneeling, half sitting at her washing, and where she could occasionally bend down to fondle her darling baby. Suddenly, and without any warning, the child sprang from the mother's lap and slipped over the side of the washing-box into the bubbling river. The mother's shriek was echoed by the startled cries of the other washerwomen as the child was borne off by the current; and the poor mother was with difficulty restrained from leaping in after her child. At that moment, some one watching the tiny form perceived a dark object making its way from shore straight toward the drowning baby, still kept afloat by its clothing.

"A dog! it is a dog!" they cried. "See! he is swimming for the baby!"

The few seconds of suspense that followed seemed almost like hours. Then the watchers embraced the agonized mother, with words of cheer.

"He has her by the frock!" they cried. "See how he keeps the darling's head above the water! She is saved; yes, nearly saved!"

For a moment the strong animal buffeted with the strong current and then struck out bravely for the opposite shore. Then a new fear assailed the watchers, for that opposite shore was solitary and uninhabited; there were reports every season of prowling wolves that were seen there. What if this great creature were no dog, but a ferocious wolf that had saved the child only to devour it? And the dismayed women stepped before the weeping mother, so that she might not see the other shore.

The four-footed swimmer reached the land; he laid the rescued child on the ground, shook the water from his heavy coat and then—calmly stretched himself panting and watchful by the silent form.

A cry of relief came from the watchers, and with swift feet they hurried to the ferryman's hut, not far up the stream. They found the old ferryman sitting in his boat, mending a row-lock, and chatting with his nine-year-old grandson, little Paul Dericker, who was on a visit to his grandfather from his home near Peaolo, on the Rhine. As soon as he heard the story, the ferryman untied his boat and quickly landed the excited washerwomen on the opposite bank. First to spring ashore, little Paul darted to the spot where the baby lay, but was speedily back with the information that the child was alive, for he had seen it move its arms and kick up its little feet, but that the dog would not let him come near.

Here was a dilemma. The dog guarded his prize determinedly, rolling a pair of fiery eyeballs and snarling savagely at the intruders when they attempted to approach. In the intervals, he would lick the face and hands of the infant, now cooing contentedly, and would give it the most affectionate attention. But let one of the party advance a step, and it was the signal for him to turn on them and drive them back. No coaxing had the least effect; and when one of the women, remembering a lunch of bread and meat in her pocket, tried to win him with food, he scorned to look at it. Losing patience, the ferryman provided himself with a club, and thought to try what a show of force could do. This merely enraged the dog, who was more than a match even for an armed man. Very much in earnest, then, Paul's grandfather sent the boy to bring from the boat his duck gun, declaring that the dog must be shot.

Away flew Paul, while the women set up such a lamentation because of the necessity of killing the dog that had saved the baby from drowning, that the ferryman made them go some distance away, lest the dog, if only wounded, should spring upon them indiscriminately, at a time when he would have all he could do to defend himself. But the gun, too, was a failure. It was evident the dog understood a gun, but supposed that they intended to shoot the child; for he protected its body so closely with his own, that to fire at one would be to fire at both. Completely baffled, the old man threw the weapon on the ground.

"Hold! Grandpa!" cried Paul, at his elbow. "I know what I can do!" And the swift feet were off toward the ferry once more.

"He is going to try a lasso on the beast—the way he caught the pig that broke out of the pen yesterday," said grandfather to himself, and then he shouted, but too late to be heard: "Don't take the rope that ties the boat, Paul! Don't let the boat loose!"

The women, waiting in terror for the report of the musket, saw Paul run past, and thought of him no more until three minutes later, when a cry for help attracted their attention, and Paul was seen to fall headlong over the boat's stern into the deep water. As he rose to the surface he grasped the rudder with one hand, but long before help could arrive, his hold slipped and he disappeared. The old man, running as fast as his stiff limbs could carry him, reached the boat at the same time as the women; but he was less frightened than they.

"Why—that chap can swim—like a duck," were his words, as he caught his breath. "He drown ng?—I wouldn't—wouldn't have believed it!"

"He was frightened by the accident," some one remarked, while the old man worked at a disadvantage in getting off the boat, as he kept his eyes turned on the water.

"There! away yonder! so far down—oh!" came the cries from the shore, as the women, shielding their eyes from the sun with their hands, caught sight of the lad's head and shoulders above the surface, nearly opposite the point where the child had been landed. All felt that he was drowning, but none dared say so to the fond old grandfather. In the same breath Paul gave one last, long, piercing cry, and sank gradually amid the curling waves.

That call had an instant effect. True to his life-saving instincts, the great dog leaped into the river again, and swimming to the boy, drew him, heavier burden than the baby, slowly ashore at the spot where the baby had lain. But the baby lay there no longer; for its mother, whom the shriek of distress had also aroused, had snatched it up, as the dog left it, and borne it away in joy and triumph. And as soon as Paul was on land, he stood up and hailed the boat, swinging his arms and shouting:

"All right, Grandpa. Carry over the womenfolks, and when I'm ready presently, I'll walk across."

He broke into a laugh that startled the echoes, the merriest laugh, those who heard it said, that ever fell on their ears.

"The young rascal," cried the grandfather, gayly, while a tear of gratitude stole down his bronzed cheek, "to frighten and fool us so!"

"But how fine for him to have fooled the dog!" said the women.

The dog did not appear to take the loss of his former prize to heart, as he had now secured a larger and better. In a little while the boat was seen approaching. Paul stood up on his feet, patting the rather astonished dog upon the head, and the pair trotted along shore to meet the ferryman.

"We were just going to swim across for sport—can't we, Grandpa?" cried Paul.

But his grandfather thought there had been enough of that kind of sport for one day, and so the boy and his new playmate crossed in the boat.

Some hours later a sportsman appeared at the ferry, inquiring for a dog answering the description of the one that now, hearing his master's voice, came rushing out of the ferryman's cottage. Both were glad to meet again, and the sportsman, when he had heard the story, expressed his delight that his noble runaway had so well employed his time.—*Lavinia S. Goodwin, in St. Nicholas.*

How Princes Make Love.

How Princes make love is told in the "Reminiscences of the Marquis Custine," which have just appeared in Paris. When the Czar Nicholas was eighteen years old he spent two days in Berlin, where he saw the Princess Charlotte, two years younger, and of a delicate beauty which at once attracted him. She, however, showed no signs of reciprocating his affection. On the evening before his departure he sat next to the Princess at dinner. "I shall leave to-morrow," he suddenly remarked. She did not show any surprise, but quickly answered: "We shall all be sorry that you leave us so soon. Can not your departure be delayed?" "That depends on you." "How so?" asked the Princess. The Prince now declared his love, somewhat to her embarrassment, as she thought they would be overheard. As a pledge of her love he asked for the ring she wore, suggesting that no one would notice it if she took it off and pressing it into a piece of bread pushed it toward his plate. The ring, however, was not hers, but belonged to her governess, who had received it of the Empress of Russia. And in taking it off to give to the Prince she read for the first time on the inside the inscription: "Empress of Russia."

—A leading model has a set of cuff and shirt studs made of Chinese finger-nails, set in gold. He points with pride at his exclusive possessions, which are made of a Chinaman's finger nail which was four inches long when cut. The nail in the studs presents a shiny appearance and is susceptible to changes in the weather. Their owner claims that they were successfully used by him as a weather barometer when he first got them, but their usefulness in this direction has been lost through age.

FARM AND FIRESIDE.

—Table scraps are better food for poultry than for pigs.—*Chicago Journal.*

—A light dusting of salt sown on buckwheat is said to largely increase the productiveness of its grain, making it fill well even in dry weather.—*N. Y. Herald.*

—If farmers who would like to sow orchard grass, but are deterred from its habit of growing in tufts, would remember that the seed weighs only fourteen pounds to the measured bushel the reflection would come that not less than two bushels per acre should be sown. Blue-grass and red-top also weigh each fourteen pounds per bushel, and when exclusive seeding is practiced not less than three bushels per acre should be given.—*Chicago Tribune.*

—Soda biscuit: Sift into one quart of flour two teaspoonfuls of cream tartar; half teaspoonful of salt; add to it four tablespoonfuls of thick cream or (if you have not cream) one tablespoonful of lard, and the same of butter; cup and a half of sweet milk; dissolve one teaspoonful of soda in the milk; work well together; mould into biscuit with the hands. Do not let them touch when in the baking tin; bake in a quick oven.—*Boston Budget.*

—The following mixture forms an excellent brown coating for protecting iron and steel from rust: Dissolve two parts of crystalized iron chloride, two of antimony chloride and one of tannin in four of water and apply with a sponge or rag and let dry. Then another coat of the paint is applied and again another, if necessary, until the color becomes as dark as desired. When dry it is washed with water, allowed to dry again, and the surface polished with boiled linseed oil. The antimony chloride must be as nearly neutral as possible.—*Albany Journal.*

—The *Farmers' Magazine* says the best method of ridding the ground of cut-worms is to plow late in the fall, turning the earth up deep. Do not harrow it, but leave it in the rough condition. The frost will penetrate the soil and kill the worms. Should, however, the plowing be done too soon, the worms will have time to seek protection lower down, and the plowing therefore should be done as late as possible, for fear that some of the worms may escape. Plow the field again in the spring, but as early as possible, and the work of extermination will be complete.

—Glazed Cucumbers: Cut the cucumbers into quarters, split them in the middle, remove their seeds; peel them, let them blanch for a few minutes; then range them in a stewpan, spread with slices of raw ham; moisten them with a little gravy; let them boil, letting the moisture reduce to glaze; then dish them up. Dilute the stock of the stewpan with a little white wine, let it boil, thicken it with a little kneaded butter; pass the sauce, through a sieve, over the cucumbers. Glazed cucumbers may be masked with bechamel sauce, white sauce, brown sauce, and even with tomato sauce.—*Boston Globe.*

INDIAN CORN.

A Cereal Which Emphasizes the Hope and Hardihood of the New World.

Our ntaional escutcheon displays an eagle. Now, if it were required to choose an emblem from the vegetable kingdom to bespeak the hope and hardihood of the new world, where would the selection fall? The plant to be promoted to the place of honor must possess the virtue of accommodation, growing readily north, south, east and west; be notable for its fruitfulness; a right-hand reliance of the pioneer; above all, it must be an immemorial occupant of the soil. The western continent has produced the potato, the pumpkin, and the tobacco plant; also maize. The first, prone in its ways, and fruiting subterraneously, would do wrong to our national genius; the second a golden braggart, with its earth-embracing habits—afar be its suggestion! The third would but conjure up a vision of Columbia, lapped in nicotian haze and vagaries, inviting the nations to smoke with her! There remains only the maize, and how can we do better than to adopt as our armorial device the Indian's own plant? No other species in the list of cultivated cereals appears to such good advantage in the isolated individual. A single full-grown plant of Indian corn, though but a fleeting, annual growth, possesses presence and dignity no less than does the oak itself. It stands erect, poises sufficient, its green blades sweeping right and left in the curve of beauty, and ready at the wind's excitation to engage in a mock battle of scythes with its neighbors.

First the blade. It must be an eye indifferent to contrast in color that will not take distinct delight in those little pennons of sunshiny green, fluttering above the rich umber of the soil, and signaling the welcome intelligence, "Corn is up." Every stage of its growth, as in the life of some lovely child, is interesting and repays attention, from the time when its blades, clasping the stalk, first form chalices to hold the rain, to its midsummer pride of two-fold flowerage, yellow or brownish tassel above and flowing silk below. What strides of growth it makes from evening to the next day's light! A sly, silent bacchanal, it gets drunk upon the dew every blessed night. By and by, it is seen standing on tiptoe; toes white, or, sometimes, prettily roseate. (The farmer, I am bound to say, sees only "brace-roots," the botanist only "aerial roots," extending from the first joint of the stalk downward until they fasten themselves in the soil; yet it will be evident to one who makes corn a sympathetic study that it stands a tiptoe out of pure good spirits and valiance.) Its leaf, closely scanned, shows, not one uniform green, but streakings of paler and deeper color. Hold the blade between you and the light, and you will see on each side of the strong, straight midribs an equal number of lucid hair-line channelings. The upper surface is roughish, being set with minute hairs; the under surface is of a cool smoothness. A day of "ninety in the shade" tells upon the leaves, causing them to curl their margins upward, as though to shut out the glare of the sun; but the night does not fail to bring restoration.—*Atlantic Monthly.*

—Good and healthy girls are almost always cheerful. No novelist would consider his youthful heroine complete if a "ringing laugh" were omitted from the list of her charms, and in real life the girls who do not laugh now and then are seldom trusted or liked by their companions.—*Harper's Bazar.*

A BROOKLYN lady now calls her pet cat "Stolen" instead of Helen.—*Brooklyn Eagle.*

Delicate Diseases

of either sex, however induced, speedily, thoroughly and permanently cured. Complicated and obstinate cases of blood taints, ulcers, obstructions, unnatural discharges, exhausted vitality, premature decline, nervous, mental, and organic debility, varicocele, hydrocele, diseases of prostate gland, kidneys and bladder, piles, fistulas and rupture, all permanently cured. Staff of twelve expert specialists in constant attendance, constituting the most complete organization of medical and surgical skill in America. Send history of case and address for illustrated pamphlet of particulars. World's Dispensary Medical Association, Buffalo, N. Y.

MAJOR-GENERAL PLUME is the commander of the New Jersey soldiers. It is very appropriate to have a plume at the head.—*Texas Siftings.*

Drowsiness in the Day-time

unless caused by lack of sleep or from over-eating, is a symptom of disease. If it be accompanied by general debility, headache, loss of appetite, coated tongue and sallow complexion, you may be sure that you are suffering from biliousness and consequent derangement of the stomach and bowels. Dr. Pierce's "Pleasant Purgative Pellets" are a sure cure for all ailments of this nature. They cleanse and purify the blood and relieve the digestive organs.

ONE difference between a sailor and a showman is, that a sailor likes a lighthouse and a showman does not.—*N. Y. Independent.*

Young Men, Read This.

THE VOLTAIC BELT CO., of Marshall, Mich., offer to send their celebrated ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES on trial for 30 days, to men (young or old) afflicted with nervous debility, loss of vitality and all kindred troubles. Also for rheumatism, neuralgia, paralysis, and many other diseases. Complete restoration to health, vigor, and manhood guaranteed. No risk incurred, as 30 days' trial is allowed. Write them at once for illustrated pamphlet, free.

IT is reported that female dentists are gaining ground in Germany. They seem to be taking root in this country.—*Oil City Derrick.*

I WAS a great sufferer from rheumatism. As a last resort I tried Athlophoros, and after a few doses felt almost immediate relief. I used two bottles and am entirely well of my rheumatism. Mrs. Margaret Ingham, 634 East Exchange St., Akron, O.

WHEN a miner has been eaten by a grizzly, the Western people speak of him as being admitted to the b'ar.—*Yonkers Gazette.*

A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.

The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.

The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of interior Dakota.

Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Lexington, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.

For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing

R. R. CABLE, President and General Manager, Chicago.
E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

Frightful Case of a Colored Man.

I contracted a fearful case of blood poison in 1883. I was treated with the old remedies of Mercury and Potash, which brought on rheumatism and impaired my digestive organs. Every joint in me was swollen and full of pain. When I was given up to die, my physicians thought it would be a good time to test the virtues of Swift's Specific. I improved from the very first dose. Soon the rheumatism left me, my appetite became all right, and the ulcers, which the doctor said were the most frightful he had ever seen, began to heal, and by the first of October, 1884, I was a well man again. LEM McCLENDON.

Lem McClendon has been in the employ of the Chess-Carley Company for some years, and I know the above statements to be true. W. B. CROSBY, Manager Chess-Carley Co., Atlanta Division.

Facts for Farmers.

Now that harvesting is over remove the knives from the mowers and reapers, to avoid accidents, and see that all machinery used is properly oiled and stored in a dry place.

Crushed oats make the best feed for horses. Old horses cannot easily masticate whole grain, and the crushing of the oats consequently adds 25 percent to their value.

Between 1842 and 1860 England lost from contagious lung plague, it is estimated, 5,558,780 head of cattle, worth $400,000,000. During the following nine years she lost about $1,000,000 more.

Currant and gooseberry cuttings from new shoots, placed in rich soil, will now root nicely. One inch and one bud are enough to leave above ground, with four or five inches below.

If trees are growing too vigorously and are sending out too many or too long branches, lop them off now. If cleanly done no harm will follow. But cut smoothly; don't tear or twist them off.

Have your pigs and hogs access to plenty of fresh water? If not, provide it as soon as possible. Good, pure, fresh water is as essential to healthy development in the hog as in the cow or horse.

Every farmer should endeavor to keep down weeds, not only for his own benefit, but also in order to prevent injury to his neighbors. Compulsory clearing of weeds would soon lessen the nuisance,

All the extra care of the colts now will be handsomely repaid in the early developing of the young horse, and the better horse it will make gives a better return in ready cash for the extra feed and care of the colts.

In Northern Ohio droughts are much less frequent now under a system of mixed husbandry than they were twenty or thirty years ago under a system of pasture, meadow and dairying under old-fashioned methods.

Every man who breeds and handles improved stock should consider it necessary part of his business to keep himself well informed in matters of pedigree and the method of keeping private records of his own work.

Mr. William Stewart, of South Dumfries, Canada, has concluded to try the experiment of introducing the prairie chicken on his farm. With this object he has ordered eggs for hatching from the West. The experiment will be watched with much interest.

Farmers cannot be too guarded in the isolation and protection of their hogs. Disease is here, there and nearly everywhere, and a little carelessness may be the means of losing an entire herd, whilst with ordinary care the disease may possibly be entirely avoided.

How Grant Stiffened up an Aide.

An old army officer told me to-day how Gen. Grant revived the flagging courage of one of his staff officers. The latter, when he was first assigned to duty under Grant, had never been in any serious engagement. Almost the first day that he reported to Grant he was placed under a fire of the hottest and most severe kind. The screaming of the balls, the roaring of the cannon, and the sharp crack and rattle of the musketry thoroughly demoralized him. He became absolutely sick and paralyzed with fear. He was so weak from nervous excitement that he lost physical control over himself. Grant came up at the very climax of his fright, and noticing his pale face, his blue lips, and chattering teeth, he said: "Captain, you are frightened. This is natural enough. You will get over it." Suppose, continued Grant, "I should come to you with a hat containing ninety-nine white beans and one black one, and I should ask you to thrust your hand into the hat at a venture and pick out the black bean; do you think your chance of getting that black bean would be very good? Well, your chance for being hit under this fire is no greater than your chance for drawing the black bean." This officer at once took heart, and from then on he never showed the slightest sign of fear.—*N. Y. World.*

A Pathetic Incident.

The Greenville *Banner* tells the following pathetic story of how Conductor Frazier, of the International and Great Northern Railroad, tried to fight off death a few hours in order that he might see his wife once more. He had been shot by a tramp, and had been taken to Tyler, Tex., in a dying condition:

"Help me to fight back this cruel death, boys, until my wife gets here," said the dying man, cheerily. The doctors had already told him he could live but a few hours. With a calm courage he heard the verdict, and called all of his wonderful force to his aid in the struggle to live until his wife arrived. "Tell me exciting stories," he said to the boys around his bed, "for I must make this run till she comes!" And the boys did laugh and tell big stories, poor fellows, when their stout hearts were filled with regret. The hours sped rapidly by; the merry voice of the conductor grew fainter and fainter, but his courage never faltered. A telegram from his wife in answer to one sent her some hours before was brought into the room and read. She was coming on a special train, the road was cleared for her passage, and with lightning speed her train was annihilating distance. What a race! A young woman in the full flush of love and a new life, pitted against the king of terrors. The news nerved Frazier for a moment, and his efforts to keep up were renewed. A little later another telegram. "Old boy!" whispered a brakeman, "she will be here in an hour." Good God! But one short hour to wait—to live! "Turn me over, boys," he said. It was done. He whispered to an attendant: "Charley, I cannot run on this schedule—good-bye!" He was dead in an instant. Just thirty-one minutes later a beautiful young woman bent over the prostrate form, and, finding no life there, broke out in one of those wild wails which tell all too well that hope in life is done.

Boys, here is an alphabet of excellent counsel, by following which the great Baron Rothchild made himself famous and rich:

Attend carefully to the details of your business.
Be prompt in all things.
Consider well; then decide positively.
Dare to do right; fear to do wrong.
Endure trials patiently.
Fight life's battles bravely, manfully.
Go not into the society of the vicious.
Hold integrity sacred.
Injure not another's reputation or business.
Join hands only with the virtuous.
Keep your mind free from evil thoughts.
Lie not for any consideration.
Make few acquaintances.
Never try to appear what you are not.
Observe good manners.
Pay your debts promptly.
Question not the veracity of a friend.
Respect the counsel of your parents.
Sacrifice money rather than principle.
Touch not, taste not, handle not intoxicating drinks.
Use your leisure time for improvement.
Venture not upon the threshold of wrong.
Watch carefully over your passions.
'Xtend to every one a kindly salutation.
Yield not to discouragement.
Zealously labor for the right.
And success is certain.

—*Farm Journal.*

To Avoid Colds.

The result of closing the pores of the skin is various, according to the direction the shock takes, and this is always to the weakest part. In the little child it is to the throat, and there is croup or diphtheria; to the adult it is to the head, giving catarrh in the head or running of the nose; to the lungs, giving a bad cold, or, if very violent, causing pneumonia or inflamation of the lungs themselves; or pleurisy, inflammation of the covering of the lungs; to the bowels, causing profuse and sudden diarrhœa, or to the covering of the bowels, inducing that rapid and often fatal malady known as peritoneal inflammation; if the current is determined to the liver there is obstinate constipation, or bilious fever, or sick headache. Hence, a cold is known by a cough, when perspiration is driven inward, and is directed to the lungs; by pleurisy, when to the lining of the lung; by a sick headache or bilious fever, when to the liver, etc.; diarrhœa or constipation, when to the bowels and liver.

To avoid bad colds, it is only necessary to avoid closing the pores of the skin, either rapidly, by checking perspiration, or slowly, by remaining still until the body is thoroughly chilled—that is, until the pores are nearly or entirely closed by inaction in a cold atmosphere or room. In the matter of health, these suggestions are of incalculable importance. —*Hall's Journal of Health.*

The Pitch-Pine Industry.

"M. Quad's" Georgia Letter.

That curious industry—the extracting of oil and turpentine from pine by distillation—is represented in Augusta. Five cords of fat pine are used in the kiln or oven at a single charge. This charge is smothered, the same as if intended for charcoal. The first result is a quality of turpentine as clear as crystal. The second is turpentine oil, pure and unadulterated. The third is a liquid resembling tar, but much thinner, and having a pleasant odor. Three or four drops of this on a bit of sugar will cure an ordinary sore throat in an hour, and instantly relieve hoarseness and tickling in the throat. It is largely used south for man and beast, and most people regard it as a sure cure for everything except a broken neck. The fourth result is a mixture largely used by gravel-roofers, and to some extent by painters. It is not only water-proof, but a great preservative. The fifth and last result is a mass of the clearest and purest charcoal which can be produced in any known manner. The cost of operating these work is very slight, while there is a steadily increasing demand for the products at a fair profit.

After a sea diet, to prevent boils and eruptions, and assist acclimation, use Ayer's Sarsaparilla.

NEW ADVERTISEMENTS.

Diabetes Cured.

New Orleans Picayune, Jan. 20, 1884.

Mr. Mathias Doll, business place No. 23 North Peters street, residence Royal street, between Jeanne and Bartholomew, New Orleans, has been a most intense sufferer from kidney trouble (diabetes) for the last six long and weary years. He said to us: "Even earlier than that I frequently suffered from pain in the back, and frequent making of water, but gave it no thought until about the time stated, when the almost constant desire to make water became unendurable. The pain in the back, and sometimes in the legs, made me so lame at times that I could scarcely walk. I consulted one of the best doctors in this city, and was under his constant treatment for one entire year without deriving the least benefit. I then consulted from time to time, during the last five or six years, six other physicians, each one standing in the front rank of the medical profession in New Orleans, and though I sometimes was a little relieved of some excruciating suffering, yet upon the whole I was not only no better, but in many respects much worse. My limbs became so swollen and sore that I could not cross my legs when sitting on a chair—all of which, they said, was caused by diabetes. I then tried some highly lauded patent medicine. But they all turned out to be humbugs. I had given up all hopes of ever getting relief, much less being cured, when I noticed in the papers some wonderful cures that PERUNA had made in this city, as prescribed by Dr. Hartman, giving the name and address of each person treated. I called to see him; he at once prescribed his PERUNA, which is not over three weeks ago. I am so much better that if I would not improve any more, I would not for any amount that I had not placed myself under his treatment. All my pain and lameness is gone. The swelling and stiffness in my legs has disappeared, and instead of making water every fifteen minutes, I now make it once in three hours during the day, and only twice in a whole night. I am, indeed, quite well again. Don't hesitate, don't say humbug, but get the PERUNA at once and take it as its printed label directs, or, if you think this is only an advertisement, and not strictly true, call and see me and see for yourself."

Mrs. Huldah Riple, Smethport, McKean county, Pa., writes: "DR. S. B. HARTMAN, & CO., Columbus, O. I have used your PERUNA and it has done me a great deal of good. Have recommended it to many of my friends, who have since expressed themselves as wonderfully pleased with its virtues."

IT LEADS ALL.

No other blood-purifying medicine is made, or has ever been prepared, which so completely meets the wants of physicians and the general public as

Ayer's Sarsaparilla.

It leads the list as a truly scientific preparation for all blood diseases. If there is a lurking taint of Scrofula about you, SCROFULA AYER'S SARSAPARILLA will dislodge it and expel it from your system.

For constitutional or scrofulous Catarrh, CATARRH AYER'S SARSAPARILLA is the true remedy. It has cured numberless cases. It will stop the nauseous catarrhal discharges, and remove the sickening odor of the breath, which are indications of scrofulous origin.

ULCEROUS SORES "Hutto, Tex., Sept. 28, 1882. "At the age of two years one of my children was terribly afflicted with ulcerous running sores on its face and neck. At the same time its eyes were swollen, much inflamed, and very sore.

SORE EYES Physicians told us that a powerful alterative medicine must be employed. They united in recommending AYER'S SARSAPARILLA. A few doses produced a perceptible improvement, which, by an adherence to your directions, was continued to a complete and permanent cure. No evidence has since appeared of the existence of any scrofulous tendencies; and no treatment of any disorder was ever attended by more prompt or effectual results.

Yours truly, B. F. JOHNSON."

PREPARED BY

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

1621 DAVID LITTLE.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTS.

AYER'S Sarsaparilla

Is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier that can be used. It invariably expels all blood poisons from the system, enriches and renews the blood, and restores its vitalizing power. It is the best known remedy for **Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Blotches, Sores, Boils, Tumors, and Eruptions of the Skin,** as also for all disorders caused by a thin and impoverished, or corrupted, condition of the blood, such as **Rheumatism, Neuralgia, Rheumatic Gout, General Debility, and Scrofulous Catarrh.**

Inflammatory Rheumatism Cured.

"AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years.
W. H. MOORE."
Durham, Ia., March 2, 1882.

FOR RENT.

The building formerly occupied by Mr. Thomas White will probably be for rent May 1st. There are six available rooms up stairs; a room on the first floor, that has been used for a Barber shop. Would make a desirable stand for a grocery, flour and feed store, with room enough for a family above. Would also make a convenient and desirable place for Post Office, having an unobstructed entrance on Liberty street.

For further information apply at this office or to

JOHN A. WOLF.

CARPENTER AND BUILDER,

EAST END OAK STREET, OAKLAND.

Furniture repaired. Will also take orders for new furniture. Rustic work on hand and manufactured to order. Gives him a call

HOW WE THREE FELL OUT.

We three were Miss Emily Daniels, Mr. John Christy, and myself; the one was my dearest intimate and the other was my best esteemed friend. The one was sedate, amiable and no longer young; the other was elderly, staid, and benign. Neither seemed to much admire the other as a gracious concession to me—for whom both professed the stanchest regard. Miss Emily—dear soul!—declared herself devoted to me; and she had indeed cheered me in many a grief and indulged me in many a foolish joy. And Mr. John, with his honest soul and his big heart, considered me his special protege.

"I am going to Europe for the summer, Bessie," he said to me one day, "and I intend to take you with me."

"But, my friend, I cannot go," answered I, mindful of my meagre income and my recent resolution to obtain a place as governess. "A European trip would be an impossible undertaking for me."

"Ah, but you must go, Bessie, my sister is such a helpless body traveling, and I should not know how to manage without you. And the trip will cost you nothing—I shall settle all the monetary difficulties," he persisted in his affectionately decided fashion.

"Oh, but I must have time to deliberate," I reluctantly returned.

I did not like to decline what was really a generous arrangement for me; neither did I like to acquiesce with what might perhaps not be wholly satisfactory to my dear Miss Emily. But I was not averse to the undertaking; indeed at the moment I should have been delighted to go to Africa or the Antipodes, since a dismal misunderstanding had just occurred between me and a certain young gentleman whose wife I had once believed I should some time be.

"I do not doubt the misunstanding is a lucky thing for you, after all," Miss Emily remarked some time later.

"Oh, I do not doubt that myself," I concurred readily enough; for I still felt that my young lover deserved all the blame of our miserable quarrel.

"Marriage is such an uncertain good," continued Miss Emily, who was always inclined to sniff disaster in everything matrimonial, "and many girls lock the gates upon their own happiness at the altar. There are so many

"Who start at the sound of the marriage bell
On a life-long walk of despair."

"I am rather glad you are no longer betrothed to Sidney Dwight; I am glad for myself too, dear; I am going to the Yosemite this summer, and now of course I can take you with me."

"Oh, but I cannot afford to take such a summer jaunt as that," answered I; "and besides, I shall soon begin my career as a governess, you know."

"The trip will be no expense to you," Miss Emily argued persuasively. "I can do that much for you, Bessie; and if you are squeamish enough to fancy some requital necessary, you may consider yourself as my companion if you choose. I am sure you would rather be with me than drudging as a governess among strangers."

"Indeed I would," I replied with all sincerity. "But I cannot promise hastily—I must have time to think."

"I do not know why thinking is so indispensible," the amiable spinster responded with unfamiliar asperity. "Of course you will go; no sane girl would refuse such a chance to see the magnificent Yosemite."

To behold the Yosemite had indeed been one of the ambitions of my life; but to behold the splendors of Europe had an equal charm. And was ever a girl so distracted by indecision as I? To choose the magnificent valley of the West would be to wound and offend my estimable Mr. John; to choose the glories of the Old World would be to hurt and affront my dear Miss Emily. I could promise neither and deny neither; I could only temporize and cavil with both. Oh, was ever a girl so vacillating, so tantalizing, so hypocritical, as I was?

Each morning I was compelled to listen to Mr. John's complacent anticipations of my voyage with him across the glorious sea; each evening I was obliged to hear Miss Emily's blissful expectations of my journey with her across the great continent; and each night I lay pondering sleeplessly or tossing in perturbed dreams—wild and terrifying jumbles of shipwrecks and train collisions, in which my estimable elderly friend and my amiable intimate seemed transformed to curious birds or beasts of prey, each screeching or snarling defiance at the other, as I lay exhausted and lacerated beneath their hungry beaks or greedy claws.

And so the lengthening spring days lapsed, and the hour came when I must give the nay which would disappoint and offend the one, or the consent which would affront and disappoint the other.

"You are becoming alarmingly thin and colorless, Bessie; our voyage will be precisely what you need," Mr. John had just said.

"But I am not going; I cannot go, and I will not," I answered so resolutely at last, and I fear so rudely, that he started.

"Of course she will not," observed Miss Emily, who unluckily at the instant entered the room. "Bessie is going with me to the Yosemite."

"I am not going with you, either," I avowed with less civility than determination, I am afraid. "I cannot go, and I will not. I shall go with neither of you."

"I have done a great deal for you, Bessie—you know that," Mr. John said reproachfully.

I might have retorted that I had done a great deal for him, too; that I had sewed his buttons and mended his garments and tended his invalid sister ever since I was born. But I knew his big honest heart was wounded, and so I maintained silence.

"You are an ungrateful girl, Bessie; I am sure I have offered you everything which is considerate and liberal," Miss Emily said upbraidingly.

I might have reminded her that her consideration had never yet meant utter indolence for me, that I already had some experience of gratuitous duties as companion to herself. But I knew her amiable soul was really hurt, and so I remained silent.

"Well, we shall survive without you, I dare say," Mr. John growled sarcastically.

"Of course I shall not force kindness upon anybody," Miss Emily snapped simultaneously.

"And I have no time to be scolded," said I, attempting a mollifying smile. "I have finally secured a situation; my trunk is already packed, and I shall leave you both directly."

They each looked startled and unaffectedly anxious.

"And of course you do not care, John Christy, how unhappy the poor child will be among strangers," Miss Emily complained to him. "I do not believe you really cared to take her with you at all—you only proposed the European trip to prevent her going with me."

"I dare say you are entirely satisfied now, madam; I am disposed to believe you thrust your Yosemite plan upon her only to spite me," Mr. John grumbled in unison.

And so we three fell out; and with a sigh I turned and left the more inimical two together.

"I am not astonished that Bessie is so eager to leave you," I heard, with my hand on the knob of the door. "You have always kept her at your beck and call; and of course she is weary doing your mending and odd jobs for nothing but an occasional gown, which your sister has worn threadbare."

"I am not at all amazed that Bessie wishes to leave you," I heard as I passed out of the room, "I dare say she is tired doing all your correspondence and accounts for a yearly drive in the park, or a corner in your church."

Had the curtain rolled up on the beak and claw of my dream? I questioned as I hastened away.

An hour later I was admitted to an ante-room of the mansion where I had supposed myself unconditionally engaged as governess. But as I had disappointed the two whom I had left behind, so was I myself destined to be disappointed.

"Our present governess has been induced to continue with us," I was politely informed. "We are willing to indemnify you for any loss incurred, but we naturally prefer to retain a person to whom we are accustomed."

The explanation was sufficiently satisfactory perhaps; but nevertheless I felt miserably dejected as I again went out into the Avenue and lagged homeward, through the chill, sluggish, depressing drizzle of a sombre spring evening.

But the misty dusk was no more sombre than my life had suddenly become to me. My cares and worries had been grevious enough before "we three fell out," but in the brief time since my difficulties seemed grown and multiplied like some giant horde of an Arabian night; and I felt faint and sick at heart with a strange new sense of utter isolation and loneliness.

"I have displeased every body, and everybody is angry with me," I sighed, as I choked down the hot, thick tears. "I could not help quarrelling with them—Mr. John and Miss Emily!—but I could have helped quarrelling with Sidney." I thought regretfully and penitently—just as latterly I had often thought.

At the moment, as I was loitering dejectedly and absently onward, my umbrella came into collision with the robust shoulder of somebody whose nearness I had not perceived through my blurring tears.

"I beg pardon. Why, Bessie!" he enunciated, with prompt courtesy, swiftly changing to surprise and wistful concern, as he noted the trouble on my face.

"I am the one to beg pardon," I returned with a foolish blush. "I should have been more heedful where I was walking. But everything seems to go awry to-day," I added with a little irrepressible cry from the bitter depths of my despondent spirits.

"Something has gone awry evidently," he commented with another comprehensive glance at the straggling tears which were more and more provokingly rebellious, as with the old tender manner he closed my umbrella, installed me under his own and tucked my nervous hand within his arm.

"You would look more radiant with a summer of travel before you, I should suppose," he resumed somewhat tentatively, as he walked on beside me.

"But—but I am not," I began with a stammer and a badly suppressed sob. And then, somehow, between my suffocating heart beats and my doleful sighs, I faltered forth all my woes.

"Well, my darling, since their projects for you are frustrated, and since the governess scheme has been defeated, I suggest that our marriage be hastened, my home is waiting for you," my gallant Sidney said with as much assurance as if we had never quarreled and parted and vowed to meet no more.

"I am afraid I am a victim of circumstances," I laughed, as gayly as if but a moment ago I had not been the most miserable girl in the whole wild world.

And so, arm in arm, together we entered the familiar house which I had so disconsolately left a brief while before.

The inimical two were still in the family parlor, but, somehow, neither seemed particularly gratified at my altered mood.

"We have been so unhappy about you," Miss Emily said in her most amiable tones. "John has been lecturing me dreadfully about my delinquency toward you; and we are both so sorry and so ashamed of ourselves! We have always allowed you to do so many serviceable things for us and without compensating you in any material way. Of course John is not nearly so much to be blamed as I am——"

At this juncture the astonishing speech was interrupted by one no less surprising.

"My dearest Emily, I shall not permit you to blame yourself at all," my estimable Mr. John interposed in his most benign fashion, and with an air of proprietorship which was a revelation; "the great fault was mine. I was an apostate of my own creed when I insisted the dear child must do what I deemed best for herself; for I have always advocated that true friendship must impose neither restraint, nor compulsion, nor obligation upon the friend. We have both been remiss toward you, Bessie; but we intend to make amends to you."

"You shall have a nice little marriage dot from me," said Miss Emily.

"I will donate the trousseau," said Mr. John.

"And we four shall be married the same day," my audacious Sidney interpolated mischievously.

"Oh, certainly," they both assented rather sheepishly.

And so everything was restored to normal order, only where three fell out, four live together in harmony.

Ayer's Sarsaparilla, sending pure blood to the brain, gives a sound mind in a sound body.

A LOST OPPORTUNITY.

A youth he came upon a maid
Within a shady arbor,
A-reading of a learned book,
One summer at Bar Harbor.
The fog was slowly drifting down.
She wore a fine æsthetic gown.

"O, will you walk with me?" he said,
The youth so brave and comely.
"'Twould be less hard," the maiden sighed,
"If he were only homely;
But surely I this lovely gown
Should ruin, walking through the town."

The youth he sought another maid
Within another arbor.
She smiled on him as maidens will
In summer at Bar Harbor.
She wore a gown of homespun rough.
She said she could not walk enough.

They tarried till the sun went down.
The youth he waxed romantic.
The other maiden sighed and sighed
Above the book pedantic.
The moon came out and like a ghost
With pale lips told of chances lost.

She went back to the prosy town,
No ring upon her finger.
She heard the thrill of wedding bells
Upon the sad air linger.
"Alas," she cried, "what bitterness
Is wrought by too æsthetic dress!"

O, all ye fair aspiring maids
Who tarry at Bar Harbor
And bide the sly approach of Fate
Within a shady arbor,
Take warning of my doleful rhyme,
And be, I pray you, wise in time.

—*Harper's Weekly.*

WHAT BELLE DID.

Saved by the Pluck of the Captain's Wife.

The Master's Story of a Foundered Schooner—How a Ship's Crew Was Rescued Through the Efforts of a Brave Little Woman.

"She was the bravest woman I ever saw, and a little bit of a body, too, but if it hadn't ha' been for her pluck and courage God knows what would have become of us.

The speaker, one of the crew of the ill-fated schooner John T. Ferris, was seated on the deck of the steamship City of Durham, which was plowing her way through a heavy sea towards Boston Light the morning of Thursday last. The little knot of seamen who gathered about the wrecked mariner asked eagerly for the story, and at their request the following account was given. It is here related for publication by an officer of the Durham, who was present at the rescue. He said:

"After Captain Lund observed the signals of distress that were displayed Thursday morning by a schooner which afterwards turned out to be the Ferris, we were very much perplexed, because some hours before two vessels, which I think were American craft, passed us sailing in the exact direction of the distressed vessel. We were eight miles away at the time when the schooner was discovered. The moment the Captain saw the [illegible] gave orders to turn the steamer in the direction of the sinking ship and to fire up.

"This was about nine o'clock in the morning, and the storm was but slowly going down. It was blowing a gale and the sea was very rough. As we continued on our course all eyes on board the Durham were intently fixed on the schooner, which, as we came nearer, could be seen to roll heavily in the sea. It could be readily seen that she was full of water, and the only question was, How long can she be kept afloat? The Captain, with characteristic promptness, had ordered the boats to be made ready for lowering, and he only waited for a favorable opportunity to give the word.

"The Durham presently came within speaking distance, and then the Captain shouted, 'Shall I send you boats?'

"'No,' was the answer sent over the water in a clear, feminine voice; we have a boat, and will come to you.'

"At this point I came on deck, and the sight which met my eyes I shall always remember. The low, dark hull of the Ferris was almost under water. The waves were breaking forcibly over her bows, and what remained of a once full deck cargo was being gradually forced overboard. In the stern, with his hands upon his head, as if to steady his wasted and weary brain, stood the Captain, knee-deep in water, while off to leeward of the sinking craft was floating the ship's boat, in which we saw the form of a man and woman, while in the bottom was lying the figure of a boy.

"It was some minutes before the man on board made up his mind to leave the deck. Finally, however, a call from the boat brought him to his senses, and casting around a sorrowful glance, he went over the side and made for the frail shell that was floating with great buoyancy on the tops of the waves. The old Durham, true to her helm, came up into the wind, and as we passed by a rope was thrown. Ten minutes later the last of the party was on board, the steamer's head was turned, and as we glanced over the stern of the boat we saw the Ferris, her sails flapping wildly in the wind, give a long roll, and then go down like lead into the deep waters.

"As the party came over the side the master grasped the hand of Captain Lund and exclaimed, with tears in his eyes: 'God bless you, Captain, you have saved my wife.' A slight figure, clad in dark, wet garments, next came to our sight. I was never, to tell the truth, more surprised in my life. The figure was that of a girl scarcely eighteen years of age. Her light, thick hair was gracefully blowing about her face, which, though soiled and careworn, gave evidence of much beauty. She was under middle height and quite small. As she stepped upon the deck she gave us a look I shall never forget. So weak was she that she could scarcely stand. She attempted to walk but could not, and would have fallen if the second mate had not caught her in his arms and carried her in a partly unconscious condition to the cabin below. The boy and seaman were then pulled up, and while the officers were providing for the comforts of the castaways the story of their misfortunes was graphically told.

"The master, Captain Betts, said: 'If it had not been for Belle, God knows what would have become of us. She is the best wife a man ever had, and though I have now lost everything I have in the world save her I ought to rejoice that we have escaped together. We left Calais Sunday morning, and had a good run until the storm struck us. Wednesday night the gale was terrific. There were only three hands on board beside my wife; one of these was a boy, and could not be counted on to do men's work. The storm had caused us to be up much, and we were well nigh exhausted when the report came up from below that we had sprung aleak. The night was dark and dreary, and the waves were high. No vessel was within hail from which we could get assistance. All that remained for us to do was to man the pumps and battle as long as we could against the water in the hold, which was slowly but surely gaining on us. At this time all hope seemed out of place; before morning the Ferris would be cables under the waves, and all that would be left to tell the tale of our life and death would perhaps be found floating on the water by a passing ship days after the storm was over. Only one who has been in similar circumstances can realize how little life seems worth.

"'But at that hour, when it seemed impossible to make a successful effort, Belle came from the cabin, her face white, but determined, and said: "Don't give up, there is hope yet. Hasten to the pumps. I will steer the ship." And in truth she did, all the long hours of that fearful night. She stood at the wheel, using her entire strength to keep the vessel up into the wind. The rest of us pumped, pumped until it seemed that our limbs would break. Nerved by the fearfulness of the situation we worked with full force all the time, and much to our satisfaction found that the water no longer gained on us. Our hope and prayer was for the morrow, because when daylight came there would be a chance for help. Before dawn our hearts again sunk. Nature could no longer stand the test, and our boy, who had been making manly efforts, sank to the deck. So exhausted was he both in mind and body that blood commenced to ooze from his ears and nose. I, myself, the moment my efforts were relaxed, grew faint. I felt almost unconscious of what was going on around me. It seemed as if the fatal hour were come. Death no longer was a dreaded visitor. His presence would be almost a welcome.

"'But Belle, who had been steering all these long hours and had shouted out words of encouragement to us, now left the wheel and hurried to my side. "Don't give up yet, husband; we may be saved. O, for daylight!" With these words she grasped the handles and vigorously commenced to work the pumps. I followed her efforts, and leaving the schooner to drift we gave all our attention to the pumps. Soon it was dawn. It was with feelings of a new lease of life that we continued our work. Occasionally one would stop and glance over the waste of waters to search for a passing sail. Again and again disappointment greeted us, but suddenly my wife looked up, and, gazing a moment, cried: 'A sail! now we may be saved!'

"'I looked up, and sure enough a white sail was above the horizon. Our flag was at the masthead, and we waited with strange feelings to see if they would see our condition. But, no! No change was made in their course, and once more we turned to the pumps with aching hearts. All but my wife were disappointed and gloomy. She, however, put on a cheerful face and, working harder than ever before, said, 'Now we must pump until we see another ship.'

"'A little later another vessel hove in sight, and our hopes for a second time grew as we came nearer together. The vessel passed us in plain sight, but no indication of our discovery was seen. On, on they went, directly away. It seemed for sure that we must go down. The fates were all against us. Our chances for life were but a delusion. What I did the half-hour following the last disappointment I scarcely know. My wife's feeble words of encouragement came as if in a dream. How rapidly through my mind passed recollections of home, which are so dear to man! Little would I have thought one year before, when we were married, that a short twelvemonth would bring about such a situation as that we were in. Then I would determine that Belle should not drown, and would force myself to greater efforts.

"'When it was announced that another ship was in sight I could scarcely hope; too strong was the belief that like the others she would pass on her way without seeing us. But Providence had not so ordained, and soon we saw for sure that we were seen. The huge iron steamer's prow was turned and the black smoke that poured out of her stacks showed us we would soon be safe. I then got all the party into the boat and waited for the ship's arrival. I wanted to put a force on board to pump her and keep her afloat until we could get to land, but my wife said if I remained on board she would, so I left. It would have been of no use, though; the leak was too large. The poor Ferris! It was too bad to lose her, but, thank God, Belle is safe.'

"When the master finished speaking Captain Lund was in tears. I never saw him so affected in my life. All he said was, 'Thank God I did save her. If she is a representative of your American women you have won a fortune in knowing her worth. I am an Englishman, but I tell you frankly I don't believe there is a woman in all England that could have done as much.'

"The officers then returned to their duties, but later in the day were all introduced to the young lady. She told us that she was but eighteen years of age, and came from Ellsworth, Me. She spoke gravely concerning their narrow escape, saying little in regard to their losses. 'That was of little consequence; both had their health, and could work together for a living.' I asked if they had any money. She said: 'Ten dollars in change is all we have.' This got noised among the crew, and all with generous impulse wished to contribute something to help the couple out. We gathered forty-five dollars before Boston was reached. Superintendent Furber of the Boston & Maine Road, hearing of their condition, sent them free passes to her home, and to-day the couple reach there, I believe."—*Boston Globe.*

TEMPERANCE READING.

ALCOHOL IN THE SYSTEM.

Notes from an Address to the Students of Knox College by Prof. Albert Hurd.

The familiar phenomenon of blushing is produced by some emotion, either agreeable or other. V. A. S. Hill's Rhetorics, p. 47. The circulatory system, consisting of heart, arteries, veins and capillaries, is supplied with nerves from the sympathetic system. When these nerves are in their normal condition, they maintain a certain tension in the muscular walls of the arteries and veins. If from any cause the sympathetic nerve is paralyzed, the tension is removed from the blood-vessels which it supplies, and the result is an increased flow of blood in the arteries, so that the small capillaries become gorged with blood. Such is the case when some sudden emotion takes possession of the mind; a hot flush is felt, the skin grows red. Sometimes these changes are confined to the cheeks only, or they extend to "the roots of the hair," or "all over."

Alcohol produces the same results. Very soon after alcohol is taken into the system it paralyzes the sympathetic nerve. The tension in the walls of the blood-vessels is lost; an increased flow of blood finds its way into the small capillaries which gives the skin of the face and neck especially, a flushed appearance. When alcohol is habitually taken, the elasticity of the muscular walls of the blood-vessels is, in a large measure, lost; so that after the immediate effects of the alcohol have passed away the blood-vessels fail to resume their normal size, and the flushed appearance of the face becomes permanent.

Now, the heart is a pump, filling the arteries which lead from it with blood. When the normal tension is removed from these arteries and they become enlarged, it takes more blood to fill them. So that, whereas, in a healthy state the arteries by their tensions are a check upon the action of the heart under the diseased condition produced by alcohol, that check is removed and the flabby walls of the arteries, crying for more blood, offer no resistance to the action of the heart. In a healthy person the heart beats seventy times per minute, or about 100,000 in a day. Careful experiments show that two ounces of alcohol, the amount a very moderate ale or whisky drinker takes daily, increase the heart beats 6,000 in twenty-four hours. So then the heart of a moderate drinker beats 106,000 times, instead of 100,000 times in a day. The force exerted by the heart in beating 6,000 times would lift a weight of seven tons to a height of one foot. Putting the result in another form, the heart is driven to do extra work equal to lifting 655 pounds one foot high each hour. Is it any wonder that a feeling of languor succeeds, or that reaction follows when the immediate effects of the alcohol have passed off?

The effect of alcohol upon albumen can readily be seen by dropping an egg into a glass of alcohol. It is immediately cooked. Albumen forms a large part of the tissues of the body. Alcohol hardens the albumen in the tissues, just as it hardens it in the egg. The very delicate walls of the air-cells of the lungs are thus thickened and hardened. When the impure blood is brought to the lungs, to exchange its carbonic acid and other waste products for oxygen, it finds between it and the fresh air a thickened, hardened membrane through which the exchange can be made but slowly and imperfectly. The blood must return to the tissues of the body still filled with impurities. The corpuscles still charged with carbonic acid are enlarged, and thus the blood is made thick.

Alcohol has a strong affinity for water. It drinks up all the moisture of the body and causes inordinate thirst. Alcohol begets a strong appetite for itself, so that the thirst which it produces is generally slaked for the time being by more copious draughts from some drink containing alcohol, thus only augmenting the evil.

Alcohol is not assimilated by the body, but must be thrown off as waste matter. This is the opinion of many eminent physicians on both sides of the Atlantic. It is true that a few physicians of acknowledged authority maintain that a small amount of alcohol may be incorporated into the body. Yet in the amount of alcohol that a very moderate drinker takes daily, this can be but an exceedingly small per cent. Undoubtedly almost the entire amount of alcohol taken into the system remains a foreign element until it is thrown off by the excretory organs. Alcohol thus enta ls upon the excretory organs an undue amount of labor which they are not calculated to perform.

The effects of alcohol upon the brain are easily foreseen when we reflect that the brain is composed largely of albumen. It is not a matter of speculation, but of actual experiment. The brains of drunkards are upon examination found to be hardened. The delicate structure is destroyed. The mental effect produced by alcohol, leading on to the most dreadful of all diseases of the nerves, are well known.

The exhilarating effects of alcohol are only apparent. For a short time it produces, as we have seen, an increased activity of the circulatory organs, but a reaction follows. Under its continued use the tone of the system is lowered. Persons addicted to the use of alcoholic liquors are in more danger from epidemics than temperance people. The system that is clogged by alcohol, so that the heart is overworked, in which the tissues of the air-cells of the lungs are hardened so that the blood is not imperfectly purified in the lungs, is in no condition to repel the attacks of disease. This has been clearly shown in cases of epidemics. In one town in France cholera proved fatal to every drunkard there.

PRESIDENT LINCOLN was one day dining with a party of friends when one of them offered Mr. Lincoln some wine, and rather rudely tried to force it upon him. Mr. Lincoln bravely replied: "I have lived fifty years without the use of intoxicating liquors, and I do not think it worth while to change habits now."—*N. Y. Herald.*

MANY W. C. T. Unions are being organized in Washington Territory.

MEMORIAL TABLETS.

Monuments to be Placed in Historic Spots in Concord, Mass.

The following has been decided upon in regard to memorial tablets at Concord, Mass.: On the Simon Willard farm, which is at present owned by C. H. Hurd, a handsome boulder will be set into the stone wall, and on a panel sunk into this boulder will appear the following inscription: "On this farm dwelt Simon Willard, one of the founders of Concord, who did good service for town and colony for more than forty years." Another boulder, set in the wall at the locality known as Meriam's Corner is inscribed as follows: "Meriam's Corner. The British troops retreating from the old North bridge were here attacked in flank by the men of Concord and neighboring towns and driven under a hot fire to Charlestown." An inscription on a panel to be sunk in the Sudbury river face of Egg rock which is nearly perpendicular, will read thus: "On the hill Nashantuck, at the meeting of the rivers and along the banks lived the Indian owners of Musketaquid before the white men came." A stone post is to be located on the site of the old town house, and a small-sized bronze tablet will be set in it. The following inscription will be placed on this tablet: "Near this spot stood the first town house used for town meetings and the county courts, 1721-1794." That spot of special historic interest known as the "Butterick farm," where the Americans formed on that memorable 19th of April, 1775, will be designated by a slab, firmly set in a stone wall, and inscribed as follows: "On this field the minute men and militia formed before marching down to the fight at the bridge." The site of Rev. Peter Bulkley's residence is to be honored with a brown tablet, bearing the following: "Here is the house of Rev. Peter Bulkley, first minister and one of the founders of this town, a bargain was made with the squaw Sachem and Sagamore Tahattawan and other Indians, who then sold their right in the six-mile square called Concord to the English planters, and gave them peaceful possession of the land A. D. 1665." Concord's "Old Hill burying ground," so called, always a spot of sacred interest, will be designated by a slate tablet, which will be set in the wall and inscribed: "On this hill the settlers of Concord built their meeting house, near which they were buried. On the southern slope of the road, and on the summit stood the liberty pole of the Revolution."—*Boston Post.*

TEA IN THE EAST.

How the Hunnias, Mongols and Tartars Prepare the Delicious Beverage.

The Hunnias (Himalayan natives) drink tea which comes from China in small packets, made up of the large leaves, small branches, seeds, etc., forming a mass reduced to the smallest possible size by pressure, and rendered sometimes still more compact by a slight addition of sheep's blood. The Hunnias travel great distances, living only on tea and what the Hindus call *suttoo*—that is, flour made from roasted beans or peas. To prepare the tea, they boil the leaves for some hours—all night in fact, if they are in camp—in a small earthen pot; then they pour out the infusion into a large basin full of hot water, adding some salt and clarified butter (ghee), if they happen to have it. All these naturally make a kind of soup; and the natives can live on it several months, and undergo severe fatigue without taking any other nourishment.

"The method adopted by the Mongols and other Tartar tribes for the preparation of tea in bricks is," says Johnston, in his *Chemistry of Common Life*, "it is believed, that which extracts from the leaves the greatest possible amount of nourishment. They scrape the tea into fine powder, and boil it in the alkaline water of the steppes, adding some fat and salt, after which they pour off the liquid, leaving the deposit. They drink twenty, even forty, glasses of this liquor in the day, mixing in it some honey and butter with a little roast-meat; but with only a little milk instead of the meat, they can subsist many weeks with this drink for sole sustenance."—*Chambers' Journal.*

OREGON AND WASHINGTON.

A Great Boom That Will Be Succeeded by a Steady Onward Movement.

Washington Territory had 11,594 inhabitants in 1860, 23,118 in 1870, and 75,116 in 1880; and is alleged to contain now 125,000, which is probably somewhat over the mark. Its two largest towns are Seattle and Tacoma—the former with 12,000 and the latter with 8,000 inhabitants. The total population of both Oregon and Washington is, therefore, something like 375,000 at the present time. As railway building has ceased in both, and the "boom" caused thereby has subsided, hard times have set in and come to stay for a considerable period. The harbors of Portland, Tacoma and Seattle are no longer crowded with fleets of steamers and sail craft bringing in railroad-construction material, passengers seeking work, and speculators spending money, laying out cities, and selling corner lots at fancy prices. All that is a thing of the past, and business is settling down to hard-pan. The millions brought in and scattered while the railroads were building made things as lively while it lasted as the gold-mining fever did in California. The future growth and development of Oregon and Washington will be comparatively slow, as they were before the railway-building period. Both will continue to move onward at a steady but not fast pace. The beginning of the next century—fifteen years hence—may find Oregon with half a million and Washington a State in the Union, with 300,000 population.—*Portland (Ore.) Cor. Chicago Times.*

—More than five thousand copies of "The Rise of Silas Lapham" were ordered before it was published, and its sale since has been very rapid. This is another proof that the original issue of a book as a serial does not hinder the sale of it afterwards in its complete form.—*Boston Budget.*

YOUNG CHILDREN.

The Care of Infants During the Critical Period.

Cholera infantum is the enemy at this age, and a very fatal one. Prevention is the safest treatment. A child is helpless except in the charge of an honest, painstaking and conscientious nurse, whether mother or guardian. If in the city or large town and cow's milk is the order, then give the baby preferably mixed or milkman's milk, because there is safety in numbers. While one cow's milk is considered pre-eminently the best by most parents, the mixed milk is practically more conducive to the child's welfare, in that one cow may be consumptive, cancerous, or ill in many ways; it may have abscess of the liver or other organ, may have tumor, or an irritable temper (a cow being very human). And though many in a drove may be below par in health and spirits, some of them are undoubtedly well and give rich and wholesome milk, sufficient to leaven the whole, and thus nourish and satisfy the baby. Boiling purifies the milk, and makes it a safer diet for children, or raw milk may be alternated with boiled, depending upon the child's condition. There is a long list of artificial food, the first one experimented with being generally the favored one in the family. There seems too little difference between them to choose. Condensed milk certainly makes the majority of babies who try it thrive well. It has this in its favor, it is the same in its properties yesterday, to day and tomorrow, and the most stupid or lazy nurse could not err much in administering it. Sameness is the one qualification which a baby insists upon in its food and care and attendant. Change in any of these, when once they are acceptable to the wee mankin, jars severely upon its adaptability and nervous system, and soon the repeated changes usher in disease, which may become fatal. For the first few months the breast is sufficient, and the most desirable if the mother is healthy and well cared for, and she in turn is careful of her diet and personal cleanliness, and avoids all excitement of the emotions, whether of temper, sorrow or joy. If not the mother, then a wet-nurse should be obtained, who must be a first class in regard to health and habits. A new baby with no breast milk and one in the second year are a miserable community regarding their chances for life. These are the *enfants terribles* termed "bottle babies." The new baby has really the better chance provided it can be made to live comfortably five or six months, by even a wooden-headed nurse, because in that time the latter may have blundered into a way of awakening some affinity between baby and bottle, and so establishing an easy time through teething. Whereas the second year toothless baby may have to eat too much grown-up food, or learn to use the bottle in its declining strength, whether by illness or starvation or neglect or what not, and will become a sudden prey to its surroundings, even in the midst of apparent plenty. Many a time when a baby seems to want milk, it is thirsty and wants water. It should be offered water several times a day, hot or cold (no ice). A baby is rarely ill who has an honest nurse. A few months' old baby as well as that in the second year should have mellow fruit occasionally, and at long intervals some grown-up food, until it is "out of arms" and independent of breast and bottle. The bottle must be carefully cleaned after each meal, with brush and cloth, and to avoid the risk of infecting the milk with the germs from the accumulated dirt of the brush and cloth, it is wisdom to renew the latter daily. The baby must have a carriage and be kept out of doors in all suitable weather, rather than in the house, in the parks, boat-riding, etc. The baby's nurse should take care of it in the house, under the mother's or guardian's eye, and the mother or guardian should take airing with the baby, for fear of surreptitious work out of sight. If the baby is worth saving and bringing up, it is worth the closest watching day and night. As soon as it has the first sign of bowel trouble make every movement about the child in the most gentle manner possible. The utmost quiet is now paramount.—*Odelia Blinn, M. D., in Western Rural.*

CAPTURING SUPPLIES.

How a Colored Teamster Was Paralyzed by a Flying Battery.

A member of an Ohio battery tells how the organization managed to supply itself with fresh meat once upon a time. We knew it would be night before the slow-paced baggage wagons reached Bowling Green, and perhaps morning before we could find them. The thought made the soldiers ravenous. Clearly, something must be done to procure rations for supper. Far off down the road in front we could see a negro driving an ox team, making his way home, probably scared into an ague fit by the sudden appearance of Yankees. It was the first time, the reader must remember, that the Federal troops had penetrated the South, and the ignorant people regarded them with comical terror. The negro was making what haste he could to avoid being overtaken. At this moment a wheel ran off from the leading gun carriage, and the first detachment halted, drawing to one side to enable the battery to pass. In a minute or two it was replaced, but by this time the battery had thundered by the ox team, leaving the negro half paralyzed with fear, sitting in his wagon by the roadside. A hurried consultation in the detachment resulted in the sergeant giving it one minute to convert the oxen into beef. We approached the team on a run, halted, and while the negro still sat on the wagon with staring eyes, shivering with fright, twenty men fell to the work of slaughter. They worked like wild men, for fear of losing their rations. In a minute or two it was all over, eight quarters of beef adorned the caisson chests, the detachment clattered on the run to overtake the battery, and the negro still sat on his wagon, gazing alternately at the hides, heads and debris encumbering the yoke and wagon tongue, and the flying artillery disappearing down the road.—*Cleveland Leader.*

EXPENSIVE UNDERWEAR.

Suits That Cost One Hundred Dollars—Extravagant Hosiery.

A narrow-chested young man whose long neck, high-arched eyebrows, and receding chin were harmonious aids to a supercilious expression, ambled into a gents' furnishing store on Wabash Avenue, twirling a silver-tipped cane in his right hand.

"I am in a bit of an 'urry," said the young man, with a marked cockney accent, at the same time directing a stony gaze at the merchant, who lost no time waiting on his customer. The latter, who wore a tightly-fitting suit of plaid, a collar reaching almost to his ears, and a bell-crowned hat, emerged from the store a few minutes later holding in his left hand a package of amber-colored paper about twice the size of an ordinary walnut.

"It's all English now," said the storekeeper after the young man reached the outside. "Even for a gentleman to carry a small parcel on the street is considered the proper thing, because it's a 'bit English, you know.' Not a great while ago the fashionable young gentleman of America would sooner go without his dinner than to be seen carrying a bundle on the street. Now the same young gentleman affects the custom of carrying small bundles, and is pleased when his friends see him with one on the streets. It has all grown out of a custom that is supposed to obtain in England, and so long as Anglomania lasts it will be popular here. But America is not the only country favoring the English style of dress. Why, Paris, the centre of all fashion, copies closely after the London styles. Formerly you couldn't sell a flat scarf in Paris, or a heavy walking glove, or heavy English shoes. Now all these are the fashion there, and the five biggest shops for gentlemen's supplies in Paris buy all their goods in London. London is the great center in trade of this kind, besides being the formulator of all fashions in gentlemen's wear. Centuries of experience have given its weavers especial skill; then, too an extra kind of wool is to be had in that country. The quality of silk used in the manufacture is of the very best, and all have combined to make English goods easily saleable. The chief reason for this is that they wear well. The material is always good. Take, for example, the hosiery manufactured by a well-known London firm. For summer wear silk is the only material that a wealthy man would affect, and in the matter of taste hosiery ranges from $2 to $6 a pair. A kind of silk-spun over-cotton sells readily for a dollar a pair, sometimes less than that; but bright thread, hard-finished goods sell for $6 a pair. In the matter of gentlemen's underwear, a suit of sixteen-thread pure silk of what is known in the trade as "Brighton Novia" is worth $100. That is the most expensive suit of underwear known. Color has nothing to do with the price, and the same quality of goods can be had in cardinal red, blue and tan colors. This quality of goods is generally sold by weight or the number of threads. There are eighty strands to one thread, and in the $100 suits there are sixteen threads to a shirt. Gauze suits of silk range from $18 to $30; pure thread silk, of which salmon color is the most popular, range from $36 to $50. Bright thread, having a hard finish, ranges from $36 to $100 a suit, and suits of spun silk, which is almost the raw material, ranges from $10 to $30.

"Light wools are used almost exclusively in this climate during the cold season. The demand just now is for solid colors, plain not striped, and for material that will wear well and not shrink. Hosiery of this kind sells from $2 to $6.50 a pair. Camel's hair hose having silk toes and heels are worth from $3 to $5 a pair. Balbriggan hose manufactured in Belfast, Ireland, sells rapidly for $1.25 a pair. These are often used instead of the ribbed silk article manufactured in London, which sells from $5 to $6 a pair.—*Chicago News.*

A NOTED BETTER.

Plunger Walton's Bets—His Dealings With Book-Makers.

Plunger Walton has not been absent a day from the Monmouth course during the prolonged season. Nobody knows definitely whether he is, on the whole, making or losing money. He bets heavily, though not in the amounts which enriched him and terrified the book-makers in England. Stories are rife of his great enrichment having dissolved away in steady losses since his return to America, but I doubt their accuracy, and deem it likely that he is poorer, but by no means cleaned out. He is ruddy of face and rotund of body, with abounding spirits, such as a man under the process of financial ruination could scarcely maintain. He lives with his family at the West End, where his rooms are of the best, his road horses well kept and his expenses altogether lavish.

It is comical to see the constant onslaught on him by his acquaintances for tips on the races. He is constantly being pulled aside and whispered to, and he responds to these demands with a freedom that robs the replies of valuation, because the recipients of his points get frightened with the idea that he may be fooling them in order to make opportunities for contrary betting by himself. The book-makers are shy of him, and he could not operate as heavily as he did in England if he wished to. Besides they are masters of the same tactics which he employed so successfully over there, and he can not outdo them in dealing with the trainers and jockeys.—*Brooklyn Eagle.*

—A prize fight was arranged between two young women in Australia. The pugilists came up defiant and jaunty for the first round, which ended in a mutual knockdown, each receiving a blow squarely in the nose. At the expiration of the allowable interval the referee called "Time!" but the antagonists had lost all vim, and both were weeping over the possible disfigurement of their faces—a calamity compared with which the loss of the fight was nothing.—*Chicago Inter Ocean.*

THE BOARDING-HOUSE DOG.

His Agonizing Attributes and How One of the Specie Was Removed from a Party of Suffering Castaways.

In a few brief hours the summer will of been passed. Or, I should say, it will of had passed. Alas, the cares of this here busy world have so corroded my impulsive pen that I fear sometimes Harvard College would of been ashamed of her forgetful child if he had of returned to the halls of his alamo mater and of laid such ungrammatical offerings upon her altars. However, I did not sit down to boast of my learning. I have got it; let the world judge what I done with it, although it has not yet saw what I can do with the rest of it. Away, brief scandal.

I have set my heart upon a crime to which, ere the golden rod heralds the coming of the hosts of autumn, I shall set my read write hand. I am a summer boarder, and my deeds shall, of right, be summary as those of the borderers of an older thyme, where deeds of fright are even yet contagious to the summer boarder.

Do you know Mister Brown's Dog? He is one of our boarders. The dog, not Mister Brown. Of course, Mister Brown boards with us, too, but he does not count, save as an adjunct to Mister Brown's Dog. In your own unhappy life it has sometimes been your sad lot to be stranded upon the desolate shores of the summer boarding-house, where one of the guests was a man and his Dog? Then you know how much greater is the Dog than the man or woman who belongs to Him. And you know also, the smaller the dog, the Greater the Nuisance.

Well—ah me, if I could but keep down these fierce revengeful thoughts that burn and blister in my stormy heart—Mister Brown and his Dog were like all other boarding-house dogs and their men. They were Siamese twins. We never heard of one nor did we ever mention one without the other. The Dog had no name. He was always called Mr. Brown's Dog. And Mister Brown was merely known on account of his relation to the Dog. All the boarders became acquainted with each other through the medium of Mr. Brown's Dog. We opened breakfast with fruit and Mister Brown's Dog. "Did you hear Mister Brown's dog last night, Miss Sillibub?" "Not very much; our rooms are on the other side of the house you know." And as the cats and visiting dogs chased Mister Brown's Dog around and around the house all night long, I inferred that the Sillibubs must have taken rooms on the weather vane, and there was a chronic whirlwind up on the roof. When I speak of the cats chasing Mr. Brown's Dog, I make a calm, simple, unvarnished statement of fact. Mister Brown's Dog was about the size and general physique of a yearling calf, but he was passionately timid. The unmuzzled dogs of the street made life a burden to him, and often, when he was running away from a kitten or a hen, or some prowling raider of that kind, we could hear him wishing that he could trade off his useless tail for a pair of wings. And so at night, when Mr. Brown was not on hand to protect his property, Mister Brown's Dog, I think the very crickets used to chase him under the house where he would moan and mutter and shiver.

Somehow, we never could start any conversation at the boarding-house, that did not eventually drift into Mister Brown's Dog. At our meals the Dog intruded himself, wailing outside the window until his own provender was brought out to him. And when the boarders arose Phoenix-like (from their hashes), and sought the piazza, Mister Brown's Dog was brought around and we all talked to Him and about Him, to the entire exclusion of Mister brown and ourselves. But that seemed perfectly right.

Sometimes—but why recount all things that happened? You know what the boarding-house dog is. He not only has his day, but he has our days. And he even divides the nights, which belong of right to the cats. I think I could learn to love a cat. Along toward the end of the siege when I had had nothing to eat for six weeks.

Toward the close of the summer, Mister Brown's Dog became troubled in his mind. He had sucked an egg, or fought a kitten, or barked at a cow, or something. Some deed of reckless daring or measureless wickedness lay heavily upon his mind, for he began to howl, low and mournfully, during the day. Or, maybe he was only pining for the gayety of the great city. Anyhow, he howled during the day. No boarder so daring that he can complain about it. We affect to enjoy it, and we express our hypocritical sorrow for "Poor Mr. Brown's Dog." The "poor" referring of course wholly to the Dog. But I can stand it no longer and he must die.

You see, now, with such a crime burning in my guilty soul, why life is dark and joyless to me. To kill a common dog is nothing, but a boarding-house Dog, whose board is paid for, who is the greatest central thought of all the boarders, whose life is interwoven with the lives of the human beings who circle around him in their various orbits, to take the life of such a Dog is to strike at the heart of a perfect though complex human system. Therefore, when I kill Mister Brown's Dog, Mister Brown lies stark and bleeding at my feet.

* * * * *

I have sat up all night under the pitying stars. Sleep has not kissed my eyes, but the problem is solved and my heart is lighter, happier. When I came down to breakfast the other castaways saw the change in my manner and they stopped talking about Mister Brown's Dog long enough to remark that my laugh had its old cheery ring again. Yes, the trouble was over, the cloud and the burden was gone. I can not kill Mister Brown's Dog. I have decided to kill Mister Brown. Then the administrator will take the dog. Let us be gay. Ta lira la! lira la! la lira, lira, la!

* * * * *

The day has crept far into the afternoon and the deed is not done. Mister Brown seems to suspect me. Twice I tried to coax him to come out into the woods with me, but he would not leave his Dog. One I got him into my room and offered him a piece of pie, but he said he wasn't hungry. I finally determined to wait until to-night, when I could creep into his bedroom and slay him as he slept; but, alas, he snores so like my father that I can not do it. Infirm of my purpose——!

* * * * *

It is done! And yet my hands are clean! While Mister Brown was taking his afternoon nap I sold his dog for three dollars to a broom peddler, who promised that he would not sell him this side of the county line. The Dog is missed. Mister Brown has gone down the road in the other direction, and he has already whistled all the dogs in the township except his own around him. I am to follow straight after the peddler. Mister Brown grasped my hand and said: "Bless you!" when I volunteered. All is well. When I come back to-night I am going to set up the ale and toast (Mister Brown is a Proh bitionist) with that three dollars I got for his Dog. This willonly be doing the square thing by both Mister Brown and the Dog.

In conclusion. I have returned from my fruitless pursuit, but I have not the three dollars. I gave it to the peddler to take the Dog fifteen miles further than his contract called for. It is well.—*R. J. Burdette, in Brooklyn Eagle.*

TOWER CLOCKS.

Interesting Information on a Subject That Is Little Discussed.

"I judge from what you say that in England tower clock manufacture is an older industry than here?"

"O yes; much older. You can judge of that when I tell you that the Westminster clock was built in 1288. A few years later a clock was put up in Canterbury Cathedral, and in 1317 the Exeter Cathedral clock was made. The Westminster clock is second largest in the world. In point of size the great tower clocks of the world run as follows: Mechlin (Belgium), forty feet diameter of face; Westminster, twenty-two feet and six inches; St. Paul's Cathedral, seventeen feet; Shandon Church (Cork), sixteen feet; Pancras Station, twelve feet and nine inches; Scarborough, Old Church, twelve feet; St. James (Piccadilly), ten feet, and King's Cross Station, Bow Church, Manchester Infirmary, and Royal Exchange, each nine feet."

"Have we nothing to compare with any of these in this country?"

"I am happy to say that we have put up two clocks in this city which rank with the Scarborough Old Church clock. They are twelve feet in diameter. One of these is the Produce Exchange clock. By the way, this clock, through electrical connection, rings bells throughout the building to notify members of the sessions of the Exchange."

"Is that the largest tower clock you are prepared to make?"

"No. We have machinery ready for clocks with dials fifteen feet in diameter. But we can manufacture them of any size. Tower clocks are divided into time clocks and striking clocks. The former simply indicates the hour, the latter in addition strike bells, and are either hour or quarter strikers. Our clocks run from forty-inch diameter dial plates up. The small clocks are ordered for factories and stables. We have one, for instance, in William H. Vanderbilt's stables."

"Does the size of the bells depend on the size of the clocks?"

"It does. Our clocks of five feet diameter are calculated to bring the tone out of bells weighing 1,500 pounds, our ten-foot clocks will handle bells of 6,000 pounds weight and our fifteen-foot clocks use bells of 10,000 pounds weight."

"Is there any rule for determining the diameter of the dials?"

"The diameter of the dial should not be less than a tenth of the height of its centre from the ground. The centre of the Mechlin clock is only 300 feet from the ground; that of the Westminister clock 180 feet. Speaking again of the Westminster clock reminds me that its dials cover an area of 400 feet and cost £5,334. The minute spaces are a foot square and the figures two feet long."

"Do tower clocks often need regulating and oiling?"

"When they are only recently put up the swing of the pendulum has to be lengthened or shortened by the adjustment of a movable weight. A drop of oil should be put in the oil hole once or twice a month. When the clock has settled down to steady work a drop of oil every two or three months will do."

"How do the prices of tower clocks range?"

"All the way from $300 to $7,000. The work for the largest as they stand here, without dials and fixings, are worth $1,700. The difference between that sum and $7,000 is made up by the dials and the work required to put the clock in."—*N. Y. Sun.*

Harmful Insects.

Few persons are aware of the immense field which the study of insects opens to the student, or what a host the cultivator has to encounter among the large portion which do him harm, instead of the other portion which are a positive benefit. There are over 200,000 known species, and the whole number is estimated at 500,000 or 600,000. There are 900 species of the butterfly in North America, and 2,500 North American flies. There are, altogether, at least 20,000 species of *Hymen-optera*, including wasps and bees; and 90,000 *Coleoptera*, or shell-wing beetles. Prof. Lintner enumerates 176 different insects which attack the apple, although only a small number are formidable. A minute insect has destroyed about a million acres of vineyard in France; and we are familiar with the many million dollars' worth of property ruined by the Rocky Mountain locust.—*Country Gentleman.*

—Colonel Short, editor of the Crosby County *Clarion*, came to New Orleans not long since, and upon being shown his room at a hotel and reading the printed notices hung up in his room, said: "This is a queer hotel. If a guest can pay his bill every week, what use has he got for a fire-escape? And if there is a fire-escape, why should he pay his board at the end of the week? There is some mystery about this hotel that I can't understand."—*N. O Times.*

THE RED LIGHT.

How an Inventive Brakeman Obtained a Danger Signal.

"Talking about presence of mind," said the brakeman, "let me tell you of a little incident that I know something about, 'cause I was there. We were out one bad night, when we got stuck in a snowdrift. I was head brakeman, and had nothing to do with flagging our rear. That was the business of the other brakeman, but, as he had been drinking a good deal, I felt a little alarmed for fear he would go to sleep. So pretty soon I skipped back to see if he was attending to business, and I found him lying flat on the track, asleep. He had fallen on his lantern—the red one—and broken it all to pieces. Just then I heard the passenger coming, and she was coming fast, too. How to stop that train I didn't know. I had my white lantern, but a white light isn't just the thing for a danger signal in a snow-storm. The only red lantern within reach was broken into a thousand pieces at my feet. I suppose I might have stopped the train with my own lantern, but it would have been risky, as the drunken cuss hadn't gone back more than half as far as he should, and a white light doesn't show far in a storm. But I was mad, and as the darned tipsy fool got up I suddenly concluded I would make sure of my work."

"What did you do?"

"I hit him in the nose and held my lantern to catch the blood. In thirty seconds I had the daisiest red lantern ever engineer set eyes on."—*Chicago Herald.*

GETTING EVEN.

A Story Which Proves That No Man Can Get Ahead of an Undertaker.

"Some folks regard the negro as childish and simple-minded," said the South Carolina undertaker, as he borrowed another match to relight his cigar, "but it doesn't always do to look upon 'em that way. It was only last week one of 'em beat me out of ten dollars as slick as grease."

"How?"

"Well, I was sitting in my office, growling about hard times and the dislike of people to fall into my sympathetic care, when in walked a negro. He was the picture of health and a jolly fellow.

"'How's times?' says he.

"'Poor,' says I.

"'How much for a coffin for me?' says he.

"'When?'

"'To-day.'

"'I'll give you that coffin over there and see you put under ground this afternoon for fifteen dollars, and that's ten dollars off the regular price.'

"'Dun,' says he, and he put down his 'X.'

"'Well?'

"'Well, I'll be kicked to death by rabbits if he didn't hang himself within two hours, and before night I had to bury him!'

"'No!'

"'Sure's you're born. He had planned to suicide before he came in. I got even, though.'

"'How?'

"'Resurrected the stiff and sold it for four dollars, and put the coffin back in stock.'"—*Detroit Free Press.*

A Cincinnati Joke.

A Yale graduate spent part of the summer at Clarksboro, down in Jersey, and a mischief-loving friend whom he had intrusted to send part of his luggage addressed it to "Mr. So and So, B. A., Clarksboro."

"In the railroad business, I suppose?" remarked the West Jersey station agent when the Yale man came to get his trunk.

"Railroad business? Why, no! What made you think that?"

"Well, if B. A. doesn't stand for Baggage Agent, I'm a crow," was the response.

It took a week for the Yale man to enjoy the joke, and now he tells it on himself with the best grace possible.—*Cincinnati Enquirer.*

One Way to Save Money.

Of course, on such a bright morning she couldn't resist calling around to see how many of her friends had returned from vacation.

"Why Cicely, dear," she exclaimed, "so you too have returned?"

"Ye-es, I—I—that is I haven't been away."

"But you have a beautiful tan on your complexion."

"Oh, yes, that cost me twenty-five cents, while a vacation would have cost one hundred and twenty-five dollars. I'll have a new cloak this fall, and you'll have to fix up your old one."

It was cold enough to put the cloak on immediately.—*Hartford Post.*

SEER-SUCKERS.

I.

DeJune and DeMay start for a holiday attired in their seer-suckers.

II.

They return in a thunder-storm after experiencing a shrinkage in transitu.—*Sam.*

SHE KNEW HIM.

The Sad Predicament of a Drummer Who Flirted with a "Green Maiden."

It always touches a tender spot in the hearts of travelers on railways to see a giddy young girl fall into the clutches of a designing drummer or something, and they watch proceedings with a deep interest. The other day on an outgoing Chicago & Alton train, a chipper young woman in a short dress tripped into the luxurious chair car and sat down near the center on the shady side. She was heavily veiled, and seemed to be about sixteen years old. A little later, a pert-looking drummer came in by the front door, and walked through the coach looking with interest at all the female passengers, and then, although there were plenty of vacant chairs, he walked up to the one beside the chipper young woman and saying:

"Permit me ——" sat down. He rapidly endeavored to draw her into conversation, and, although she did not say much, she giggled like a giddy girl on

"IS THIS YOUNG WOMAN YOUR SISTER?"

her first trip alone and seemed much interested with the drummer.

"Fine day," said the masher.

The girl giggled and agreed that it was.

"Going far?" he asked.

"Not very," she replied.

"Ever rode on the cars alone before?"

"No, sir," and she giggled again.

"Ought to have a protector, eh?"

To this she said she did not know, and vented another charmingly innocent giggle.

"I guess I'll protect you," and his arm stole around the back of her chair and rested on her shoulder.

She giggled again and leaned over toward him, and the passengers began to pity her and feel like thumping the drummer.

"Say, I like you!" he said, drawing her nearer.

"You musn't," she replied simpering.

"Oh, yes, I must. You are just as sweet as you can be. I'd like to kiss you now."

"Oh my!" she exclaimed, but he bent down his head and kissed her through her veil, and she bent her head over and let it rest on his shoulder, and he drew her closer to his side. An old man who had been watching could contain his righteous indignation no longer, and jumping up, he went over to the drummer, and taking him by the shoulder yanked him around and cried:

"Is this young woman your sister?"

"No, sir."

"Daughter of yours?"

"No, sir."

"Is she your wife?"

"Well, I don't know as it is any of your business, sir, but I never saw her until fifteen minutes since."

"Oh yes he did," said the giddy girl.

"Well, well," said the masher, "of course

"GENTLEMEN, HE IS MY HUSBAND."

I did, but it is none of his business, you know. Don't talk to him!" The old man walked away and the hugging was resumed.

"Pretty good joke, ain't it?" said the drummer.

"Splendid!" giggled the girl.

"He thinks we're married! Well, I wish we were," he sighed, drawing her closer.

"Do you now?"

"You bet!"

"What would you give to have me for a wife?" she archly inquired.

"Five dollars!"

"Would you though?"

"You bet I would!"

"All right!" said she, and throwing back her veil, she added: "Fork over now!" and as he saw it really was his wife, he paid the money and tried to look happy, but the passengers roared with happy relief as she took him by the ear and led him out of the coach, saying:

"Gentlemen, he *is* my husband, but he did not think so five minutes ago."—*Through Mail.*

A LOVER'S COMPLIMENT.

The girl with the freckled face is now fashionable.—*Fashion Paper.*

He fondly gazed at her freckled face,
Then an arm he placed about
Her waist, and gave her a fond embrace,
And called her his pretty trout.

Into her face a red flush came
And her eyes with tears grew dim
As she said: "Why call me such a name?"
And she turned her back on him.

"Oh, to praise his girl is a lover's right,"
He said, "and a lover's duty,
And I called you a pretty trout to-night
Because your a speckled beauty."
—*Boston Courier.*

His Housekeeping Knowledge.

First Chum—This is a very pleasant room, old man, and we ought to enjoy ourselves.

Second Chum (gloomily)—Yes; but it will soon go to ruin unless we get a woman to take care of it.

"Oh, no it won't; we can manage that ourselves."

"Nonsense! You don't know anything about housework."

"Don't I? Well, now, let me tell you, since I've been going to see that girl with a cross father on Green street, I've learned how to dust at a moment's warning."—*Philadelphia Call.*

Outwitted.

"No, darling," George was saying to her as they walked along the brilliantly lighted street, "I have never loved as I love now. You are the only girl for whom I have ever felt that deep longing that is born of true love. And in saying that I am not guilty of—"

"Chestnuts," yelled a street-vender.

George hurried away; but before he could gain full possession of his senses she had pulled him across the street and said "Vanilla" to the waiter.—*Tid-Bits.*

HOW ANIMALS TALK.

A Farmer's Claim That All Animals Can Be Taught to Understand Language.

"If you talk with the creatures in your back yard, they soon get not only to understand your general meaning, but to reply with modifications of sound that are meant for you in particular. One or two hens in a flock will show particular aptitude in telling you what they think. Some horses have, or can have, an octave of sounds, and express very nice gradations of dislike or pleasure, even up to defined laughter. Other animals laugh, notably birds, with articulate sounds. Some years since I owned a horse with which I undertook to drive to a neighboring town over the hills in winter. A spot of hidden ice suddenly tripped her, and for a time it was impossible for her to get up. But, by efforts that entirely exhausted me, I finally got her on foot again. She never forgot it. My approach to the stable was invariably welcomed by cordial neighs, and that not sufficing, she would put her head affectionately on my shoulder or under my arm. On another occasion a pet Morgan called me while I was engaged fifty rods from the barn, with loud and persistent calls, that I instantly understood meant trouble. Going hastily to the stables I found the cows had broken down a door and were capable of doing mischief. As soon as I approached the horse gave a satisfied whinny, followed by a long sigh of relief, and went to eating quietly.

"But for real vocalization the fowls surpass both animals and birds. I have had one rooster that had a remarkable power of laughing. No one could possibly hear him without doing as he would when Gough laughs—laugh with him. Now, a dog has a diffused laugh all over, but especially concentrates a chuckle in his tail. The dog's tail is the most cultured tail among animals. It not only laughs, but it talks. The tail of a cow has no more sense than an ox-gad, and a horse's tail is not much wiser. They even lash flies in a loose way that shows they don't know, except in a general way, where the fly is. It was necessary that men should lose such a brainless appendage. As the brain increases the tail decreases, and laughing and talking go over to the brain.

"In studying animal language we must study not only their power of adaptability to us, but our power of adaptation to them. That is, having ourselves evolved our language from the sign and emotional stage, there still is in us a capacity for going back to those creatures that have not yet come up to an intelligent language; we can put forth an effort to meet them half way. Prof. Bartholomew, with his trained horses, talks with them in equine language. It needs to drop words and throw expressions into terms. In that way and for that reason singing brings us nearer to the most of our friends than articulation. Yet if we constantly talk to animals as if they understood us, we shall find ourselves involuntarily modifying our sounds, and shall be surprised to find how much they evidently comprehend our meaning.

"The relations which we assume to animals rapidly modifies their articulation. It is not the parrot only that learns to talk from human intercourse, but all animals and birds as well. You have only to test this in your own yard or on your farm. I have a horse that, when purchased, knew human beings from some unpleasant side, and was accustomed to put on terrible pretences of devouring stall boys. They had probably deserved to be eaten. She never vocalized except a snort of anger, and declined any familiarity. She is now capable of expressing herself in a way that would satisfy Dean Swift. There is a consciousness in every motion that she is conversing with me, and she has quite a vocal range of affection and inquiry."—*Boston Budget.*

A LECTURE TO MEN.

Some Reasons Why Wives Should Be Posted Upon Their Husbands' Affairs.

What is my opinion of wives knowing their husbands' business? I think every wife should know exactly all the business of her husband. It may not be necessary to tell her the worries and anxieties of it, but all that portion in which her suggestions and her tact would be valuable, should be known to her, and she should also have such knowledge as would be of vital importance in settling the estate, in case of the death of its head. Too many men think, because their wives are only women, they don't have any idea of money except to spend it, but I am here to say that the wives, on an average, have just as much business sense as their husbands, and in many cases very much more, as the records will show. If a woman is extravagant and careless, a knowledge of what her husband's business is will often act as a restraint upon her, and unless she is a natural-born fool, will cause her to make an effort to cut her garments according to her cloth. Occasionally a wife does not want to know anything of her husband's affairs because she thinks she has enough care at home, but that kind of a wife is scarce, and the man who husbands her is an unfortunate, whose lot would have been happier if he had remained a bachelor. I believe in the unity of husband and wife, and the unity of material matters is almost as important as that of the spirit, indeed, true unity of spirit means unity in all things. A good wife is a man's best friend, and her sympathy is valuable, even though she has not the wisdom of Solomon. Mr. Brown always told me his business, and Mr. Brown left a widow who is not dependent on the world, nor does she have to ask a man to conduct her business for her now that her natural protector is no more.—*Merchant Traveler.*

—A story is told by the *Presbyterian* of a New York woman who was asked to add her name to a subscription list for a charitable purpose. "I can not," was the reply; "I did all I could afford to do for charity during the winter. I went to the charity ball, the kirmess, and attended a number of private theatrical entertainments given for benevolence."

—Portland, Ore., has a new high school building which cost $125,000.

MISCELLANEOUS.

—Marriage may be defined as a temporary social alliance, entered into for the purpose of acquiring a cheap notoriety through the medium of divorce.—*Philadelphia Times.*

—The indications are that the great Lick Observatory in California will be completed in 1887, a French firm having successfully solved the problem of casting the disc, which is to be three feet in diameter.

—A late critic gives it as his opinion that the word "rye" in Burns' song, "Coming Thro' the Rye," means river, and not a field; that the author intended the word to mean crossing on the stepping stones in the river Rye.—*Chicago Herald.*

—The wits of the people in England go wool-gathering just as they do here, it seems. Last year there were 26,000 letters posted in England without any address upon them, and in 1,600 of them coins and money were enclosed.

—A book has been published which advocates the eating of non-carnivorous insects. As Abraham Lincoln once remarked: "For those who like this sort of thing it is quite probable that this sort of thing is just about the sort of thing they would like."

—The late Dr. Holland evidently thought there was a better way of spending one's time than in card playing. He described it as "the resort of the starved in soul and intellect, which has never in any way linked to itself tender, elevating, or beautiful associations."—*Congregationalist.*

—There is nothing new in the idea of pneumatic tubes. A pneumatic conveyor for letters, etc., was suggested by Dr. Papin, in 1695; patented by Madhurst in England, 1810, on the compressed air principle, and by Valentine, in 1824, on the exhaust principle.—*N. Y. Sun.*

—The First Kiss of Love:

Her cheeks are flushed, her eyes are wet,
She heaves a gentle sigh;
Her hair is mussed, she scarce knows yet
What's best—to laugh or cry.
What makes her blush and tremble so
With mighty joy and fright?
The first time in his life her beau
Had kissed her sweet good-night.

—The largest and finest collection of orchids in this country is owned by Hon. Erastus Corning, of Albany, for which he was offered and refused $675,000 by a syndicate. The late Mrs. Morgan, of New York, left a choice collection valued at $250,000.—*Albany Journal.*

—In Portland, Me., recently an ingenious device was discovered for evading the liquor law. A lead pipe was carried up a chimney to the second story of the house, and investigation showed that it was carried beneath the ground across the yard to another building fully one hundred feet away. Here, beneath the floor in the second story, were two barrels of beer, the pipe running up the wall to connect them with.—*N. Y. Post.*

—It is said that there is not a gambling-house in Boston which is not protected by a thick, bolted door, at which a watchman always stands. Electric communicators warn the occupants as soon as any unknown person comes in sight, so that by the time an entrance has been effected by battering down the door the chips, money, and other paraphernalia are all secreted and the gamblers are chatting and smoking together in the most innocent manner. It is practically impossible for the police to find a game in progress.—*N. Y. Post.*

—"Look here, Ransom," said an old negro to a young fellow. "I doan' min' yer 'sociatin' wid' my daughter, but I druther yer wouldn't come roun' my house no mo'. Time 'fore de las' what ye wuz heah I missed er water bucket, an' de las' time de bridle wus gone, an' now, ez I has a use fur de saddle, I druther yer wouldn't come heah. I doan't say that yer ain't hones', but such curis things happens while yer is in de neighborhood, so jes' ter please er ole man, what ain't enjoyin' very good health, pleas doan' come round dis house no mo'."—*Arkansas Traveler.*

—This is the latest parrot story: "A common gray Polly, having been brought from Guinea by a sailor with a coarse, rough voice and afflicted with a cough, the parrot learned to imitate the exact tones of his master, even to the cough, so closely that the sound of his voice was often mistaken for that of the sailor. It was afterward taken in hand by another instructor and taught a softer tone, but it never forgot the harsh voice of its former master, and often amused bystanders by relapsing into sea slang, interspersed with the asthmatic cough of the sailor."—*Philadelphia Press.*

—The explorers of the Congo Valley are surprised by the crudity of life there. The natives have no domesticated beasts of any sort, nor do they raise or catch any animals to eat, as they know nothing of flesh as food. No semblance of clothing is worn, and diet is practically confined to spontaneous products of the soil. Letters from missionaries say, too, that the negroes there are so low in mentality that any hope of Christianizing them must be based on a long and patient course of intellectual training. They are too densely ignorant to comprehend the simplest statements of doctrine.—*N. Y. Herald.*

Helen Jackson's Last Days.

A friend of Mrs. Helen Jackson, writing in the *Overland Monthly* of her last days, says: "Her illness was a painless one, a gradual prostration of all the vital energies under the influence of a powerful and irresistible disease. Throughout the long and trying ordeal neither her patience nor her courage ever failed. Whenever the conversation turned upon her ailment, with its mysterious symptoms and steady disorganization of the system, baffling the physicians' skill and thwarting the well-meant efforts of her friends, she was always first to turn the subject, saying with a reassuring little smile, token of the brave spirit's triumph over the failing body: 'Now let us talk of something more pleasant.' And she would so completely ignore her weak bodily condition, and enter into conversation with such spirit and zest, that one forgot she was an invalid, and was conscious only of the clear, analytical mind, with its flashes of humor, and of the great, generous heart."

Republican State Ticket.

FOR COMPTROLLER OF TREASURY:
FRANCIS MILLER,
of Montgomery County.

FOR CLERK COURT OF APPEALS:
WILLIAM M. MARINE,
of Harford County.

Republican County Ticket.

FOR STATE SENATOR:
DR. E. H. GLOTFELTY.

FOR HOUSE OF DELEGATES:
GEORGE L. MICHAELS,
SILAS WEIMER,

FOR CLERK OF CIRCUIT COURT:
W. H. TOWER.

FOR COUNTY COMMISSIONERS.
JACOB GNAGEY,
THOMAS K. HARVEY,
WILLIAM W. FRAZEE.

FOR SHERIFF:
JOHN H. RILEY.

REGISTER OF WILLS,
JOHN S. LAUGHLIN.

FOR COUNTY SURVEYOR:
DANIEL CHISHOLM.

Our Candidates.

Dr. E. H. Glotfelty, who heads our ticket, is a practising physician of large experience, and has an excellent reputation in his profession. He has had some experience in public life, having served in the Legislature of Maryland during the session of 1874. He is a man of sound judgement, active, energetic, of strict integrity, and enjoys the confidence of those who know him best. We feel we can safely say any trust committed to his care will not be abused nor neglected.

Silas Weimer, a candidate for the Legislature, has been identified with our public school interests since the organization of Garrett county, and has the reputation of being the best teacher in the county. He is modest, unassuming, honest, and has decided ability. He has been found faithful in the discharge of duty in every station in which he has been placed, and the people can safely trust him.

George L. Michaels, the other candidate on our ticket for the House of Delegates, is a farmer residing in the lower end of the county near Bloomington. He is one of the old citizens of Garrett county, and has been long and favorably known to our people. If elected he will do credit to his county, and his friends will have no regrets at having elected him to such an honorable position.

W. H. Tower, candidate for the Clerkship of the county, needs no commendation at our hands. He has filled the office acceptably for more than twelve years, and the thousands of people who have had business in the office during that time testify to his efficiency, and also to his courtesy and kindness. He will undoubtedly be his own successor.

Messrs. Jacob Gnagey, Thomas K. Harvey and William W. Frazee, candidates for County Commissioners are all farmers and know what our farmers and those residing in the rural districts need. These gentlemen have all managed their own affairs successfully, are heavy tax-payers and are therefore interested personally in having county matters economically managed. They are men whose characters are above reproach, and we believe the interests of the tax-paying community will not suffer in their hands.

No better selection could have been made for Sheriff than John H. Riley. He will, when elected, be beyond the peradventure of a doubt the right man in the right place.

John S. Laughlin, for Register of Wills is a first-class selection. The people can safely cast their votes for him knowing that he will make an excellent officer and will faithfully discharge his duties to the public when elected. He is a man of undoubted good character and can be safely trusted anywhere.

Mr. Daniel Chisholm our candidate for Surveyor is well known. He served for several years as county surveyor of Allegany county. The office of County Surveyor considering the unsettled condition of our land titles is an important one, and our people should be careful in making their choice for this office. Mr. Chisholm is, we doubt not, more familiar with the locations of the old tracts and lots of land in this county than any man in the county. He has been thoroughly trained in both the theory and practice of surveying. It is absolutely certain that we have no better surveyor in our community.

Take our ticket as a whole it is one which commends itself to the good sense of the people, and will, we believe, be triumphantly elected in November next.

The Democratic Ticket.

On Tuesday last the Democratic County Convention for Garrett county assembled at the court house in this town, and nominated a ticket for the support of the Democrats of Garrett county at the coming election, and there is blood on the moon, so to speak. We have been present at all, or nearly all, the Democratic conventions which have met in this county during a period of ten years, and if the statements made by Democrats themselves are to be taken as true, never has there been so much bitterness and dissatisfaction with the work of a convention. Many of the faithful do not hesitate to say the ticket is a weak one. Others cry out fraud, put up job, trickery, &c., &c. We take it for granted that there are some men who wanted place who were left out in the cold. To say that some of them are hurt, mortified, all broken up, so to speak, would be drawing it very mild. The evidences of dissatisfaction which we have seen and heard came from Democratic sources, and if they are true, there is every reason why Republicans should be pleased with the ticket. But whether they are true or false, the Republicans should make preparations at once to beat that ticket, and in making that preparation it is not wise to underrate the strength of our adversary. Democrats may be dissatisfied for the moment, they may cuss a little between there teeth, but they can beat the world eating crow, and you may expect those who make the most fuss now to walk up to the ballot box in November and put their tickets in straight. A word to the wise is sufficient.

There never has been such a chance for the Republicans of the state to get control of the Legislature and Senate, and the Democratic party will soon be around making frantic appeals for harmony and promising positions of assessors, boards of control and review, &c., &c., but Democrats of Garrett, don't forget that it is the same party that rode into power two years ago by promising everything to everybody, and they have just as little regard for their promise now as then.

Peace, Peace, was the cry in the Democratic Convention on Tuesday, but still there was no peace. When the Democratic brethren of Garrett get together, as a rule, they don't, to any great extent, dwell together as brethren in unity.

Elect our Senator and Representatives and there need be no fear that an expensive assessment bill will be passed and saddled upon our taxpayers, as before, just to reward a few Democratic party workers.

We acknowledge the receipt of an invitation to be present at a complimentary banquet to Hon. John A. Logan, at the Eutau House, Baltimore, Monday evening Oct. 8th, 1885.

Our ticket is not a fuss-and-feather ticket, but good, solid men, who can be depended upon to do their duty to the people.

The Ohio Campaign.

COLUMBUS, Sept. 29.—But two weeks now remain until the Ohio election. The campaign has been quietly conducted, the still hunt tactics having been very closely observed by both parties up to about a week ago, when Senator Sherman thrust out more vigorously than heretofore, and commenced forcing the fighting. It is plainly manifest that the plan of campaign adopted by the Democrats, and on which they hoped to continue the fight, namely, that of annoying the Republicans on the temperance question, is from this time on to be seriously interrupted by the sudden springing of the tariff question by Senator Sherman, who will be followed by such speakers as Major McKinley, General Grosvenor, A. L. Morrison, of Chicago, and General Beaver, of Pennsylvania. This move is like pulling out a new deck of cards on the Democratic managers, as they are not prepared for this new turn in the campaign, whereas the Republicans have their tariff literature already out.

The Baltimore *Sunday Times*, the organ of the "regular" Democrats of the State, is very much alarmed about the independent movement in Baltimore.

The great peril to the Democratic party in case they should lose the ensuing municipal election is thus set forth by the *Times*:

"If the Democratic municipal ticket should be defeated the moral effect would be so prejudicial to party prospects that the Republicans would probably carry Cecil, Kent, Talbot, Caroline, Dorchester and Somerset counties on the Eastern Shore; Anne Arundel, Prince George's, Charles, Calvert and St. Mary's counties in Southern Maryland, and Frederick, Washington, Allegany and Garrett counties in Western Maryland. The present State Senate is composed of 14 Democrats and 12 Republicans, of which 9 Democrats and four Republicans hold over. If the Republicans should carry the above named counties they will elect nine of the incoming Senators. This would make the composition of the Senate 13 Republicans and 12 Democrats, not including the senator from the second legislative district, who is to be elected this fall. The last House of Delegates was composed of 63 Democrats and 28 Republicans. Excluding the city delegation, the House stood 45 Democrats to 28 Republicans. If the Republicans should carry the counties above mentioned the House, exclusive of the city delegation, would stand 45 Republicans to 28 Democrats. The Democrats would then have to carry all three of the city districts to tie the Republican vote in the Senate and to have a majority of one vote in the House. If the municipal ticket should be defeated the probability is that at least one, and possibly another, city district would be carried by a Republican or fusion ticket. It will therefore be seen that Baltimore is the Democratic citadel, and to lose that means almost certain defeat."

The Results of Bossism.

Applause, once the solace of the statesman and the spur to fresh exertions and greater triumphs, has now but little meaning. A popular craze prevails for making heroes of everybody and everything from an adventurous road agent to an elephant, regardless of the qualities in which they excel. It is not surprising, therefore, that a successful political boss should share this fickle public favor and divide the honors with Jumbo, the fat woman and the latest walking prodigy. This singular infatuation for sawdust heroes is, in the main, harmless. To lift a base ball player to a plane which he never expected to reach, and from whence he dizzily looks down upon his less fortunate rivals, is to injure none but the individual who has been thus unexpectedly and unnaturally thrust into prominence. But this silly hero-worship at times works grave evils in the community. A boss raised far above his proper level is an ignis fatuus to an important class of citizens.

No thoughtful person can cast his eye over the political arena in Maryland to-day without a feeling of the keenest humiliation. Bright and promising young men no longer struggle in generous rivalry for the rewards which intellect and ambition crave. If found in the legislative halls of the state or in positions of trust and responsibility, with rare exceptions, they have been placed there by concessions to the bosses. They have paid the price at which a nomination is valued, or, by an apprenticeship of abject servility, they have gained the confidence of their masters, and are permitted to remain where they can further the ends of the machine, but can be of little use to their constituents or the state. They have learned to cringe, to fawn upon and to obey the orders of men whom in their better days they would have spurned, but during their tutelage they have unlearned pretty much all that was noble and manly in their lives. The majority of them look back upon a record black with ingratitude, upon the violation of the most sacred promises, upon mean and dirty acts which must still cause their young blood to tingle with shame—and for what? They certainly cannot entertain hopes of preferment beyond the precarious tenure of the boss upon the throttle of public administration. Their record is made up and in the hands of an inexorable tribunal. They have been weighed and judged. They have suffered themselves to be beguiled by the tempter. They have gazed upon the brazen image, and have groveled in the dust at its feet. There is no place of repentance for them in a healthy condition of public affairs.

But worse, perhaps, than the degradation of individuals is the loss to the state of the services of many vigorous and fertile young minds, against whom the avenues of political advancement are closed. Unwilling to sacrifice manliness and independence, the price of success under boss rule, they have distributed themselves through the various industrial channels of the state, and cannot now separate themselves from the obligations which have grown up around them. While there must always be abundant material to draw from, it is still a matter of profound regret that so many young men have been driven from the public service by the vicious rule of the boss in Maryland.

And yet it is the fashion to invest the boss with heroic attributes. Would not the public good be more truly conserved by exacting the lounger who awaits his victim at the street corner and lures him into the hells and deadfalls of the city to drug and rob him? The latter, at the worst, robs his victims one at a time, while the boss destroys them by scores, and involves in their destruction honor, manhood and self-respect.—*Balto. American.*

State of Trade.

NEW YORK, Sept. 26.—*Bradstreets* in its commercial summary says: "The movement of general merchandise throughout the country during the past week has been about equal to the volume of preceding weeks, though distributed somewhat differently. At various trade centers west and southwest, where the activity reported has not been proportionate to that recorded at eastern points of distribution, there has been a large inquiry and a heavier week's business, but at various cities in the east the movement of goods to the interior is smaller. Illustrating this it may be specified that at Boston the sales of dry goods have fallen off somewhat from the late heavy volume, and that the existing demand there is less than had been expected. The situation is, therefore, considered one for critical examination, and the succeeding few weeks will be closely observed to determine whether the result, as has been alleged, is to be a dull trade during the winter, succeeding the autumn spurt only.

The eastern dry goods trade in general is therefore characterized as quiet. Wool continues in fair demand from manufacturers in excess of immediate demands as well as from speculators. This makes prices firm and holders stiff in their views. The market is called strong and active. The new as well as favorable features are that at Chicago there is an improved distribution of general merchandise, and that the request for funds from the interior is heavier. Business is better at San Francisco, and at Cincinnati reports from various leading lines of trade show that business is 25 percent better than it was in the like period of 1884. The margin of profit, however, is not improved. Ocean freights generally are heavy and low, and the movement of exportable product is no better.

Butler's Prophecy.

NEW YORK, Sept. 29.—Gen. Butler in a published interview sneers at the efforts of the hard money men to solve the silver and gold problem, and argues that paper money is the only good currency. The people, he says, will eventually rise up and throw off the goke of coin money.

"Do you expect serious trouble?" asked the reporter.

"I do," replied the General. "I have grandchildren who will live to see the Vanderbilts and Goulds taken to the nearest lamp-post and hung. After there has been bloodshed we will settle down again for a while. These money kings see the danger already. But they do not see the remedies. When I was a candidate for President, Gould said, 'Butler must be crushed.' He could not see that it was better for a man with considerable wealth and a family and property interests to be at the head of the masses and able to control them. He only saw in the background the touch of communism, as he thought. Some day a real communist will lead them. Then we will see the difference.

"Every man is a communist now in the eyes of the community who preaches the equality of men. Christ was the communist of Jerusalem. As the head of the labor element I could have settled this whole railroad question as no other man could. The mistake I made in running for President was like running against a stone wall. In all crisises the people have failed themselves. I was foolish enough to think that the people had grown wiser; that the laborers of the new republic were more intelligent. They are not intelligent. They were afraid of me, because I had a little property. They were just as foolish as Gould. But that is not all. Nine out of ten of them would sell their votes for $2 a piece. I was a fool to think this age was any different from any other."

An Answer Wanted.

Can any one bring us a case of Kidney or Liver Complaint that Electric Bitters will not speedily cure? We say they can not, as thousands of cases already permanently cured and who are daily recommending Electric Bitters, will prove. Bright's Disease, Diabetes, Weak Back or any urinary complaint quickly cured. They purify the blood, regulate the bowels, and act directly on the diseased parts. Every bottle guaranteed. For sale at 50c. a bottle by W. D. Nydegger.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1885, and recorded in Liber W. H. T. No. 10, folio 71, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

MONDAY, OCTOBER 12, 1885.

at 11 o'clock A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O. Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
10 3 2t Attorney for Mortgagee.

WANTED, IN OAKLAND, MD.,

an energetic business woman to solicit and take orders for The Madame Griswold Patent Skirt-Supporting Corsets. These corsets have been extensively advertised and sold by lady canvassers the past ten years, which, with their superiority, has created a large demand for them throughout the United States, and any lady who will give her time and energy to canvassing for them can soon build up a permanent and profitable business. They are not sold by merchants, and we give exclusive territory, thereby giving the agent entire control of these superior corsets in the territory assigned her. We have a large number of agents who are making a grand success selling these goods, and we desire such in every town. Address, MME. GRISWOLD & CO., 923 Broadway, New York. 10 3 4t.

TRESPASS NOTICE.

All persons are hereby warned not to trespass or allow their stock to trespass upon the lands of the undersigned near Swanton, Md. Violations will be prosecuted.

T. WILT.

NOTICE!

To the Qualified Voters of the Respective Election Districts of Garrett County.

Notice is hereby given that the undersigned Officers of Registration of Voters in and for the respective election districts of Garrett county, will sit in their respective election districts in said county, on the Tuesday, Wednesday, Thursday, Friday and Saturday, after the first Monday in September, that is to say on the 8th, 9th, 10th, 11th and 12th days of September, in the year 1885, and also for two successive days commencing with and including the first Monday in October, that is to say on the 5th and 6th days of October, in the year 1885, at the respective places and on the respective days hereinafter named, for the purpose of ascertaining and registering in the proper registries of voters and poll-books persons qualified to vote in their respective election districts, and of revising and completing their respective registries of voters and poll-books of their respective election districts.

The undersigned Officers of Registration will commence their said respective sessions on the respective days, and at the respective places herein named at the hour of 8 o'clock A. M., and continuing the same until the hour of 7 o'clock P. M. of each of said days, as follows, to wit:

Election District No. 1—Swanton.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Swanton.

Election District No. 2.—Selbysport.

Tuesday, Wednesday, Thursday and Saturday, the 8th, 9th, 10th and 12th days of September, at William Ryland's store, and Friday, the 11th day of September, at Rush's school house, and Monday and Tuesday, the 5th and 6th days of October, at William Ryland's store.

Election District No. 3—Grantsville

Tuesday and Wednesday, September 8th and 9th, at the residence of the Officer of Registration, and Thursday, Friday and Saturday, September 10th, 11th and 12th at Grantsville, and Monday and Tuesday, October 5th and 6th at Grantsville.

Election District No. 4—Bloomington

Tuesday and Wednesday, the 8th and 9th days of September, at Geo. T. Michael's house and Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Bloomington.

Election District No. 5—Accident.

Tuesday and Wednesday, the 8th and 9th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Accident, and on Thursday, Friday and Saturday, the 10th, 11th and 12th days of September, at Sylvester H. Ryland's house.

Election District No. 6—Sang Run.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at the house of Nathan Browning, in said district.

Election District No. 7—Oakland.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October, at Oakland.

Election District No. 8—Ryans Glade

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, at Fort Pendleton, and Monday and Tuesday, the 5th and 6th days of October, at Mrs. Thomas Grimes, in said district.

Election District No. 9—Frostburg.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September, and Monday and Tuesday, the 5th and 6th days of October at Johnson's.

Election District No. 10.—Deer Park.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at Altamont, and Monday and Tuesday, the 5th and 6th days of October at Deer Park.

Election District No. 11.

Tuesday, Wednesday, Thursday, Friday and Saturday, the 8th, 9th, 10th, 11th and 12th days of September at the house of John H. Gregg, and Monday and Tuesday, the 5th and 6th days of October at the house of Jacob Strickland.

All naturalized citizens applying for Registration will be required to produce their certificates of naturalization to the officers of Registration.

ORDER NISI.

Henry A. Rasche, Assignee, vs. Alpha Hinebaugh, and others.

In the Circuit Court for Garrett County, in Equity.

ORDERED, This Fifteenth day of September, 1885, by the Circuit Court for Garrett county, sitting in Equity, that the sale of the land of Alpha Hinebaugh and wife and John Hinebaugh and wife, mentioned and described in these proceedings made and reported by Henry A. Rasche, assignee of Matthew Cullen, mortgagee, be ratified and confirmed unless cause to the contrary thereof be shown on or before the 19th day of October next, provided a copy of this order be inserted in some newspaper printed in Garrett county, Maryland, once in each of three successive weeks before the 19th day of October next.

The report states the amount of sale to be $2,000.

Order of Publication

Joel Wiland vs. Florissa Biddinger, Simeon Biddinger and James Bowser.

In the Circuit Court for Garrett county. No. 160 Equity.

The object for which the bill of complaint was filed in the above cause, was to have certain deeds therein mentioned set aside as fraudulent, and to procure a decree for a sale of the real estate conveyed by Florissa Biddinger and Simeon Biddinger to James Bowser, and to subject the same to the payment of the plaintiff's claim.

The bill states that in the year 1875 Simeon Biddinger was largely indebted to the plaintiff for work done and materials provided for him, the said Biddinger, and for board and clothes for the children of the said Biddinger, and that the plaintiff continued to furnish board for the children of said Biddinger up to the time of the filing of said bill.

The bill further states that on the 25th day of June, A. D. 1878, he instituted suit in the Circuit Court for Garrett county, to recover from said Biddinger the amount due him, and that on the 9th of September, A. D. 1879, a judgment was rendered by said Court against the said Biddinger in favor of said plaintiff for the sum of $304.45, and $75.75 costs.

The Bill further charges that after the [illegible] of said suit at law, and until the [illegible] of the bill in this cause, the plaintiff continued to furnish board and clothing for the child of the said Biddinger, and that the said Biddinger is indebted to the plaintiff in the further sum of $142.50, making an entire indebtedness on the 15th of September, A. D. 1879, of $611.70.

The Bill further charges that prior to the month of May, A. D. 1878, the said Biddinger purchased from Jacob Hare and wife, a tract of land in Garrett county, called "Mount Airy," containing fifty acres of land; that the said Biddinger paid the entire purchase money for said land, amounting to $750.00 or more. That after said Biddinger had purchased said land and paid for it, he intending to cheat, defraud, hinder and delay the plaintiff in the collection of his said claim, and with a view to cheat and delay his other creditors in the collection of their claims, fraudulently procured and induced said Hare and wife to convey said land to Florissa Biddinger, his infant daughter, by deed dated May 22nd, 1876.

The Bill further states that at the time said deed was made and at the time of filing said bill, the said Florissa was an infant, under the age of twenty-one years, and that she had no money of her own, and that she was wholly incapable of earning any money, that she had not inherited anything, and that she paid no part of the purchase money for said land.

The Bill states that the said Biddinger further intending to cheat the plaintiff and hinder him in the collection of his said claim, did on the 14th day of January, A. D. 1879, procure, induce, and require his said infant daughter to join with him in executing a deed for said land to James Bowser, and that the said James Bowser knew all the circumstances surrounding the whole matter, and that his object was to cheat the plaintiff.

The Bill further charges that the said Biddinger was indebted and had not means apart from said property to pay his debts, and that the said conveyances were fraudulent and void and contrary to Equity and good conscience.

The Bill then prays that said deeds be set aside and that said land be sold for the purpose of paying the plaintiff's claim, and for general relief and for process.

It is thereupon ordered by the Court this Second day of September, A. D. 1885, that the plaintiff cause a copy of the order together with the object and substance of the bill to be inserted in some newspaper published in Oakland once a week for four successive weeks before the fifth day of October, A. D. 1885, giving notice to the said Florissa Biddinger, the non-resident defendant in said Bill, and warning her to appear in person or by Solicitor on or before the 5th day of October, A. D. 1885, to show cause, if any she has, why a decree should not pass as prayed.

At Pritchard's Gallery. Prices to suit the times. Having no partner now to divide with, I have made a reduction on photographs, and guarantee them to be as good as my partner and I together got up. Testing is believing. I also have on hand and for sale a nice lot of frames.

G. H. PRITCHARD.

In Memory of Lydia Kemp.

MR. EDITOR:—Lydia Kemp, relict of the late Reuben Kemp, died on the 22d of Sept., 1885, at the residence of her son Elijah Kemp, Bloomington, in this county, of an illness (old age rather) of about two weeks. She would have reached four score years on the 4th of November next. In her last days, indeed weeks, she endured no bodily pains, or mortal suffering. Her transit was so calm and peaceful that its exact time could hardly be noted. With one remaining motive for life, and that an anxiety for her almost dying son. Indeed the two frail ones seemed to prolong life, one for the other. She was universally beloved for her amiable and sweet disposition. Every neighbor (and none better are to be found elsewhere) was happy in ministering to her but few wants, and tenderly helping her remains to a place of rest. She had been a widow for forty-two years, and an invalid for nearly as many. With a frail constitution, she attained great age by a system of life blameless and almost free from friction. Three sons and two daughters survive her; also one sister and two brothers. She was the second daughter of the late Samuel and Amy Brown, born in Somerset county, Pa., but with her parents moved to Allegany county in 1812, where she has resided ever since. Her late husband, Reuben Kemp, was a very respectable man, and died in 1843, near Grantsville, where his remains repose and hers at the Westernport cemetery. About sixty years ago Mrs. Kemp became converted and a member of the M. E. Church in the days of Wesleyan simplicity, at "old Grantsville." The village and its church have long since disappeared, but not so with her religion; it endured and even strengthened as she grew older and weaker in body. For much of her life she was deprived of church advantages. There are yet those who remember how the ministers more than fifty years ago habitually held services at her neat and quiet home, at the old Brown homestead, for her small family and neighbors as worshipers. But her Bible was a substitute for church, which she read incessantly and trusted implicitly. Its truths and lessons were deeply impressed on her mind and actions, with a memory that seemed wonderful for a body so frail and diminutive. The relatives of this goodly woman will always feel a sacred pleasure in bearing the debt of gratitude they owe her neighbors for their unceasing, appropriate and tender kindness, not only in her last days but years, as age was doing his sure work.

NEIGHBOR.

Sept. 28th, 1885.

Accident Items.

Rain is badly needed.

Grasshoppers have never in our recollection been so numerous and destructive.

Mr. Albert Mosser, who was cut in both knees, is coming on well.

The threatening cold weather hurried up corn cutting.

Rev. Fleckenstein, a former pastor is visiting friends here.

Rev. Jacob Miller, of Stuttgart, Arkansas, preached an acceptable sermon in the English language.

The Missionary meeting was very well attended and was quite successful pecuniarily.

Mr. John E. Gnagey is visiting friends at Grantsville.

Mr. Adam Garinger, who was quite ill, is around again.

We notice Mr. Chas. Davis is doing a good business in cider mills.

There is going to be a big stream of cider started from the cider mills of Garrett county this fall. The apple crop is really immense.

Permit me in this connection to say to my friends of Accident and vicinity, that, in the event of my election to the State Senate, I will provide a competent man to take my place professionally for that length of time.

Miss E. C. Butler has had a successful season with music here. Besides the private pupils she has conducted a singing class for the Sabbath School, meeting twice and three times a week. This work was done altogether gratuitously.

The new singing book introduced by Miss Butler is giving great satisfaction, we notice, all over the United States. It is by Dr. Chas. Robinson and is published by the Century Company of New York. The selections are all good, the music not too difficult and there is a not a single frivilous, foolish piece in the book.

E. H. G.

Mountain Lake Park.

The Directors met on last Thursday but there were only three present, so there was no business of general importance transacted. It is to be hoped that they will all be here on the 5th inst., and that they will plan extensive improvements.

Mrs. Blake's addition to her cottage is about completed.

Miss Harris' cottage is under roof and the painters and plasterers are at work.

Miss Jennie Smith and Miss Sherman left us on Monday to pursue their evangelistic work.

Rev. D. Lee has located here for one year, his health having failed in the mission work in India. We are glad to have this addition to our population, and hope that he may be greatly improved in health during his stay with us.

We are having the finest of weather now, and the scenery is just magnificent. The beauty in the ripening foliage I think has never been surpassed.

We will have preaching here next Sabbath at 3 o'clock.

J. A. E.

Democratic Convention.

The Democratic County Convention, for the nomination of a county ticket assembled in the court house Tuesday afternoon at 2 o'clock, and was called to order by Mr. R. T. Browning, Chairman of the County Committee.

On motion Hon. W. R. Getty was called to the Chair, and Mr. W. L. Rawlings was elected Secretary.

Committees of one from each district represented were appointed on Credentials, Rules, &c., and on Resolutions.

The committee on Credentials, Rules, &c., reported the following delegates entitled to seats in the convention:

District No. 1.—Rudolph Beckman, C. T. West, H. O. Hamill, L. C. Hamill, Edward Taggart.

No. 2.—W. W. Griffith, Jasper Guard, W. W. Schlossnagle, J. M. Miller, R. T. Liston.

No. 3.—Hon. W. R. Getty, J. B. Dorsey, Henry Winterberg, U. M. Stanton, George Smouse.

No. 4.—Wm. A. Brybon, W. L. Rawlings, Daniel Laughlin, C. Facenbaker, Edward Devine.

No. 5.—Daniel Hinebaugh, C. Snyder, Adam Synder, V. Kahl, M. J. Miller.

No. 6.—Christian Soelters, Henry Sines, N. C. Browning, Levi Echard, Wm. R. Porter.

No. 7.—E. Jamison, P. A. Chisholm, Thos. J. Browning, J. L. Burley, R. Reynolds.

No. 8.—J. McC. Mason, J. W. Fowler, C. H. Jamison, Wm. Haun, Geo. H. Serpell,

No. 9.—Not represented.

No. 10.—E. F. Droege, M. T. Brady, A. H. Williams, M. Garrett, Jr., M. T. Sollers.

No. 11.—John C. Chaney, Amos Broadwater, Sr., David Warnick, Wm. B. Broadwater, A. J. Lancaster.

The committee on Resolutions, after a considerable absence, reported two poor little resolutions, one endorsing the administration of President Cleveland, and the other recommending the re-election of "Boss" Gorman. They were adopted by half a dozen mild ayes.

Nominations were then declared in order, when Hon. W. R. Getty and R. T. Browning were placed in nomination for Senator. Mr. Getty declined, and, on motion, the nomination of Mr. Browning was made by acclamation.

For House of Delegates the names of Dr. E. H. Bartlett, Wm. Hinebaugh, Daniel Laughlin, R. J. West and E. M. Friend were placed in nomination. Dr. Bartlett declined.

Mr. Laughlin was nominated on the first ballot, receiviug 8 votes. Messrs. Hinebaugh and West received 5 each, and Capt. Friend 2 votes.

On the second ballot Mr. Hinebaugh was nominated, having received 6 votes to 4 for Mr. West.

Messrs. M. R. Hamill for Clerk of Court, R. S. Jamison for Sheriff and John T. Mitchell for County Surveyor, were nominated by acclamation.

For Register of Wills Messrs. G. W. Merrill and Titus Delawder were nominated. The first ballot resulted in favor of Mr. Delawder by a vote of 6 to 4.

For County Commissioners six names were brought forward as follows: R. J. West, A. J. Fike, J. W. Blocher, Norman Barnard, John Robeson and J. W. Shillingberg. The first ballot resulted as follows: West, 7; Fike, 8; Blocher, 8; Barnard, 2; Robeson, 2; Shillingberg, 3. Messrs. West, Fike and Blocher were declared the nominees.

Deer Park.

The Hotel has closed for the season, but the cottagers are all remaining to enjoy our lovely autumn weather.

Mr. John B. Davis, of Richmond, spent a few days here lately.

Mrs. John Sheridan and children, and Miss Kate Downey, of Piedmont, made a visit to Mrs. W. R. Davis last week.

Mr. S. C. Hoye, the newly appointed postmaster, will take charge of the office to-morrow, October 1st.

Mr. Williams' new cottage is progressing rapidly, and presents a fine appearance.

The B. & O. R. R. Co. will commence the erection of new cottages, near the Hotel this fall, and also an immense swimming pool to be ready for next summer.

The Band of Hope will meet on next Saturday evening. Mr. Joseph Foster, of Swanton, will deliver a lecture on the occasion.

Mr. Jeremiah Tasker, of Ryans Glade, last week lost a horse valued at one hundred and thirty dollars.

Maj. Armstrong's family have arrived and are established in the house formerly occupied by Mr. D. F. Graham.

Dr. McFarlan, of Washington, who, with his wife, has been spending some time at Wing-and-Wing, has been a very valuable assistant in our Union Sunday School since he has been here. He has been for years the Superintendant of a Sabbath School in Washington, and his heart is in the work everywhere. He leaves for home to-morrow and will be greatly missed by all who have met him here.

Registered at Wing-and-Wing:

Parkersburg.—A. D. Casteel.

Kingwood.—J. E. Kildow.

Washington.—E. K. Lundy, wife and two children.

Selbysport.—Jasper Guard, R. F. Arnson.

Baltimore.—J. F. Kreis.

Wheeling.—Clay Dean.

Valley Furnace.—J. W. Bowman.

***

Miller and Marine.

The Maryland Republican State Convention met in Baltimore on Thursday, and was well attended and harmonious. Hon. Francis Miller, of Montgomery county, was nominated for Comptroller by acclamation, as also was the Hon. William M. Marine, of Harford county, nominated for Clerk of the Court of Appeals.

Following is the platform adopted:

Resolved by the *Republican party of Maryland in State convention assembled:* First. That in this hour of our national defeat we renew our allegiance to Republican principles—proud of the past history of our party, convinced of the continued efforts for its success, and confident that it will speedily resume control of the destinies of the nation, which it saved from destruction. Second. That, in common with the entire American people and the civilized world, we sincerely mourn the death of that great soldier and true patriot, General Ulysses S. Grant. Third. While we sincerely trust that the feeling of unity and good will aroused among our people of all sections and parties by the protracted suffering and final death of General Grant will increase and strengthen, we are constrained to appeal to the people of the Southern States to give practical expression to this feeling by a complete and hearty recognition of all the rights of every American citizen.

Resolved, That we view with alarm the tendency in Federal appointments in this state to appoint to office the worst element of the Democratic party, as testified to by the better element of the Democratic party itself, and that it is the duty of every good citizen, irrespective of party affiliations, to show their disapproval of such appointments as Higgins, Hahon and Thomas by defeating at the polls the nominees of Senator Gorman, whom we hold primarily responsible, such being the only way to overthrow bossism and stamp out the disgrace thus brought upon the State of Maryland.

Resolved, That the principles of civil service reform, as set forth in the national Republican platform, should be extended and applied to all state and municipal offices.

Resolved, That free trade cannot exist in the relations of this country to other countries; that, of necessity, a very large sum must be raised annually from import duties; that the sum so raised should be the smallest amount sufficient to meet the actual necessities of the government, and in laying the duties to raise this sum every possible care should be taken so to adjust and apportion them as will most surely and efficiently protect American labor and secure the full development of our great natural resources. In the language of the brethren of New York, "The persistent threats of the Democratic leaders to overthrow this policy add to the present troubles of trade and the paralysis of industry. Until the full effects of the revision of 1883 can be fairly estimated agitation for the radical change of the tariff law is a gratuitous assault on the wages of labor, on all branches of production, and all the interests of traffic. We are opposed to the introduction of an system of free trade, the inevitable effect of which would be to destroy our mills and factories, and to crrry down American wages to the standard of the Old World."

Resolved, That the great question of the true relations of capital and labor demands the serious and careful consideration of every true patriot, and we demand such legislation as shall secure to capital safety, and to labor its fair share of the joint results of capital and labor.

Resolved, That while we recognise the duty of the state to provide means by which those confined in our penal and reformatory institutions, particularly the young, should be taught trades, by which they may earn a livelihood and become useful citizens when they return to society, we declare that the employment of convict labor, under the contract system, in competition with the labor of honest men is unjust and demoralizing, and should be prohibited by law.

Resolved, That the safety of the people demands that such legislation should be had at the earliest possible moment as shall control and restrict the gigantic corporations that have grown up in our midst in such a manner as shall render them a benefit, instead of a wrong and oppression to the people, and make them servants instead of the masters of the state,

Resolved, That we are in favor of such a modification of our constitution and laws as shall restrict the aggregate amount of bonded debt which any county or city within the state shall contract to some small percentage of the assessed value of the property within the same.

Resolved, That the Republican party will use all proper means to secure such legislation as will promote the propagation and cultivation of oysters in the non-productive waters of the state, and to reconcile the conflicting interests of the states of Maryland and Virginia and to remove the evils already existing in the oyster laws of the state.

Resolved, That the management of the Chesapeake and Ohio Canal should be divorced from politics, as it is used for base and selfish purposes and to advance the political interests of the Democratic ring, by whom it is controlled.

Resolved, That the colored schools of the state are entitled to the same care, supervision and financial support as the white schools.

Resolved, That the first duty of every true son of Maryland, at this period of her history, is to secure the complete overthrow of the corrupt ring, by means of which *one man* rules as with a rod of iron the Democratic party of the state, and through that party subordinates the interests of the state and the people to his own selfish purposes.

SKETCHES OF THE NOMINEES.

The Hon. Francis Miller, the nominee for comptroller, is one of the best known and highly-respected Republicans in the state. He has been a delegate to Republican conventions for many years. Mr. Miller was born in Alexandria, Va., in 1829, and is a well-known member of the Society of Friends. He studied law under Mr. A. G. Riddle, in Washington, and has practiced his profession since his admission to the bar. In 1876 and 1877 he was United States assistant district attorney, and for about seven years was assistant attorney for the district. He resigned last spring. Mr. Miller was a candidate for chief judge of the circuit embracing Frederick and Montgomery counties, but was defeated by Judge John Ritchie a few years ago.

Mr. William M. Marine was born in Somerset county, Md., on August 25, 1843. He was educated at Irving Institute, Mechanicsburg, Pa. He studied law under ex-Congressman Thomas H. Walsh, in Baltimore, and has practiced ever since. He has been sent to state conventions ever since the Republican party was formed in Maryland. He ran for Congress in 1870 against Hon. Wm. J. O'Brien in the Second district when he was twenty-six years of age, and was a candidate for elector on the Grant tickets in 1868 and 1872, and on the Blaine ticket in 1884. Mr. Marine married a Miss Hall, of Prince George's county. He is now counsel to the Sheriff, and was for many years the corporation attorney of Havre-de-Grace.

We are registering all along the line. If you have a neighbor who so far has failed to register urge him out, so he can help administer a rebuke to the party of high taxes, broken promises and mischievous tendencies generally. For this is what the Democratic party in Maryland has proven to be.

The Chinese Must Go!

CHEYENNE, WY., Sept. 28.—The workingmen representing all classes of labor, held a secret meeting Saturday night and Sunday morning. A number of printed dodgers were distributed in different parts of the city and posted on the doors of all houses occupied by the Chinese, reading as follows: "A fair warning. All Chinamen found in the city of Cheyenne after October 1 will be subjected to a coat of tar and feathers and ridden from the city on a rail. Workingmen the Chinese must go!"

The most minute inquiry thus far cannot trace the source from which the dodgers originated. The affair has created a sensation throughout the city, and while nearly all the best citizens of Cheyenne would prefor to see the Chinese go, still there is no doubt should a mob attempt to drive them out with violence they would be protected.

The proprietor of a steam laundry publishes a card stating in deference to the public opinion he has discharged all his Chinese help.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, Sept., 28, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 4½@5¼ c. that generally rated first quality 3¾@4½ cts; medium or good fair quality 2@2½ cts; ordinary thin steers, oxen and cows 2@2½ cts; extreme range of prices 2@5¾ cts; most of the sales were from 2½@4¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 3,290 head, against 2,833 last week and 3,175 head the corresponding week of last year, and the sales were 1,863 head, against 2,165 last week, and 1,848 head the corresponding week of last year.

The quality of the offerings to-day on the Hill was inferior to any seen there for a long time, very few good butcher cattle or tops being among them. These, as to quality, showed a decline of nearly ½c., as compared with last week, while a larger fraction marked the difference on other grades. The common cattle this week, though fully as numerous as they were last week, were of a shade better quality than they were then. Some dealers accepted concessions of ⅜ to ½c., to affect a clearance. Prices 2½@5 1-5c., with most sales from 4½ to 4¾c.

THE SWINE MARKET.

The supply, though light, is fair, and about equal to a moderately fair demand. There is but little, if any, variation in the quality of the offerings as compared with the quality of last week's receipts. Prices are nearly ½c. lower than they were last week, and range at 5½ to 6c., for common to fair, 6¼@6¾ for fair to good, and a few extras sold at 6⅞. Same time last year hogs sold at 6@7½c., with most sales from 7¾ to 8¼c. net.

THE SHEEP MARKET.

There is a full supply of Sheep on the market, though the offerings number more than 600 head less than last week. The quality shows a falling off in all the yards, as compared with that of last week's receipts. Trade is low. There is no outside demand, and butchers are not active buyers. Quotations range from 2 to 3¾c. gross for sheep, 2½@4¼ for lambs, and $1@2.50 for stock sheep. Same time last year butcher sheep sold at 2½@4¼c., with extra at 4¼, and lambs at 3½@5½. Stock sheep then sold at $1.50@2.75 per head.

NEW ADVERTISEMENTS.

FOR RENT,

The following properties belonging to A. A. Perry:

The Brooks building containing two large rooms suitable for stores on the first floor, six rooms on second floor, suitable for dwelling, with kitchen on first floor.

Also Back building of Perry Cottage, now in possession of Maj. Hill.

Also the Miss Stowe house, now in possession of Mr. Vance.

A. J. HARNE, Agt.

Oakland, Oct. 2, 1885.—3m.

COMMISSIONERS' MEETING.

OFFICE OF THE GARRETT COUNTY COMMISSIONERS, OAKLAND, MD., Aug. 26th, 1885.

The County Commissioners of Garrett county will meet in their office at Oakland, on

Monday, Oct 12th, 1885,

for the purpose of transacting business.

By order,

G. W. MERRILL,
10 3 2t Clerk.

For terms, &c., apply to or address

G. P. KING,
9 26 3t Austen Mines, W. Va.

PATENTS!

A. A. THOMAS,

WASHINGTON, D. C.

Expert in all branches of Patent business including Interferences and Rejected Cases. Information and advice sent free on application.

ELECTION NOTICE!

NOTICE IS HEREBY GIVEN TO THE Judges of Election and to the voters of Garrett county, that an election will be held in the several election districts of Garrett county at the usual places of holding elections,

TUESDAY, NOVEMBER 3, 1885,

for the purpose of electing

A Comptroller of the Treasury of the State of Maryland.
A Clerk of the Court of Appeals for the State of Maryland.
A State Senator,
Two members of the House of Delegates.
A Clerk of the Circuit Court.
A Sheriff.
Three County Commissionrs.
A Register of Wills.
A County Surveyor.

The polls of said election will be open in each and every election district of said county, at the usual places of holding the polls, at 8 o'clock A. M., and will be closed at 6 o'clock P. M., when the baliots shall be publicly counted.

Keepers of hotels, taverns, saloons or any place where liquors are sold, and all others will take notice that by Chap. 191, acts of 1868, no spirituous or fermented liquors, ale or beer or any intoxicating drinks can be sold or given away on election day.

M. R. HAMILL,
9 26 td. Sheriff.

ORDER NISI.

Jonas E. Gnagey and others, vs. Mary Otto, et. al. } No. 326 Equity

IT IS ORDERED, By the Circuit Court for Garrett county, sitting in Equity, this 29th day of September, 1885, that the sale of the real estate mentioned in the second report of Jonas E. Gnagey, trustee, in the above cause, and made to Elizabeth Swager, be ratified and confirmed, provided a copy of this order be published in some newspaper printed in Oakland once a week for three successive weeks before the 26th day of October next.

The report states the amount of sales to be $2600.

W. H. TOWER,
Clerk Circuit Court.

True copy—Test:
10 3 3t. W. H. TOWER, Clerk.

AT THE BARS.

I wait in the dusk at the bars in the lane,
  Waiting and watching at close of day;
When the world is stilled in the solemn hour
As it yields for a space to the night's brief power,
  And the moonshine chases the daylight away.

In the mystical purple of twilight the hills
  And valleys are wrapped, and the forces of night
Have conquered the day and driven him far
To the west, where the sentinel evening star
  Keeps a watchful eye on his sullen flight.

From the darkening meadows the tinkling bells
  Ring low and clear on the perfumed air,
Where a thousand delicate odors blend
From flower and bud that to Heaven ascend,
  An offering purer than human prayer.

The querulous plaint of the whippoorwill,
  Hiding away in its lonely nest,
Quivers and thrills with a note of pain,
Like a lover mourning who loves in vain,
  Or a lost soul crying to Heaven for rest.

Why cometh she not, my beauty, my Bess!
  With the tender eyes, so gentle and kind;
She is late; even now with noiseless fall
O'er the dull earth settles a gossamer pall,
  And the bat darts by on the rising wind.

With a nameless dread that I can not quell,
  And a fancy filled with doubts and fears,
I peer in vain where the ghostly trees
Frolic and play with the wooing breeze
  And the winding path on the hill appears.

At the bars, I wait, though the dews are falling,
  She will surely come though the hour be late;
Hark! there's a step on the path coming near,
Aha! and a call that I know, low and clear.
  So well does my brown beauty know I will wait.

She is coming at last! How the glad earth smiles
  And the breezes of Heaven grow sweeter;
See the clover heads bend in a dying caress
As they tremble and bow 'neath her foot's light press,
  On the path where I'm waiting to meet her.

Her foot falls as light as the dew on the grass,
  So quiet and shy as she comes to my side,
As her brown dreamy eyes look so softly in mines.
They rival the glow of the calm star shine,
  Where is any can equal my Bess in her pride?

All day she has gathered, in meadow and wood,
  Sweet grasses and flowers and buttercups white;
But now, in the gloaming, when the mists lie low,
On the river brink and the faint stars show,
  She comes to me here in the fading light.

So, I let down the bars and my pet comes through;
  With a step that a Duchess might envy, and now,
With a grateful moo and a musical low,
She enters, so glossy and stately and slow,
  My three hundred dollar prize Alderney cow.

—*Detroit Free Press.*

LOST HER FACULTY.

The Minister and the Arithmetician—Letty's Escapade.

A strong soft south wind had been blowing and the trees had dropped nearly all their leaves. There were left only a few brownish-gold ones dangling on the elms, and hardly any at all on the maples. There were many trees on the street, and the fallen leaves were heaped high. Mrs. Wilson Torry's little door-yard was ankle-deep with them. The air was full of their odor, which could affect the spirit like a song, and mingled with it was the scent of grapes.

The minister had been calling on Mrs. Torry that afternoon, and now he stood facing her on the porch, taking leave. He was very young, and this was his first parish. He was small and light and mild-looking; still he had considerable nervous volubility. The simple village women never found him hard to entertain.

Now, all at once, he made an exclamation, and fumbled in his pocket for a folded paper. "There," said he, "I nearly forgot this. Mr. Plainfield requested me to hand this to you, Mrs. Torry. It is a problem which he has been working over; he gave it to me to try, and wanted me to propose, when I called, that you should see what you could do with it."

She seized it eagerly. "Well, I'll see what I can do; but you an' he musn't make no great calculations on me. You know I don't know anything about the 'rithmetic books an' the rules they hev nowadays; but I'm willin' to try."

"Oh, you'll have it done while Mr. Plainfield and I are thinking of it, Mrs. Torry."

"You 'aint neither of you done it, then?"

"He had not at last accounts, and—I have not," replied the young man, laughing, but coloring a little.

The old lady's eyes gleamed as she looked at him, then at the paper. "I dare say I can't make head or tail of it," said she, "but I'll see what I can do by-an'-by."

She had something of a childish air as she stood there. She was slender, and so short that she was almost dwarfed; her shoulders were curved a little by spinal disease. She had a small round face, and a mouth which widened out innocently into smiles as she talked. Her eyes looked out directly at one, like a child's; over them loomed a high forehead with bulging temples covered with deep wrinkles.

"You have always been very fond of mathematics, haven't you, Mrs. Torry?" said the minister, in his slow retreat.

"Lor, yes. I can't remember the time when I wa'n't crazy to cipher.

"Arithmetic is a very fascinating study, I think," remarked the minister, trying to slide easily off the subject and down the porch steps.

"'Tis to me. An' there's somethin' I was thinkin' about this very forenoon—seein' all them leaves on the ground made me, I s'pose. It's always been a sight of comfort to me to count. When I was a little girl I'd 'most rather count than play. I used to sit down an' count by the hour together. I remember a little pewter porringer I had, that I used to fill up with beans an' count 'em. Well, it come into my head this forenoon what a blessed privilege it would be to count up all the beautiful things in this creation. Just think of countin' all them red an' gold-colored leaves, an' all the grapes an' apples in the fall; an' when it come to the winter, all the flakes of snow an' the sparkles of frost; an' when it come to the spring, all the flowers, and blades of grass, an' the little new light green leaves. I don't know but you'll think it ain't exactly reverent, but it does seem to me that I'd rather do that than sing in the other world. Mebbe somebody does have to do the countin'; mebbe it's singin' for some."

She stared up into the warm blue air, in which the bare branches of the trees glistened, with a sweet, solemn wonder in her old face.

The minister in a bewildered way pondered all the old woman had said, as he rustled down the street. Later, Mr. Plainfield (the young high-school teacher) and he would have a discussion over it. They often talked over Mrs. Wilson Torry.

After her caller had gone, the old woman entered the house. On the left of the little entry was the best room, where she had been entertaining the minister; on the right, the kitchen. A young girl was in there eating an apple. She looked up when Mrs. Torry stood in the door.

"He's gone, ain't he?" said she.

"Why, Letty, when did you come?"

"A few minutes ago. School's just out. I came in the back door an' heard him talking, so I kept still."

"Why didn't you come in an' see him?"

"Oh, I didn't want to see him. What you got there, grandma?"

"Nothin' but a sum the minister brought me to do. He an' Mr. Plainfield have been workin' over it."

"Couldn't they do it?"

"Well, he said they hadn't neither of 'em done it yet."

"Is it awful hard?"

"I don't know. I 'ain't looked at it yet."

"Let me see. He didn't get it out of any of our books, I know. We never had anything like this."

"I s'pose it's one he come across somewhere. I guess I'll sit down and look at it two or three minutes."

An old bureau stood against the wall; on it were arranged four religious newspapers in the exact order of their issues, the latest on top, Farmers' Almanacs for the last four years filed in the same way, and a slate surmounted by an old arithmetic. The pile of newspapers was in the middle, the slate and almanacs were on either side.

Letty, soberly eating her apple, watched her grandmother getting out the arithmetic and slate. She was a pretty young girl; her small, innocent face, in spite of its youthful roundness and fairness, reminded people of Mrs. Torry's.

"I don't think much of Mr. Painfield, anyhow," said she, as the click of her grandmother's pencil on the slate began; "and he knows I don't. He overheard me telling Lizzie Bascom so to-day. He came right up behind us on the street, and I know he heard. You ought to have seen his face!"

"I don't see what you've got agin him," remarked Mrs. Torry, absently, as she dotted down figures.

"I haven't much of anything that I know of against him, only I don't think he's much of a teacher. He can't do examples as quickly as you, I know, and I don't think a man has any business to be schoolteaching if he can't do examples as quickly as an old lady."

Mrs. Torry stopped her work and fixed her round, unwinking eyes full on the girl's face.

"Letty Torry, there's some things you don't understand. You never will understand 'em, if you live to be as old as Methusaleh, as far as that's concerned. But you'll get so you know the things air. Sometimes it don't make any difference if anybody's ignorant, an' 'aint got any book-learning; air old, an' h'd a hard-workin' life. There'll be somethin' in 'em that everybody else 'ain't got; somethin' that growed, an' didn't have to be learned. I've got this faculty; I can cipher. It 'ain't nothin' agin Mr. Plainfield if he 'ain't got it; it's a gift."

Her voice took on a solemn tone and trembled. Letty looked at her with childish wonder. "Well," said she, with a subdued manner, "he has no right to teach, anyhow, without it. I guess I'll have another apple. I was real hungry."

So Letty ate another apple silently, while her grandmother worked at the problem again.

She did not solve it as easily as usual. She worked till midnight, her little lamp drawn close to her on the kitchen table; then she went to bed, with the answer still in doubt.

"It ain't goin' to do for me to set up any longer," said she, forlornly, as she replaced the slate on the bureau. "I shall be sick if I do. But I declare I don't see what's got into me. I hope I ain't losin' my faculty."

She could not sleep much. The next morning, as soon as their simple breakfast was eaten and Letty had gone to school, she seated herself with her slate and pencil.

When Letty came home at noon she found her grandmother still at work, and no dinner ready.

"I do declare! cried the old woman. "You don't mean to say you're home, Letty! It ain't twelve o'clock, is it?"

"Course it is; quarter past."

"I 'ain't got one mite of dinner ready, then. I've been so took up with the sum I hadn't no idea how the time was goin'. I don't know what you will do, child."

"Oh, I'll get some bread and milk, grandma; just as soon have it as anything else. Got the problem done?"

"No, I 'aint. I feel real bad about your dinner. I'll kindle up a fire now and fry you an egg—there be time enough."

"I'd rather have bread and milk."

After Letty had gone to school for the afternoon, and Mrs. Torry had been working fruitlessly for an hour longer, she dropped her pencil.

"I declare," said she, "I'm afraid I am losin' my faculty!"

Tears stood in her eyes. "I won't give up that I am, anyhow," said she, and took the pencil again.

When Letty returned, in the latter part of the afternoon, she scarcely knew it, with the full meaning of the word. She saw her, but her true consciousness was so full of figures that Letty's fair face could only look in at the door.

Letty ran in hastily; a young girl was waiting for her outside. "Oh, grandma," cried Letty. "Lizzie's going to Ellsworth to do an errand for her mother; she's coming back on the last train. Can't I go with her?"

Her grandmother stared at her for a minute and made no answer.

"She's got tickets for both of us. Can't I go, grandma?"

"Yes."

Letty smoothed her hair a little and put on her best hat; then she went.

"Good-bye," said she, looking back at the intent old figure; but she got no answer.

"Grandma's so taken up with the example she's got that she doesn't know anything," she told her friend when she was outside. "She didn't answer when I said good-bye; she forgot to get dinner to-day, too."

Mrs. Torry worked on and on. She never looked up nor thought of anything else until it grew so dark that she could not see her figures. "I'll have to light the lamp," said she, with a sigh.

After it was lit she went to work again. She never thought of wanting any supper, though she had eaten nothing since morning.

The kitchen clock struck seven—Letty should have been home then—eight, and nine, but she never noticed it. A few minutes afterward some one knocked on the door. She ciphered on. Then the knocks were repeated, louder and quicker.

"Somebody's knockin' I guess," she muttered and opened the door. Mr. Plainfield stood there. He was a handsome young man with rosy cheeks; he was always smiling. He looked past her into the room inquiringly.

"Is Letty at home?" said he.

"Letty?"

"Yes, Letty. Is she at home?"

"Why, yes, she's here, Letty!"

"Has she gone to bed?"

"Why, yes, I guess she has." Mrs. Torry opened the door at the foot of the stairs. "Letty! Letty!"

"I guess she must be asleep," said she, turning to the young man, who had stepped into the kitchen. "Want me to go up and see? Did you want anything particklar?"

He hesitated. "If you had—just as soon—I—had something special——"

The old woman climbed the steep, uncarpeted stairs, feeble, with a long pat on every step. She came down faster, reckless of her trembling uncertainty. "She ain't there! Letty's gone! Where is she?"

"You know she went to Ellsworth with Lizzie?"

"No, I didn't."

"Why, she said something to you about it, didn't she?"

"I don't know whether she did or not."

"Lizzie just told me that she missed her in the depot. She left her there for a minute while she went back for something she had forgotten. When she came back she was gone. The train was all ready, and Lizzie thought she must be on it, so she got on herself. She did not see her in the depot here, and has been crying about it, and afraid to tell till just now. I came right over as soon as I knew about it."

"O, Letty! Letty! Where's Letty? O, Mr. Plainfield, you go an' find her! Go right off! You will, won't you? Letty allers liked you."

"I always liked Letty," said the young man, brokenly. "I'll find her—don't you worry."

"You'll go right off now?"

"Of course I will; I won't wait a minute."

"O, Letty, Letty! Where is she? What shall I do? That little bit of a thing—and she was always one of the frightened kind—out all alone; an' it's night! She never went to Ellsworth alone in all her hull life. She didn't know nothin' about the town, an' she didn't have a cent of money in her pocket."

"I'll send Mrs. Bascom over to stay with you," Mr. Plainfield called back as he hurried off.

Soon Mrs. Bascom came, poking her white, nervous face in the door inquiringly, "She 'ain't come?"

"No. O, Mis' Bascom, what shall I do?"

"O, Mis' Torry, I do feel so bad about it I don't know what to do! If Lizzie had only told before! but there she was upstairs crying, and afraid to tell. I've been scolding her, but she felt so bad I had to stop. She called me, an' told me finally; an' I guess 'twa'n't long before Mr. Plainfield started off, to find out if she was home. It was lucky he was boarding with us. He'll find her if anybody can: he's as quick as lightning. He turned white's a sheet when I told him."

"O, Mis' Bascom!"

"Now, don't give up so, Mis' Torry. He'll find her. She can't be very far off. You'll see her walking in here first thing you know. He's got a real fast team, an' he's started for Ellsworth now. He went past me like a streak when I was coming up the road. He'll have her back safe and sound before morning."

"O, Letty! Letty! O, what shall I do? It's my own fault, every mite of it's my own fault. 'Tis; you don't know nothin' about it. The minister brought me a sum, he an' Mr. Plainfield had been workin' on, to do, yesterday afternoon, an' I jest sat an' ciphered half the night, an' all day. I didn't know no more what Letty asked me, when she came in from school, than nothin' at all. I didn't know nothin' but them figgers, an' now Letty's lost, an' it's my fault."

"Why, you might have let her gone if you'd known."

"I guess I shouldn't let her gone all alone with your Lizzie, to come home after dark in the last train, little delicate thing as she was. I guess I shouldn't; an' I guess I should have started up an' done something, if I'd known, when she wasn't here at train time. I didn't get the sum done, an' I'm glad of it; it seems to me jest as if I was losin' my faculty as I'm growin' older, an' I hope I am."

"Now don't talk so, Mis' Torry. Sit down an' try to be calm. You'll be sick."

"I guess there ain't much bein' calm. I tell you what 'tis, Mis' Bascom, I've been a wicked woman. I've been thinkin' so much of this faculty I've had for cipherin' that I've set it afore everything—I hev. Only yesterday that poor child didn't hev any dinner but crackers an' milk, 'cause I was so took up with the sum that I forgot it. An' she was jest as patient as a lamb about it; said she'd rather hev crackers an' milk than anything else. O, dear! dear!"

"Don't cry, Mis' Torry."

"I can't help it. It don't make no difference what folks are born with a faculty for—whether it's cipherin', or singin', or writin' poetry—the love that's betwixt human beings an' the help that's betwixt 'em ought to come first. I've known it all the time, but I've gone agin it, an' now I've got my pay. What shall I do?"

Mrs. Bascom remained with her all night, but she could not pacify her in the least. She was nearly distracted herself. She was fearful that her Lizzie might be blamed.

The next day people flocked to the house to inquire if there was any news from Letty, and to comfort her grandmother. Sympathy seemed fairly dripping like fragrant oil from these simple, honest hearts; but the poor old woman got no refreshing influence from it. She kept on her old strain in their ears. She had lost Letty, and it was all her own fault, and what should she do! Mr. Plainfield did not come home. The minister took his place in school. Nothing was heard until noon; then a telegram from the teacher came. He thought he was on Letty's track, he said; they should hear again.

Next day there was a second message; Letty was safe; coming home as soon as possible. The following day passed then, and not another word came. The old grandmother's faith and hope seemed to have deserted her. She knew Letty was not found: she never would be found. She and Mr. Plainfield were both lost now. Something dreadful had happened to both of them.

"The worst of it is," she told Mrs. Bascom one afternoon, with a fierce indignation at herself, "I can't help thinkin' about that awful sum now after all that's happened. Them figgers keep troopin' into my head right in the midst of my thinkin' about Letty. It's all I can do to let that slate alone, an' not take it off the bureau. But I won't—I won't if it kills me not to."

On the fourth day after Letty's disappearance, between six and seven o'clock in the evening, Mrs. Torry was sitting alone in her kitchen. The last sympathizer had gone home to eat her supper.

The distressed old woman had drank a cup of tea; that was all she would touch. The pot was still on the stove. There was a soft yellow light from the lamp over the room. The warm air was full of the fragrance of boiling tea.

Mrs. Torry sat looking over at the bureau. She would have looked the same way if she had been starving and seen food there.

"O," she whispered, "if—I could—only work on that sum a little while, it does seem as if 'twould comfort me more'n anything! O Lord! I wonder if I was to blame? 'Twas the way I was made, an' I couldn't help that. P'haps I should hev let Letty gone, an' she'd been lost, anyway. I wonder if I hev lost my faculty?"

She sat there looking over at the slate. At last she rose and started to cross the room. Midway she stopped.

"O, what am I doin'? Letty's lost, an' I'm goin' to cipherin'! S'pose she should come in an' ketch me? She'd be so hurt she'd never get over it. She wouldn't think I cared anything about her."

She stood looking at the slate and thinking for a moment. Then her face settled into a hard calm.

"Letty won't come back—she won't never come back. I might as well cipher as anything else."

She went across the room, got the slate and pencil, and returned to her seat. She had been ciphering for a minute or so when a sound outside caused her to start and stop. She sat with mouth open and chin trembling, listening. The sound came nearer; it was at the door. Of all the sweet sounds which had smote that old woman's ears since her birth—songs of birds, choral hymns, Sabbath bells—there had been none so sweet as this. It was Letty's thin girlish treble which she heard just outside the door.

For a second, as she sat listening, her face was rapt, angelic; in spite of its sallowness and wrinkles it might have figured in an altar-piece. Then it changed. The slate was in her lap. What would Letty think?

It was all passing swiftly; the door-latch rattled, she slipped the slate under her gingham apron, and sat still.

"O, poor grandma!" cried Letty, running in; "you've been frightened 'most to death about me, haven't you?" She bent over her grandmother and laid her soft pretty cheek against hers.

"O, Letty! I didn't think you'd ever come back."

"I have; but I did have the dreadfulest time. I got carried 'way out West on an express train. Just think of it! I got on the wrong train while I was waiting for Lizzie. I was frightened almost to death. But Mr. Plainfield telegraphed ahead. He found out where I was going, and they took me to a hotel; and then he came for me. You haven't said anything to Mr. Plainfield, grandma."

The young man was standing smiling behind Letty. She looked astonished when her grandmother did not rise to speak to him, but sat perfectly still as she uttered some broken thanks.

"Why, grandma, you ain't sick, are you?" said she.

"No—I ain't sick," said her grandmother, with a meek tone.

When Mr. Plainfield left, in a few moments, Letty gave a half-defiant, half-ashamed glance at her grandmother, and followed him out, closing the door.

When she returned Mrs. Torry was standing by the table pouring out a cup of tea for her. The slate was in the usual place on the bureau.

"Grandma," said Letty, blushing innocently, "I thought I ought to say something to Mr. Plainfield, you know. I hadn't, and I knew he heard what I said to Lizzie that day. I thought I ought to ask his pardon, when he'd done so much for me. I've made up my mind that I do like him. There's other things besides doing arithmetic examples."

"I guess there is, child. Them things is all second. I think I'd rather have a man who hadn't got any special faculty, if I was goin' to get married."

"Nobody said anything about getting married, grandma."

Pretty soon Letty went to bed. She was worn out with her adventures.

"Ain't you going too, grandma?" asked she, turning around, lamp in hand at the foot of the stairs.

"Pretty soon, child; pretty soon. I've—got a little somethin' I want to do first."

The grandmother sat up till nearly morning working over the problem. Once in a while she would lay down her slate and climb upstairs and peep into Letty's little peaceful girl-chamber to see if she was safe.

"If I have got that dear child safe, and 'aint lost my faculty, it's more'n I deserve," muttered she, as she took her slate the last time.

The next evening the minister came over. "So Letty's come," he said, when Mrs. Torry opened the door.

"Yes, Letty's come, and—I've got that sum, you gave me, done."—*Harpers' Magazine.*

SCAB IN SHEEP.

A Remedy Which May Produce a Permanent Cure.

To one hundred gallons of water use twenty-five pounds flowers of sulphur and ten pounds of quick lime. The sulphur can be put into tank as soon as water is pumped. The lime should be slacked in a separate barrel and the liquid poured into the boiling vat, taking care that no slaggy pieces of lime will cake upon the bottom of the iron boiler. The water should boil well before letting it out in the dipping vat, and time allowed for it to cool before dipping. This preparation usually can be made the day before the sheep are to be washed, and more water added to the boiling vat, keeping the mixture in proportion as above stated. A pen in the form of a letter V, large enough to hold fifty sheep, should receive the sheep at the end of the dipping vat. Each sheep, when incrustation or yellow dandruff is seen on flesh, must be thoroughly scarified with a curry-comb, or some hard brush, with frequent applications of the liquid, used at from 110 degrees to 125 degrees Fahr., and, for fear of getting too hot, not above the degree last mentioned. We are now ready to dip, which, after tests are made, is to be commenced slowly, and continued till all the flock are dipped. Pushing sheep through a vat to see how many can be dipped in a day will only double the care and expense of attending to the flocks, while the chances are that the disease will continue to infect the sheep and all the work must be done again. After treating, they must be taken to a range where they have no infected sheep, and be fed with salt and sulphur in proportion of one part sulphur to twelve parts salt.—*Sheep Breeder.*

Velvets and Plush.

Plain velvets are so largely imported that of themselves they would constitute a "velvet season," but to these are added striped and figured velvets, and the beaded and embroidered velvets that are to form the combinations with plain velvet or with uncut velvet costumes. A *plomb* or lead-colored costume, with the front beaded with lead beads, will be a stylish choice for autumn and winter, but the still larger importations of brown velvets both for dresses and bonnets point to these warmer browns as a more certain choice for a winter toilet. The use of carved wood beads in brown shades on brown velvet is a novelty for the front breadth, the plastron, collar, and cuffs of brown velvet dresses. There are also many brown wool laces for such dresses, and the velvet bonnets to accompany such toilettes have wooden beads forming the coronet or edging the brim, while many tinsel threads are employed in embroidering the crown. While brown remains a leading color, gilt will not be entirely banished, yet the best dealers import it sparingly, giving the preference to tinsel threads of many shades. The shaded plushes are shown in brown and gray tints, some of which are called tiger plushes, and others merely ombre, but these are shaded in stripes or in close patterns instead of all the way across from selvedge to selvedge as they formerly were. Next the beaded velvet fronts there are applique velvets that have the effect of transparents when put on wool or silk of contrasting color; these come in side panels or in a single front breadth, or a foot border, and with the necessary garniture for the basque.—*Harper's Bazar.*

A Pretty Anecdote.

The prettiest of literary anecdotes has been related by William Grimm, one of the pair of famous story-tellers. One day a little girl rang their bell and met him in the hall with the words: "Are you the Mr. Grimm that writes the pretty tales?" "Yes, I and my brother." "And that of the clever little tailor who married the princess?" "Yes, certainly." "Well," said the child, producing the book, "it is said here that every one who doesn't believe it must pay him a thaler. Now, I don't believe that a Princess ever married a tailor. I haven't so much as a thaler, but here is a groschen and please say I hope to pay the rest by degrees." Just then Jacob came up, and the brothers had an interesting interview with the little dame; but they could not persuade her to take away the groschen which she had laid on the table.—*The Household.*

ABRAHAM LINCOLN.

Some Stories Concerning His First Inaugural Address.

Mr. Lincoln gave a cordial greeting to me when I called on him after his arrival at Willard's Hotel, and he indulged in some pleasant reminiscences of his Congressional career. Of course I talked with him about his forthcoming message, and, after having made me promise that what he told me should not get into print, he gave me an account of it. He had written it at his Springfield home, and had it put into type by his friend, the local printer. A number of sentences had been reconstructed several times before they were entirely satisfactory, and then four copies had been printed on foolscap paper. These copies had been locked up in what Mr. Lincoln called a "gripsack" and intrusted to his eldest son Robert. "When we reached Harrisburg," said Mr. Lincoln, "and had washed up, I asked Bob where the message was, and was taken aback by his confession that in the excitement caused by the enthusiastic reception he believed he had let a waiter take the gripsack. My heart went up into my mouth, and I started down-stairs, where I was told that if a waiter had taken the gripsack I should probably find it in the baggage-room. Going there I saw a large pile of gripsacks and other baggage, and thought that I discovered mine. My key fitted it, but on opening it there was nothing inside but a few paper collars and a flask of whisky. A few moments afterward I came across my gripsack, with the document in it all right, and now I will show it to you, on your honor, mind!" The inaugural was printed in clear-sized type, and wherever, Mr. Lincoln had thought that a paragraph would make an impression upon his audience he had preceded it with a typographical fist—viz.: ☞

At the inauguration, when Mr. Lincoln came out on the platform in front of the eastern portico of the Capitol, his tall, gaunt figure rose above those around him. His personal friend, Senator Baker, of Oregon, introduced him to the assemblage, and as he bowed acknowledgments of the somewhat faint cheers which greeted him, the usual genial smile lit up his angular countenance. He was evidently perplexed just then to know what to do with his new silk hat and a large gold-headed cane. The cane he put under the table, but the hat appeared to be too good to place on the rough boards. Senator Douglass saw the embarrassment of his old friend, and, rising, took the shining hat from its bothered owner and held it during the delivery of the inaugural address. Mr. Lincoln was listened to with great earnestness, and evidently desired to convince the multitude before him rather than to bewilder or dazzle them. It was plain that he honestly believed every word he spoke, especially the concluding paragraphs, one of which I copy from the original print.

"☞I am loath to close. We are not enemies, but friends. We must not be enemies. Though passion may be strained, it must not break our bonds of affection. ☞The mystic chords of memory which stretch from every battle-field and patriot grave to every loved heart and hearthstone, all over our broad land, will yet swell the chorus of the Union when again touched, as they surely will be, by the better angels of our nature."—*Ben. Perley Poore, in N. Y. Tribune.*

AN ATHLETE'S DIET.

Wallace Ross Describes How He Trains and Physics Himself.

"I eat," he said the other day, "and I always have eaten since I was a boy, plenty of nourishing, generous food, and I am very wide in my choice, eating as a rule any good food that tempts my appetite, and that is hearty enough to be easily tempted. For myself I am not specially fond of what you call made dishes, but prefer food in its plainer forms. For meats I eat chiefly mutton and beef, and I use a good deal of bread, of course, being as careful as I can to get the best. My own idea is that so long as you have sound, sweet food it doesn't make as much difference what kind it is as how you eat it. I am very particular to eat slowly. I eat three times a day. Breakfast is a light or hearty meal, according to how I feel about it at the time. Lunch in the middle of the day is always light, and dinner at 6:30 or seven is the principal meal of the day. I always take an hour for that. If I haven't an hour to spare at dinner time, I put off dinner till I have the time.

"I find, though, that aside from meat and bread, I must have plenty of vegetables. No man can make any kind of an athlete without eating plenty of vegetables. I take all kinds, and pretty much of all fruit, too. Fruits are good. A man can't stay without that kind of food. He has no endurance.

"Yes, I'm Scotch, and I believe in oatmeal; but I don't think you ought to eat too much of it. I have it at breakfast about three times a week. I am fond of milk, too, and am specially careful to drink it slowly. It's excellent food, but its very bad to drink it fast. And it isn't good to take much liquid at any time, especially at meals. I drink very little at my meals. I have a habit of always drinking a glass of water when I first get up; spring water if I can get it. I don't exactly know why I do it. I don't know that it is very good for me. I guess it is because I like it. There's no accounting for taste, you know.

"Tea is my greatest stimulant. I don't drink much coffee, but I do take considerable tea—black tea always; I never use green—and I take it with sugar and milk, and never take it iced. I don't believe in iced drinks.

"In training? Well, I make no difference in my diet in training. I only try to keep more regular hours, especially in sleeping. And I take no physic. Physic is bad always. In training it's fatal."—*The Cook.*

—Statistics show that the wheat trade of California, Oregon and Washington Territory with Europe give employment annually to more than four hundred sailing vessels going around Cape Horn. The average passage for each vessel is about 16,000 miles, in an average time of a little over four months.

SCHOOL AND CHURCH.

—The National Educational Association, in session recently, at Saratoga, elected N. A. Calkins, of New York, President.

—During his ministry at Cheltenham, the late Dean Close received over fifteen hundred pairs of worked slippers from lady members of his flock.

—During the past convention year the Protestant Episcopal Bishop of Iowa traveled, on official duty, upward of fifteen thousand miles.

—It was stated by Dr. Vose, of Providence, at a farewell meeting to a lady of his church about to start for India, that hitherto no foreign missionaries had gone from Rhode Island.

—"What do they do when they install a minister?" inquired a small boy; "do they put him in a stall and feed him?" "Not a bit," said his father, "they harness him to the church and expect him to draw it alone."—*Exchange.*

—Women have been elected for the first time, to positions on the Glasgow School Board. When Scotland breaks through the trammels of conservatism in any particular, it is usually safe to be the rest of the world to follow.—*Current.*

—The number of names carried in Baptist Church books of members who—whereabouts are unknown is said by the New York *Examiner* to be very large, and the same thing is said of the Presbyterians by the New York *Observer*, while a third authority reckons the proportion of these lost members at ten per cent. of the whole.

—The Legislature refused to add the History of Tennessee to the list of books for public schools. The idea seems to prevail with some that the schoolboy should learn more about Greece and Rome and other ancient countries and people than about the history of his own country and State.—*West Tennessee Whig.*

—The *Christian Advocate* says: "There are signs of the total break-up of the Salvation Army in this country. Something has taken away the measure of sympathy which was freely given at first. The opinion expressed when their work first opened in this country—that the churches could and soon would do all the work the Army proposed to do, is still held. No organization outside the Church is called for when the Church is alive. The one lesson of value which the Army teaches is that the Church may safely go outside the churches to do its work. Methodism has known that for a long time. But latterly we have been too much afraid of eccentric methods."

PUNGENT PARAGRAPHS.

—A life insurance policy—never to bring spring poems to the editor in person.—*Judge.*

—A Philadelphian has invented a flying machine of a new kind, with which he will soon experiment. Why he is tired of life is not stated.—*Norristown Herald.*

—Henry Karat went to sleep on a doorstep in New York and was robbed of his "turnip." Henry says the policeman was not on his "beet."—*Boston Bulletin.*

—A soft answer. "Whenever I can find a donkey with a loud enough voice and long enough ears," he growled, "I'll bring him up here and let him argue with you." "Well, my dear," she replied sweetly, "what subject do you want to discuss?"—*N. Y. Graphic.*

—At last we know why "uneasy lies the head that wears a crown." A newly arrived chiropodist from the old country announces himself as late corn doctor to the court of Germany, and tells us he has removed corns from several of the crowned heads of Europe.—*Life.*

—A young man denounces straw bonnets "because they chafe his ears." Here, now, is a question for scientists. Can they explain how it is that a bonnet worn by one person can chafe the ears of another person not wearing it? Eh? How's that? O—well, well, now that may be. How stupid not to see it before.—*Foreign Ex.*

—Clara—I understand that Mr. Featherly paid me a very pretty compliment to-day? Ethel—Yes? What was it? Clara—He said that among the most beautiful young ladies at the party last night was Miss Clara Smith. Ethel (with a cough)—Yes, I noticed you among them.—*Chicago Tribune.*

—Brown was ruminating on Archimedes and his lever. "Old Archimedes had a long head when he said he could raise the world if he had a long enough lever," he said to Burns. "Well, fairly so," was the reply, "but I have done better." "How so?" "Raised some money with my lever." "What do you mean?" "Pawned my watch."—*Rambler.*

—The mistress of a large establishment, starting out on a "shopping expedition," asked the cook what she would bring her from the city. The cook replied, "I'd like mighty well to have a pah er fine shews, please, ma'am." She was asked what size she wore. "I kin wah numbah threes easy, but on account ob de size ob my feet, I reckon ye bettah git me number nine."—*Chicago Ledger.*

Traveling Aphorisms.

We kick a worn-out old purse which we see in our pathway, until we hear the clink of gold in it, and then we clasp it to our bosoms.

Other people's tears are little drops of salt water; our own are rolling floods of bitterness and woe.

A baby comes to us on angels' wings, but it hangs the wings up in a dark closet when its feet have once touched the earth.

A beautiful polished shoe may hide a painful corn.

The selfish man's stomach is larger than his heart.

That man is weak, indeed, who can not lift his eyes to Heaven.

One hair in the butter does not condemn the roll.

A woman doesn't have to dance very long until her knees are too stiff to bend in prayer.

The devil paints his most alluring pictures on a backgronnd of gold.

It takes a long time for a lie to fade.

There's more honesty in the wag of a dog's tail than in the shake of a man's hand.—*Merchant Traveler.*

FOR OUR YOUNG FOLKS.

MARGIE AND THE GOLDEN-ROD.

"O pretty Lady Golden-Rod,
I'm glad you've come to town!
I saw you standing by the gate,
All in your yellow gown.
No one was with me, and I thought
You might be lonely too;
And so I took my card-case
And came to visit you.

"You're fond of company, I know;
You smile so at the sun,
And when the winds go romping past,
You bow to every one.
How you should ever know them all,
I'm sure I can not tell;
But when I come again, I hope
You'll know me just as well.

"I love you, Lady Golden-Rod;
You are so bright and fine;
You never have a rumpled frock,
Or tangled hair like mine.
I think your mamma comes at night,
When we are all away,
And dresses you in green and gold
Fresh for another day.

How tall you are, dear Golden-Rod!
You're taller 'most than I;
I can not grow so very fast,
Although I try and try.
Oh, here's mamma, dear Golden-Rod!
I'll ask her please to stop;
And she shall say which one of us
Comes highest at the top."

The lovely Lady Golden-Rod!
She surely understood;
For when wee Margie turned around,
She bent down all she could,
Until the fluffy yellow heads
Upon a level came,
And Margie's mother, smiling, said:
"Your heights are just the same!"

—*Carrie W. Bronson, in St. Nicholas.*

SNAKES.

Many Erroneous Ideas Entertained Concerning Them—The Poisonous and Dangerous Comparatively Few in Number and Variety.

More than once, in the history of wars, two valiant armies have marched together, looked each other in the face, and then ran away, each scared out of its wits by the mere sight of the other. In the history of men and snakes the same thing has frequently happened. The man runs in one direction and the snake in the other, and it is hard to tell which is the more frightened.

We are apt to look upon snakes as terrible monsters, but they seem to look upon men and boys as equally terrible, and the most poisonous serpent will fly if it has a fair chance, and only fights when it finds itself cornered.

There are many wrong ideas entertained about these gliding reptiles, and it may not be amiss to stick a pin in some of these false notions and let out what truth is in them. The general idea seems to be that all snakes are horridly ugly and deadly poisonous monsters, hereely bent on destroying the race of man, and armed with a forked sting which they constantly thrust out from their dreadful jaws in search of victims.

The fact of the matter is that many snakes are very handsome, being brilliant in color and graceful in form, while their flexible, gliding motion is perhaps the most attractive of all movements in the animal kingdom. As for the forked sting, it is only the tongue of the serpent, and is as soft and harmless in its touch as a piece of velvet.

The poisonous organs are a pair of [illegible] teeth or fangs, often sharper than [illegible]. These are either hollow, or have a sort of canal down the [illegible]. The poison is a liquid which lies in a gland at the base of the fang. The moment the teeth enter the flesh of a victim certain muscles press on the gland, the poison is forced out, and runs down the hollow of the tooth and into the wound.

As for the forked tongue, which plays in and out with such rapidity, it seems to be the feeling organ of the serpent. It is used as we use our fingers—to find out more about things that can be told by the eyes.

The great majority of snakes are as harmless as a mouse. In all North America there are only three or four poisonous kinds of snakes. These are the rattlesnake, the moccasin and the copperhead, which are very dangerous, and a little snake found in some of the Southern States, called the harlequin, which is only slightly poisonous. All these snakes, except the harlequin, are marked by a deep pit on each side of the head, between the eye and the nostril. What the pit is for no one knows, but if any of my readers meets a snake with these holes in the sides of its head, he had better have business in the other direction if he does not want to get into trouble.

Most of our common snakes are as harmless as doves. The black, the whip and the milk snake, the water and garter snake, the hog-nosed snake, and the big and ugly pine snake of New Jersey, with many other common species, may be handled as safely as one would handle a flexible strip of India rubber. There is no reason why man, boy or girl should show the same senseless fear of snakes as is shown by monkeys. These animals, as is well known, are dreadfully afraid of snakes, and can not be made to come near even a dead one, but will stand off at a safe distance, chattering and flying in wild fright if the slightest motion is seen. The human race is like the monkey race in this. They seem born with a natural dread of snakes.

The rattlesnake is born with a small knob or button at the end of the tail. After that, every time the snake sheds its skin, as a rule a new rattle is added. But this may happen three or four times a year, and it is not possible to tell the age of a snake by the number of its rattles. They are all alike in one thing; they shake the tail, causing a rattling sound, when they are disturbed or cornered.

There are in all from fifteen to eighteen species of rattlesnakes. Some of these average seven or eight feet long. The most common variety in the mountains of the Middle States and in the South is the banded rattlesnake. It is about four feet long, of a yellowish or grayish color, with black bands. It is mostly found in rocky situations and feeds on birds, frogs, toads and the like small game.

The only other poisonous snake in the Middle and Eastern States is the copperhead. This creature is seldom more than three feet long, is very slender, and rather pretty. It is of a pale red color, with a row of dark brown spots on the back. The head is of a color something like copper. It lives in rocky places, and grows scarcer the farther north we go.

The moccasin seems to be only found in the Southern States. It is from three to four feet long, and lives in swampy places, often on tufts and hummocks of grass. It is a short, thick snake, with rough scales. When young it is of a greenish hue, with dark bands on the neck; but when old it becomes almost black. The common water-snake of the North is often called a moccasin, though it is not at all like the true moccasin, and is quite harmless.

All snakes may be divided into three classes: those that kill by poison, those that constrict, or coil around their prey, and those that swallow their prey alive. Their mode of swallowing is one of the most remarkable features of snake life, since they often swallow creatures much larger than themselves. It is rather curious to see a slim-bodied serpent slowly swallowing a fat frog two or three times its diameter, and looking after the operation like a rubber tube with a base ball in its center.

In fact, all snakes have a rubber-like power of stretching. The head is very curiously constructed. Instead of the bones being firmly joined together, as in other animals, they are held together by elastic ligaments. These readily stretch, so that the bones can be pulled apart, and the opening of the jaws greatly widened. It is the same with the body. It has great stretching powers, and can easily hold something of a diameter several times larger than its own. But the stories that are sometimes told of the great tropical boas swallowing oxen or other large animals need not be believed. In these travelers' stories there is shown a power of stretching which beats that of any snake.

No one need believe the story that the snake licks its prey all over, and covers it with a slimy substance before attempting to swallow it. Snakes have a great flow of saliva, and their food when taken into the mouth is quickly covered with a slimy substance which makes it more easily swallowed.

The snake's mouth has six rows of long, fine teeth, curved inward, which are not suited to cut or bite, but are good at holding on. When a frog, mouse or bird is caught, it is worked into the mouth, the teeth letting it enter easily, but not letting it out again. The six bones which bear the teeth each moves separately, and each keeps loosing its hold and taking a new hold further out, so that the prey is steadily drawn back by this active motion.

The bodies of all snakes are covered with scales. These help them in their movement by the friction of their edges with the ground. But the main moving organs are the ribs. Of these some snakes have as many as three hundred pairs, all movable and able to press backward through the skin upon the ground.

As to the power of snakes to charm other animals this needs yet to be proved. It is well known that many animals become motionless and helpless when seriously frightened, and what is usually charming is probably this effect of fright. The wonderful stories of bird charming by snakes are no doubt a little embellished to make them seem more remarkable. It is possible that the effect is something like what we call mesmerism, or animal magnetism.

Snakes are divided by some writers into five classes—the burrowing, the ground, the tree, the fresh-water and the sea-snakes. The burrowers live mainly underground. They have a short, stiff body, with firm, close-set scales, and live on worms and slugs, etc. The tree-snakes are small-sized, swift-moving creatures, often bright green in color. Many of them can swing downward by the tail when seeking their favorite food of eggs or young birds. Some of them are poisonous. The ground-snakes comprise far the greater number, and are those best known. Though ordinarily living on the ground, they frequently take to trees or to the water. The true water-snakes are small in size and harmless, though poisonous ground-snakes often frequent the water.

Snakes are very fond of milk, though they do not milk cows, as has been asserted. They are also fond of eggs, and there is a story of a cobra having entered a hen-house through a chink and swallowed so many eggs that he could not get out again. The robber was slain, the eggs placed under the hen again, and duly hatched out as if nothing had happened.

On an average, snakes sleep half the year, while the green garter snake of the United States sleeps eight months out of the twelve.—*Charles Morris, in Harper's Young People.*

"But I Want To."

That is what Alice Belden always says when she is told not to do anything. She is a sweet, pretty little girl, but she is an only child, and is badly spoiled. When her mamma says: "Come now, Alice, and learn your lessons; do not swing any longer this morning," Alice whines out: "But I want to!" And then her weak mother does not say any more.

One day her nurse was with her by the riverside, and Alice got into a little rowboat that was there. "Oh, Miss Alice," said the nurse, "you must not do that. I am sure your mamma would not like it."

"But I want to!" said Alice, in a pet, and she lifted one of the big oars and tried to put it into the water. How frightened she was when the little boat turned over, and she felt herself going down, down in the deep river! The foolish child would have been drowned had not some men in the field heard the cries of her nurse and plunged into the water to save her.

I hope Alice will learn before long that "But I want to" is not a good reason for doing anything that it is not best to do.—*Our Lambs.*

—Charles Henderson says that the ventilation of a greenhouse has more to do with the health of its contents than any other one cause. This is particularly true of roses. If air is given in a rose house day and night during July and August, there will be little trouble with mildew, as the cool night air and the action of the wind all tend to toughen the fiber of the wood and leaves and give strength of constitution to the whole plant, so that when the spores of mildew and other fungoid diseases strike, they do not take root, but glance off harmlessly from the hardened and fortified foliage.—*Philadelphia Press.*

FARM AND FIRESIDE.

—Persian insect powder is not poisonous, and is only destructive to insects by suffocating them, as its fine particles enter the orifices through which they breathe.—*Troy Times.*

—When a timothy sod has borne one crop of hay that is enough for one year. The after-growth is worth more to lie on the ground as protection for the roots than it can be as pasture.—*San Francisco Chronicle.*

—Fruit Cookies: Two cups of sugar, one cup of butter, two cups of chopped raisins, two eggs, two tablespoonfuls of sour milk, two tablespoonfuls of cinnamon, one tablespoonful of nutmeg, cloves and soda. Bake same as other cookies.—*The Household.*

—There is a general belief that late cultivation is injurious to the potato, causing it to set a large number of small tubers with few marketable specimens. This effect is the result of deep plowing between the rows after the potatoes have set. Shallow culture does no injury at any time, and pulling out grass or weeds is beneficial even after the potatoes are half-grown.—*Toledo Blade.*

—When oats fall down after getting full in head the quality of the grain is not much affected, providing they have cool weather to fill in. The largest crops almost always fall before they are ready to cut, and the principal loss is from the greater difficulty in harvesting and the waste of heads cut too short to be gathered into the bundles.—*N. Y. Herald.*

—Put your clothes in warm water over night; in the morning wring them from this into a boiler containing strong hot suds, to which is added salsoda the size of a hickory nut. Boil them one-half hour, dip them into cold water, rub them out, rinse in clear cold water, then in water slightly blued, and you will be surprised to see how easily your washing is done.—*Albany Journal.*

—There are few greater nuisances than bushes, large rocks, thistles and other large weeds in the meadow and pasture. Grub up the bushes, remove the stones, and with a spade cut the thistles, docks, etc., that will seed next year, just beneath the surface of the ground. It does not pay to mow around obstructions, and they are also unsightly in a pasture.—*Chicago Tribune.*

—A good dish for supper: Slice cold boiled potatoes very thin; sprinkle a thin layer of cracker crumbs in a baking dish, and cover with a thick layer of potatoes; scatter on salt, pepper and small bits of butter; then repeat the layers until the dish is filled; then pour on a cup of cream or a cup of rich chicken soup. Half an hour's baking in a quick oven should be enough for a small dishful.—*Boston Budget.*

—The place which the pumpkin can be made to fill on the farm is an important one. As a food for cattle it is excellent, and after removing the seed may be fed with profit to the milch cows. Horses are fond of them. Hogs revel in their rich and appetizing juices. Sheep eat them with avidity. Chickens, ducks, and geese feed on them at every opportunity. As a winter food for all kinds of stock they are excellent.—*Prairie Farmer.*

—Cocoanut Candy: One large grated cocoanut, one and one-half pounds of granulated sugar; put the sugar and the milk of the cocoanuts together (if not enough, add a little water), heat slowly until the sugar is melted, then boil for five minutes; add the cocoanut, finely grated, and boil ten minutes longer, stirring constantly to keep from burning; pour on buttered plates and cut in squares; will take about two days to harden.—*Exchange.*

IRONING.

How This Difficult Housework Can Be Done Nicely.

As in washing, everything should be ready and in proper order before the day's work is begun. The irons should be scrupulously clean and smooth; this can be done by rubbing them with beeswax and salt or powdered bath brick. The heaviest irons accomplish the best work, and should be used with a rolling motion and a strong pressure. Muslins and prints do not require very hot irons, but stiff white garments need hotter ones. The ironing table and board should be firm and strong and covered with a coarse woolen blanket, over which a clean coarse sheet should be pinned. A bosom board about eight inches wide, and a long board for skirts and dresses, are a necessity to the laundry. Iron holders should be padded to protect the hand from burning. Collars, cuffs and similar articles should be covered with a clean, thin cloth, and the iron passed over it several times, when it may be removed and the iron passed directly over the article. Fine, soft laces and muslins that do not require polishing should be carefully unrolled, one at a time, and spread on a soft blanket, covered with a thin, soft sheet. Laces, embroideries and trimmings must be carefully pulled into shape, with all the edges and purling picked out; those needing ironing carefully smoothed, and those that do not, folded. Always iron by the thread of the material. Embroidery should be ironed on the wrong side of a soft blanket.

In ironing shirts use heavy irons well heated. First iron the thick bands, then the bodies and sleeves, and last the bosom, which should be rubbed over with a clean cloth wrung out of warm water. Then the iron should be passed over rapidly, then rubbed again with a damp cloth and ironed until it is polished. To gloss the linen a polishing iron with smooth, round edge should be used with all possible force. The thickest parts of dresses, such as the waistbands, the gathers and sleeves, should be ironed first. Dresses should always be ironed on the wrong side first and finished on the right. Fine muslins look much better if they are ironed twice in opposite directions. Caps, fichus and aprons, where the lace is full, should have the frill ironed first. In plaiting frills, each plait should be laid by the thread, and held until ironed in place.

While ironing is difficult work to accomplish nicely, any housekeeper who will take the trouble to give personal supervision to the work will soon teach even an indifferent servant to do it properly. A willing hand, guided by a kind and intelligent instructor, will soon overcome all obstacles and make the work easy.—*Mrs. Eliza R. Parker, in Good Housekeeping.*

A Sad Case of Poisoning

Is that of any man or woman afflicted with disease or derangement of the liver, resulting in poisonous accumulations in the blood, scrofulous affections, sick-headaches, and diseases of the kidneys, lungs or heart. These troubles can be cured only by going to the primary cause, and putting the liver in a healthy condition. To accomplish this result speedily and effectually nothing has proved itself so efficacious as Dr. Pierce's "Golden Medical Discovery," which has never failed to do the work claimed for it, and never will.

THE sky, unlike man, is most cheerful when the bluest.—*Worcester Gazette.* The grass, unlike man, is most delightful when the greenest.—*Oil City Derrick.*

WHAT can be more disagreeable, more disgusting, than to sit in a room with a person who is troubled with catarrh, and has to keep coughing and clearing his or her throat of the mucus which drops into it? Such persons are always to be pitied if they *try* to cure themselves and fail. But if they get Dr. Sage's Catarrh Remedy there need be no failure.

WHILE the Czar is compelled to have a mastiff to guard him, some of our American ladies feel secure with a pug.—*Atlanta Constitution.*

ATHLOPHOROS is the best rheumatism cure I have ever tried. I never had anything do me as much good for that painful disease, and there has been a great deal of it sold on my recommendation. C. R. Bruner, Urbana, Ohio.

FRANCE presents America with the statue of liberty, and we put up the pedestal—a sort of base ingratitude.—*Texas Siftings.*

when applied into the nostrils, will be absorbed, effectually cleansing the head of catarrhal virus, causing healthy secretions. It allays inflammation, protects the membrane from fresh colds, completely heals the sores and restores the senses of taste and smell.

NOT a LIQUID or SNUFF.

A few applications relieve. *A thorough treatment will cure.* Agreeable to use. Price 50 cents by mail or at druggists. Send for circular.

ELY BROTHERS, Druggists, Owego, N. Y.

ECZEMA!

My wife has been sorely afflicted with Eczema or Salt Rheum from infancy. We tried every known remedy, but to no avail. She was also afflicted with a periodical nervous headache, sometimes followed by an intermittent fever, so that her life became a burden to her. Finally I determined to try S. S. S. She commenced seven weeks ago. After the third bottle the inflammation disappeared, and sore spots dried up and turned white and scaly, and finally she brushed them off in an impalpable white powder, resembling pure salt. She is now taking the sixth bottle; every appearance of the disease is gone and her flesh is soft and white as a child's. Her headaches have disappeared and she enjoys the only good health she has known in 40 years. No wonder she deems every bottle of S. S. S. is worth a thousand times its weight in gold. JOHN F. BRADLEY,
Detroit, Mich., May 16, 1885. 54 Griswold St.

Narrow Escape.

* * * ROCHESTER, June 1, 1882. "Ten Years ago I was attacked with the most Intense and deathly pains in my back and —*Kidneys.*

"Extending to the end of my toes and to my brain!
"Which made me delirious!
"From agony!!!!
"It took three men to hold me on my bed at times!
"The Doctors tried in vain to relieve me, but to no purpose.
Morphine and other opiates!
"Had no effect!
"After two months I was given up to die!!!!
"When my wife heard a neighbor tell what Hop Bitters had done for her, she at once got and gave me some. The first dose eased my brain and seemed to go hunting through my system for the pain.
The second dose eased me so much that I slept two hours, something I had not done for two months. Before I had used five bottles, I was well and at work as hard as any man could, for over three weeks; but I worked too hard for my strength, and taking a hard cold, I was taken with the most acute and painful rheumatism all through my system that ever was known.
"I called the doctors again, and after several weeks they left me a cripple on crutches for life, as they said. I met a friend and told him my case, and he said Hop Bitters had cured him and would cure me. I pooh-ed at him, but he was so earnest I was induced to use them again. In less than four weeks I threw away my crutches and went to work lightly and kept on using the bitters for five weeks, until I became as well as any man living, and have been so for six years since.
It has also cured my wife, who had been sick for years, and has kept her and my children well and healthy with from two to three bottles per year. I here is no need to be sick a[illegible]s are used
J. J. BERK, Ex-Supervisor.

"That poor invalid wife, Sister, Mother,
"Or daughter!!!!
"Can be made the picture of health!
"with a few bottles of Hop Bitters!

A MAN
WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY, WILL SEE BY EXAMINING THIS MAP, THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RAILWAY

By reason of its central position and close relation to all principal lines East and West, at initial and terminal points, constitutes the most important mid-continental link in that system of through transportation which invites and facilitates travel and traffic between cities of the Atlantic and Pacific Coasts. It is also the favorite and best route to and from points East, Northeast and Southeast, and corresponding points West, Northwest and Southwest.
The Rock Island system includes in its main line and branches, Chicago, Joliet, Ottawa, La Salle, Peoria, Geneseo, Moline and Rock Island, in Illinois; Davenport, Muscatine, Washington, Fairfield, Ottumwa, Oskaloosa, West Liberty, Iowa City, Des Moines, Indianola, Winterset, Atlantic, Knoxville, Audubon, Harlan, Guthrie Centre and Council Bluffs, in Iowa; Gallatin, Trenton, Cameron and Kansas City, in Missouri; Leavenworth and Atchison, in Kansas; Albert Lea, Minneapolis and St. Paul, in Minnesota; Watertown in Dakota, and hundreds of intermediate cities, towns, villages and stations.

THE GREAT ROCK ISLAND ROUTE

Guarantees its patrons that sense of personal security afforded by a solid, thoroughly ballasted road-bed; smooth tracks of continuous steel rail; substantially built culverts and bridges; rolling stock as near perfection as human skill can make it; the safety appliances of patent buffers, platforms and air-brakes; and that exacting discipline which governs the practical operation of all its trains. Other specialties of this route are Transfers at all connecting points in Union Depots, and the unsurpassed comforts and luxuries of its Passenger Equipment.
The Fast Express Trains between Chicago and the Missouri River are composed of well ventilated, finely upholstered Day Coaches, Magnificent Pullman Palace Sleepers of the latest design, and sumptuous Dining Cars, in which elaborately cooked meals are leisurely eaten, "good Digestion waiting on Appetite, and Health on both." Between Chicago and Kansas City and Atchison, are also run the Celebrated Reclining Chair Cars.

THE FAMOUS ALBERT LEA ROUTE

Is the direct and favorite line between Chicago and Minneapolis and St. Paul, where connections are made in Union Depots for all points in the Territories and British Provinces. Over this route, Fast Express Trains are run to the watering places, summer resorts, picturesque localities, and hunting and fishing grounds of Iowa and Minnesota. It is also the most desirable route to the rich wheat fields and pastoral lands of Interior Dakota.
Still another DIRECT LINE, via Seneca and Kankakee, has been opened between Newport News, Richmond, Cincinnati, Indianapolis, and Lafayette and Council Bluffs, Kansas City, Minneapolis and St. Paul and intermediate points.
For detailed information see Maps and Folders, obtainable, as well as Tickets, at all principal Ticket Offices in the United States and Canada; or by addressing
R. R. CABLE, President and General Manager, Chicago.
E. ST. JOHN, General Ticket and Passenger Agent, Chicago.

Senator Sawyer's Parable.

From the Indianapolis Journal.

There was rather an amusing incident at the Ebbitt House a day or two ago. Senator Sawyer, of Wisconsin, who was here en route to New York, met Senators Beck and Harris at the hotel, and after passing the compliments of the day, said: "Well, gentlemen, how do you like the new administration?"

"Well," said Senator Beck, after waiting in vain to hear from Harris, I, am tolerably well satisfied. It beats the administration which preceded it, anyhow. Yes, I am pretty well satisfied."

"So am I," said Harris, in a way that showed that he was about as happy as Beck, who, everybody knows, is not happy at all.

"Well," said Senator Sawyer, "I think I can tell you a story that will illustrate about how well you are pleased. Now promise me that if I hit it right the first time you will own up."

So they promised.

"Well," he said, "there were a dozen fellows up in our pine timber country who [illegible] another one fall to go into the woods and cut logs. They hadn't much money, and their plan was to work together, incurring just as little expense as possible, run their logs together, and, after marketing them in the spring, divide the money equally. This plan was acceptable to all, when it occurred to some one that they should have decided who should be cook for the party. It was positively necessary that some one should do the cooking, for they were determined not to hire a cook. So they all fought against the duty. But some one must do it, and so it was decided that they should draw lots, and the one getting the longest should be cook, but if any fellow complained of the cooking he should take that duty himself and excuse the first one selected. So they went into camp, and the first duty that the new cook essayed was to cook a pot of beans. By some chance he got them altogether too salty, so much so that they were entirely unfit to eat. The men were hungry, however, and at meal time were promptly on hand for their beans. Some of the more cautious tasted them in silence, but one fellow, who was especially hungry and fretful, bolted a whole mouthful, and springing to his feet, shouted in his disappointment, 'Great heavens, how —— salty these beans are!' Then suddenly recalling their agreement about the fate of the first kicker, sat himself down quickly, and resumed his meal with the remark, 'but then I like them salty.'"

There was a roar from the politicians who had gathered around to hear the conversation, and Beck and Harris said quietly: "I guess you are right, Sawyer; we are pleased with the Administration, but we like salt."

A New York church congregation recently made quite a ceremony of the burning of a mortgage which, "in the order of Providence," they had been enabled to pay off. After the sermon the pastor stepped down from the chancel and took from within his vest a folded manuscript. "This," said he, "is a mortgage. Until now I've never seen one. Have you any idea what the holders of this bond could do? They could turn you out of your church, but, thank heaven, they can't do it now, for it is paid." He then tore the paper into slips, and crumbling the pieces into a ball, placed it on a tray. Lighting a small lamp, he ignited the ball, and while the congregation sang the doxology, the mortgage paper of $6,000 was burned to ashes. When the services ended, the trustees assembled and held a second cremation. Upon the same tray which held the ashes of the mortgage the note was burned. During the service many of the older members were moved to tears. The ashes are now inclosed in a sealed envelope, but will be placed in a silver urn, which, with the lamp, will be inclosed in a glass case and hung in the parlor of the church.

An Enterprising, Reliable House.

W. D. Nydegger can always be relied upon, not only to carry in stock the best of everything, but to secure the Agency for such articles as have well-known merit, and are popular with people, thereby sustaining the reputation of being always enterprising, and ever reliable. Having secured the Agency for the celebrated Dr. King's New Discovery for Consumption, will sell it on a positive guarantee. It will surely cure any and every affection of Throat, Lungs, and Chest, and to show our confidence, we invite you to call and get a Trial Bottle Free.

Everything is good which takes away one plaything and delusion more, and drives us home to add one stroke of faithful work.

Trade Reviving.

The Philadelphia *Press* prints several columns of special dispatches from all parts of Pennsylvania on the condition of trade. The following is summary of the dispatches: A revival of business in many lines, and a constant expectation of further improvement are reported. The greatest prosperity is shown in the oil regions, where confidence seems perfectly restored, in spite of a belief a few weeks since that the advance in oil was chiefly speculative. Reports of the iron trade are somewhat conflicting, but many Eastern mills show marked prosperity. The bituminous coal trade has been somewhat injured by the extended use of natural gas and in the anthracite region there is lack of confidence and an apparent fear to base sanguine calculation on the present improvement. Among the most discouraging are those from the Susquehanna lumber region, though Williamsport seems prosperous in spite of an over-stocked market. Most industries at Chester droop in sympathy with the paralysis at the great ship yards, but from other parts of Delaware county the reports are cheering. Reports from the purely agricultural counties indicate conditions varying with the quality of the crops. Perry county sends, perhaps, the gloomiest message, and generally the region west of the Susquehanna seems less active than the eastern counties. Among the most cheerful reports are those from Columbia, Easton, Bradford, Titusville, Media and Tottstown.

A Remarkable Will.

An old French physician of St. Mande, who had for years lived a hermit's life, died a few days ago, and when the relations put in an appearance the following will was found: "8th of January, 1882. This is my will and testament. At the present moment I consider myself bodily healthy, but cannot swear that I am so in mind. Such ridiculous presumption I bequeath to others. My fortune amounts to 70,000 francs How many hypocritical tears might I have purchased for such a sum. I intended at first to devote these 70,600 francs to a beneficient object; but I asked myself, what would be the use of this? The only benefactors of mankind are war and cholera. Besides this, I am under obligations to my dear wife, Celestine Melanie, of whose whereabouts I have not the slightest idea. She once did me a great kindness. She left me one beautiful morning, and I have never heard of her since. With the most heartfelt thankfulness I appoint her my heir-in-law, but subject to the following condition, that she marry again immediately, so that at least there may be one man who will deeply deplore my death."

Both houses of the Georgia Legislature have passed a local-option bill and it is now a law. The bill provides that upon the application for prohibition signed by one-tenth of the voters in any county, the ordinary shall hold an election to determine whether or not spirituous liquors shall be sold in that county. All persons qualified to vote for members of the General Assembly are qualified to vote in this election. The tickets shall be written "For Sale" and "Against Sale." If the result of the election should be against the sale, the ordinary shall give notice once a week for four weeks, and the act shall take effect as soon as the result is ascertained except as to the vested rights of persons whose annual license has not expired. If the result of the election should be "for sale," no other election on the question shall be held in that county within less than two years.

Convenient to Church.

"How do you like your new home Mrs. Gazatem?"

"Splendid! It's a charming place."

"I'm so glad to hear it, for I was afraid you would not like it."

"On what account?"

"Why, the church across the way. It would be an annoyance to some."

"Why, that's just what makes the place so lovely, according to my notion. It's a privilege I never enjoyed before, for without taking the trouble to dress and go out I can peep through the blinds, and look at the fashions until my eyes ache, and if I want to grit my teeth I can do it, and nobody's the wiser. It's perfectly splendid, and makes a body feel as contented as a wax figure in a show window."

Jumbo, the celebrated large elephant, which was imported from the London Zoological Garden in the spring of 1882, was killed on the Grand Trunk Railroad half a mile east of St. Thomas, Ontario, week before last. His keeper was leading him along the track when a freight train came up behind unnoticed and ran him down. He was injured so badly that he died in 30 minutes.

NEW ADVERTISEMENTS.

A Remarkable Case.

Mrs. Henry Ellis, 500 Scott street, Milwaukee, Wisconsin, writes: "DR. S. B. HARTMAN & CO., COLUMBUS, O.: I am induced by a sense of duty to the suffering to make a brief statement of your remarkable cure of myself. I was a most miserable sufferer from the various annoying and distressing diseases of delicate persons, which caused me to be confined to my bed for a long time, being too weak to even bear my weight upon my feet. I was treated by the most reputable physicians in our city, each and all saying they could do nothing for me. I had given up all hopes of ever being well. In this condition I began to take your MANALIN and PERUNA, and I am most happy to say in three months I was perfectly well —entirely cured, without any appliances or support of any kind."

Mr. G. A. Proehl, New Portage, Summit County, Ohio, writes: "My wife has been sick for about five years. In the first place the doctor called it leucorrhœa, and treated it about one year, and she grew worse, and turned to ulceration of the womb, and was treated for that two years, but she grew worse and the doctor gave her up. Then I employed Dr. Underwood, one of the best doctors of Akron, but under his treatment she grew worse. She was paralyzed; she had lost all of the sense of feeling and her eyesight. She could not walk for nearly two years. About six months ago Underwood gave her up. She tried your PERUNA. She has taken three bottles, and it is worth a good than any other medicine. The paralysis has about left her; her eyesight is getting better. We will continue the use of PERUNA until she is well."

Mr. Isaac Nicodemus, Schellsburg, Bedford County, Pa., writes: "I am induced, by a sense of duty to the suffering, to make a brief statement of your remarkable help, as a sufferer of catarrh in my head and throat. I doctored with one of the best physicians in our place for that dreaded disease, catarrh, and found no relief. But in 1883 I lost my speech, and was not able to do any kind of work for near three months. I could neither eat nor sleep. PERUNA and MANALIN did wonders for me. I used three bottles of PERUNA and one of MANALIN, and now I am in better health than I have been for ten years, and I can heartily recommend your medicine to all suffering from that dread disease, catarrh."

Mr. I. W. Wood, Mt. Sterling, Ohio, says: "Your medicine gives good satisfaction. My customers speak highly of its curative properties."

TRUSTEE'S SALE!

The undersigned having been appointed trustee under and by virtue of a decree passed by the Circuit Court for Garrett county, in Equity in a cause wherein Henry A. Shaffer is plaintiff, and John M. B. Shaffer and others are defendants, I will on the

20th Day of October, A. D. 1885,

at 11 o'clock A. M., in front of the Glades Hotel in Oakland, offer at public sale, the real estate described in said decree, it being the farm of which Albert Beard, died, seized and possessed.

The said farm contains

163 ACRES OF LAND,

more or less. There are about 25 acres under fence and cultivation, the balance is in timber. It is well watered and is improved by a

DWELLING HOUSE,

barn, dairy and other out-buildings.

This property is situated in Election District No. 8, about 12 miles from Oakland, and would make a comfortable home for a man of small means.

TERMS—as prescribed by the Decree are—One-third cash on the day of sale; one-third in one year, and one-third in two years, the purchaser to give his note with security to be approved by the trustee for the deferred payments.

HENRY A. SHAFFER,
9 26 4t. Trustee.

W. A. WORTMAN,

WATCHMAKER & JEWELER.

PRITCHARD BUILDING,

OAKLAND, - - MARYLAND

A full line of Watches, Clock, Silverware, &c., &c., always in stock, of the very best quality for the money.

REPAIRING OF ALL KINDS Neatly and Promptly Done.

SATISFACTION GUARANTEED.

Call and see my stock before purchasing elsewhere. I will take pleasure in showing my goods.

W. A. WORTMAN.
Oakland, Md., June 29th, 1885.—tf.

FOR RENT!

50 acres desirable land, fenced; easily cultivated, on Pond Run, 2½ miles Northeast of Deer Park, between the farms of Ramsey Browning and L. A. Stemple.

Apply to
EDWARD A. OSSE.
57 N. Calvert St., Baltimore, Md.
July 22d, 1885.—6t.

FOR SALE

Valuable Property in Deer Park.

A store and dwelling house combined, which is directly opposite the village ticket-office. Also two good-sized dwelling houses with stable, gardens and all necessary out buildings.

For terms and additional particulars, apply to W. H. Tower, Clerk of Court, Oakland, or to E. C. Tillson, Deer Park.

NOTICE.

All persons are warned against cutting down any of the timber on my land on the Hooppole Road, adjoining the land of Bowie Johnson, about three miles from Deer Park and six miles from Oakland. The penalty for cutting down timber in Garrett county, Md., without permission of the owner of the land, is the same, under the Act of 1880, ch. 264, as for feloniously *stealing* goods or chattels to the value of the tree or trees" so cut down.

THEOS. B. HORWITZ.

FOR SALE!

A 152 ACRE FARM.

The undersigned offers for sale a small farm, on the waters of Lead Mine Run, Tucker county, W. Va. This property is known as the "Hershlin Place," and adjoins lands of the widow Schrader and others. There are about 50 acres in the tract, which is well timbered.

For terms, &c., apply to or address

Estate of John Airronhalt, deceased.

THIS IS TO GIVE NOTICE—That the subscriber, of Garrett county, hath obtained from the Orphans' Court of Garrett county, in Maryland, Letters Testamentory on the personal estate of

JOHN AIRRONHALT,

of Garrett county, Md., dec'd. All persons having claims against the deceased are hereby warned to exhibit the same, with the vouchers thereof legally authenticated, to the subscriber, on or before the 15th day of March next; they may otherwise by law be excluded from all benefit of said estate. Given under my hand this 22d day of September, 1885.

JOHN W. HARVEY,
9 26 3t. Executor.

An Old Soldier's EXPERIENCE.

"Calvert, Texas,
May 3, 1882.

"I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy.

"While with Churchill's army, just before the battle of Vicksburg, I contracted a severe cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYER'S CHERRY PECTORAL.

"I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AYER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

PREPARED BY

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.

Sold by all Druggists.

NEW ADVERTISEMENTS.

HALL'S VEGETABLE SICILIAN Hair Renewer.

Seldom does a popular remedy win such a strong hold upon the public confidence as has HALL'S HAIR RENEWER. The cases in which it has accomplished a complete restoration of color to the hair, and vigorous health to the scalp, are innumerable.

Old people like it for its wonderful power to restore to their whitening locks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beautiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply because it deserves to.

BUCKINGHAM'S DYE FOR THE WHISKERS

Has become one of the most important popular toilet articles for gentlemen's use. When the beard is gray or naturally of an undesirable shade, BUCKINGHAM'S DYE is the remedy.

Crazy Quilt Architecture.

The following from the pen of Bill Arp, in the *Chattanooga Times*, *The American Architecture and Building* describes a few thinks, contains more truth than fiction:

I may be premature, perhaps, but I desire to suggest to any one who may be contemplating the erection of a summer residence for me, as a slight testimonial of his high regard for my sterling worth and symmetrical estimation—a testimonial more suggestive of earnest admiration and warm personal friendship than of great intrinsic value, etc.—that I hope he will not construct it on the modern plan of mental hallucination and morbid delirium tremens peculiar to recent architecture.

Because a man ought not to look a gift house in the gable end, but if my friends don't know me any better than to build me a summer house, and throw in odd windows that nobody else wanted, and daub it up with colors they have bought at auction, and applied to the house after dark with a shotgun, I think it is time we had a better understanding.

Such a structure does not come within either of the three classes of Renaissance. It is neither Florentine, Roman nor Venitian. Any man can originate a style of architecture if he will drink the right kind of whisky long enough, and then describe his feelings to an amanuensis. Imagine the sensation that one of these modern, sawed-off cottages would create a hundred years from now, if it should survive. But that is impossible. The only cheering feature of the whole matter is that these creatures of a disorded imagination must soon pass away, and the bright sunlight of hard horse-sense shine in through the shattered dormers and gables of gnawed off architecture of the average summer resort. A friend of mine a few days ago showed me his new house with much pride. He asked me what I thought of it. I told him I liked it firstrate. Then I went home and wept all night. It was my first falsehood.

The house taken as a whole looked to me like a skating rink that had started out to make money, and then suddenly changed its mind, and resolved to become a tannery. Then ten feet higher it had lost all self-respect, and blo-somed into a full-blown "drunk and disorderly," surmounted by the smoke stack of a foundry, and with the bright future of thirty days ahead with the chain gang. That's the way it looked to me.

The roofs were made of little odds and ends of misfit rafters and distorted shingles that somebody had purchased at sheriff's sale, and the rooms and stairs were giddy in the extreme. I went in and rambled around among the cross-eyed staircases and other nightmares till reason tottered on her throne. Then I came out and stood on the architectural wart called the side porch, to get fresh air. This porch was painted of dull red, and it had wooden rosettes at the corners that looked like a brand new carbuncle on the nose of a social wreck. Farther up on the demoralized lumber pile I saw now and then places where the workman's mind had wondered, and he had nailed on his clapboards wrong side up, and then painted them with Paris green that he had intended to use on something else. It was an odd-looking structure indeed. If my friend got all the materials for nothing from people who had fragments of paint and lumber left over after they failed, and then if the workmen constructed it at nights for mental relaxation and intellectual repose, without charge, of course the sceme was a financial success, but architecturally the house is a gross violation of the statutes in such cases made and provided, and against the peace and dignity of the state.

There is a look of extreme poverty about the structure which a man might struggle for years to acquire and then fail. No one could look upon it without feeling a heartache for the man who built that house, and probably struggled on year after year, building a little of it at a time as he could steal the lumber, getting a new workman each year, building a knob here and a protuberance there, putting in a three-cornered window at one point and a yellow tile or a wad of broken glass or other debris at another, patiently filling in around the ranch with any old rubbish that other people had got through with, and painting it as he went along, taking what was left in the bottom of the pot after his neighbors had painted their bob sleds or their tree boxes—little favors thankfully received—and then surmounting the whole pile with a potpourri of roof, a grand farewell incubus of bumps and hollows for the rain to wander through and seek out the different cells where the lunatics live who inhabit it.

I did tell my friend of one thing that I thought would improve the looks of his house. He asked me eagerly what it could be. I said it would take a man of great courage to do it for him. He said he didn't care for that. He would do it himself. If it only needed one thing, he would never rest until he had it, whatever that might be. Then I told him that if he had a friend—one that he could trust—who would steal in there some night when the family were away, and scratch a match on the leg of his breeches, or on the breeches of any other gentleman that was present, and hold it where it would ignite the alleged house, and then remain to see that the fire department did not meddle with it, he would confer a great favor on one who would cheerfully retaliate in kind at ca

About Choosing a Husband.

No sensible man, no man whose affection is worth retaining, is driven away by being told by the lady of his choice that she likes him, that she feels that in time she may come to love him, but that her heart is not yet his. If he really loves her he will come back again, and it is pretty certain that he will learn before a second asking whether his affection is returned or not. But a girl, if she can not always choose, can always refuse; and generally her difficulty is this. It is evident that this man is making love to me. I do not love him, but I think I might do so if I choose; shall I choose or shall I forbear? It is here that the power of choice comes in, and it is here that the voice of prudence must be heard, if it is to be heard at all.

In such circumstances a girl will act wisely if she gives considerable weight to the general opinion that is held of the gentleman in question by his professional brethren or his business acquaintances. It is, in short, not the man who is agreeable among women, but he who is well liked by his own sex, who is the man to choose for a husband. A mother, of course, always speaks well of her son; it is not what she says of him, but his behavior to her, that is to be looked to. A woman may feel certain of this point, that as a man now treats his mother and sisters, so he will treat her six months after marriage.

All this may seem very cold-blooded, very far removed from the tender feeling which courtship induces. But, after all, a girl has a choice to make—a choice upon which the whole happiness of her life will depend; and there is always a time, whether she notices it or not, before she parts with the control of her heart, at which she ought to listen to her judgement. Without better judgement than her own feelings she is very likely to make a mistake, but if she can assure herself that her lover is a man who is respected and liked by his male friends, and is a favorite at home, she may be pretty sure that in listening to his love she is choosing wisely.

A Walking Skeleton.

Mr. E. Springer, of Mechanicsburg, Pa., writes: "I was afflicted with lung fever and abscess on lungs, and reduced to *a walking skeleton*. Got a free trial bottle of Dr. King's New Discovery for Consumption, which did me so much good that I bought a dollar bottle. After using three bottles, found myself once more a man, completely restored to health, with a hearty appetite, and a gain in flesh of 48 lbs." Call at Nydegger's Drug Store and get a free trial bottle of this certain cure for all Lung Diseases. Large bottles 50c and $1.00.

The following mixtures are recommended for coating plows and tools in order to keep them from rusting. Dissolve one ounce of rosin in four ounces of linseed oil, and add one quart of kerosene, stirring the mixture well. Apply in a warm condition. Another method is to dissolve an ounce of camphor in turpentine and add four ounces of lard and one ounce of pulverized black lead or stove polish; mix well and rub on with a rag.

Don't allow the accumulation of Scurf or Dandruff, when it can be so easily prevented by the use of Ayer's Hair Vigor.

"Tiss Me, Papa."

A well to-do-citizen of New York, who is a hard drinking man, had a sweet little daughter to whom, when sober, he was devotedly attached, but when drunk he was inclined to be ugly. In the latter condition he was frequently in the habit of calling her to him for a kiss. If she hesitated, the maudlin beast would wrap her on the head with his cane, knuckles or whatever came handy. The result was, that after a while his mere approach served to throw his little one almost into convulsions in anticipation of the blows she expected to receive. All this appeared to please the brute while he played upon her fears, and the shyer she grew the severer grew the punishment that followed the enforced caress. Finally she was taken ill, and the physician who was summoned pronounced it a case of brain fever. On examining her head it was found to be full of knots and bruises. It was unnecessary to make a further diagnosis and the father was informed that the child must die. The intelligence sobered him, and he insisted on being present at her bedside continuously. Just before the child breathed her last she looked at him wearily, while her head tossed from side to side in pain and said: "Papa, I ain't afraid of oo now, oo may tiss me now as much as oo please, and oo may knock my poor head, too, if oo wants, papa, for I ain't going to tubble oo any more!" and with that she turned her baby face to the wall and slept the sleep that knows no waking. The father, recognizing at last what he had done, uttered a cry and fell insensible to the floor. The physician who described the scene says he has in the father another patient who will never recover, for his mind is gone and he wanders hopelessly around the house moaning and weeping for his murdered child.

Puzzles for Boys.

Boys should never go through life satisfied to be always borrowing other people's brains. There are some things they should find out for themselves. There is always something waiting to be found out. Every boy should think some thought that shall live after him. A farmer's boy should discover for himself what timber will bear the most weight, which is the most elastic, what will last longest in water, what is the best time to cut down trees for fire-wood. How many kinds of oak grow in your region? How does a bird fly without moving a wing or feather? How does a snake climb a tree or brick wall? Is there any difference between a deer's track and a hog's track? What is it? How often does a deer shed its horns, and what becomes of them? In building a chimney, which should be the largest, the throat or the funnel? Should it be wider at the top, or draw in?

The boys see white horses. Did they ever see a white colt? Do they know how old the twig must be to bear peaches and how old the vine is when grapes first hang upon it? There is a bird in the forest which never builds a nest, but lays its eggs in the nest of other birds. Can the boys tell what that bird is? Do they know that a hop vine alway winds with the sun, but a bean vine always winds the other way? Do they know that when a horse crops grass he eats back toward him; but a cow eats outward from her, because she has no teeth upon her upper jaw and has to gum it?—*Chatterbox.*

Went to Bed with a Swarm of Bees.

Missouri Republican.

A man living in Dalton, who has been under the treatment of a physician for rheumatism, a short time ago dismissed his physician and undertook the bee remedy. Divesting himself of his clothing, he got into bed and covered up, and told his attendant he was ready. A swarm of young bees was then put into the bed with him and the remedy commenced, It took four men to bring him back the house and it would have required forty to have put him in the bed again. He still has the rheumatism.

To commit the execution of a purpose to one who disapproves of the plan of it is to employ but one-third of the man; his heart and his head are against you; you have commanded only his hands.

It is just as well that a majority of people have trouble. They would go out and borrow it if they did not have it in the house.

BLACKSMITHING.

I am prepared to do all kinds of blacksmithing. Farmers' work a specialty. Prices as low as can be had for first class work. Shop near "Browning House."

1?24 DAVID LITTLE.

AYER'S Ague Cure

contains an **antidote for all malarial disorders** which, so far as known, is used in no other remedy. It contains no Quinine, nor any mineral nor deleterious substance whatever, and consequently produces no injurious effect upon the constitution, but leaves the system as healthy as it was before the attack.

WE WARRANT AYER'S AGUE CURE to cure every case of Fever and Ague, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Bilious Fever, and Liver Complaint caused by malaria. In case of failure, after due trial, dealers are authorized, by our circular dated July 1st, 1882, to refund the money.

Dr. J. C. Ayer & Co., Lowell, Mass.
Sold by all Druggists.

NEW ADVERTISEMENTS.

HALL'S VEGETABLE SICILIAN Hair Renewer.

Seldom does a popular remedy win such a strong hold upon the public confidence as has HALL'S HAIR RENEWER. The cases in which it has accomplished a complete restoration of color to the hair, and vigorous health to the scalp, are innumerable.

Old people like it for its wonderful power to restore to their whitening locks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beautiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply because it disappoints no one.

BUCKINGHAM'S DYE

FOR THE WHISKERS

Has become one of the most important popular toilet articles for gentlemen's use. When the beard is gray or naturally of an undesirable shade, BUCKINGHAM'S DYE is the remedy.

Crazy Quilt Architecture.

The following from the pen of Bill [illegible], in the *Chattanooga Times*, *The American Architecture and Building* [illegible] thinks, contains more truth than fiction:

I may be premature, perhaps, but I desire to suggest to any one who may be contemplating the erection of a summer residence for me, as a slight testimonial of his high regard for my sterling worth and symmetrical esprit de corps—a testimonial more suggestive of earnest admiration and warm personal friendship than of great intrinsic value, etc.—that I hope he will not construct it on the modern plan of mental hallucination and morbid delirium tremens peculiar to recent architecture.

I suppose a man ought not to look a gift house in the gable end, but if my friends don't know me any better than to build me a summer house, and throw in odd windows that nobody else wanted, and daub it up with colors they have bought at auction and applied to the house after dark with a shotgun, I think it is time we had a better understanding.

Such a structure does not come within either of the three classes of Renaissance. It is neither Florentine, Roman nor Venitian. Any man can originate a style of architecture if he will drink the right kind of whisky long enough, and then describe his feelings to an amanuensis. Imagine the sensation that one of these modern, sawed-off cottages would create a hundred years from now, if it should survive. But that is impossible. The only cheering feature of the whole matter is that these creatures of a disorded imagination must soon pass away, and the bright sunlight of hard horse-sense shine in through the shattered dormers and gables of gnawed off architecture of the average summer resort. A friend of mine a few days ago showed me his new house with much pride. He asked me what I thought of it. I told him I liked it firstrate. Then I went home and went all night. It was my first falsehood.

The house taken as a whole looked to me like a skating rink that had started out to make money, and then suddenly changed its mind, and resolved to become a tannery. Then ten feet higher it had lost all self-respect, and blossomed into a full-blown "drunk and disorderly," surmounted by the smoke stack of a foundry, and with the bright future of thirty days ahead with the chain gang. That's the way it looked to me.

The roofs were made of little odds and ends of misfit rafters and distorted shingles that somebody had purchased at sheriff's sale, and the rooms and stairs were giddy in the extreme. I went in and rambled around among the cross-eyed staircases and other nightmares till reason tottered on her throne. Then I came out and stood on the architectural wart called the side porch, to get fresh air. This porch was painted of dull red, and it had wooden rosettes at the corners that looked like a brand new carbuncle on the nose of a social wreck. Farther up on the demoralized lumber pile I saw now and then places where the workman's mind had wondered, and he had nailed on his clapboards wrong side up, and then painted them with Paris green that he had intended to use on something else. It was an odd-looking structure indeed. If my friend got all the materials for nothing from people who had fragments of paint and lumber left over after they failed, and then if the workmen constructed it at nights for mental relaxation and intellectual repose, without charge, of course the sceme was a financial success, but architecturally the house is a gross violation of the statutes in such cases made and provided, and against the peace and dignity of the state.

There is a look of extreme poverty about the structure which a man might struggle for years to acquire and then fail. No one could look upon it without feeling a heartache for the man who built that house, and probably struggled on year after year, building a little of it at a time as he could steal the lumber, getting a new workman each year, building a knob here and a protuberance there, putting in a three-cornered window at one point and a yellow tile or a wad of broken glass or other debris at another, patiently filling in around the ranch with any old rubbish that other people had got through with, and painting it as he went along, taking what was left in the bottom of the pot after his neighbors had painted their bob sleds or their tree boxes—little favors thankfully received—and then surmounting the whole pile with a potpourri of roof, a grand farewell incubus of bumps and hollows for the rain to wander through and seek out the different cells where the lunatics live who inhabit it.

Just before the child breathed her last she looked at him wearily, while her head tossed from side to side in pain and said: "Papa, I ain't afraid of oo now, oo may tiss me now as much as oo please, and oo may knock my poor head, too, if oo wants, papa, for I ain't going to tubble oo any more!" and with that she turned her baby face to the wall and slept the sleep that knows no waking. The father, recognizing at last what he had done, uttered a cry and fell insensible to the floor. The physician who described the scene says he has in the father another patient who will never recover, for his mind is gone and he wanders hopelessly around the house moaning and weeping for his murdered child.

Puzzles for Boys.

Boys should never go through life satisfied to be always borrowing other people's brains. There are some things they should find out for themselves. There is always something waiting to be found out. Every boy should think some thought that shall live after him. A farmer's boy should discover for himself what timber will bear the most weight, which is the most elastic, what will last longest in water, what is the best time to cut down trees for fire-wood. How many kinds of oak grow in your region? How does a bird fly without moving a wing or feather? How does a snake climb a tree or brick wall? Is there any difference between a deer's track and a hog's track? What is it? How often does a deer shed its horns, and what becomes of them? In building a chimney, which should be the largest, the throat or the funnel? Should it be wider at the top, or draw in?

The boys see white horses. Did they ever see a white colt? Do they know how old the twig must be to bear peaches and how old the vine is when grapes first hang upon it? There is a bird in the forest which never builds a nest, but lays its eggs in the nest of other birds. Can the boys tell what that bird is? Do they know that a hop vine alway winds with the sun, but a bean vine always winds the other way? Do they know that when a horse crops grass he eats back toward him; but a cow eats outward from her, because she has no teeth upon her upper jaw and has to gum it?—*Chatterbox*.

Went to Bed with a Swarm of Bees.

Missouri Republican.

A man living in Dalton, who has been under the treatment of a physician for rheumatism, a short time ago dismissed his physician and undertook the bee remedy. Divesting himself of his clothing, he got into bed and covered up, and told his attendant he was ready. A swarm of young bees was then put into the bed with him and the remedy commenced, It took four men to bring him back the house and it would have required forty to have put him in the bed again. He still has the rheumatism.

To commit the execution of a purpose to one who disapproves of the plan of it is to employ but one-third of the man; his heart and his head are against you; you have commanded only his hands.

It is just as well that a majority of people have trouble. They would go out and borrow it if they did not have it in the house.

The Republican.

OAKLAND, GARRETT CO., MD.

THE HARNESS-MAKER'S WOOING.

"I never went to school, Miss May,
And sew I'm not horse-collar,
But I'm as harnessed as the day,
And not 'strapped' for a dollar."

She guessed his spur-pose, and at once
Said to the harness-maker:
"You show no traces of a dunce
In being a heart-breaker."

Then he got harness knees. Sighed he:
"Your sweet words stirrup in me
A hope that you my bridle be—
O try a bit to win me."

"O, no, surcingle will I stay,
Ere I do that, dear Walter."
"Then, darling, won't you name the day
To meet me at the halter?"

"No maiden hames the day," she said,
A blushing in her beauty,
"But if you're hitching soon to wed,
You'll buckle to that duty."

"I'll name to-morrow, then," he cried,
"Lest saddle be our marriage—"
"And, if it reins," the maiden sighed,
"Whip better have a carriage."

THE BREAD WE EAT.

Some Points Relating to Its Wholesale Manufacture.

Interesting Secrets of the World's Cooking Rooms—Description of Bread Baking—How Crackers are Evolved, Etc.

A reporter made a very thorough tour of an extensive and well-known Minneapolis bakery and cracker factory. The bakers are all men. "The fact is," explained one of the firm, "that the trade is a hard one, requiring not only skill, judgment, and activity, but a far greater physical strength than women usually possess. I think housewives, as a rule, regard breadmaking as about the hardest kind of work they have to do. The making of bread in large quantities would prove far more taxing on the strength."

"How about pies and cakes?"

"Oh, they might do that. However, there is not the same inducement for them to learn a small part of a trade like that. At any rate, I know of very few women bakers."

An inspection of the actual process of bread-making, from the setting of the sponge to the time it goes into the oven under the sidewalk, convinced the visitor that the occupation is one which demands a great amount of muscle and the eminent ability to "hustle" as well. A trough full of dough under the influence of "a little leaven" shows no more inclination to wait for a man's convenience than do time, tide or the tailor. The sponge for bread or rolls is made in one end of a stationary wooden trough, about three feet wide by the same depth, and from fifteen to twenty feet long. Likely as not, another sponge is setting in the other end, and the space between is conveniently dammed with flour. Either the compressed yeast (bought in five-pound packages) or a liquid yeast made by the firm is used as leaven. Sometimes the two are combined. There is very little machine work about breadmaking. After it has "proved," or risen, two able-bodied men go to the bottom and haul up the lower stratum to the surface, and everlastingly agitate the mass for fifteen or twenty minutes. Because of the depth of the trough and the mass of dough, usually sufficient for two or three hundred loaves, and the dispatch with which the work must be done to get it out of the way before another batch comes on, the process does not appear in the light of a recreation exactly. The reporter thought he knew of nothing but base ball that would demand so much concentrated strength combined with activity. The bread is left in the trough to rise after this kneading. It lies there perhaps an hour and a half, and is then lifted out upon a floured table and tackled by four men. The first cuts off a lump of dough about as large as his two hands. The second lays it on a pair of scales and pinches off a bit or adds a morsel, so as to make the "pound nominated on the bond." A single addition or subtraction makes it right five times in six, and the operation does not take two seconds. A man stands on each side of the table beyond him, and, seizing a pound of dough in each hand, rolls them round with quick, deft motions. Then the balls are placed regularly upon the further end of the table, where they stand fifteen or twenty minutes before they are worked out in the oblong, pointed shape in which most loaves, especially Vienna and Eureka bread, appear. The loaves, having now attained their final form, are placed in tins and encouraged to rise by a coating of egg and sugar, which excludes the air and imprisons the gas. Then they are placed on a long-handled wooden shovel and slid into an oven which has an area of probably four hundred feet, and a temperature far above that to be attained in the ordinary range oven.

The reporter had always heard and implicitly trusted the tradition that the reason that women are less successful (as it is alleged they are) than men in culinary operations lies in the fact that they have not a head for weights and measures—that they will guess and take a pinch of this and a lump of that, and, hence that the results attained at different times are as variable as the proportions of the ingredients are liable to be. Hence the expectation that these practiced scientific bakers would stick close by their weights and measures and thermometers—which expectation was very far from the facts.

"Oh, no," said the head bread-baker, "in mixing we just keep adding flour and water until the dough is of the right consistency, you know. Then, as to the temperature of the oven, I can tell that by running my hand in. So about the time of rising. That varies with the temperature of the room, and there can be no rule about it. We use our judgment, and so does any woman, if she has any. There is no such thing as baking by an exact rule any more than there is about bringing up a family."

"Is there any secret about your Eureka and Vienna bread that you can't give out?"

"None at all. The Vienna bread is mixed with sweet milk instead of water, and that is all the difference. The Eureka bread has a pound of lard and a pound and a quarter of sugar to every 150 pounds of flour, and that, and the facilities we have for a high, even temperature in baking, make all the difference there is. We use a pound of compressed yeast to 150 of flour in setting the sponge. A great deal, of course, depends on the yeast. If that is not first class you may as well 'throw up the sponge' at once.

"In making rolls, they are placed in a steam-box and made to rise twice as fast. The rolls are not weighed, but guessed at. A man makes one in each hand, and you may see him pick a piece off one, and add it to the other, to get them about the same size. Our brown bread we bake in pails for two and one-half hours. It has corn, graham, and rye flour in it. Rye bread we raise with a little salt—no yeast. The Vienna and rye loaves are raised in cloths, without pans, and are baked right on the bottom of the oven.

A visit to the cake, pie, and turnover department was not less interesting. These viands are all made by hand except that the eggs are beaten by a machine. Out of one dough mixture as a foundation half a dozen different sorts of cake may be made by the addition of some slight ingredient. But the science comes in knowing "what kind of an oven," as women say, to use for each variety. The decorative material is ordinary frosting, made out of pulverized white sugar and eggs, with enough acid, lemon, or cream of tartar to cut the grain off the sugar. The frosting is put into a cloth or rubber bag and squeezed out through a tube, just as the paints with which plaques and landscapes are evolved. There is an endless variety of tubes through which stars and garters and different styles of posies and foliage are squeezed. The liner work, however, such as the tracing of vines, birds, and other elaborate patterns, is done with a minute tracing tube, and gives room for real freehand drawing rather than mechanical execution. The more elaborate solid pieces, such as wedding bells, horseshoes, cooing doves, and palpitating hearts, which surmount the most pretentious table architecture, are made of gum paste, and are not edible, so the foreman of the cake department said. They are imported from Italy along with organ-grinding and macaroni.

"What is the work of an apprentice at the baker's art?"

"Well, he begins by sweeping up the floor, washing dishes, and doing odd jobs of any sort. Then he dusts the turnovers with powdered sugar, or beats the eggs, or paints over the loaves before they go into the oven—anything for which he is needed. If he is apt and industrious he ought to know his business pretty well in three or four years; but it is a trade in which there is always something new to be learned, and there is a wonderful facility to be gained in practice."

The cracker factory, which is an immense business in itself, was yet to be inspected. While the bread, cakes and pies go to feed hungry Minneapolitans only, the crackers are largely shipped to supply outside demands.

The process of cracker making was found to be more mechanical and less freehand than bread, pie or cake making. Winter wheat is used exclusively. Crackers made from spring sown wheat are tough and springy. The cracker sponge is set over night in an immense trough, and is worked the next morning through a patent screw mixer. The dough comes out in round columns about a foot through, and is dumped back two or three times until it is well kneaded. Then it is sent down through a chute in the floor to the platform, from which it is fed in sections to three rollers, one after another. The piece is passed under each one several times, and the rollers are so graded that the dough gradually thins and lengthens out as it proceeds. It finally passes into what is called the "form," which determines the width of the strip of dough. This strip is then started upon a canvas revolving belt, over which is a large revolving bush, which constantly dusts flour upon it. Two or three feet further on the dough comes under the stamp, operated also by machinery, and the crackers are given any one of the dozens of shapes known to the trade and families. If it is the usual square soda cracker, there will be five in a row, and the strip, of course, is endless as long as the dough holds out. As they emerge from under the stamp a boy stands ready with a sort of very thin wooden shovel, without raised edges, and with a handle several feet long, and with this instrument called a "peel," he takes off a section about three feet long, which he dexterously flirts with a twist of the wrist into the oven, or rather upon one of the immense revolving iron shelves which are contained in the oven. These shelves are about three feet wide and fifteen feet long, and one revolution serves to bake the crackers a delicate brown. As they come up done, another boy stands with a rake and hauls them unceremoniously into larger baskets, in which they are transferred by elevator to the third floor for packing. When only partially cooled they are put away by girls into barrels and boxes neatly lined with white paper, and are left uncovered until cooled and dried. While still warm they have a toughness which makes it possible to handle them in a way that would break them into bits when cold.

In getting a perfect edge on the outside rows of crackers a strip about three-quarters of an inch wide is incidentally sacrificed on each side, and this thrown back into the general mass of dough, is supposed to greatly improve it. The batch must consequently improve from first to last, as the amount of scraps keeps climbing up toward a majority. Cracker dust is another branch of the manufacture. Any crackers that may have been broken in handling or packing are ground fine and sold, principally to hotels and restaurants, for breading meats, oysters, and soups. All the flour sweepings are sold to farmers for cattle feed, so there is little actual waste anywhere about.—*Minneapolis Tribune.*

QUEENSLAND.

A Country for a White Man to Stay Away From.

Mr. Finch-Hatton has written a book on Queensland. Much as he has to say in its praise, it hardly strikes one as an eligible place for the white man. This is his description of Mackay, the first place he landed at:

"Of all horrible places to live in, the worst is a small coast town in Queensland. They are all alike. There is not a green thing to be seen anywhere. Dust is everywhere, inches deep in the streets that are not macadamized; and thus bushes, houses, and everything were powdered over with it. The population was under 1,000, but I counted seventeen public houses in the place.

"The cane-fields around he described as beautiful, and the River Pioneer as lovely. But it is full of alligators, which run to nineteen feet long. The scrub, as the forests of Queensland are called, is beautiful; but "the monotony of the endless timber is appalling, and it is easy to realize the terrible madness that so often comes over those who get lost in the bush. The only change is from white gum-trees on the flats to black iron-barks on the ridges, and one ridge and one flat is so like another to an inexperienced eye that it seems incredible that any one can ever find the way about. The author went to his brother's cattle station, and was put into a "slab hut," "through the spaces of which, as he lay in bed, he commanded a fine view of the surrounding country. . . . He also counted five little streamlets of water descended on his bed." On going to bed he found a huge snake coiled up in it, which turned out, luckily, to be a tame one belonging to his brother's partner. But in Queensland "there are five deadly kinds," one eight or nine feet long; but "but by far the worst is the death adder. It has this peculiarity; it does not attempt to move out of anybody's way, but lies quite still until it is touched, when it fastens with a spring upon its victim. I have never known a well-authenticated instance of recovery from it," except in the case of one Underwood, who used to let any snake bite him, and by means of an antidote never suffered harm. The Victorian Government foolishly refused to give him £10,000 for his secret, and as he one day let a snake bite him when he was drunk and had forgotten where he had put his antidote, this all-valuable secret died with him. Then there are other cheerful beasts. "A small black spider, about the size of a large pea, with a brilliant crimson markupon its back, frequently takes up its abode in an inhabited house, and does not want to be provoked before attacking. * * * Death is by no means an uncommon result, but more frequently the victim becomes hopelessly insane or is paralyzed." Mr. Finch-Hatton was himself bitten. He took up the piece of his leg where the bite was between the finger and thumb, and cut it clean out. "I always had some ammonia with me, and I rubbed a quantity of it in. Certainly not more than ten seconds elapsed between the time I was bitten and when I cut the piece out. But the pain was intense for days, the whole leg swelled and became soft, like dough. The place itself became a running sore, which did not heal for four months afterwards." And there are centipedes and scorpions, and "the real pests of the bush," worse than mosquitoes, the flies. Then there are the blacks, who, "even when half-tame in the settled districts, can not resist the temptation of spearing the traveler," to say nothing of lifting the cattle. Mr. Finch-Hatton's partner was "digging one day in the garden. Suddenly he became aware that half a dozen of these 'Myalls,' as they are called, were creeping at him through the long grass, armed with spears and boomerangs. He waited until they got about fifty yards off, and then, as they stood up ready to sling their spears at him, he suddenly pointed his spade at them like a gun. Two warriors fell flat down on the spot from sheer fright, upsetting a third who was just about starting to flee. Two of the remaining then tried to run away so fast that they hardly made any progress at all, and the last one, while scattering a Parthian glance at the object of terror in his rear, ran with awful violence against a gigantic gum-tree."—*Chicago Tribune.*

LAKE SAILORS.

Their Ordinary Superstitions and Their Extraordinary Fear of Red-Headed Women.

At supper we spoke again of sailors and their superstitions. The Captain said:

"Sailors on the lakes are very superstitious. Lots and lots of 'em would sooner lose a place than sail on Friday. They're awfully afraid of anything that appears the least bit supernatural. Anything in the shape of will-o'-the-wisp or St. Elmo's light will make most of 'em tremble in their shoes. Once I frightened a set of 'em half to death by muffling a lantern to give it a weird appearance, and then tying it to the yard-arm. Then they are firm believers in the power of certain things to bring luck or ill-luck, just like old Coleridge's 'Ancient Mariner' and the albatross. They're particularly timid of red-headed women. I was mate on a boat once on which a red-headed woman took passage, and the sailors complained right off. Once outside everything seemed to go wrong. Finally, we ran into a schooner and lost our jib-boom. This was too much. Half the fellows came to the Captain and actually asked to be put ashore anywhere in the woods rather than run the risk of a possible loss of life, as they said. They weren't accommodated, of course, but once in port you should have seen those fellows draw their pay and skedaddle. A red-headed Captain would either have to use hair-dye or quit the business. Cook, bring me another cup of tea."—*Louisville Courier-Journal.*

—Red squirrels lose no time in picking out the toothsome mushroom from the tempting toadstool. The cute little creature never touches the latter, but the mushroom is "nuts" to them, and no doubt they make merry when they read daily in the papers of some poisoning case of the sort. "What fools these mortals be who eat toadstools," chuckles the red squirrel.—*Troy Times.*

HOW LIVES ARE SAVED.

The System of Work Adopted by the United States Life-Saving Service.

The method of saving lives from shipwreck, at present in use at our United States Life-Saving Stations, may be best understood by supposing an actual case and describing the operations of the surfmen.

If the sea will permit, the people on the vessels are brought ashore in the surf-boat." If a high sea is running, however, this is rendered impracticable, and recourse is had to the "Breeches Buoy." When the discovery of a wreck is announced at the station, all the apparatus is at once carried along the beach to the point nearest the wreck. The Lyle gun, a small brass cannon, which weighs one hundred and seventeen pounds, is loaded with powder. Then into its mouth is slipped a long steel "projectile," to the outer end of which is attached a light but stout line, called the "shot line." Then the gun is aimed and fired. The projectile, followed by the long cord, flies out toward the wreck, passes over it, and drops into the sea, and the "shot line" falls on deck. Thus the first means of communication is established between the wreck and the shore. The crew of the vessel now pull in this "shot line," until they draw on deck a pulley block, which the men on shore have fastened to it. Through this pulley block is running an "endless line," that is, a long line which is called endless, because the two ends have been fastened together. It runs also through another pulley block, which has been kept on shore. The sailors tie their pulley block well up on the mast, and the men on shore fasten theirs to a "sand anchor," which they have firmly buried in the sand.

You have often seen the double string which children, living across the street from each other, run between their houses and call a "telegraph." It is a long, endless line, running through a pulley, or a staple, at each end, and when a basket or other article is tied to one side of the double line, and the other side is pulled in, the basket of course moves off across the street. This is like what has now been rigged between the vessel and the shore. So now the men on shore can tie anything on to the endless line, running through a pulley block at each end, and starting the circular motion of the line, soon send it out to the vessel. What they do tie on is the end of a great hawser, or heavy rope, and when this hawser is drawn on deck, it is at once fastened to the mast a few feet above the pulley block. Then the other end of the hawser, which has been kept on shore, is hauled in as tight, or "taut," as possible, and also fastened a few feet above the pulley block, which has been tied to the sand anchor. Now the "breeches buoy" is brought out by the men on shore. This is a circle, or large ring of leather stuffed, of perhaps two feet in diameter. Hanging below it is a pair of stiff canvas knee-breeches. It is now hung from the heavy hawser so that it can slide freely to and fro upon it. Then it is securely fastened to one part of the endless line, the other part of the line is hauled steadily in, and away moves the buoy, slipping along on the hawser from which it hangs, and drawn by the small endless line to which it is secured. One person is dropped in through the circle, with one leg in each side of the canvas breeches. The circular line, which has been described, is fastened also to the buoy, or rather to the pulley block of the buoy, and is again put in motion, and the buoy retraces its course to the shore. The rescued person is taken out, and again and again the buoy makes the journey, until every one on board is brought safe to land.—*Youth's Companion.*

THOROUGHLY COMPETENT.

A Steamboat Mate Who Displayed Remarkable Courage in Drowning Out Incipient Flames.

The mate of the steamer was showing me over the boat as we rushed along down the great Father of Waters. The one particular thing he wanted me to take notice of was the fact that the boat was as near fire-proof as a steamboat could be made. Fire hose was coiled up all along the various decks, nozzles all ready to play, and buckets of water were kept standing in various localities to drown out incipient fires.

"It's all right if you have a system," I said, as we finally halted.

"System is dead perfect," he replied. "At the cry of 'fire' I tap the bell. That calls all the crew to the spot. There isn't a spot on the boat which we can't reach with three streams of water, and I rather guess I'm competent to take charge. I'm an old fireman of twenty years' experience."

Well, I went off to bed by and by, but hadn't turned in yet, when somebody shouted "fire!" as loud as he could yell. I rushed out. We were bowling along within fifty feet of the shore, and away aft there was a bright blaze of flame and a rush of smoke. I started that way, but somebody ran over me, sprawled out, sprang up and I heard a splash in the water. A negro ran past me and rang the bell, and a second got down a coil of hose, opened fight on the fire, and directed matters so sensibly that the flames were soon subdued. Then the Captain came aft and roared out:

"Johnson! Johnson! Where in blazes is the mate?"

Nobody knew. We hunted for him, but he was not found. He was the old fireman of twenty years' experience who went overboard and struck out for shore at the first alarm, leaving the negro deck-hands to save the boat and one hundred and eighty lives.—*Detroit Free Press.*

—Let any farmer compute the sum which a full annual crop of apples would produce, even at a low rate per bushel, and he will be surprised to find how much more profitable his apple orchard is than any part of the farm devoted to grain growing. With good management and manuring a full crop of apples may be grown every year with as much certainty as any grain crop and with less expense.—*N. Y. Herald*

A DISAGREEABLE SET.

Indifferent People Unfit to Live in Civilized Communities.

What is my opinion of indifferent people? They are a disagreeable cross between boorishness and selfishness. They are so thoroughly devoted to themselves and their interests that they can give no thought to anybody else, and they frequently go so far in this exclusion as to be positively uncivil. I have met men who go about with their business, or their cares, so closely wrapped about them, that it was not possible for them to see the world around them. That is the way it looked to the casual observer, but I somehow thought that those men had not mind or heart enough to attend to their own affairs and be polite at the same time. There are those, too, to whom you may talk, possibly not because you want to, but because the necessities of the circumstances compel it, and they will look at you with a kind of idiotic stare which is enough to paralyze a hundred-pound rifle gun loaded to the muzzle. You've seen hundreds of that kind, and they don't seem to decrease in numbers to any remarkable extent as the world increases in civilization and refinement. I can understand and allow for a certain percentage of selfishness in the sum of our existence, but I not believe that any man or woman has the right to increase that percentage to the discomfort or unhappiness of the majority. A very little thought and care for others goes a great way, and those who do not exercise it, differ from hogs only in their difference of anatomy and the clothes they wear.—*Merchant Traveler.*

VALUE OF THOUGHT.

Deep Reasoning on the Strength of Which a Colored Gentleman Obtained a Useful Implement.

"Let that wheelbarrow alone," cried Colonel Matterson, as he stepped to the end of the gallery and called to an old negro who had entered the back-yard.

"Sah?"

"I say put down that wheelbarrow or I'll send for a policeman."

"Oh, I ken put it down, sah, an' sabe yer all dat trouble. I neber wants er pusson ter go outen his way ter 'commodate me."

"All right. Now get out of this lot. First thing I know you'll steal——"

"Now, look heah, mister. I doan know whut yer name is, but I wants yer to look heah jes' de same. I wan't thinkin erbout takin' dis thing. I makes dese imperments, sah, an' I wanted ter 'zamine dis one, 'case it 'peered ter be er new 'vention, but, sah, of yer's so easy skeered, I'll bid yer good mawnin'."

"You must excuse me if I have wrongfully accused you."

"Oh, neber mine. De ole saints wuz 'cuzed an' pussycuted, sah. Ef da could stan' it widout 'plainin' I oughtenter grumble."

Shortly after the Colonel went into the house, the old negro, after quietly lifting the wheelbarrow over the fence, mused: "Folks is gittin' so 'spicious dese days dat somebody is gwine ter git inter trouble. Dat man ain't got no use fur dis 'borrer. Whut do he Bible say 'bout de pusson whut buried his talen's an' didn' make nothin' outen 'em? Folks oughter think erbout dese things."—*Arkansaw Traveler.*

Always Late.

Half the value of anything to be done consists in doing it promptly, and yet a large class of persons are almost more or less late. Their work is always in advance of them, and so it is with their appointments and engagements. They are late, very likely, in rising in the morning and also in going to bed at night; late at their appointments also. Their letters are sent to the postoffice just as the mail is closed. They arrive at the wharf just as the steamboat is leaving it. They come into the station just as the train is going out. They do not entirely forget or omit the engagement or duty, but they are always behind time, and so are generally in haste, or in a hurry, as if they had been born a little too late and were forever trying to catch up with the lost time. They waste time for themselves and waste it for others, and fail of comfort and influence and success which they might have found in systematic and habitual punctuality. A good old lady, who was asked why she invariably was so early in her seat at church, is said to have replied that it was her religion not to disturb the religion of others. And if it were with all a part both of courtesy and duty, not to say of religion, never to be unpunctual, they would save time for, as well as annoyance to others, and aid themselves to success and influence in a thousand ways.—*Household.*

A Lucky Man.

Hostetter McGinnis is one of the most lucky men in Texas. If he takes a chance at a raffle he is sure to win. If he throws dice for the drinks, somebody else has to pay for them. Not long since a New York lawyer said to McGinnis:

"Lend me seventy-five dollars. I'd rather borrow money from you than any friend I've got."

"Why do you prefer to borrow from me?"

"Because you have such good luck that I really believe you would get your money paid back, although I never did did such a thing in my life."

As luck would have it, Hostetter did not have a cent of money with him at the time.—*Texas Siftings.*

—A female book agent has gone down into some of the deepest coal mines of Pennsylvania and has taken a large number of orders from the men while they were at work.—*Pittsburgh Psot.*

—A man died lately in London from the effects of a bite of a cat. And a verdict of "death from hydrophobia" was rendered by the Coroner's Jury that investigated the case.

—A genuine sealskin is valued at from $30 to $50. That with the necessary work and the silk lining makes a good cloak worth about $400.—*N. Y. Herald.*

MISCELLANEOUS.

—The Superior Court of North Carolina has decided that a railroad company can not force a passenger to ride in a smoking-car if he objects to doing so.

—It will pay to store the hay, straw and fodder under shelter, as such materials are often injured by the exposure to winter storms and spring rains.—*Rural New Yorker.*

—An Indiana farmer couldn't get any of the neighbors to sit on the fence with him and talk horse and whittle at a shingle, and so he went and drowned himself.—*Detroit Free Press.*

—A man who abused Christopher Columbus in a restaurant in Sacramento was pounded until his life is despaired of. Christ has friends in this country who won't stand by and hear his motives in discovering America questioned.—*Detroit Free Press.*

—The distance from Cologne to Berlin, 474 kilometers in a bee line, was recently covered by some carrier pigeons belonging to the Berlin Society "Pfeil" in eight hours and forty-one minutes, which is equal to nearly fifty-five kilometers an hour.

—During the fifty years since the first train ran in Belgium the railway companies claim that only thirty-one travelers have been killed through any error or disaster in the railway itself, although 7,250,000 passengers have been carried over the lines.

—Since New Year's Day 150 inventions have been filed in the Patent Office relating to roller skates. Boxwood, of which the wheels are generally made, has doubled in price. Contracts for ten thousand tons of steel for the skates have been given out.—*Washington Post.*

—In a cemetery a little white stone marked the grave of a dear little girl. On the stone were chiseled these words: "A child of whom her playmates said, 'It was easier to be good when she was with us.'" I used to think, and I do now, that it was one of the most beautiful epitaphs I ever heard.—*Detroit Post.*

—The unkindest thing that has recently been said about the legal profession is embodied in the remark made in a French provincial court the other day to a lawyer who was called as a witness: "Look here, Brother X—," he said, "just lose sight of your professional character for a moment, and tell us the truth."

—Prospective bridegroom (to prospective bride)—Would it be possible, do you think, dear, to postpone our wedding until Monday? I am in receipt of a dispatch calling me to Buffalo on important business. P. bride—I'm afraid not, George, dear. The wedding presents, you know, are only rented until Saturday.—*N. Y. Sun.*

—A Laconia (N. H.) correspondent of a Manchester paper is ready to swear that a trout weighing twenty-eight and a half pounds was caught in Lake Winnisquam recently. Another member of the same party, it is alleged, caught one weighing eleven and a half pounds. Owners of expensive trout tackle may be pleased to learn that the big fellow was caught with a cod line and hook, with a cold chisel for a sinker and a live bull frog for a bait.—*N. Y. Post.*

—A number of Concord (Vt.) people have been victimized by a fellow who claimed to be agent for a weekly paper. Each subscriber gave ten cents for the paper six months, and also was to have a chance at several valuable prizes. Then the agent sent each subscriber a certificate, saying that he had drawn an organ, and requiring one dollar to pay for boxing, etc. The subscribers have since found out that they all drew organs and all sent one dollar for boxing, but the organs do not come.—*Rutland Herald.*

—The Indian population of Dakota is 32,511, and the total area of Indian reservations, as they at present exist in the Territory, is 41,948 square miles, or 26,847,105 acres. This is an allowance of 825 acres of land for every individual Indian, counting in the old men, women and children. The population of the tribes of the Sioux Nation west of the Missouri River is 25,537, and the area of reservation is 33,739 square miles, or 21,593,129 acres—a farm of 853 acres for every Sioux west of the river, chief, brave, old man, squaw, boy, girl and papoose.—*Chicago Journal.*

—It was well worth the while of a Manitou (Col.) correspondent to write this, and it is worth anyone's while to read it: "The Rockies are piled up like purple clouds against the brittle, sparkling sapphire skies. They trail off in a royal glory of color to the far South, their pink and purple peaks picked out with piles of everlasting snow. They are the 'Rocky' Mountains in all truth. Not a tree blooms upon their bald sterility of rock, and yet in the amber atmosphere, under the sweet, clean sunshine, they look as if the next puff of wind might float them away."

SURE OF ONE THING.

Hot Water in the Hands of an Excited Woman as a Fight Exterminator.

There was a case of assault and battery before one of the justices the other day, and a witness with a black eye, several strips of court plaster across his nose and one ear badly lopped over was asked by the defendant's lawyer if he saw Brown strike White.

"Can't say as I did," he replied.

"Did you see the whole affair?"

"Mostly."

"Well, how was it?"

"Well, Smith and me sot on the reaper talkin' evolution. Jones and Green sot on the grass talkin', and Brown and White sot by the edge of the straw-stack disputin' on politics. Three or four boys was in the barn gittin' up a dog fight."

"Yes, go on."

"Fust I knowed, somebody called somebody else a liar. Next I knowed evolution, politics and fighting dogs was a rolling over each other on the grass, and every man kicking and biting and hitting away fur all he was wuth."

"But did you see Brown strike White?"

"Can't say as I did."

"Did you see White strike Brown?"

"Can't be sure it. The only thing I'm sure of, Mister Lawyer, is that my old woman came out with a pail of hot water and biled the hull crowd and had over two quarts left fur next time."—*Detroit Free Press.*

TEMPERANCE READING.

WINE ON THE TABLE.

A Son's Disgrace and a Mother's Remorse—"But for the Wine on Your Table I Should Never Have Been Here!"

I was a guest once at a beautiful home in one of the Eastern States. Nothing that wealth and taste could provide was wanting to beautify and adorn it. The father was a man of business, and immersed in its cares; the mother was a refined and cultured lady, who moved in the first circles of society. They had two children, one a young girl of some fifteen years of age, and the other a young man of more than eighteen years, who was attending the college in the town, and whom his fond parents designed for the profession of the law.

The home was a hospitable one, and its hospitality had been conducted on the old-fashioned lines of what was called polite society. No entertainments were more elegant, no table more daintily supplied, and none had costlier wines than were to be found in this home of a foremost business man. The latter were used to no excess in the private life of the family, and were dispensed with refined hospitality to the family guests. Father and mother, daughter and son, drank of them with their guests, and, so far as could be seen, drank of them sparingly and prudently. Once or twice the young man had been noticed to fill his glass more than once, but neither father nor mother dreamed that excess would ever mark his conduct. He was brought up to use wine as a gentleman, and would never so far forget himself as to allow it to master his self-control. So thought father and mother, if ever the matter became a subject of thought.

But who can answer for the consequences when once the subtle spirit of drink and the warm blood of youth are mingled. The facts unseen by all were that the wine-cup had already fatal charms for the youth. Often, when no eye saw him, did he quaff the extra glass or take the half empty bottle to his chamber. And often, when father and mother thought him with his student companions busy at work, was he to be found with companions, not at work, but playing the exciting game and drinking the still more exciting draught.

I had risen early, and was reading in the pleasant little library, when an anxious, hurried step was heard in the dining-room, and through the half-open door I caught the quick tones of a woman's voice, saying:

"Where's Tom? His bed was not touched last night. Where can he be?"

It was Mrs. A.'s voice. To it replied the slower, more careless words of the husband:

"Do not be anxious, dear; Tom's all right; he has likely gone home with one of his friends. He will turn up presently."

We sat down to breakfast, but the whole atmosphere was disquieted. I could notice the listening ear and the glancing eye of that stately mother as each step sounded near, or a form passed the window. But no Tom came.

Breakfast had just ended when the servant brought in a note and handed it to Mr. A. He quickly opened it, turned as quickly pale, and then, with a hurried, anxious look at his wife, left the room followed by the frightened mother.

A half hour later I learned it all. Tom had been arrested the night before and taken to the lock-up, and the note was from the kindly keeper, who wished to spare the respected family the disgrace of a public trial. I shall never forget the face of that mother. Pride, shame and love chased each other over it in varying light and shade, but love conquered and lighted it up with a sad, pitying, merciful glow. It was settled that she should go to the lock-up and that I should accompany her.

We alighted at the forbidding door, we entered the still more forbidding passage-way, and were conducted to Tom's cell. With a cry of unutterable love and mingled bitterness the mother flung her arms about the neck of the boy whom she had nurtured so delicately, and wept hot tears of shame and pity.

"Oh Tom, my son, my son, how could you disgrace me so?" she uttered between her sobs. The answer came, slowly, bitterly, almost defiantly, cutting into the conscience of that mother with the sharp, remorseless edge of retribution.,

"Mother, oh my mother, why did you teach me to drink? But for the wine on your own table, curse it! I should never have been here. It crept into my blood, fastened upon my will and chained me fast. What I did last night I know not. I was mad drunk. Oh, if you had kept it from me years ago."

That mother's face is before me now. Pale as death, agonized beyond possibility of description, every line of reproach for the wayward boy turned into a deepening furrow of self-reproach. She spoke but once: "Forgive me, my boy—I see it all now, and may God forgive me."

Tom was taken home. The disgrace was not suffered to become an open one. That night a lengthy and solemn conference took place between the proud mother and the wealthy father. And the next day no vestige of strong drink was to be found in the princely home. The evil spirit was cast out, but, alas! not before it had well nigh possessed the only son of those who had so thoughtlessly harbored it. I have visited that home since. Wealth and refinement mark all its appointments, as of old, hospitality reigns as royally, but the lesson of chastening is to be read in the absence of all that can intoxicate, and in the tender care and constant prayer that the Heavenly Parent may repair the error well nigh irrevocably wrought by the loving earthly parents. Yes, dear reader, keep it out of the house. Have no deceitful ally within, working hand in hand with the brazen confederate without. Keep it out of your kitchen, away from your table, make the family circle secure.

It may be that some member of your family will fall a victim to the terrible power of the drink appetite, but what a pitiable and almost unendurable thought it would be to haunt you forever, if conscience accused you of making it easy for the first step to be taken. If the lightning must strike your home, don't, for pity's sake, prepare the rod which draws the destroying bolt upon you.

Cider, beer, wine, may sound and seem harmless, but all these contain the subtle spirit of destruction, the fatal alcohol. They are the easy steps, the alphabet; once allow them to be learned, and you can not stop the goings forth and forward toward destruction. Make your homes pure. It is the cradle of youth, the refuge of middle life, the asylum of the aged. Whatever may be the temptation and the dangers without, give no place for them within. Keep the drink out of the homes.—*Prof. L. E. Foster, M. P.*

A BISHOP'S ADDRESS.

Remarks of Bishop Spalding at the Recent Catholic Temperance Convention at Peoria, Ill.

The annual convention of the Catholic Total Abstinence Union of the State of Illinois was recently held at Peoria. Rt. Rev. J. L. Spalding, Bishop of Peoria Diocese, was chosen President of the Union for the ensuing year. After the business of the convention was finished a public meeting was held and Bishop Spalding delivered an eloquent address on Temperance, from which we make the following extracts:

The Temperance cause is one which beyond all question commends itself to all who have the welfare and progress of mankind at heart. The bases of all human happiness is virtue—right conduct. To be governed by that moral law of which we are all conscious is the best. Whatever tends to make men more earnest in their conduct and more able to practice what they preach is good. Since this is a general principle it follows that sobriety—temperance in whatever we may use—is right in human life.

The Temperance question is one of the absorbing questions of to-day.

Gladstone has said that intemperance has brought more wretchedness, sorrow or ruin upon mankind than war, famine and pestilence combined. And I am convinced of this. There is no evil to be compared in its dread and fatal power with the vice of drunkenness. Between 50,000 and 60,000 human beings die daily. This is unnoticed; but if 1,500 die in one day in Spain of cholera, everybody talks about it, and people become alarmed thousands of miles away. If fifty or sixty people are killed in a railroad accident the newspapers teem with the news. We need something startling to attract our attention. It is so with intemperance. It is a cancer, an ulcer in many a household—paving the way to ruin in thousands. It works its way silently. If you could gather in one place the drunkards of a city or State, and could depict the history of those blighted lives, public opinion would stand aghast. A kind of moral paralysis would take possession of all. We lose sight of it because it does not come on us like a pestilence, in an hour, but by slow and stealthy advances.

There are, however, very few even of those who hate Temperance who do succeed in shutting their eyes to the enormity of the evil. There is no evil which to me is so repulsive, that affects me in so unpleasant a way. There are other vices that may be worse—God knows. But to me the most pitiable wreck of a man is brought about by drunkenness. It seems more than any other vice to get control of a man. Of course there are some reformed drunkards, but as a rule they die by the hundred thousands and reform by tens. Its powers are almost as fatal as the force of gravitation that holds us to the ground. It weakens the will more than all the other vices. The most God-like thing in a man is his free will, which places him above other creatures. The tendency of all wrong-doing is to weaken the will, and drunkenness has that effect more than anything else.

My notion is that men do not love liquor for its pleasant taste, but for the effect it produces, and the direct effect is to deaden consciousness. It makes man for the time forget his labor, his troubles, the cares of life, and therein is the greatest charm of using alcoholic stimulants. But as the habit grows upon many it brings about the lessening of will power, and induces intellectual and physical decay. It is unworthy of man to seek this unnatural unconsciousness. It is a coward's refuge from the realities of life, and results in the destruction of the man.

I have a supreme belief in the good of life as it is given to us on earth. It is a God-like privilege to be able to think, to love, to work, to console, to see and enjoy the beauties and advantages of nature. It is a crime in any man to lessen the perfect goodness of his life, which I think drunkenness does. That is why I hate it. Life is sweeter, fonder and freer to me as a total abstainer than as a moderate drinker; so I say if you want to get the most out of life, if you want to sympathize with your fellow-men, to feel the true force of your being, abstain from alcoholic stimulants. I am convinced that even the most delicately-constituted man is liable to endure more as an abstainer than a moderate drinker.

It is a grave mistake to imagine that drunkenness has grown more general in our age than in past ages. On the contrary, I am convinced that in this country and in Europe sobriety is on the increase. Drunkenness was even approved of one hundred years ago. It was thought once to be a gentleman-like vice. Public opinion did not condemn it. Heaven, what progress since then! And this progress has been brought about by the force of public opinion. It is one of the glories of this country that it has so many Temperance societies. They are doing the work of educating public opinion on this question; of teaching the people to realize the awful results of intemperance. In the United States we have more true liberty than is enjoyed by people in other lands. With this social and religious liberty it becomes all-important to educate men, to teach them to control themselves. Here, the people are all in all, and since they govern, it becomes a matter of supreme importance that the people should be wise, sober and have self-control. One reason why I advocate total abstinence is because I believe it is the most philanthropic work of the age. In this country drink prevents ninety men out of a hundred from leaving their children in a better condition than that with which they started. Whisky, alcohol and beer are the great invincible enemies of women. They take self-respect from the children, fill the home with the seeds of anger, discontent and wretchedness, when they might be full of happiness, light and cheer.

We can not neglect taking sides on this question. It is of more importance than any political question. It is associated with all we love and cherish and glory in.

Concluding, the speaker argued that Temperance is the poor man's cause, because he is at great disadvantage in the struggle. It is not only his cause—it is the cause of the soul—the cause of the Eternal God.

TEMPERANCE ITEMS.

DRUNKENNESS is punishable by death in Japan. This is the most effectual method known of preventing a man getting drunk a second time.—*Current.*

THE body of a drunkard was recently brought into Guy's Hospital, London. His body was very much bloated, and upon being punctured and a lighted match applied the gas which escaped burned with the ordinary flame of carburetted hydrogen. As many as a dozen of these flames were burning at the same time.

THE Superintendent of the Elmira Reformatory says that drunkenness can be traced in the ancestry of more than a third of the convicts sent there; that only one in four of their parents has received a common school education; and that, as nearly as can be ascertained, the home influence in half the cases has been distinctly vicious.

A CERTAINTY is better than an uncertainty. Which is why men prefer to procure their medicine at the saloon rather than at the druggist's. At the drug-store there is always a doubt whether you get the harmless drug your prescription calls for or a virulent poison. At the saloon it is different; you are sure to get poison every time.—*Boston Transcript.*

DUDE AND CANE.

In Three Scenes.

SCENE III.

CONSTERNATION.

AN ALCOHOL SWEAT.

How It Is Administered—Entirely Proper That It Should Be Done by an Expert.

Did you ever take one? No? Then you have much to learn. They *will* knock a fellow out, though, there's no question about that; and if administered with due caution are not so very bad to take. The trouble is the person having charge of the ceremonies—one's mother if the victim is a boy, or his wife if he is a married man—is apt to underrate the caloric-producing properties of alcohol and turn out too much. But I will describe one that my better-half engineered a few years ago.

I caught a thundering cold somehow which didn't seem to loosen up at all, and in an evil moment asked my wife if she had ever run the motor of an alcohol sweat. She replied that she had not, but had seen her mother do it lots of times and knew just how it was accomplished. After it was all over the thought occurred to me that I had in the morning scolded her considerably for a little mercantile transaction of hers the day before, by which she parted with a suit of my summer clothes but little worn for a navy-blue cigar set worth about forty-five cents, and I shall always believe that the scolding had something to do with the way she fired up the alcohol. But I don't seem to get started on the story.

Well, the way an alcohol sweat is administered is this: You remove all your clothes and take a seat on a cane-bottomed chair. After being seated, a thick blanket or quilt is thrown around your person, leaving the head out. A small quantity of alcohol is then poured on a plate, which is thrust un-

der the chair, the fluid lighted and the opening in the blanket again closed. If too large a dose is not given the sensation is pleasurable at first, and by shifting occasionally and lifting the weight of the body from the chair by the hands and arms, one can generally stand it until the alcohol has burned up, and a feeling of relief is experienced. This is brief, however, for in a few seconds the thing is repeated, and unless you are very bad off indeed you begin to "sweat like a butcher." After you have thrown off a pailful or so of perspiration you are curried down with a coarse towel, then jump into bed, when you are loaded with quilts, and a secondary sweat occurs. You soon sink into the arms of Morpheus, and in the morning the backbone of the cold is broken.

The particular one I refer to, in which my wife made her *debut* as stoker, was unfortunate, however. In the first place she selected a rickety chair, which had seen its best days, and had no cane seat to speak of. I kicked on that chair, of course, but she overruled my objections, saying that her mother had just such a chair, which she kept especially for similar occasions. The first trial was a success while it lasted, as she poured out but a small dose, and I duly praised her dexterity. The second and third trials were also satisfactory, and I was beginning to get thoroughly warmed up, when she said: "Now I will put in a little more, and you must sit as still as possible." I told her to go ahead but to be careful, and didn't watch her as she poured the alcohol out. When she touched it off and closed the blanket, I knew at once that she had overdone the thing by several

spoonfuls. It was not heat alone that assailed me this time, but the veritable flames. And these didn't crawl and loiter on the way, but swarmed all over such part of my anatomy as came within their reach. I naturally yelled, and made a desperate effort to free myself from the blanket and get hence, when the chair gave way and I struck the home plate with a dull thud. Jerusalem, but that plate *was* hot! I will not give you all the details, as they might create an impression unfavorable to alcohol sweats, which are really very good and thorough, and succeed when nearly everything else fails. The splinters of cane which hung down caught fire, ditto the blanket, and we had a great time smothering the threatened conflagration; and what with the smell of scorched woolen and cuticle, the fumes of burning alcohol, my yells, and the fright of Mrs. S., it was a regular monkey and parrot time.

Did it cure my cold? Yes, indeed. Either that or the fact that I had to remain indoors for several days and take my gruel in bed, lying on my side, effected a complete recovery, and I didn't have another cold that winter. I generally take a Turkish bath now though, when I feel a cold coming on, although I do think an alcohol sweat will do the work just as well, and there needn't be any trouble if everything is all right. Going to try it? That's right; but caution your wife about the dose. So long.—*Peck's Sun.*

ABBE LISZT.

An Hour With the Great "Meister" and His Pupils.

Liszt is a man of the world in the highest degree, a gallant host, a convivial guest, but he adds to these qualities others of a far more solid kind. When his life one day comes to be written, it will be recorded that no more self-denying and no kinder hearted man ever existed. Many a promising pupil would, but for his material assistance, have been unable to pursue his or her career. In his early years he experienced the greatest triumphs due to his art, and takes no little pride in knowing in how high esteem his genius is held. The great refreshment of his declining years lies in handing down to posterity through the medium of others, whom he has especially chosen, his conceptions of music as a science, to be a living testimony to his greatness. There may be a little pardonable self-laudation in this, but there is no doubt that to have been a pupil of Liszt is a passport to most of the concert halls of the world. It must be remembered that "musical excellence" is the only introduction required to the charmed circle of which he is the center; but it must be excellence such as to augur greatness in the future. Not one farthing of pecuniary remuneration does he ever accept from any pupil.

Between two and four o'clock in the afternoon of about three days in the week musical reunions are held in the Meister's salon. There are then gathered together about twenty pupils around his grand piano—pupils is perhaps hardly the name suited to the persons here collected. It might be said that there were assembled a number of admirers looking to their chief for words of approbation, encouragement, and advice, but yet pupils they call themselves. A pupil is invited to play. Liszt's *modus operandi* is to allow them to choose their own pieces. The young lady singled out seats herself; the Meister paces the room and beats time with his finger; all the eyes of the remaining nineteen enthusiasts are fixed upon his face; a nod of approval means sullen looks from the nineteen; at remarks such as: "Go on, go on," "That is your way," "Tastes differ," the nineteen faces light up with glee and flash exultation, for this means failure on this occasion, and the sole endeavor of these rival artists is to narrow the circle of the Meister's admirers and favorites. It is, however, the highest reward if the player be constantly interrupted, and if the Meister himself takes his seat at the piano and replays the few bars. This is recognition, indeed. It is a bad sign if the piece is allowed to be finished without comment; the more frequent the interruptions, the greater as a rule the performer's perfection in the art—except, of course, in the case of a really famous performer. For Liszt, though sympathetic, is sparing of his interest until a first-rate standard has been reached.

That green-eyed monster, jealousy, plays nowhere in the world a greater role than in Weimar generally, and in the Meister's salon in particular. Petty intrigues to gain the great man's favor or to bring a rival into disfavor are unceasingly going on. To possess one of the hairs from the Meister's venerable head, to kiss his hand, and, in the case of a lady, to be chastely kissed upon the brow in return, constitutes the sole bliss of the hard-worked worshiper of Listz. Weimar echoes not with the din of arsenals and workshops, but with the clanging and banging of some scores of pianos, each endeavoring to out-Herod Herod, and to forge weapons to assert the superiority of Liszt in the musical world. While his pupils are interchanging glances and looking askance, the great man sometimes—not infrequently—retires to his buffet and refreshes himself with glad red wine. By four o'clock the seance is over, and now woe to the poor Meister, and woe to the happy possessor should he present a flower to any young lady as a mark of special favor. Those who know him more intimately will then successively upbraid him, and will, until they have received other and similar tokens of recognition, plot against the now luckless possessor. Those who stand more outside the charmed circle will beg morsels of the costly flower, and treasure them in their secretaries as souvenirs. It may, therefore, be readily conjectured that such marks of distinction are but seldom given.

The rest of the great Meister's waking hours are mostly given up to the composition of oratorios, one of which, "Die heilige Elizabeth," he conducted and introduced to the world at Marburg in 1883. Thus lives and thus works Liszt, the Altmeister of the tonic art; and so long as he lives the classic groves along the Ilm will not miss a worthy successor to the celebrities that have made the name of Weimar famous. —*Pall Mall Gazette.*

SANITARY COOKING.

The Nutritive Value of Foods as Affected by Cookery.

Next in importance to pure air is good food. This really includes good water, since the watery constituents of foods constitute a great part of them, and since water itself, as taken in addition, is a kind of conveyancer and distributer of the needed supplies throughout the entire system. Chemistry and experience have now made us pretty well acquainted with the various constituents which go to make up the human body, and their various modes of introduction, appropriation and settlement. It also enables us to know in what forms and quantities of food these are to be found, or when not found, how they are manufactured therefrom in the human system. Albumen, for instance, as found in an egg, may almost be said to be so identical with that found in the human body that it is the business of the digestive and circulating apparatus to distribute and place it, rather than to transform it. On the other hand, starch, which forms so large and valuable a constituent in foods, is not found in the human body. Yet the process by which, in the system, and in the process of digestion, it is changed to dextrine, sugar, and animal heat, and so made vital, is well understood. Great care has been exercised in the minute study of foods, in order to determine what is actually in them, so as to know how, and how far, they can be appropriated in the system. The two great divisions into flesh or fiber-forming and heat-producing food is still practicable, although the dividing line is not now so broad as in the chemistry of Liebig. It is to be remembered, however, that a bare chemical analysis may greatly mislead us as to the value of any given food. One has remarked that man is not so distinctly a carniverous or herbivorous, as he is a cooking, animal. Facility of assimilation has much to do with the value of any food-containing article. Changes may thus be made "which may double the nutritive value without affecting more than a small percentage of alteration in its chemical composition as revealed by laboratory analysis." Common boiling is a good illustration of this. There are some foods made less nutritious by boiling; others made more so; while many others are greatly affected by the manner of cooking. The various modes of cooking an egg is a simple illustration of this. If an egg is cooked in water which is raised and kept at a temperature of about 160° its albumen, which is also the chief constituent of the yelk, comes to be a tender, flaky substance, which is very easily digested. If, instead of this, the egg in plunged in water already at the boiling point, and kept there for four minutes or more, it becomes tough and hard. Even if kept in but three minutes, so as to be soft, the albumen is in a different condition of toughness from that of the first egg. So hard and tough is this albumen, when prepared by heating it a little over 212 degrees, that a valuable cement for china is made by smearing the edges of a broken piece with the glairy albumen and then plunging the cemented article into boiling water. An egg kept in water at from 160 degrees to 170 degrees for ten minutes will still be a soft-boiled egg, but is more easily digestible than an egg of apparently the same softness, which has been kept in boiling water for three and a half minutes. In this latter cooking, in order to cook the yelk at all, the white must be subjected to too high a temperature. This may make no difference to some stomachs, and yet, through all the years of three-score and ten, does make a difference to very many. The point would be of less importance were it not that this very albumen is found as a juice in all our meats, and in a varied form, in many vegetables, and forms a very valuable part of their food values. In meat it is everywhere, among the fibers of the muscles, and in the blood contained in the meat. Now if you put a piece of meat into cool water, or that only slightly warm, the albumen, together with other flavoring constituents of much nutritive value, come to be diffused through the water. If the design is to make soup, we thus extract from the meat some of its most valuable nutrition. But if the meat is being boiled for use, unless at the start it is immersed into water above one hundred and sixty degrees, so as to immediately coagulate the albumen on the surface and hold in the inner juices, the meat will lose greatly, both in value and in flavor. In order to make a quick sealing of the pores by making a firmly coagulated coating, the temperature into which the joint is plunged should be nearly or quite at the boiling point (212 degrees,) and be kept so for five minutes, but after that should not be higher than 180 degrees. This cooking will take about half as long again as cooking at boiling point, but furnish you a boiled meat of very different value and digestibility. The effect of adding salt, five or ten minutes after the joint has been put in, is that it helps to coagulate the outer albumen, that it slightly raises the boiling point of water, and that, by increasing the density of the water, it makes the oozing out of the juices less active. These rules apply to all preparations of meat by boiling where no soup is to be made, and, in a modified degree, to roast and fried or grilled meats.—*N. Y. Independent.*

Steering Clear of Sin.

Milkman—Johnny, did you put water in the milk this morning?

New Assistant—Yes, sir.

"Don't you know that is wicked, Johnny?"

"But you told me to mix water with the milk."

"Yes, but I told you to put the water in first and pour the milk into it. Then, you see, we can tell people we never put water in our milk.—*Chicago News.*

—During the sessions of the Chautauqua Assembly nearly 90,000 people visited the grounds. The gate receipts were $30,000, and the receipts from all other sources $60,000. The totals are larger than any of the preceding assemblies. Twelve thousand dollars was expended for the programme this year. —*Buffalo Express.*

A True Love Match.

"How are you coming on? I've not seen you in some time," remarked Hostetter McGinnis on meeting Colonel Witherspoon.

"I have just returned from my bridal tour."

"So you are married. How did that happen?"

"I married Miss Esmerelda Longcoffin. It was a love match between us."

"You don't say so. Well, I am surprised, for I heard you say once that you would never marry except for money."

"Esmerelda has got thirty thousand dollars in her own name."

"Is that what you call marrying for love?"

"Yes, I did marry for love, for I could have married another girl who had the same amount of money if I had wanted to, and she wasn't any uglier than Esmerelda, either."—*Texas Siftings.*

Was Going to Be Easy.

The druggist had filled the prescription while the man waited and walked up and down the store and drummed on the showcase with his fingers, but as he was pasting the label and directions on the bottle he gave a sudden start.

"Anything wrong?" asked the quick-eyed customer.

"N-o-a. That is——"

"You have made a mistake in the compounding and got in poison of some sort!"

"No, I haven't. I thought I had left out the tincture of opium, but it's all right. I knew I hadn't made any mistake."

"Oh, well," said the customer, as he received the bottle, "I wasn't going to kick about it anyhow. I am getting it for a neighbor!"—*Detroit Free Press.*

Not So Crazy.

Young Dudenthaler (whose brother-in-law has just failed)—Oh, yesh, Moses he takes on dreadful. He valked de floor all night. He's shust grazy—berfectly grazy.

Good Natured Merchant—Tell him not to trouble himself so much. Such things will happen. Let him call a meeting of his creditors, offer fifty per cent. cash, and I'll use my personal influence to have it accepted.

Y. D.—Fefety per shent! Fefety per shent!! Vell, Mose vas feelin' pretty bad, but he vasn't so grazy as all dot.—*The Rambler.*

S'm'other Girl.

A Fifth Ward young man possesses a very liberal endowment of perseverance.

"Miss B——," said he, "do you love me?"

"I am sorry to say that I do not," was the reply.

"Well, then," he persevered, "won't you at least permit me to renew the question this evening?"

"Not this evening," said the maiden.

"May I ask some other evening?"

"Not some other evening, Mr. Q——, but—you may ask some other girl."—*N. Y. Herald.*

A Hitch in the Testimony.

"So, Mr. Witness, you swear that at the time this theft was committed on the south side you saw the prisoner on the north side?"

"Yes, sir."

"Was he going toward the south side or was he coming from that direction?"

"I can't answer that now."

"Why not?"

"Because the prisoner's lawyer forgot to tell me which way north is."—*Chicago News.*

A Maiden's Soliloquy.

'Tis wondrous strange how great the change since I was in my teens; then I'd a beau and billet-doux and joined the gayest scenes, But lovers now have ceased to vow—no way they now contrive to poison, hang or drown themselves—because I'm thirty-five. Once, if the night was e'er so bright, I ne'er abroad could roam without "the bliss, the honor, miss, of seeing you safe home." But now I go, through rain and snow, fatigued and scarce alive, through all the dark, without a spark—because I'm thirty-five.—*Chicago Tribune.*

Why Mr. Cruikshank Departed.

"Tommy, is your sister Clarinda in?"

"Mebby she is and mebby she ain't. What's your name?"

"Why do you ask?"

"Waal, ye see, she said if Mr. Tompkins called she'd be in, but if old Cruikshank came she'd be out. Which be you?"

Mr. Cruikshank departed.—*Chicago News.*

Two Curious Inscriptions.

Mr. Henry Jones communicates two specimens of inscriptions on houses. One is from an old stone let into a wall of Castle Caldwell, on Lough Erne. The stone is carved in the form of a violin, and thus inscribed:

"To the memory [sic] of Denis McCabe Fiddler who fell out of the St. Patrick's barge belonging to James Caldwell Bart. & Count of Milan and was drowned off this point August ye 15, 1770.

"Beware ye fiddlers of ye fiddler's fate
Nor tempt ye deep lest ye repent too late
You ever have been deemed ye water's foes
Then shun ye lake till it with whisky flows
On firm land only exercise your skill
There ye may play and safely drink your fill."

The other is from Favorn Royal, residence of Rev. J. Moutray, County Tyrone. The stone on which it is inscribed was saved from the old house when burnt down and incorporated into the new one:

"Wel . com . to . come in . a
16 . 70
nd . as . wel . com . to . go . by."
—*Notes and Queries.*

—A contemporary tells of a Virginia babe who mimics every tune he hears, and hums himself to sleep. But if the parents ever take the youngster to a minstrel show they will be willing to go back to the old reliable paregoric.—*San Francisco Post.*

—Jelly "speckled" with strawberries is the favorite dish for suppers after dances in England.

JOHN S. LAUGHLIN.

FOR COUNTY SURVEYOR:
DANIEL CHISHOLM.

Caution!

If any of our Republican friends are green enough, after their experience of two years ago, to think of voting for Democrats, we would advise them to be very sure they have something to gain by such a course. Be certain that the public will be benefitted. Unless you are certain you had better stick to your colors, like true men. Be not again deceived by Democratic promises.

Republicans of Garrett, if you ever had good sound reasons for going to the polls and putting in a solid Republican vote, you have them this fall.

Would be tax collectors, assessors, &c., run the Convention that nominated the Democratic ticket, and no doubt they all went home highly elated at their work. We will see you later, gentlemen.

The Republican party, while not blaming President Cleveland for the hard times, believes and holds that had Blaine been elected, business of all kinds would not be at a standstill as it is at the present time.

Resolved, That the first duty of every true son of Maryland at this period of her history is to secure the complete overthrow of the corrupt ring, by means of which one man rules, as with a rod of iron the Democratic party of the state.—*Rep. Platform.*

The fact is there seems to be a genuine break up in Baltimore. Thirteen prominent lawyers have declared the late city Convention irregular. The chairman is denouncing them as dudes and things are getting lively in Gorman's citadel, without doubt.

Much political capital will be made out of the increased assessment made by Surveyor Mitchell, but after getting pay for them Mr. Mitchell will make more than the courty out of the business. The evidence of three ex-Tax Collectors simply is confirmatory of the aboye, *i. e.* that the increased taxable basis is all fictitious.

High taxes have prevailed for two years. The first year they were enormous, almost a rental or quite so in many instances. This year they were cut down by increasing the taxable basis. Times are hard. Taxes are more burdensome than at the higher rate last year, while the unpleasant fact remains that the increasing assessment is fictitious, according to the judgement of every man who understands the matter, and the whole amount will be returned as insolvent.

Five, or one half of the Democratic ticket, are residents of Oakland district, and four of them reside in the town of Oakland.

Democrats again claim they will elect two County Commissioners by consolidating in two strong Republican districts and run their two men ahead and by getting only the regular party vote outside of those districts will insure their election. Very nicely laid out, but don't "count yonr chickens before they are hatched." Garrett is Republican, and we know enough to know that consolidation cannot possibly help us, and we won't consolidate to any very great extent. The scheme is "too thin." Not if the "court knows itsetf," and we think she does.

Two years ago quite a number of Republicans voted for Democratic Commissioners. We assume to ask them how much they have gained by such a course? Have taxes been decreased? Have they been benefited in any way by electing two Democratic County Commissioners? 'Tis true the Democrats promised to reduce taxes and to inaugurate various reforms if they should be elected, but did they fulfil these promises? Nay verily.

We do not think there are many readers or the REPUBLICAN who would wish to see this paper crippled. The organization of the party is intimately bound up with the welfare of the paper. We do not think we are claiming too much in saying that the work we have done for the party is incalculable. We therefore think it not unreasonable to ask our friends to hold up our hands by coming to the polls and voting the whole Republican ticket.

Nearly five thousand dollars the tax-payers of Garrett paid for an unfair assessment. Did not two men once assess the same territory? and are our County Commissioners not able to act as a board of review. But two or three offices will not parcel out among several hundred dissatisfied Democrats, and the prospects are that if the Democratic ticket is elected the machinery will be increased so as to "go round" rather than disminished.

The men who have been the bulwarks of the Democratic party of Garrett urged wise counsel. They were "set down on," and hard at that, and now the very shades of Thomas Jefferson will be invoked to bring them up to support the ticket. The prospects are good, however, for some more, and no doubt, very lively "setting down on" about Nov. 3d. A dose of physic is said to be a very good remedy at times.

Is not the Republican platform more in accord with the views of the Democratic party on Civil Service Reform than the platform of Senator Gorman? It says: "That the principles of Civil Service Reform as set forth in the national Republican platform should be extended and applied to all State and municipal offices." Are not these the President's avowed views upon the question?—*Exchange.*

Let us see. Six Assessors, three members of Board of Control and Review and a Clerk—ten in all. There are eleven districts in the county. Ten times eleven are one hundred and ten. This is a fair estimate of what will be pomised by the Democratic candidates this fall. Promises are going to be cheap, "and don't you forget it."

This is from the Baltimore *News* (Dem.): "Between the writer of this letter [to Mr. Eston] and the author of the Maryland Democratic platform there must of necessity be an 'irrepres-ible conflict,' although open hostilities may not break out for a while. Mr. Gorman, while really a complete infidel, so far as his belief in any improvement in politics on this side of the grave is concerned, has, nevertheless, something of a saint's appearance, and we doubt not at times can, to some extent, dissemble. The President had every reason to repose confidence in him, and it can be readily understood how difficult it is to break down that confidence. The irrepressible conflict,' however, must go on and Mr. Gorman be revealed in his true light as a spoilsman to a President who so sincerely desires to see the merit system adopted."

The Galveston *News* one of the organs of the Democracy of Texas, has been trying its hand at an analysis of its party, and sets down the result of its researches as follows: "The Democratic party is a promiscuous conglomerate of heterogeneous substances, without form and void of purpose and meaning, except such as is denoted by the immortal Flannigan war cry: 'What are we here for?' It is a great umbrella, under whose spreading arches can be collected prohibitionists, whiskey-men, greenbackers, communists, fence-cutters, socialists, free-traders, protectionists, civil service reformes, spoilsmen, monopolists, anti-monopolists, and all other elements, fragments, factions and particles wit. thought and opinion, or without thought or opinion." Come to think it all over carefully, we guess the *News* is about right. The Chicago *Times* takes up the same task and compares the Democracy to a new kind of church organized in the Garden City a few years. "They called themselves the 'Free Religious Society,' the name being intended to indicate that the new church was free to everybody, whatever his religious or irreligious notions might be. Pagans, devil-worshippers, Buddaists, infidels, Jews, Christians of all varieties, Atheists, Swedenborgians, spiritists, Mormons, saints, sinners and heathen of every style and degree, persons that believe nothing, all were eligible to membership of the Church of the Free Religion, without any charge of their miscellaneous opinions or the conduct of their miscellaneous lives.

It was a church without a creed, without a motive, without a reason to be. It was not a long lived religious establishment; the idea on which it was set up was too brilliant to be attained, in fact, too many kinds of brilliancy—for endurance." Coming from such high authorities, these definite descriptions of Democracy must be accepted as well deserved.—*Pitts Chronicle.*

The moral discredit brought upon the Government by the appointment and retention of Higgins, Mahon and Thomas is in every quarter admitted to be traceable entirely to that acute "adyiser of the Administration," Senator Gorman. The appointment of these three disreputable men, he is eager to let his henchmen know, was solely at his instigation. They were appointed in the first instance to reward this local boss for his much vaunted and much over estimated political services in the Presidential compaign. They are being retained in the face of a storm of public indignation, not because of any doubt in regard to the truth about their respective characters, but to defend this same local boss from a well deserved and imminent defeat at the hands of the next legislature. The Senator has hastened to assume the responsibility for this unpardonable insult to the people of Maryland. We are now prepared to take him for once at his word. He has staked his official position upon the appointments. The friends of good government in this community are not unwilling to go before the people upon this issue. Secretary Lamar claims to believe, in the words attributed to him, that the Senator is still "devoted to his fortunes"; that he deserves his "entire confidence"; that he would not "willingly put him under fire." The succession of criminal appointments has not been sufficient to disturb this "confidence." The loud-voiced indignation of the people of the State of Maryland has not yet been sufficient to disturb it. What, then, will break this mysterious tie of friendship between the Senator and the Administration? Will anything less than the ignominious defeat of the Senator himself? But our political ill-wind has fortunately been true to its proverbial character. It has blown some good to the ring-ridden people of the State of Maryland. It has at last opened their eyes to the true character of our Senator. Not the most blind and credulous of his constituency can any longer refuse to see him in his true light. But the events of the past few months have also served as a terrible warning to the people at large. What man is so guileless as to believe that these three appointments have emptied the Senator's political sink of its contents? Does anybody think that all the violence and all the fraud which has fought for the Senator for the past decade will be less exacting in its demands upon him in the future than that which has already found its reward in the past?—*Civil-Service Reformer.*

State of Trade.

NEW YORK, Oct. 3.—The check to the activity in business circles at the east, noted in *Bradstreet's* last week, has become more pronounced. In New England the distribution of boots and shoes is as heavy as ever, but the demand for woolen and cotton goods has fallen off. Both staples are quieter. There is a diminished activity in dry goods. Prices are no more than sustained. Commission and jobbing houses find a check in the demand, and state that it will now be necessary for the retail demand to step in and take the wholesale purchases of the last month or two, if the late activity is to be upheld. Within a month it will be made plain whether the general public has the ability as well as the desire to buy more largely than within a year past. The movement of textile staples from second hands has visibly declined. Proyidence, R. I., advices are that cotton and woolen manufacturers now think that the foundation of the improvement in business within the past month or so is not so solid as had been hoped. Machinery generally is running, but the effort to obtain better prices has resulted disappointingly.

CONNELLSVILLE, Oct. 3.—The *Keystone Courier* has the following: The coke trade outlook is not very flattering this week. The shipments have declined slightly, and the stock of coke is accumulating upon the yards and in the cars at a rate that has a depressing effect on trade. Furnaces are well supplied and there is no disposition to lay in extra stock.

BOSTON, Oc. 3.—The *Advertiser* in its weekly review of the wool market says: The market has been less active, but prices are well sustained, and some wools are held higher than a week ago.

Baltimore Live Stock Market.

[From Baltimore American.]

MONDAY, Oct. 5, 1885.

PRICES OF BEEF CATTLE AT THE MARKET TO-DAY.

Very best on sale to-day 4¾@5c. but generally rated first quality 3¾@4¼ cts; medium or good fair quality 2¾@3 cts; ordinary thin steers, oxen and cows 2@2¼ cts; extreme range of prices 2@5 cts; most of the sales were from 2¼@4¾.

REMARKS ON BEEF CATTLE.

The arrivals of Cattle during the week amounted to 3,409 head, against 3,290 last week and 4,017 head the corresponding week of last year, and the sales were 1,880 head, against 1,863 last week, and 1,704 head the corresponding week of last year.

Trade was somewhat more active than last week, but at lower prices throughout the list, to the extent that country dealers bought more freely. The quality proved to be of a better average than last week, the tops were somewhat better, and there was a longer line of the middle grades and a smaller number of the commonest grades. Prices were off ¼@½c., generally through the list, considering the rather improved order of the offerings. Prices 2@5c., most sales 2¾@4¾c.

THE SWINE MARKET.

There is a moderately fair trade only to-day for hogs. The supply is fair, being an increase of a few hundred over last week's offerings. The quality generally is quite as good as it was last week. Prices are ½c lower than they were then, and range now at 5c. to 6¼, as to quality. Same time last year hogs sold at 6@7¾c.

THE SHEEP MARKET.

Trade for sheep generally is not active. There is no outside demand and the supply is fair, but there is a fairly good demand for good lambs, which are not plentiful. We quote sheep at 2@3¾c. gross, as to quality, and lambs at 3@5 gross; stock sheep sell at $1@2 25 per head. Same time last year butcher sheep sold at 2¾@4¼c.; lambs same as to-day. Stock sheep $1.50@2 75 per head.

NEW ADVERTISEMENTS.

THE EVENING STAR is to be the name of a new afternoon Democratic paper to be issued in Baltimore. The first number will appear October 10. Sample copies will be sent to any one sending their address to

A. J. HARNE, Agt.
Oakland, Oct. 2, 1885.—3m

COMMISSIONERS' MEETING

OFFICE OF THE
GARRETT COUNTY COMMISSIORENS,
OAKLAND, MD., Aug. 26th, 1885.

The County Commissioners of Garrett county will meet in their office at Oakland, on

Monday, Oct. 12th, 1885,

for the purpose of transacting business,

By order
G. W. MERRILL,
10 3 2t Clerk.

ELECTION NOTICE!

NOTICE IS HEREBY GIVEN TO THE Judges of Election and to the voters of Garrett county, that an election will be held in the several election districts of Garrett county at the usual places of holding elections,

TUESDAY, NOVEMBER 3, 1885,

for the purpose of electing

A Comptroller of the Treasury of the State of Maryland.
A Clerk of the Court of Appeals for the State of Maryland.
A State Senator,
Two members of the House of Delegates,
A Clerk of the Circuit Court.
A Sheriff.
Three County Commissionrs.
A Register of Wills.
A County Surveyor.

The polls of said election will be open in each and every election district of said county, at the usual places of holding the polls, at 8 o'clock A. M., and will be closed at 6 o'clock P. M., when the ballots shall be publicly counted.
Keepers of hotels, taverns, saloons or any place where liquors are sold, and all others will take notice that by Chap. 191, acts of 1865, no spirituous or fermented liquors, ale or beer or any intoxicating drinks can be sold or given away on election day.

M. R. HAMILL,
9 26 td. Sheriff.

LAND! Claims a specialty. Warrants, and ADDITIONAL HOMESTEAD CERTIFICATES and all kinds of LAND SCRIP bought and sold. SUSPENDED ENTRIES, LAND, PATENT and PENSION cases attended to. Correspondence solicited. A. A. Thomas, Attorney at Law, Room 25 St. Cloud Bld'g, Washington, D. C.

NEW ADVERTISEMENTS.

DR. LETROBE,

SPECIALIST

IN THE

Treatment and Cure

OF ALL

CHRONIC DISEASES.

Read and send to your afflicted neighbor, as Dr. Letrobe is here to prove his practice and all he claims to be ABSOLUTE FACTS.

The doctor has had the advantages of many years in Europe, expended wholly to fit and qualify himself as a legitimate specialist. His marked and truly wonderful success in Europe and America in the treatment and cure of hundreds of GIVEN UP and hopeless cases is due in a great degree to the scientific adaptation, in each case of

NATURE'S OWN REMEDIES,

Vegetable or Botanic Medicines.

One of the many Wonders and Mysteries in his practice is the almost miraculous cure of all External Cancer. This great discovery has Cured and Saved the lives of thousands of hopeless sufferers for the past fourteen years. No person is allowed to be present while the Doctor is operating upon Cancer. One painless application of Three to Five minutes duration entirely destroys all cancer and cancerous growths in their first stages, and the cancer drops out wholly, body, root and branch the Seveth day after its application, and the wound heals of nature's own accord. All are curable in the first and second stages, all are incurable in the third stage, hence do not delay, but apply at once, and save yourself from the agony and certain terrible suffering that waits you, and save your life while your case is still in its early stages, for all cases become incurable in their last stage, as the germs infiltrate or pass through the system generally and attack the vital organs, rendering recovery strictly hopeless.

CATARRH, NASAL, THROAT AND LUNG DISEASES.

I particularly solicit those cases that have been the rounds of the profession without receiving benefit, whether suffering from chronic, nasal catarrh, or other diseases leading to pulmonary consumption, feeling confident that I can give more than satisfaction in such cases, and fully realizing that every such hopeless case that I restore to health is the best possible advertisement that I can give. I never give encouragement unless very sure that I can greatly benefit or cure the case.

NERVOUS DISEASES.

Epileptic Convulsions or Fits, Insomnia or inability to sleep, and threatened Insanity, Nervous Debility arising from over study, excess and other causes, and every variety of nervous affection, are treated with a measure of success heretofore regarded as impossible.

PILE TUMORS,

Piles, Fistula in Ano, and other diseases affecting the region of the lower bowel. I never fail to cure Pile Tumors, however large, as well as the most complicated forms of Fistula in Ano.

LIVER COMPLAINT.

It is an established fact that nine-tenths of all pains, afflictions and deformities are primarily caused by diseased conditions of the Liver. Therefore take warning in time and place yourself at once under skillful treatment and save yourself from a life of suffering.

FEMALE WEAKNESS.

Diseases incident to women cured speedily and without cautery or the usual painful treatment.

LOSS OF VITALITY.

Many young and middle aged men through youthful indiscretions or disease, are suffering with loss of manhood or invitality. To all suffering as above you can be assured of a speedy and permanent cure by calling or addressing.

KIDNEY DISEASES.

If you are suffering with Kidney Disease, Diabetes or Chronic Disease of the urinary organs, call and be examined, you can be cured in the first stages.

DYSPEPSIA.

Every specie and type of Dyspepsia cured speedily and without fail. Call and be referred to the many cured.

Medicines sent with full directions by mail and express to all parts. Patients treated by correspondence. All Cancer cases must apply in person.

DR. LETROBE uses expensive medicines, many of which are expressly manufactured for special cases; also quantities of costly imported medicines for which he pays CASH, hence charges CASH for all medicines when DEDIVERED to patients.

In CANCER and EXTREME CASES special rates will be given after examination, and in accordance to the ability of the patients, or present means to pay.

DR. LETROBE

Performs all Surgery upon the EYE and EAR, and restores Sight and Hearing to the most hopeless Cases.

☞ French Imported Medicines used in all private cases.

☞ Consultation and Examination FREE at office.

Call on or address

DR. V. L. LETROBE,
Medical and Surgical Rooms at
CODDINGTON'S HOTEL,
OAKLAND, MD.

☞ DO NOT DELAY. Call at once while your case is curable. ☜

NEW ADVERTISEMENTS.

ORDER NISI.

Henry A. Rasche, Assignee, vs. Alpha Hinebaugh, and others.

In the Circuit Court for Garrett County, in Equity.

ORDERED, This Fifteenth day of September, 1885, by the Circuit Court for Garrett county, sitting in Equity, that the sale of the land of Alpha Hinebaugh and wife and John Hinebaugh and wife, mentioned and described in these proceedings made and reported by Henry A. Rasche, assignee of Matthew Cullen, mortgagee, be ratified and confirmed unless cause to the contrary thereof be shown on or before the 19th day of October next, provided a copy of this order be inserted in some newspaper printed in Garrett county, Maryland, once in each of three successive weeks before the 19th day of October next.
The report states the amount of sale to be $2,000.

W. H. TOWER,
Clerk Circuit Court.
True copy—Test:
9 26 3t. W. H. TOWER, Clerk.

Having opened an office for the collection of notes, bills, &c., I will collect all bills placed in my hands with dispatch, and make prompt return of all moneys collected. Special inducements offered to parties having property to rent and the collection of rents, can be found at Harne & Lawton's store. Reference given when required.

ANDREW J. HARNE.
Oakland, May 19th, 1885.—1 y.

SELLING OFF

AT COST!

Desiring to quit business, for the next thirty days we will offer our entire stock of

Groceries,
Notions, &c.,

AT COST

HARNE & LAWTON'S
GROCERY.
Under "Republican" Office, Oakland.

FOR SALE,
TRACTS & MILITARY LOTS.

The subscriber offers for sale the following lands in Garrett county:
"Bank Property," 1625 acres on Backbone Mountain near West Virginia line. There is on this tract good Poplar, White and Red Oak, Chestnut, Birch and Sugar Timber, and the land when cleared, will make good farms.
"Friedland," 175 acres, near Accident, part improved.
A fine building site near Fort Pendleton, lot containing two acres.
Also the following Military Lots, containing 50 acres each:
Lots Nos. 403 and 402, with the well known Boiling Spring, two miles south of Deer Park, with which it is connected by a good road.
Lot No. 1014, on B. & Ohio R. R., East of Wilson's store.
Lots Nos. 361, 363, 364 and 365, near Ben Davis'.
Lot No. 396, West of Garrett Moon's.
Lots Nos. 371 and 377, West of (late) Hugh Cooper's.
Lot No. 383, East of (late) Elisha Harvey's.
Lot No. 1252, near West Virginia line.

WILLIAM I. BROWN,
Box 41, Oakland, Md.
Sept. 5th, 1885.—1 y

POSTPONED.

MORTGAGEE'S SALE.

Under and by virtue of a power contained in a mortgage from John Hinebaugh, Fannie B. Hinebaugh and Alpha Hinebaugh, to Melville E. Howe, bearing date the 6th day of April, A. D. 1885, and recorded in Liber W. H. T. No. 16, folio 271, &c., one of the Land Records of Garrett county, which said mortgage was for value received, assigned by the said Melville E. Howe to David S. Andrews, I will on

MONDAY, OCTOBER 12, 1885.

at 11 o'clock A. M., on the premises, where said Hinebaugh's saw mill is now located, near Mountain Lake Park station, on the B. & O. Railroad, offer at public sale to the highest bidder for cash, one

STEAM ENGINE, BOILER, SAW MILL AND FIXTURES

complete, it being the property described in said mortgage. This mill is in good condition and is doing good work. A rare chance for a bargain.

FRED. A. THAYER,
10 3 2t Attorney for Mortgagee.

WANTED, IN OAKLAND, MD.,

an energetic business woman to solicit and take orders for The Madame Griswold Patent Skirt-Supporting Corsets. These corsets have been extensively advertised and sold by lady canvassers the past ten years, which, with their superiority, has created a large demand for them thr. ughout the United States, and any lady who will give her time and energy to canvassing for them can soon build up a permanent and profitable business. They are not sold by merchants, and we give exclusive territory, thereby giving the agent entire control of these superior corsets in the territory assigned her. We have a large number of agents who are making a grand success selling these goods, and we desire such in every town. Address, MME. GRISWOLD & Co., 923 Broadway, New York. 10 3 4t.

TRESPASS NOTICE.

All persons are hereby warned not to trespass or allow their stock to trespass upon the lands of the undersigned near Swanton, Md. Violations will be prosecuted.

T. WILT.

ORDER NISI.

Jonas E. Gnagey and others, vs. Mary Otto, et. al. } No. 326 Equity

IT IS ORDERED, By the Circuit Court for Garrett county, sitting in Equity, this 29th day of September, 1885, that the sale of the real estate mentioned in the second report of Jonas E. Gnagey, trustee, in the above cause, and made to Elizabeth Swager, be ratified and confirmed, pr ovided a copy of this order be published in some newspaper printed in Oakland once a week for three successive weeks before the 26th day of October next.
The report states the amount of sales to be $2600.

—Oranges, lemons and bananas, at Lakin's.

—Ladies' and children's wraps at Garthright's—very cheap. 10 3 4t

—The Glades Hotel is receiving a new coat of paint under the supervision of Mr. E. J. Fringer.

—Geo. F. Wass has been appointed postmaster at Mineral Springs, *vice* J. H. Strawn, resigned.

—Poems of Longfellow, Whittier, Bryant, Poe, Scott, Milton, Dante, Dryden, &c., at Lakin's.

—Auction at Harne & Lawton's Saturday night, Oct. 10th, 1885, at 7½ o'clock.

—Books for young and old, at Lakin's.

—Mr. Henry Meyers, residing near Oakland, raised this season some of the finest apples we have seen in this market.

—All persons knowing themselves indebted to W. D. Nydegger are hereby notified to call and settle on or before Nov. 1st, 1885. 10 3 td.

—Dr. Glotfelty, Republican candidate for State Senator, and Messrs. Hinebaugh and Laughlin, Democratic candidates for the House of Delegates were in town this week.

—Choice books for birthday presents, at Lakin's.

—In the September and October Registrations in Oakland district there were newly registered 58, stricken from the list 45, making a net gain of 13.

—John W. Bosley, of Oakland, who has been afflicted with rheumatism for several months, was last week taken to the Garfield Hospital, Washington, D. C., for treatment.

—Aarrivals at Edwards cottage: Bishop O'Sullivan, Mobile, Alabama; Dr. McAlla and family, Washington, D. C.; Miss Mary Robertson, Fauqueer county, Virginia; Mrs Mary McNally, Wheeling, W. Va.

—Mr. Daniel Gnagey, of district No. 8, this county, raised this season from one pound of seed potatoes, of the "Empire State" variety, 120 pounds or two bushels. Six of the potatoes weighed seven pounds.

—Cash paid for chestnuts, at Lakin's.

—Quarterly Meetings, M. E. church will be held at the places and on the dates following: Cranesville, Oct. 10th and 11th; Albrightsville, Oct. 17th and 18th; Grantsville, Oct. 24th and 25th; Brandonville, Oct. 31st; Selbysport, Nov. 21st.

—Rev. M. W. Rider, who has acceptably filled the M. E. pulpit here for the past two years, goes to Guyandotte Circuit, as Presiding Elder. Rev. Rider has performed a good here, and will, no doubt, be followed to his new field of labor by the prayers of this congregation.

—Died, at the residence of Jas. W. White, in Oakland, Sunday, Oct. 4th, 1885, Mrs. Susan Taggart, in the 81st year of her age. Deceased had been making her home with the family of her now deceased brother, John G. Rinehart, for a number of years, and at the time of her death was visiting at Mr. White's, where she took suddenly ill and died in less than two hours.

—Mr. P. T. Garthright, at his store at Mountain Lake Park, has now on hand a very large stock of Clothing for men, boys and children, which he will sell within the next ninety days at a small advance on cost. Also boots and shoes, stocking yarns and many other lines of goods. Call and examine goods and prices.

Aug. 22, 13t.

—An impressive ceremony will take place in the Garrett Memorial church next Wednesday evening, at 7½ o'clock, the 14th inst. The Rev. John S. Foulk, who has been preaching there for six months, will then and there be installed as pastor of the Presbyterian church by a committee appointed at the fall meeting of the Presbytery of Winchester, in Gerardstown, West Va. Rev. F. M. Woods, of Martinsburg, W. Va., will preside, preach the sermon, and propose the constitutional questions, Rev. M. W. Woodworth, of Burlington, W. Va., will deliver the charge to the pastor, and Rev. Geo. W. Finley, of Romney, W. Va., the charge to the people. The first pastoral relation will thus be constituted with the Presbyterian church of Oakland.

—FOR SALE.—A horse and cow—should be sold before next Tuesday. Call on Theo. F. Combs.

—I purchased a White Bronze Monument from Mrs. Mary Tasker for my husband, and must say I much prefer it to marble or any other material for tombstones. It is very beautiful and every one who sees it admires it greatly.

ELIZABETH STAHL,
Oakland, Md.

Oct. 5th, 1885.

Church Services--Sunday.

M. E. Church—Preaching at 10½ A. M. and 7½ P. M. by Rev. J. Engle.

Garrett Memorial (Pres.) Church—Preaching at 11 A. M. by Rev. John S. Foulk.

St. Peter's, Catholic— Preaching every Sunday at 10½ o'clock A. M., except the second Sunday of each month.

Bucklen's Arnica Salve.

The best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. D. Nydegger, Druggist, Oakland, Md.

Dr. Letrobe.

Persons afflicted with Cancer or any painful and dangerous chronic diseases, should read carefully Dr. Letrobe's advertisement in another column of this paper. Dr. Letrobe's success in the treatment and cure of lingering and fatal diseases is truly remarkable and his cure of cancer is most miraculous. He guarantees to perform all he advertises, and just as he advertises to do, and will, for the first 10 days, make no charges until cured, except for medicine. The Doctor will remain here for 30 days. If you have Cancer or any chronic disease call at once and be cured while your case is in a curable stage, as delays are dangerous.

Dr. Letrobe's office is at Coddington's Hotel, Oakland, Md.

Conference Appointments.

Following are the appointments for Oakland district, made by the W. Va., Conference of the M. E. Church, for the ensuing conference year:

P. E., C. H. Lakin.
Albrightsville—D. H. Friend.
Brandonville—L. W. Roberts.
Cranesville—D. B. Orr.
Deer Park—J. W. Bedford.
Evansville—N. L. Baumgardner.
Grantsville—S. P. Archer.
Newberg—B. B. Evans.
Oakland—J. Engle.
Pleasant Grove—J. B. Kurtz.
Randolph Mission—Hanson Ward.
Rowlesburg—A. D. Perry.
Selbysport and Johnstown—A. S. Arnett.
St. George and Aurora—W. P. Weekley.
Hamilton—W. Burton.

Accident.

Rain.

The next in order—snow.

Dr. Wm. K. Butler, of Washington, D. C., is visiting Dr. Glotfelty. Dr. Butler is a practicing physician in Washington, and comes to the mountains for recuperation.

A very distressing accident occured last week near here. A little child nine months old was accidently shot and instantly killed by his brother only nine years old. The rifle had no cap on and was not known to be loaded. G. D. caps had been used and enough composition remained to ignite the powder no doubt.

Mrs. George Dietrick aged 63 died and was buried in the English grave yard last week. Mrs. Dietrick was formerly the wife of Simeon Knox, and was a daughter of Willian Wiland.

Mrs. John Frantz, well known in this community, died at the residence of her son-in-law, Adrian Glotfelty, above Oakland, and was buried at Bear Creek, on Sabbath, 4th inst.

Mr. Abraham Turney hus brought to our office several large turnips one of which weighed six pounds.

Mr. Henry Feik has on exhibition at J. E. Gnagey's a pumpkin weighing 41 pounds. Mr. Feik also has raised the largest potatoes we have ever seen. One potato of the White Star variety weighed 1 pound and 6 ounces, being large, white and smooth. His Chili's are immense.

Mr. Feik raised his potatoes, 75 bushels, from ½ acre on sod land, manured on the sod and top dressed with lime. The harrow was run over the potatoes when coming out of the ground and again when about six inches high.

There are many ways of doing good *silently*, and we are teaching all the time, perhaps unconsciously for good or evil. Don't let us forget this fact.

Mr. John Beechy this year raised on Rev. Josiah Beeghley's farm, 750 shocks of corn, which at a low estimate will make twelve hundred bushels of corn in the ear.

E. H. G.

Prohibition in Allegany.

Twenty-three delegates in pursuance of a call from the State Central Committee of Prohibitionists of Allegany county, met at Good Templars' Hall, in Cumberland Saturday last to nominate a ticket for county officers and the legislature. The convention was called to order by O. H. Bruce, in the absence of Capt. H. H. Hartsock, chairman of the committee. Roland Dayton, of Rawling's, was selected as chairman, and James Hitechew, of Cumberland, secretary.

The following ticket was selected:

For Sheriff—Capt. H. H. Hartsock, of Cumberland.

For House of Delegates—Elisha C. Kerns, of Westernport; Alexander M. Adams and J. H. J. House, of Cumberland, and Charles Conner, of Frostburg.

For County Commissioners—Geo. W. Spangler, of Westernport; Josiah Eyler, of Oldtown; Rev. Isaac Thomas and Charles Weiskettle, of Cumberland, and James Banatyne, of Frostburg.

For Clerk of the Circuit Court—W. L. Morgan, of Cumberland.

O. H. Bruce was nominated for senator, but most emphatically declined.

The executive committee was then chosen as fellows: A. M. Adams, O. H. Bruce, Lincoln Porter, John Wilson and J. M. Hitechew, who were instructed to nominate a candidate for the Senate.

The Secretary of the Allegany County Temperance Alliance, who mailed to the legislative candidates on the Republican and Democratic tickets certain questions asking whether, if elected, they will vote for local option and prohibition legislation, has as yet received no reply from any of the candidates, several of whom, it is said, intend to take no notice of the circular, but to treat it with silent contempt.

Real Estate Transfers.

The following is a list of real estate transfers filed for record in the office of W. H. Tower, Clerk of the Circuit Court for Garrett county, for the month of September:

John J. Ringer and wife to George D. Frantz, 2 acres, 3 roods and 22 perches of land; $28.87.

Geo. M. L. Serpell to J. R. Serpell, part of "William and Mary," one piece containing 10 acres and 80 ps. and a piece containing 5 acres and 148 ps., being part of military lots Nos. 1381 and 1374; $350.

Jos. R. Anderson and wife to Amos Broadwater, Sr., 13 acres and 90 ps. of a tract called "Cheviot Dale;" $82.

Richard Glover to Margaret Glover 25 acres of military lot No. 2977, and about 2 or 3 acres of lot No. 2979, and being part of a tract of "The Rose has Bloomed; $60.

L. M. Albright and wife to Wm. Ryland, 80 ps. of military lot No. 3282; $500.

Thos. W. Ashby and wife to Hannah E. Shaffer, 30 acres of a tract of land called "Maryland;" $50.

Edward L. Dorsey to Jesse H. Dorsey, his interest in lot No. 4, in "Brant's Addition to town of Oakland;" $100.

Jesse H. Dorsey, et al to Samuel W. Smith, lot No. 4, in "Brant's Addition to Oakland; $206.

Joseph Green and others to Aaron Trent, part of lots Nos. 3 and 4 of the subdivisions of Johnsons part of addition to "Eden's Paradise Regained;" $325.

John F. Robeson and wife to John Wilhelm, part of a tract called "Pathway," containing 7¼ acres; $47.25.

Ezra Savage and wife to L. Deterick, 5 acres of a tract called "Utica;" $25.

Ezra Savage and wife to Taylor Friend, 7 acres and 140 ps of land; $39.37.

Samuel M. Fike and wife to Wm. M. Fike, one acre of military lot No. 2998; $6.

Joseph P. Lewis and wife to Israel M. Frankhouser, 5 acres of land; $1 and other considerations.

Israel M. Frankhouser to Joseph P. Lewis, 5 acres of a tract of land called "Tudor;" $1 and other considerations.

Elizabeth Miller to Samuel J. Miller and others, her dower interest in a tract called "Hard Struggle," Mellinger house and 10 acres, and 2 other lots in Grantsville; $5.

Jos. R. Anderson and wife to Chas. T. West, part of a tract called "Latent Worth," containing 62 acres and 38 ps., and one piece of same tract containing ¼ acre; $350.

SELBYSPORT, MD, Oct. 7th, 1885.

ED. REPUBLICAN:—It has been circulated through the District that I am to be appointed to an office if W. W. Frazee is elected commissioner, simply because I have been working for his election; but not more for his than the whole ticket. Now, as a favor, I will ask you to say to those parties through the REPUBLICAN, that I do not ask any office in the gift of the commissioners, and further, that I never mentioned such a thing to Mr. Frazee, knowing him to be a man that makes no such promises. You will very much oblige me if you will do as above requested.

Yours, &c.,
ED. J. STUCK.

New Store, New Goods, New Terms, New Prices!

John Shartzer has just returned from the east with a full line of dry-goods, notions, ready-made clothing, boots and shoes, &c., which will be sold at the lowest cash prices.

National Road Recollections.

MR. EDITOR:—It has always been a maxim with me that every capable person owes something to history, and should make his contribution in due season. Historic germs or material precedes history itself, just as the seed does its product, and they should be utilized while yet serviceable and attainable. The octogenarian with his store of practical knowledge of facts dies, and the whole is lost to usefulness—a loss often greater than if the whole edition of some of our modern books were given to the flames. So we have from time to time in a feeble manner been endeavoring to discharge this obligation on our part by rescuing and recording yet living facts for the coming historian.

Considerable has already been written and published in regard to the Old National Road, but there is a feature of it that yet remains untouched; the hotel, or public inns, legally known as Ordinaries. The subject of this article will be the hotels and their proprietors in by-gone times in Garrett county.

In the flush times of this now deceased thoroughfare, there was upon an average about one of these useful institutions to each mile. They were in most cases, especially in early times, plain buildings of logs or frame work, with annexes from time to time as circumstances would authorize; however, there were some brick and stone edifices among them, notibly at Grantsville and Little Meadows. In busy seasons even these numerous Inns were insufficient to comfortably accommodate the immense "travel" on the road. Many a way-farer had to submit to pretty hard lodging; but always plenty to eat. The chambers in these buildings were neither large or numerous, with but little furnishing, always a good clean bed, however, sometimes with posts or spars mounting to the ceiling, with covering to suit temperature though it should be largely below zero, as very often it was. The table (not a lot of little desks as now dot the modern dining room) usually extended from one end of the room to the other, mostly loaded with good wholesome, well cooked edibles, fit for statesman or Prince. All the edibles were placed upon the table, which was generally so crowded as to not leave room enough for a napkin, but there were none in those days. The guests were summoned to their meals by the ring of a bell which would electrify all concerned, and who would respond in a manner according to their breeding and education. The hotels, especially the stage houses, furnished most excellent meals. Mountain provisions were plenty, cheap, and the very best. The mutton cannot be equaled by any other climate, and in those days venison and other game meat, such as wild turkey, pheasant, &c., were abundant, and easily obtained, with brook trout at about the price of beefsteak; just think of such an array of luxuries before promiscuous travelers, but of course this was not the general rule.

In the front part of the hotel was always found the *bar-room*, which formed a lobby for the guests and the public generally. Here in a corner was the bar itself, not for lawyers *especially*, but for the thirsty generally The bottles were numerous and sometimes grotesque in shape, but the varieties of the liquors not so manifold—the taste generally much the same. One remarkably candid proproietor had a habit of asking the applicant what his beverage would be, but always answered his own question by saying he had nothing but whiskey. Sometimes a little cheap brandy and gin would be found in a secret part of the lock-up. Once a prominent U. S. officer who had seen service in the Florida war called for brandy, which happened to be on hand. It was pronounced to be good by the partaker; the quiet old landlord replied yes, it ought, for it cost 75 cents per gallon. Common whiskey cost from 18 to 25 cents per gallon, and was doled out at 3 and 5 cents per drink. It was mostly made of corn, and generally hard stuff, and had many hard names, such as rot-gut, Perry grove, &c. It was drunk freely and almost by everybody, and strange to say, its effects were not so pernicious as now from liquor ten times as costly. None of these inkeepers were or could be tetotlers (one, however, was in the habit of declaring he had not taken a drink for 40 years, but really sometimes not so many minutes.) They had to treat and be treated, and were a generous set of fellows. Handled a great deal of money, but as a rule did not get rich.

The landlady, as the proprietors wife was styled, if clever in her ways, was an important and helpful factor about the establishment. She certainly could do much to cause the stranger to feel he had a temporary home when away from his own. But some of them were as robust in manner as their spouses, the garb had to be appealed to show the real authority.

The hotel business, like all others, had its grades and specialities. Those who were fortunate enough to secure the patronage of the great stage lines were the upper crust, and did not care for other custom except the more genteel kind. Then there were the wagon stands pretty much monopolized by the men who drove the great Connestoga wagons with their six powerful horses. As a class they were pretty rough, some very much so. Some were well to-do farmers; a good deal more civil at home than abroad. Most of them terribly profane and boisterous, and could almost annihilate each other with threats and gesticulations. Old Wilse Clemmet and Henry Poffenberger, when in good condition were better than Barnums sideshow, if not the show itself. The wagoners who made a trip or two during the season, and there were many such, were called "Sharp shooters;" shysesters, as lawyers of ill repute are called, and how they were hated and dispised by the regulars. The contempt of a regular army officer for a volunteer is not a just comparison. They always carried their own beds in a roll like a bundle of carpet. The bar-room floor was their sleeping place, which was often packed with them like cobble stones in a street, and woe to the person who happened to invade their lair. Then there were the droyers' taverns, preempted by the cowboys and pigpelters, who were generally noisy and loud-mouthed, but manageable as they were in the most boys. Hotel rates were moderate, and by no means uniform. Stage passengers, who always received the best, were invariably charged 50 cents per meal. The morning receipts of some of these hotels would be quite large in a currency that would shock business people now. Spanish-Mexican dollars, quarters, *levies* and *fips* by the fist full. The paper money hardly deserved the name—really a majority of it was rank counterfeit, broken banks, or under par notes. Counterfeit notes were passed by these innocent receivers until they became the acquaintance of everybody, then somebody would be the loser.

The travel and traffic on the National Road was immense up to about 1850, when they were diverted by a railroad on either side and the consumption of grain, provender and food products also large, consequently an excellent market at all times for the producers of these commodities, who were prosperous, industrious and contented. There were never a happier people than those who lived on and along this road. But a wail went up when the cruel railroad innovation came. Ruin and starvation were in plain view of inexperienced and narrow minds. The engineers who were scouting on either flank for locations for the two great trans-Allegany trunk roads, were hated as savages with "paint and knife," and lo, the change came in due time, and without harm, but general good. True, we sometimes sigh for a return of those "good old times," but really would we exchange what we enjoy for those extincts, though they are scented with precious recollections of a happy past.

The next communication will be devoted to particular hotels, and individual proprietors.

REMINISCENCE.

Grantsville, Md., Oct 5, 1885.

Marriage Licenses.

Marriage Licenses were granted to the following parties during the month of September:

Jehu Paugh and Clarissa R. Demmitt.
John C. Hunter and Golda C. Wilt.
James F. Broadwater and Arminta Stanton.
Christian P. Miller, and Lulia A. Bittinger.
Wm. H. Newman and Lizzie A. Mason.
Christopher S. Funk and Maggie M. White.
Benj. F. Michaels and Ella E. Michael.
C. H. White and Carrie C. Chaney.
John B. Cormany and Jane S. Elsey.
W. G. Gregg and Amanda Davis.
James W. Uphold and Mary E. Turney.
John F. Satke and Mary E. Groves.
Pliny D. Foreman and Viola Kelly
David Albright and Isouri Frankhouser.
Jesse L. Jones and Mary L. Howard.
Elmore M. Tice and Mary E. McRobie.
John W. Orr and Ann Anderson.

Davis, W. Va.

A party of B. & O. photographers arrived here Friday for the purpose of taking views of the Blackwater Falls, the old Dobbin house, Point Lookout and other places of note.

Workmen are now engaged cleaning off ground for the erection of a hotel for the accommedation of city guests and sportsmen. It will be finished early next spring.

Snow, rain and hail fell here Sunday, the 4th, and Tuesday, the 6th insts.

F. S. Landstreet has been appointed postmaster at this place.

Eight car loads of cattle were shipped from this place Saturday.

It is not definitely settled whether the Messrs. Ladeau will locate their tannery here or not. The prospect is fair. The firm employs about two hundred men.

Mrs. Jos. Shillingberg is erecting a store house here.

The J. L. Rembarger Lumbering Company will have their dam completed shortly. They are also getting ready to put in a large saw mill early next spring.

Hon. S. B. Elkins and Col. T. B. Davis arrived here Saturday night in a special train, and remained until Saturday evening.

Mr. M. E. Howe will soon have saw mills in operation at Thomas, Fairfax and Hamilton.

Several deer have been killed here lately.

Mr. and Mrs. McCandlish, of Piedmont, were guests here Saturday and Sunday.

Mountain Lake Park.

I am glad to state that our Depot will be kept open all winter, and that Mr. A. R. Sperry is our agent. He will keep the postoffice in the Depot also.

Mr. D. C. List has just had his large cottage handsomely painted.

The probabilities are that we will have a public school here this winter.

There was a full board of Directors here to-day (Tuesday).

J. A. E.

A Severe Winter Predicted.

Persons who base their weather predictions on signs terrestrial rather than celestial, are unanimous in the opinion that we are to have a severe winter. All who have been close observers of weather signs for a number of years, find them more reliable than any other kind of meteorological prognostications. Three signs have been observed thus far this season by the weather-wise which convince them that the winter will be both early and cold. The first is the extreme thickness of the coverings of hulls of hickorynuts, walnuts, etc. This is an old sign well known to the country people, and seldom fails. The next is the unusual thickness of the corn husks. This has been remarked by many in all parts of the country. Whenever this is the case, unusually cold weather is almost a certainty. The husks are thicker this year than 1857 and 1858, when the winter was exceptionally cold. The third sign noticed is the early departure of the black birds for Southern latitudes. Three weeks ago they were very plentiful in the woods and fields, but now they are all gone. People who have observed the movements of these birds know they are prone to linger among us as long as there is a prospect for good weather, generally taking their leave late in September or early in October. Their fight at least a month earlier than usual is unexplainable, except upon an early winter.

Magistrate's Jurisdiction.

FREDERICK, MD., Sept. 28.—The decision of the court rendered on Saturday in the case of Magistrate Tyler vs. the County Commissioners settles some very important points. Among the items of the bill which he sued to recover were charges for sitting in the cases of vagrancy. The court sustained the refusal of the commissioners to pay the charges. According to the decssion, justices of the peace are entitled to recover fees for ministerial services such as issuing writs and making out commitments provided for under the code, but that vagrancy is an offence over which they have no jurisdiction and cannot accordingly collect for sitting in such cases.

Figures are wonderful things. Here is a sample of what can be done with them: By placing one grain of corn on the first square of a chess board, doubling the number of grains for each succeeding square, the quantity of corn required for the whole board of sixty-four squares would fill 1,844, 375 barns, each holding 1,000,000 bushels of 100,000 grains each. If the United States grows 1,800,000,000 bushels each year, it would require a little over 550 years to make enough.

NEW ADVERTISEMENTS.

FOR SALE!
A 152 ACRE FARM.

The undersigned offers for sale a small farm, on the waters of Lead Mine Run, Tucker county, W. Va. This property is known as the "Hershiln Place," and adjoins lands of the widow Schrader and others. There are 152 acres in the tract, about 50 of which are cleared, the balance is well timbered.

For terms, &c., apply to or address

G. P. KING,
9 26 3t Austen Mines, W. Va.

FOR RENT!

50 acres desirable land, fenced; easily cultivated, on Pond Run, 2½ miles Northeast of Deer Park, between the farms of Ramsey Browning and L. A. Stemple.

Apply to

EDWARD A. OSSE.
37 N. Calvert St., Baltimore, Md.
